SOIL FOR STRAWBERRY

One of First Requisites of Ripening Fruit Is Moisture.

Stiff Clay Is to Be Avoided Because It Cannot Be Worked Early in Season Without Becoming Cloddy and Is Apt to Bake.

(By J. A. BAUER.)

The soil and location best adapted to strawberry culture will vary somewhat in different sections. In a general way we have said that any soil that would grow good crops of corn or potatoes would grow good strawberries, and while this seems to be a pretty safe rule, it is also true that in order to grow them to the best advantage it is necessary to have the soil especially adapted. One of the first requisites of the ripening fruit is moisture, and care should be taken that this is provided. Hence a very dry or loose, sandy soil would not be a safe location, although in moist seasons a fair crop might be harvested. Neither is a stiff clay adapted to strawberry growth, as very early in

Perfect or Staminate. Improper or Pistillate.

season it cannot be worked, without becoming cloddy, and late is apt to bake, and the plants will suffer more than on sandy soil. It would seem that a sandy loam or loam with slight mixture of clay should, if properly handled, give the best results.

Having chosen a soil, drainage of moisture is next becomes necessary to prepare for proper drainage in case of excessive rainfall, unless the natural lay of the land is such that no water will stand upon the surface. Tile drains are the only practical ones to use. Open ditches will, perhaps, answer this purpose, but are unsatisfactory in many ways.

In planning your strawberry field care should be taken to avoid frosty locations, such as very low land near marshes or lakes, also valleys where there is no chance for circulation of air, as these localities are very liable to heavy frosts, when higher land or that more open to circulation would show little, if any. A hard frost at blossoming time often ruins the entire crop.

The best land one can use is a level, or after plowing, fertile with a mixture of three pounds of nitrogen, seven pounds of phosphoric acid and nine pounds of potash, using about eight hundred pounds to the acre.

After about two or three crops the land should be plowed up and after one or two crops rested.

Just to find out what varieties of strawberries are best adapted to one's particular soil or climate, it is well to

Proper and Improper Method of Setting Strawberries—Plant at Top, Properly Sets at Left, Too Deep; at Right, Too Shallow.

visit neighboring farmers of that locality, and determine by their experience; or, a limited number of plants can be tried. Setting poor plants will often bring failure. It should be a rule never to purchase any but strong, hardy, vigorous plants.

On an acre of rich, cultivated land, a crop of strawberries can be produced at the rate of 200 bushels to the acre.

CLEAN AND STORE PLANTERS

Implements Should Be Put Away Carefully for Another Year—Keep in Good Condition.

As soon as the farmer has finished using the plants for this year, they should be cleaned and put away carefully, so that they will be in good condition for another year. Often by carelessly allowing planters to lay around uncleaned for one year, he has a new one the following season, or at least a hunt for lost parts. Every plate and other part of the planter should be stored carefully away, and the planter left ready for use another year. Prices of machinery are advancing as well as prices of foodstuffs, and there is no reason why the farmer should not have a good care of all implements on the farm.

CABBAGE IS EASY TO RAISE

Plant Not Particular About Soil and Often Thrives on Soil Not Adapted to Other Crops.

Cabbage is not very particular about the soil in which it will grow. It can be grown on land not suited to other crops. The leaves make a good cover for the soil and the plant is easy to grow. It is a good crop for the farmer to raise.

SILG QUALIFICATIONS.

It should be all-right, to keep the air out and the juices in. It should be smooth, to permit the silage to settle without leaving air spaces along the wall. It should be constructed of durable material which will not decay or blow down.

The diameter should be such that from two to three inches of silage will be fed off each day. There is an advantage in the tall silo, because the silage at the bottom is compressed by the weight of that above.

It should be so built that it can withstand the bursting pressure of the silage. The weight of silage differs from year to year, according to the amount of moisture in the silage.

MOST NUTRITIOUS OF FOODS

Sweet Corn Is More Easily Dried Than Almost Any Other Vegetable—Plant Good Supply.

(By R. W. THATCHER, Minnesota Experiment Station.)

Dried sweet corn is one of the most nutritious foods. Sweet corn is more easily dried than almost any other garden vegetable. For these reasons very large amounts of sweet corn should be dried this summer for use next winter. It can be planted on small tracts or in large fields and is one of the most easily cultivated garden crops.

For table use, small lots of quick-maturing varieties like the Early Golden Bantam should be planted; but for drying for a winter use the larger and heavier yielding sorts, as Country Gentleman and Stowell's Evergreen, should be used.

Let everyone who has a garden or field available plant plenty of sweet corn to give a summer supply and a large excess to be dried for winter use.

ENTRANCE IS CATTLE-PROOF

Posts Arranged in Such Manner as to Admit Person, but Always Closed to Animals.

To make a gate that a person can enter but cattle cannot go through, set one post in each direction about eight inches apart, or so you can go through with ease, says a Minnesota writer in The Farmer. In a fence running east and west, place one post on

Cattle-Proof Gate.

the west, one on the north, one on the east, and one on the south. Nail the rails on the two posts east and west, and you will have an entrance that is always open for a person, but closed to a cow. Put one of these gates in your cowyard fence where you enter often.

FEEDING FARM WORK HORSES

Farmers Are Urged to Utilize Home-Grown Feeds to Full Extent—Grain Is Essential.

In feeding horses utilize home-grown feeds to the fullest extent. In a section where corn can be well matured, this grain ought to constitute the greater portion of the concentrated feed for work horses.

Corn alone can be used as a grain feed for work horses if a good quality of clover or timothy hay is fed for roughage. When combined with mixed hay or timothy hay, a grain combination of three parts corn and one part oats by weight is a satisfactory mixture.

If oats are scarce and high in price, substituted for the protein furnished by the oats. One-third to one-half pound of linseed meal will, with the amount secured through mixed hay, furnish sufficient protein for a 1,500-pound working horse.

A horse at farm work requires from 14 to 16 pounds of grain per 100 pounds live weight daily. Feed grain sufficient to keep the horse in good working condition. Hay may be limited to the standard of a pound of hay to 100 pounds live weight daily. Reduce the grain one-half on days when the horse is idle to avoid prostrata.

IDEAL PLACE FOR CHICKENS

Fowls and Chicks Should Be Allowed to Run in Corn When It Is High Enough for Shade.

Let the fowls and chicks run in the cornfield after the corn is high enough to furnish shade, and they will have a comfortable place to spend the hot days and will pick up many bugs and worms which might otherwise injure the corn.

SWISS CHARD FOR CHICKENS

Leaves Make Best of Green Food for Fowls, and Many Raise It Especially for That Purpose.

Swiss chard is fine if not allowed to run to seed. It should be kept picked and used. The leaves make a good cover for the soil and the plant is easy to grow. It is a good crop for the farmer to raise.

COULD HARDLY

STAND ALONE

Terrible Suffering From Headache,

Sideache, Backache, and Weak-

ness, Relieved by Cardui.

Says This Texas Lady.

Gonzales, Tex.—Mrs. Minnie Phil-

pot, of this place, writes: "Five years

ago I was taken with a pain in my

left side. It was right under my

left rib. It would commence with an

aching and extend up into my back

By that time the pain would be so

severe I would have to take to bed,

and suffered usually about three days

...I suffered this way for three years,

and got to be a mere skeleton and was

so weak I could hardly stand alone.

Was not able to go anywhere and had

to let my house work go. I suffered

awful with a pain in my back and I

had the headache all the time. I just

was unable to do a thing. My life

was a misery, my stomach got in a

terrible condition, caused from taking

so much medicine. I suffered so much

pain. I had just about given up all

hopes of my getting anything to help

me.

One day a Birthday Almanac was

thrown in my yard. After reading

its testimonials I decided to try Car-

diui, and am so thankful that I did,

for I began to improve when on the

second bottle...I am now a well

woman and feeling fine and the cure

has been permanent. If it has been

so good for me, why not for you? Get

your Cardui today.

Burlington, Ky.

Local Happenings.

Not many automobiles are coming to Burlington these days.

You will be at the Harvest Home next Saturday, will you not?

Monday morning had very much of a fall appearance and feeling.

The local telephone system was demoralized considerably by the storm last Friday night.

The corn crop has been damaged immensely by wind and rain in this part of the county the past week.

Rock is stacked up in Woolper creek below each of the covered bridges stood in piles of hundreds of patches.

Judge Gaines is holding circuit court in Owenton, Owen county. The business will require a two weeks term.

Many Burlington people visited Limaburg early last Saturday morning to view the destruction wrought there Friday night.

The mail reached Burlington on time last Saturday morning, it being transferred to John C. White's automobile at Limaburg.

Al Rogers has recently completed a \$1,700 barn on his farm just below McVine. It is an up-to-date building in every particular.

At one time Friday night W. F. Grant, who resides near Gunpowder church thought the building would surely be swept away by the creek.

Kentucky will get from the government \$200,000 good road fund. Boone county could use a considerable slice of it just now to a good advantage.

During the storm, last Friday night, lightning killed seven \$15-a-head black faced sheep for Mrs. Eliza Walton, who lives out on the Bellevue pike.

It is said that the boys who are sent from Boone, Kenton, Pendleton, Campbell, Grant, Carroll, Owen and Gallatin counties are being placed in the artillery.

A gang of wild ducks passed over Burlington early in the evening last Friday, going south. This is a sign of cold weather and the people of the oldest generation now in existence.

Daniel Slayback, Alfred Stanley Cason and Luther Green Surface are the three Boone county boys whom the draft board sent to the cantonment at Louisville, last Friday. It will not be many days before a considerable number will follow them.

Fred Louen, who has the contract for reconstructing the Buellville and Dry Creek turnpikes, will turn his attention to repairing the bridges and culverts on that road that were damaged last Friday night and will have them in shape by next week.

The trucks did not lose a trip to the city on account of the loss of the bridge at Limaburg.

Now plenty of rye to have ground next year for your hogs. It is said to be the finest foot known for young hogs.

Walter Hafer, of Hebron, has bought of W. L. Kirkpatrick, local agent, a five passenger Maxwell automobile. The machine has been delivered.

The work of reconstructing the Lexington pike in this county was suspended several days last week because of not having the stone to use. The stone is shipped from High Bridge.

Richard Stephens, of East Bend, moved his wife and son, Benjamin, back to Burlington, last Saturday in order that Ben, may continue his course at the Boone County High School which began last Monday.

The county screener that is used in connection with the stone crusher was only saved by being lodged against a tree and the crusher. It was damaged considerably. The outfit was near the first covered bridge out on the Petersburg pike where it was in use.

Conrad introduced his new mail auto to the public last Thursday evening, and it must be said that it is a commodious vehicle. It will accommodate sixteen passengers and has a separate department for the mail. It is a neat conveyance and will be appreciated by his increasing passenger trade. It is arranged for carrying packages on the hurricane deck.

W. M. Green, the Ripley merchant, attended the fair at Bellevue, last Friday, and made a friend of two very present and increased his popularity for people's esteem for a time captured the affection of a little folk by presenting each of them with a stick of peppermint candy and a package of chewing gum, and increased friendship on the part of the older element by his pleasant greetings.

Pearl Kite and Charles E. Miller have been held by the local draft board for service, and Harry Clay Howlett has been temporarily discharged on account of the physical disability of his father, R. L. Howlett.

The local draft board has been notified by the district board that it has exempted G. W. Tolin and Geo. Slayback, each, because of being married men, and Harold Garr because of being an agriculturalist.

State Superintendent V. O. Gilbert is writing county school authorities to make an effort to see that all dogs in their counties are listed for taxation, as the schools receive the balance remaining in the dog tax fund after depreciation among sheep are paid for. He also expects to have sheep claims put under surveillance, at a has happened in the past that in counties where not a sheep valued as over \$1 had been returned to the state, numbers of sheep have been lost.

Too Optimistic.

A lot of people think the Log Cabin war editor is entirely too optimistic about the ending of the European struggle, and a majority of alleged experts say the war will go on from three to five years more. No possible chance. Did you ever see a dozen college boys in a mile foot race? At the quarter they are just getting a good start, and are "going strong," at the half they have "just hit their stride," and are running bunched; at the three-quarters they have "got their second wind," and their admires in the grand stand say the athletes "look like they could keep it up forever." But they can't! At the home stretch the fellows in the lead begin to stagger and fall, gasping for breath and never reach the wire, while the lad who has been "taking the dust" nearly all the way steps out and wins. Germany and Austria have passed the three-quarter pole looking like they could keep it up forever—but they can't! Austria is already wobbling badly and Germany is getting dizzy but it putting forth every ounce of her strength. The home stretch has been reached and in a rather short time the Allies are going first under the wire. Germany and Austria are about all in, and it will not take a year to put them on the ground. Our guess is that the boys now being drafted will never see a battle and we still have hope of getting the boys out of the trenches before Easter. Just paste this in your hat.—Cynthia's Log Cabin.

GRANGE HALL.

James Arrsmith and wife spent Saturday in the city. Miss Maud Beemon spent last week with Miss Una Adams. Linnie Love and wife are the proud parents of a fine boy. A number of our people attended the association at Bellevue last week. Cecil Preaser spent last Saturday and Sunday at Stanley Ryle's in East Bend. Miss O. Belle Rouse visited her uncle John Conrad last week and attended the Institute. Mrs. Alice Neal has returned to her home in Chattanooga after a pleasant visit with relatives here. Miss Alline and Neal Clementa spent Saturday night and Sunday with their grandparents, P. P. Neal and wife.

Some of the creek bottoms that were growing tobacco and corn have a crop of pumpkins, milk cans, fence rails and other articles, too numerous to mention, ready to be moved.

Leslie McMullen is subbing for Elmer Stephens, carrier on R. D. 3, who is sick.

LANDS POSTED.

Notice is hereby given that our lands are posted against trespass of any and all kinds, and hunters and trappers are forbidden to go thereon. JULIA S. DINSMORE, MRS. E. L. GRANT, R. O. HULL.

FIFTY MORE CALLED

To Appear Before Local Draft Board at Burlington Next Tuesday.

The following named persons, drafted, have been called to appear before the local draft board in Burlington, on the 18th inst., to be examined for military service.

- 416 Archie Lloyd Northcutt.
- 617 David Franklin Utz.
- 526 Geo. Sleet, (Colored)
- 609 Wm. Frances Tupperman.
- 613 John Oliver Taylor.
- 316 Harmon H. Jones.
- 274 Geo. E. Hughes.
- 546 Albert Lee Stephens.
- 511 William W. Rogers.
- 203 Chas. E. Farrell.
- 342 Wilbur D. Kelly.
- 460 John Ryan.
- 427 Clifford Pope.
- 666 Frank M. Walton.
- 241 Wm. H. Grimsley.
- 40 William L. Boyer.
- 572 Dudley Strader (Colored)
- 100 William Chapman.
- 157 Omer Dudgeon.
- 226 Wm. Calvin Green.
- 614 Manley P. Guley.
- 529 John E. Watters.
- 647 Christopher C. Wireman.
- 29 Claude M. Arrasmith.
- 533 Sug Sturgeon.
- 114 Edwin P. Carpenter.
- 151 Herman Caldwell.
- 61 Allen S. Burcham.
- 503 Robert A. Thompson.
- 518 Edward W. Utz.
- 209 Thos. J. Garrison.
- 33 Ernest Monroe Arnold.
- 32 Sidney H. Ambrose.
- 63 Earl Beach.
- 362 Linnie Braxton Love.
- 371 Harvey Eads Mitchell.
- 529 Charlie Sturgeon.
- 64 James Brewster.
- 32 John H. Mason.
- 224 Chester Grant.
- 449 C. Milton Richey.
- 41 Amos Bradford.
- 43 Thomas F. Black.
- 38 Albert R. Blackburn.
- 640 Robert R. Witham.
- 127 James Elbert Clore.
- 588 Melvin L. Wason.
- 88 Lewis E. Bresh.
- 473 Wilbur P. Rice.
- 287 James Smith Head.

The New Tax Law Discussed

The following discussion of the new tax law and the way in which it will affect local citizens is by the Harrodsburg Herald:

While the terms of the new law have been fairly well understood by those interested in the subject, the publication of these assessment lists has been awaited with the keenest interest of property owners in all parts of Kentucky, as the majority of people who pay taxes desire to learn for themselves the meaning of the law by studying the assessment schedules. It was announced some time ago by Chairman Logan of the State Tax Board, that these assessment lists would be the best guide for an understanding of the law.

The most noteworthy fact in the new tax law, as brought out in the assessment lists and the portions of the law quoted, is the heavy penalty provided for failure to report property for assessment. Before the new tax law was passed a man or a woman who failed to report the ownership of bonds or stocks in outside corporation of notes of bank was in danger at some time or other of being sued for back taxes, when the full amount of the tax could be collected, with six per cent interest. All this is changed in the new law, and a penalty of 100 per cent of the face of the tax bill is imposed for failure to report, and penalties with interest may be collected as far back as ten years. Because of this heavy penalty and the rigorous powers given the county and State assessing boards, the State officials believe that many millions of dollars of property will be unsearched for taxation upon which little, if any taxes have been paid in the past.

Another point of much importance in a proper understanding of the law is brought out in these official assessments, namely, that the general property tax remains for the purpose of State taxation, and is only abolished for local and municipal taxation. Everybody must pay taxes on everything they have to the State, except as under the old general property tax system. The only change is that bonds, stocks in foreign corporations, accounts due notes representing money loaned on mortgages, etc., are hereafter pay taxes only to the State; these items of property, together with a certain amount of machinery, manufactory, and exempt from county and city taxation, and only pay taxes to the State.

A music box has been invented for autos that, when the music is played, the car will move forward.

ments are of course, included in the general property schedule, but the exhaustiveness of the schedule on this subject indicates that real property will probably bear a higher tax next year. Owners of farm lands will be required to fill in a long schedule showing how many acres are under cultivation, how many acres are in timber, how many acres are underlaid with masonry, how close the land is located to railroads and public turnpikes, and complete information about all farm buildings.

The inquiries into the live stock of farmers are equally as exhaustive. The farmer will be required to fill up schedules showing exactly how many horses, cows and mules he owns, together with information as to their breeding and value. This is not half however. There are separate places of the lists to show how many goats, hogs, chickens, turkeys, geese, ducks.

He will also have to include in the lists, agricultural implements even down to "saws, axes, hatchets and hammers," agricultural products raised last year in hands of producer; motor vehicles, carriages and bicycles; coal and provisions on hand; musical instruments; paintings and pictures; li-braries; jewelry; household and kitchen furniture; gold, silver and plated ware; dogs over four months old; patent rights, copyrights and trademarks; annuities and royalties; building and other materials and a large variety of miscellany, such as guns, pistols, clocks, trunks, sewing machines, wearing apparel, etc.

The residents of cities, towns and villages must make returns equally minute. Each lawyer must report the number of law books in his library, and also the amount of money owing to him in fees. Each doctor must return the number of books in his medical library and the amount owing to him by patients. All citizens must report the number of books in their private libraries, number of chairs, desks and tables.

The State also wants to know as shown by these schedules, how many bushels of corn, wheat, rye, oats, buckwheat, etc., were on hand when the list is filed, and also how many gallons of molasses, bushels of potatoes, onions, carrots, beans, etc., that may be held for individual use or for sale as of September 1.

In the general property schedule are also exhaustive lists for merchants to show the value of their stock.

Intangible personal property is taxed for State purposes only at 40 cents on the \$100. The schedule for this class of property includes among other things; par value of bonds, actual value of bonds, face and actual value of unsecured notes, face value and actual value of notes secured by mortgages or other liens which mature within five years; par and actual value of all shares of stock in any corporation, association or joint stock company except building and loan associations, not paid on by the company or association cash value of certificates, or contracts in such companies or associations; face and actual value of accounts owing for legal medical, dental or professional services; face and actual value of accounts for money loaned, or goods, wares or merchandise purchased; amount owing for wages, salary earned, annuities, royalties open accounts, money on deposit, checks or money orders; face value of all court judgments or oral loans, or monies invested in or on shares of stocks.

The law provides for an exemption of \$250 for a household, but this household's family is not exempt. For instance, parents, as householders, might claim exemption on their \$250 worth of household goods, but their daughter, possessing a piano, a diamond ring, a library, a piece of costly statuary would be compelled under the law to give in such property as her individual holding.

A CARD.

Petersburg, Ky., Sept. 11, 1917. We desire to answer in this way the question as to the future of the firm of E. T. Krutz & Sons, since the death of our senior member, Mr. E. T. Krutz. My brother-in-law, Forest E. Krutz and myself will continue the business under the old firm name, and trust to merit a continuance of your liberal patronage and good will. All those indebted to the old firm will kindly come forward and arrange settlement at their earliest convenience.

EVERETT L. HELMS.

Last Friday John C. White, carpenter, of Richmond, sends the following list of premiums he took on his Holstein cattle at the Petersburg fair: Bull one and under two, first and second; cow two and over, first; heifer under one year old, first and second; heifer, one and under two, first; heifer, first; making five first and two second premiums captured.

Renewing his subscription, Thos. Carpenter, of Richmond, sends the following list of premiums he took on his Holstein cattle at the Petersburg fair: Bull one and under two, first and second; cow two and over, first; heifer under one year old, first and second; heifer, one and under two, first; heifer, first; making five first and two second premiums captured.

A music box has been invented for autos that, when the music is played, the car will move forward.

MAXWELL

Most Miles per Gallon Most Miles on Tires

Banker—professional man—contractor—farmer—or wage earner,

—whatever your business may be, a motor car will save time for you and increase your efficiency.

And we recommend the Maxwell to you as the most economical car on the market today.

Thousands of Maxwell owners operate their cars at a cost of \$6 to \$8 a month.

The Maxwell retains its efficiency for years and has a high second-hand value.

The Maxwell is a genuine business asset for any man.

Touring Car \$745
Roadster \$745; Coupé \$1095
Berline \$1095; Sedan \$1095
All prices f. o. b. Detroit

A BIG PICNIC

The last of the Season will be given at Harvest Home Grounds on the Afternoon of

Saturday, Sept. 22, '17

Come and Enjoy the Last Half Day's Outing of the Season.

The Music will be unsurpassed, the Refreshments Delightful and the Biggest Time Ever will be the Lot of those Who Attend.

The damaged approach to the bridge east of town has been repaired, and a road around the bridge site at Limburg has been made, making a fairly good crossing at that point. It is altogether probable that a bridge at Limburg and two bridges on the Petersburg pike will not be rebuilt and ready for travel before next spring.

Robert Foster and sister, Mrs. Housha of Madisonville, O., were visitors to Burlington, last Tuesday. Mr. Foster left the town about sixty years ago when he was very small and had never been back since. Tuesday he took a look at the building in which he was born and other places he had heard his people talk so much about that he almost recognized them.

Rev. Wm. Wood, who preached for the Methodist churches in the Petersburg circuit the past two years was returned to the churches in this county by the Methodist Conference held at Lexington, last week.

Three soldiers and two civilians jumped from an automobile late in the night at Scioto, as best they could, and were taken to the Scioto Hotel, where they were treated.

Chas. Fulton and wife and Mrs. Janie Coddell and daughter, of Lexington, were the first of the week.
H. F. Albright, of Walton, was at the funeral of the late Perkins, who died last week. He said it was a sad day for the family.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of September 13th, 1877

In the \$10,000 damage suit of E. J. Butts against Micajah Stephens the jury rendered a verdict for one cent.

Criminal court will be in session next week.

The laying of a new pavement in front of Mr. Rouse's store was begun Monday.

Henry Hoffman sold his farm to John L. Bruce for \$50 an acre.

Phil Watson, colored, who killed his wife in Covington by splitting her head open with a hatchet, was captured by Harry Ingram, toll-gate keeper on the Lexington pike near Walton.

Miss Nannie Hamilton has accepted a position as teacher in Georgetown Seminary.

The usual crowd following pay day on the Bellevue pike came off last Tuesday. Bruised heads, mashed noses and blacked eyes were numerous and sticking plaster was in demand.

G. M. Allen advertised 113 acre farm near Normansville for sale.

W. M. Conner advertised a sale of livestock for the 29th at his residence near Florence X-Roads.

Pecuniary Cost of Habits.

What will serve as a standard of measurement as the war's restrictions upon alcoholic beverages continue to operate is found in the remarkable report of the Commissioner of Internal Revenue for the fiscal year ending in June. This shows that distilled spirits increased in production 26,000,000 gallons over the preceding twelve months, the total amount being no less than 105,000,000 gallons in round numbers. Cigar consumption was about 90 per cent. the increase in numbers being nearly one billion. As for cigarettes the increase was 40 per cent. and over thirty billions were consumed. Tobacco prepared for chewing and for the pipe saw an increase of 28,000,000 lbs., the total amount burned and chewed at the shrine of Lady Nicotine being 43,000,000 pounds. Even snuff, which most people think has been discarded and out of fashion like candles and crinoline hoops, has made a new high level, the increase being 7,200,000 pounds. It is interesting to note that more than 35,000,000 pounds of the various liquors went into American nostrils to produce trillions of sneezes. Beer did not keep pace with the extraordinary stride of the other liquors, according to it was in 1914 that the barley brew saw its zenith when 65,000,000 barrels were pressed upon the market. Last year the amount was about five million barrels less. Still the taxes received were about the same. The revenue produced from alcoholic beverages and tobacco totals nearly \$100,000,000. When July, 1918, comes around it will be of consuming interest to compare the statistics of the Internal Revenue office with these just set forth and ascertain just what changes a great war produces in the habits of most men—and a large number of women.

The following persons in this county sent cattle to market Monday: John Bacheler; John Coad; James Ryle, 1; W. W. Kirkpatrick, 7; Thos. Hensley, 1; Clarence Saxon, 4; Bert Berkshire, 1; A. C. Porter, 3; James Mitchell, 1; Hubert Bacheler, 1; Elmer Kirkpatrick, 1; Forest Brady, 3; F. H. Rouse, 1; Martin Beemon, 2; W. H. Rouse, 1. These were all nice animals and were driven to market by way of Constance.

Master Commissioner Chas. Maurer was making a distribution of an estate, Monday in which there were numerous checks ranging from five to 11 cents. A large roll of checks which he had ready to mail did not represent to exceed five dollars.

NOTICE—Burlington town taxes are now due and if not paid by the first day of October next they become delinquent and a penalty of six per cent will be added thereto.

DUDLEY BLYTH, Town Marshal

Lewis Clore, of Locust Grove neighborhood, was an early caller at this office last Monday morning. He was pretty well chilled by his ride of five miles and expected to find the office stove on duty but it had not been touched off.

All day Saturday groups of people were on the streets of Burlington discussing the effects of the cloud burst of the night before.

Rev. David Blyth occupied the pulpit at the Baptist Church last Sunday morning, at the request of the pastor, Rev. DeMolloy.

First hat very comfortable last Monday, when the first touch of winter was present in this part of the country.

People are coming in every direction to see the new bridge, but the bridge is not yet open.

Dr. John C. Kilgour Dead.

He was buried at Harrison. He was 71 years old. He would have been 72 years old if he was living. His first wife said that he had been feeble for some time and later he had pneumonia for two days before he passed away. Second pneumonia was won by conquering him in his death. It is such strange on anybody to die in his bed. Dr. John C. Kilgour, of Harrison, of Francesville, was only the person who attended his funeral. He was born in our part of farm at Francesville, Mason county, Ky., on the 8th of November, 1845. He was a son of our late father John Ficklin Kilgour and a grandson of late Charles Kilgour. He and his wife both have had the same disease for two times each. He had it while his second wife passed away several years ago. He never had any children. His first wife was buried at Cynthia, Ky., and her maiden name was Maggie Hamilton. Our late father John C. to Cincinnati to study on medicines on West fourth street at the South House,opathic Institution. He belonged to the Democratic party, church of which he was a member. He bolted the Democratic party, turning Republican to cast his vote on William McKinley. He discovered the Republican newspapers, taking the Cincinnati Tribune. He did speak at Harrison more than several years ago. He and his wife lived at Hebron, Ky., at one time, many years at New Richmond, Ohio and the rest at Harrison, Ohio. Many years later he went to New York to study on surgery where he was staying with our cousin Charles Kilgour. Charles is a chemist by his trade. He was a son of his late father Robert John Kilgour of a proprietor of a large weekly newspaper published at Flemington, N. J. Another Anthony is running in this same printing office yet. There was seven deaths in our family, leaving four of us living. It is said over "Hoshal" families living in Baltimore county, Maryland. This proved to be a great race. Some of them strayed to old Kentucky, Illinois, Arkansas and the other states from Maryland. My deceased mother's father and mother was David Harshat, of Maryland, and Elizabeth McCoy, of Virginia. Our late "great uncle" W. McCoy lived on his farm known as the "Webb" place down at Taylorsport, Ky. He believed that Elizabeth was a daughter to him. I am now possessing a good deal of W. McCoy's papers here. He was named after uncle Will Hoshal. He worked at the mill in the south many years ago. When he died he was about 18 years old. He was a brother to our late mother and late John M. Hoshal Sr. H. K.

Miss Fannie Hoshal of Cincinnati, Ohio, and our late sister Fannie were both named after Fannie McCoy, who drifted far off to Kentucky, where Elizabeth and Fannie were both deceased sisters.

Drafted Men to Be Studied.

Army officers who will organize the national army division face the task of making the best possible use of the individuals for military duty by the local boards. They will come from all walks and conditions of life. Among these will be highly trained individuals, specialists in particular lines, and efficient mechanics. It is the intention of the war department to get the maximum advantage from the nation out of each man's special qualifications, and his previous occupation will be carefully considered in assigning him to duty. Desirable lists of all drafted men will be made out as soon as they reach the training camps. They will contain an abstract of the life history of the soldier, showing what occupations he has been engaged in. From these preliminary classification can be made, subject always to the primary necessity of organizing a great body of infantry for duty in the trenches.

Presumably the first increment to reach camp will be organized as infantry companies. This was the practice followed in the officers' training camps which have closed one course. The basis of the classification is the school of the soldier, and that must be taught first. In addition, it makes possible a hardening process which will make the men physically able to meet the strain of the strenuous days to come.

After some weeks of elementary drill, the organization of signal, engineer, artillery and other special units will commence. The process of selection by special qualifications will be applied to the greatest possible extent. At the same time the officers will begin to get a line on men who are likely candidates for future commissions, and they will be observed with a view to promotion later.

The question of seed corn for next year is going to be matter of the greatest importance to the county to give careful consideration. Much of the corn is now lying on the ground, and the probability is it will not mature thoroughly, thereby leaving the germ in a condition that it will not sprout. A good time to make selection of seed corn is when the clouds begin gathering, and this fall will be an opportune time to select your seed while gathering your corn.

Mr. Wallace Green, of Bellevue neighborhood, presented the Recorder last Monday with one of those precious photographs of his father's.

The DAIRY POULTRY FACTS

ROB CALF OF MOTHER'S MILK

Expert of Colorado Station Says It Is "Saving at the Spigot and Losing at the Bung."

GEORGE H. GLOVER, Colorado Agricultural College, Fort Collins. We are beginning to question whether after all it pays in the long run to rob the calf of its mother's milk and try to raise the future cow on whitewash and sawdust, or to express it with a little more moderation, to try to raise the calf on separator milk and patent foods.

Feeding Calves in Stallions.

ured it out to their satisfaction that whole milk is too valuable to feed to calves and from the standpoint of immediate returns, these figures don't lie. But if we could in some way estimate the ultimate loss in calves that die from this treatment the depreciation in value of mature animals that have been stunted in their growth and the price that must be paid for milk cows, it might look different. Is it not a case of 'saving at the spigot and losing at the bung'?

BUTTER PRODUCED ON FARMS

Amount is Continually Decreasing According to Investigation Made in Wisconsin.

An investigation made in Wisconsin shows that the amount of butter produced in the farm dairy is continually decreasing and what is paid for it generally sold direct to the consumer. The market butter is made in the 835 creameries of the state, 45 per cent of which are owned co-operatively by the farmers. An important feature is that the co-operative creameries pay the farmer more for his butter fat, pay the buttermaker higher wages, and sell the product for a higher price.

It costs 1.68 cents per pound of butterfat to get the cream to the creamery and 2.33 cents to make a pound of butter. The shipping charges vary from 0.25 to 1.25 cents per pound, depending upon the distance from the market. The investigation brought out the interesting fact that for every pound of butter sold to the consumer the farmer received two-thirds of the money and the retailer one-tenth.

REMOVING HORNS ON CALVES

Application of Caustic Potash When Animal is Two or Three Days Old is Satisfactory.

Horns on calves may be removed by an application of caustic potash. When the calf is two or three days old, clip the hair from the spot where the horns are to protrude. Moisten the end of a wrapped stick of caustic potash and rub on the horn. Care should be taken to see that all of the horn is removed in order to prevent the growth of a new horn. The calf should not be turned out into the field immediately after the operation, as the caustic preparation may wash down the eyes and injure them. Caustic potash should be kept in an air-tight container or it will absorb water and disintegrate. Wisconsin College of Agriculture.

SALT IS OFTEN OVERLOOKED

All Animals That Consume Large Quantities of Vegetable Matter Require Some Salt.

An important item that is often overlooked in the management of dairy cows is providing them with plenty of salt. All animals that consume large quantities of vegetable matter require some salt.

CANDLING EGGS IN NEW WAY

Recent Device Confines Dark Area Just Around Egg—Impossible for Light to Get In.

As far as the consumer is concerned there are only two kinds of eggs—good ones and bad ones; and usually he cannot distinguish one from the other until he breaks the shell. But to the dealer there are several grades between the best and the usable eggs. For years these grades have been determined by candling—a process re-

Latest Candling Device.

quiring a dark room and a point of light against which the egg is held to get a kind of X-ray view of its interior. The process is slow and the conditions under which the men must work are more or less unsanitary.

A newer method employs the candling device shown in the illustration. This device confines the dark area where the light comes just around the egg. The projection on top of the device has a slight cut so that it is impossible for any light to get to the egg from above. With this device, one room may be used for candling, grading and packing—Popular Science Monthly.

CHICKS INFESTED WITH LICE

Mother Hen Should Be Dusted With Some Good Insect Powder—Make Examination Often.

Where chicks are raised with hens, they are likely to become infested with lice. If the lice get very numerous, they greatly retard the chicks' growth and may even cause their death. The hen should be powdered thoroughly with some good insect powder before she is put in the coop with the chicks, and at intervals of several days or a week thereafter. The baby chicks should be examined for lice, particularly on the head, under the wings and about the vent. If any are found, a little grease, such as lard, should be rubbed on in those places. Apply grease moderately, as too much will injure the chicks. The chicks should be examined frequently and the treatment repeated if lice are found on them.

MAKING MONEY WITH CAPONS

Fowls Should Reach Full Size Before Fattening—Bring Better Prices Than Turkeys.

Capons should reach full size before fattening, and this should be when they are from ten to twelve months old.

Fatten them from two to three weeks before marketing—two if they are shut up in dark coops. Feed them all they will stand of cornmeal and middlings, wet, but not too wet, with milk.

Cracked bits of glass are used as an aid to digestion, but good grit is safest where the ground stuff is used. Grit of some kind they must have.

The farmer who does not keep over a lot of male birds as capons will lose a big profit on fowls, as turkeys do not at any time sell as high as capons per pound.

VENTILATION OF HENHOUSES

Reason Many Fowls Sicken Roosting Places in Trees Is Because Buildings Are Too Warm.

Henhouses need to be ventilated in the winter time as much as in the summer time. The reason many hens go to the trees to roost is because the house is too warm for them. At least ten inches of perch space should be provided for the fowls, so that they will not have to crowd; and the more open the house is during the summer months the more contented the fowls will be. A small hole cut on the north side of the poultry house about two feet off the door and left open during the day and night will do a great deal to cool the house down and to remove any foul odors. All windows should be removed and screened instead; also the doors should be left wide open.

A FAMILY MEDICINE

In Her Mother's Home, Says This Georgia Lady, Regarding Black-Draught, Relief From Head-ache, Malaria, Chills, Etc.

Ringold, Ga.—Mrs. Chas. Gaston, of this place, writes: "I am a user of Theodore's Black-Draught; in fact, it was one of our family medicines. Also in my mother's home, which I was a child. Upon any of us children complained of headache, usually caused by constipation, she gave us a dose of Black-Draught, which would rectify the trouble. Often in the Spring we all have malaria and chills or trouble of this kind, we would take Black-Draught pretty regularly until the fever subsided well, and we would soon be up and around again. We would not be without it. For it certainly has saved us lots of doctor bills. Just a dose of Black-Draught when not so well saves a lot of days in bed."

Theodore's Black-Draught has been in use for many years in the treatment of stomach, liver and bowel troubles, and the popularity which it now enjoys is proof of its merit.

If your liver is not doing its duty, you will suffer from such disagreeable symptoms as headache, biliousness, constipation, indigestion, etc., and unless something is done, serious trouble will result.

Theodore's Black-Draught has been in use for many years in the treatment of stomach, liver and bowel troubles, and the popularity which it now enjoys is proof of its merit.

Committed Suicide in Kansas City.

John Cloud received a letter, a few days ago, from his sister, Mrs. Everett Walton, who lives in St. Louis, Missouri, stating that her husband's brother, Herbert Walton, had committed suicide by shooting himself in his room in Kansas City a few nights before.

No cause for the act was known. He was fifty years of age, a married man, the son of the late William Walton, who many years ago was a citizen of the Commonwealth of Kentucky.

Herbert Walton was a very good time and is survived by a little girl about two years of age. Both of his wives are dead.

The Tobacco Crop.

Tobacco cutting is being rushed in Bourbon county, as farmers are in dread of frost, which would prove disastrous to the crops.

Tobacco cutting is occupying the attention of the farmers in Fleming county. Tobacco seems to be below the average.

The past week has been a busy one in Woodford county, trying to get the tobacco cut and housed. The light frost did practically no damage to the tobacco.

The farmers of Nicholas and the adjoining counties are rushing the work of cutting and housing the tobacco. The crop is about 50 per cent cut and housed. Farmers are rushing to get the crop in before danger of frost.

Tobacco is doing well and growing fast in Bracken county. Much of the crop is being cut and housed. Many persons who have been in the country say Bracken's tobacco is as good, if not better than any other section.

Fayette county farmers have been cutting and housing tobacco. Several good sales have been made of tobacco crops and many good offers are being made speculatively.

Catesby Woodford, Jr., of Paris, has disposed of his 14-acre crop of tobacco to a Mr. Sterling buyer at the record price of \$20 an acre cash, less six per cent interest for six months. This is said to be the highest price paid for tobacco by the acre.

The past week has been pretty much occupied in Scott county, in the farming field, by the cutting and housing of tobacco. It has not been hot enough to burn the tobacco at all and it has cured up well.

Tobacco cutting is still under way in Clark county, but both weight and quality will be added in many cases if the tobacco can stand two weeks or more. That part of the crop which is in the barn is yellowing up nicely and gives every promise of excellent quality. Hands are scarce, but the crop is going into the house in good shape. There is some very good fields of tobacco. So far, the weather has been fairly good with but little sunburn in the patch between cutting and housing.

The crop in Pennsylvania has made remarkable progress in developing the past week, rains and warm weather having inevitable effect crops are now well along and should appear to have taken on a new lease of life, and with the continuance of favorable weather will mature into fairly good fields of tobacco. So far, the weather has been fairly good with but little sunburn in the patch between cutting and housing.

H. H. Slaback, who has been seriously ill with stomach trouble for ten days, was called Sunday morning in consultation with Dr. Ryle.

HAMILTON.

School began here last Monday, Miss Beemon teacher.

Tom Huff and family attended church at Big Bone Sunday.

Wm. Smith made a business trip to Paris, last Monday.

Johnnie Hartman, who has been away all summer, is here on a visit to his parents.

Mrs. J. A. Hartman was shopping in Rising Sun, Saturday.

A considerable lot of tobacco has been cut the past week.

Mr. and Mrs. J. A. Hartman, of near Berkshire, were visiting friends here a couple of days last week.

Bernard Huff went to Walton, Sunday, to see his boy friends leave for the cantonment at Louisville.

Bliss Stephens, of near Erlanger, R. D. 3, has bought a new passenger Ford.

STATE NEWS.

Versailles. - The past week has been a busy one with the farmers, who are pressing every available hand into service so as to get their tobacco cut and housed.

Georgetown. - The past week has been pretty much occupied in the farming field by the cutting of tobacco, sowing wheat and grain seed. The light frosts which fell during a couple of nights of the past week had a tendency to ripen the weed at just the proper period. It is estimated that the largest wheat crop ever sown in Scott county will in all probability be put in this fall.

Whitesburg. - The past week was perhaps the best breaking weather for September, the coldest known in years, at least. Some of the early farmers are starting fiddling and report that the weather is not so good for the crop, is much better than they expected. Farmers are making preparations to sow wheat this fall on a much larger scale than for a quarter of a century. Great care will be taken for the selection of the seed.

Paris. - Unusually low temperatures prevailed in this section last week. As a consequence of the cold, the corn is maturing rather slowly and tobacco cutting is being rushed, as farmers are in dread of frost, which would prove disastrous to the crop. Alfalfa, potatoes, sweet potatoes, cowpeas, etc., are generally good. The hemp is excellent, and farmers are anxious to get it in and demand a good price. Tomatoes continue very scarce and are ripening slowly. Eggs are scarce.

Bowling Green. - Oil excitement here was increased when the fact was made public that the oil of this city was uncapped and a six-inch stream of oil was spouted into the air for a period of ten minutes, covering the streets. The oil well is the big strike so far in Warren county. It has been plugged for several months awaiting the drilling of the well. The company in charge is anxious to get the oil up and the necessary pumping machinery. This has not arrived and will be installed immediately. Experts say this will yield 100 barrels per day.

Carlisle. - Farmers are rushing to get the crop in before danger of frost. The corn crop in this section is badly damaged by the wind storm which visited this section. The hemp crop has all been cut and reports indicate that it is a very fine crop. The grain crops are well along and should appear to have taken on a new lease of life, and with the continuance of favorable weather will mature into fairly good fields of tobacco. So far, the weather has been fairly good with but little sunburn in the patch between cutting and housing.

FLICKERTO the heading.

F. M. Voshell has filed a notice to show cause why he should be housed this week.

J. W. White has bought Shinkle's property near here.

Born, on the 22d inst., to Leslie Seebree and wife, a boy, Cabell Beemon and wife were Sunday guests at Chas. Finn's.

Bernard Huff went to Walton, Sunday, to see his boy friends leave for the cantonment at Louisville.

Bliss Stephens, of near Erlanger, R. D. 3, has bought a new passenger Ford.

FIRST SOIL FOR LIMA BEANS

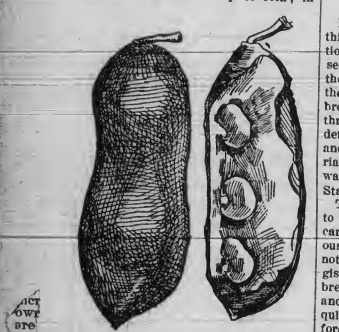

One of Most Desirable Products of Any Family Garden.

General Rules for Care of Garden Crops Should Be Adhered To in Cultivation — Plant Thrives When Land Is Rich.

Beans thrive best in a rather warm sandy loam, but may be grown on almost any kind of soil. For the best results the soil should not be too rich in nitrogenous matter, or the plants will run to foliage and stems at the expense of the crop of pods. Heavy clay soils are not well adapted to bean culture, owing to the tendency of the soil to bake and prevent the seedlings from coming up evenly. The bean does not draw heavily upon the soil and is suitable for rotation with other garden crops.

In the cultivation of beans, the general rules for the care of garden crops should be adhered to, and frequent shallow stirring of the soil practiced. For a constant supply of bunch or snap beans successive plantings should be made, the first planting being made about eight weeks before time for frost in the autumn. In the South, plantings should be made as soon as the ground begins to warm, and continue until hot weather sets in. Toward the end of summer one or two plantings should be made for a fall crop.

The lima bean, both pole and bush, forms one of the most desirable products of the garden. This crop thrives best when the soil is quite rich; in

Late Lima Beans.

Whole lima beans cannot be grown in the open, but are the seed in hills. The Liberty Primer and after the plants have been set in the hills, the unsprayed beans should be set in the hills to harmony. The Liberty Primer and after the plants have been set in the hills, the unsprayed beans should be set in the hills to harmony. The Liberty Primer and after the plants have been set in the hills, the unsprayed beans should be set in the hills to harmony.

TEST GERMINATION OF SEED

Varieties Best Adapted to Local Conditions Should Be Used—Plant for Full Stand.

No one should run the risk of crop failure for using poor seed. This is especially true at this time when all possible agricultural produce is needed. Seed of the varieties best adapted to local conditions should be used as far as available. Particular care should be taken that all seed is planted at such a rate as to insure a full stand in the field under normal weather conditions. Wherever possible, soil only seed which germinate well. It often happens, however, that the available supplies do not germinate well. All seed, therefore, should be tested for germination before sowing and the rate of sowing of any that does not germinate well should be increased sufficiently to insure the use of a proper amount of live seed.

HANDY LOW-WHEELED WAGON

Handy for Use in Harvesting of Corn for Silage—Large Saving of Manual Labor.

A wagon with low wheels for use in the harvesting of corn for silage is recommended by H. C. Ramsower of the college, Agriculture, Ohio State university. Although the draft is approximately one-third greater than that of a higher-wheeled wagon, the saving of man labor is of greater importance. Aside from its use in the handling of silage, it can be of great advantage for many other farm operations.

CORN HEAVY FOOD PRODUCER

Dr. Y. Yield More Per Acre Than Any Other Crop. With the Possible Exception of Alfalfa.

will produce more food per acre than any other crop except alfalfa. It produces both grain and silage. It is both nutritious and palatable. It has about the same feed value as alfalfa. It is the same feeding value as alfalfa. It is the same feeding value as alfalfa.

MORE VEGETABLES IN FAVOR

Fresh Garden Truck Should Form Part of Everyone's Diet—Reduce High Cost of Living.

(By W. E. EDMUNDSON, Idaho Experiment Station.)

Fresh garden vegetables should furnish a large part of everyone's diet, and if produced at home are not expensive. Abundantly used in the diet, they will aid in forming a balanced ration and will greatly assist in reducing the high cost of living. While we are planting the gardens this year everyone should make a special effort to grow special vegetables for winter use. No less than 30 distinct kinds of vegetables can be preserved for winter use by proper methods of storing, canning and pickling. The vegetables most commonly canned are tomatoes, corn, peas and string beans. Those most commonly preserved by pickling are cauliflower, cucumbers, green peppers and green tomatoes. There are many vegetables that may be kept in the fresh state by proper storage methods. This list includes potatoes, beets, carrots, turnips, parsnips, winter radishes, rutabagas, cabbage, kohlrabi, celery, onions, pumpkins and squashes.

Since most vegetables usually keep best if put into storage comparatively late, it should be the aim of the gardener to mature the vegetables for winter use late in the season. If planted too early many crops will become tough, woody and pithy before the season for storage arrives.

INSECT INJURIES TO CROPS

Great Part of Annual Loss Can Be Prevented by Vigilance and Action on Part of Growers.

Be on the job against insect pests this season. Make your food contribution to the human family, not the insect family. Farmers who provide themselves with insect poisons and then keep a vigil for the first outbreaks of crop enemies will bring through the largest yields. Failure to detect an outbreak at its beginning and delay in getting combative material may be fatal to the crop attacked. Warm entomologists in the United States department of agriculture.

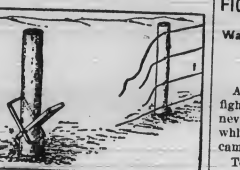

That a great part of the annual loss to grain crops due to insect injuries can be avoided by vigilance and vigorous action on the part of growers is not sufficiently realized, the entomologists say. Frequently insect outbreaks originate within a limited area, and when this is the case it is often quite possible to stamp them out before any great damage has been done. If the outbreak is general, then community action is essential to prevent the infestation from becoming widespread.

PULLING STAKES AND POSTS

Mechanism Is In Form of Pivotaly Connected Open Frames Adapted to Be Slipped Over Post.

The Scientific American in illustrating and describing a fence post and stake puller, invented by R. S. Fox of Blue Earth, Minn., says:

This inventor provides a device especially adapted for pulling posts, stakes and the like from the ground.

Stake and Post Puller.

wherein the pulling mechanism is in the form of pivotaly connected open frames adapted to be slipped over the post, each frame having at one end a gripping mechanism for engaging the post or stake, and at the other end a handle.

WHITEWASH IS EASILY MADE

Formula Given for Preparation of Weather-Proof Solution for Farm Fences and Walls.

(By DR. C. FRANCIS.)

Stake one bushel of good quicklime with not more than 12 gallons of water. Slake the lime and keep the vessel covered until steam ceases to rise, stirring occasionally to prevent scorching. Prepare a second mixture containing one pound common salt and one pound zinc sulphate in two gallons of boiling water. Pour this into the slaked lime and stir two gallons of skim milk. Stir vigorously. This makes an excellent weather-proof whitewash, suitable for walls and fences.

EXCELLENT AS LICE KILLER

Kerosene Emulsion Is Easily Prepared and Not Expensive—Best to Use Rain Water.

Kerosene emulsion is one of the best lice killers on plants and animals. It is easily prepared and very cheap. Dissolve one-half pound of soap in one gallon of kerosene and stir very vigorously. Add one quart of water and stir. For use, dilute one gallon with nine to ten gallons of water. Stir well. It is best to use rain water. If only a small quantity is wanted, use one to two ounces of soap, two quarts of boiling water and one pint of kerosene, and dilute to two gallons.

USE POISONED BAIT FOR GRASSHOPPERS

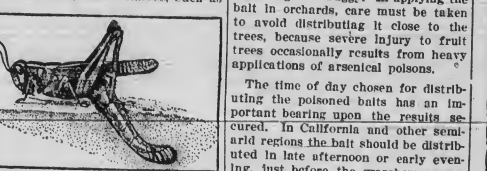

YOUNG GRASSHOPPERS FEEDING ON CLOVER.

(Prepared by the United States Department of Agriculture.)

If grasshoppers are discovered in the early days of their attack on crops, they may be easily controlled by means of poisoned baits, the most effective of which is described below. This method has been used with remarkable success in many parts of the United States. Its complete effectiveness depending only upon the discovery of the young insects before they have attained any considerable size, when the injury done by them is still very slight and when they are wingless and easily killed by poisons or mechanical means.

The constituents of a good poisoned bait are wheat bran, 25 pounds; paris green, 1 pound, or white arsenic, 1 pound; lemons or oranges, 6 finely chopped; low-grade molasses, such as

Two-Striped Grasshopper Laying Her Eggs. (Webster.)

refuse from sugar factories, or cattle molasses, known as "black strap," 2 quarts; water, 2 to 4 gallons. The bran and paris green or other arsenic are thoroughly mixed with the dry fruits finely chopped and added. The molasses and water are poured over the bait and the whole thoroughly kneaded. A coarse-flaked bran is most desirable, although where middlings or alfalfa meal may be substituted; a low-grade, strong-smelling straw or molasses, however, is essential to the entire success of the poison. Crushed ripe tomatoes, watermelons, or limes may be substituted for the

FIGHTING PESTS IN GARDEN

War Gardeners Must Battle Host of Insects That Never Seem to Know When Whipped.

All summer you war gardeners must fight the host of insect pests that never seem to know when they are whipped. Here are a few hints for the campaign:

Tomato worms.—Pick or spray with arsenate of lead.
Cabbage worms.—Pick or spray with arsenate of lead plus soap.
Cutworms.—Cover with frames; apply tobacco dust or spray with arsenate of lead. For immature forms and roots apply nicotine sulphate.

Tomato beetles attack tomatoes, eggplants, tomatoes. Hand pick and apply arsenate of lead. For immature forms and roots apply nicotine sulphate.
Aphis (plant lice) attack cabbage groups and other plants. Spray with a solution of hard soap or nicotine sulphate plus soap.

SUPERIOR PASTURE FOR PIGS

Acres of Rape Sown on Good Land Will Carry From Twenty-Five to Forty Animals.

Rape will stand quite a heavy frost without any apparent injury. When cutting for soiling care should be taken to cut about four inches from the ground, and a second and even a third crop can be expected from the same seedling.
It makes the finest pasture for brood sows and pigs. An acre sown on good land will carry from 25 to 40 pigs from June to October, if handled properly.

REST REQUIRED BY HORSES

During Noon Hour Harness and Heavy Collars Should Be Removed—Give Animals Brushings.

Remove the harness and heavy collars during the noon hour. Go over the horses with a stiff brush before replacing the harness. This will take only a few minutes, but will go a long way in keeping the team in good condition and full of vigorous force.

FALSE SCHOOL OF HUMOR.

The women who are running from place to place of registration to another, rather than reveal their ages to the gossiping neighborhood in which they live, have been driven to it by the guffaws of those fun lovers who regard gray hairs and all other signs of old age and worldly experience as fit subjects for ridicule. The great beehive school of humor loves a shining mark, and indulges in uproarious mirth over everything that should not be laughed at, says New York Herald. In the midst of the disciples of this witless cult it is funny to be married, and still funnier to remain single. It is funny to be fat and equally funny to be lean. A long-haired man is quite as funny as one who is bald. The mother-in-law, who in nine cases out of ten is the real self-sacrificing mother of her brood of grandchildren, is quite as ludicrous in the eyes of those jocosse ones as the "old maid," who more than earns her keep by doing the marketing and relieving her married sister of nursery cares. Our national sense of humor is in need of need of a reformer who will teach us the difference between sacred things and the various forms of vulgarity and pretense that should be laughed out of existence.

The amazing activity of Italian warriors in the Alps seems to continue the tradition Caesar set when in winter campaigns he defied the snow-clad mountains in order to hold or to extend the frontiers of the empire. The Caesar who bridged the Rhine was a brother-in-arms to brave Cadorna, says Philadelphia Public Ledger. The Roman legionaries who live for us in the pages of the *Comma* seem to have their reincarnation in the eagle's aerie and convey their wounded over wire ropes across yawning abysses. Who said Italians were degenerate actors of the ancient heroic stock? The war has shown the world no sturdier warriors than these. With the forces of nature herself arrayed against them, they have removed mountains, and in their prowess it is as though Caesar himself were on earth again to defy and finally subjugate the German war lord who has assumed and ascribed the name the great Italian were who ruled the world.

The United States is short of beef and long on fish. The people of this country eat less sea food than those of any other nation which has available supplies so great as ours. The problem is to save the beef for shipment across the ocean and to consume here the fish which cannot be economically shipped. The country must conserve wheat, too, and eat instead such grains as cannot be sent to the trenches.

Like a good many business men, Uncle Sam is protecting his borrowings—the bonds issued and sold to his own people—by leading at the same rate of interest to his allies. And, to complete the endless chain, the money loaned to the allies is being largely expended in this country, so our own people will get the benefit from it.

Now we are advised that we mustn't use any more starch on our shirts, utilizing it rather for blaine mange and other so-called food products, and we have written our washerwoman asking if this oughtn't to apply also to our union suits, feeling that possibly an appeal on broad patriotic grounds may have some weight with her.

Not the least of our contribution to the allies to exude respectful attention abroad was the consignment of the great American army mule. On all sides was heard the French equivalent of the wish that he would have more power to his kick on the field.

Now someone has invented a machine gun unit, the same being in the shape of a machine gun, which is a whole battery of machine guns. More and more does war take on the form of a machine-made thing.

We have not worried about the minimum price theory so far, being confident that old Mac will always get our number and the final sell remains distant while Max is around.

The daughter who is to spend an evening at home alone—just with the family—who decides to go to bed real early and catch up on sleep.

Dispatches from Washington indicate that the crop reports are improving pretty nearly as much as the crops are.

Harry Aylor reports considerable ice at Linsburg last Monday morning.

A GOOD EXAMPLE

How The Road Fund Is Handled in Woodford County.

Woodford County presents a good example of the proper method of handling road funds. The County Road Engineer, W. H. Edwards, Jr., during the year travels regularly over the entire road system of the county in a machine but in the months of December and January he makes a special tour of inspection in order to determine exactly what must be done on the roads and bridges during the coming year, and at the February term of court he makes his recommendations.

Woodford county ordinarily receives from ten to twelve thousand dollars State Aid. This court sets aside a sufficient amount to meet the state appropriation, all of which is expended on one of more inter-county-sect roads. The remainder is apportioned to the various parts of the county where it is most needed.

The Road Fund in Woodford county amounts to about forty thousand dollars per year and the Road Engineer makes his recommendations so as to distribute the entire amount. Mr. Edwards has been Road Engineer of Woodford county for twenty years and there is not a case on record where the recommendations he has made to the Fiscal Court have not been adopted.

It is noteworthy that the court appreciates the fact that he is an experienced road man and that to his care should be entrusted the road affairs of his county. Another important feature is that the road fund is not apportioned equally to the magisterial districts—in fact no attention is paid to magisterial districts, but it is placed from year to year where it is most needed, the idea being to keep interest in the road fund generally by the people of the state that Woodford county has about the best roads in the State. The above is a fact in fact no attention is paid to magisterial districts, but it is placed from year to year where it is most needed, the idea being to keep interest in the road fund generally by the people of the state that Woodford county has about the best roads in the State. The above is a fact in fact no attention is paid to magisterial districts, but it is placed from year to year where it is most needed, the idea being to keep interest in the road fund generally by the people of the state that Woodford county has about the best roads in the State.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of October 4th, 1877

River very low.

Water scarce in cisterns.

Spelling master of the White school house next Friday night.

The Covington Commonwealth has put on a daily edition.

Sophia, daughter of James and Virginia Riddell died of diphtheria last Thursday night.

Noah Craven sent to the Recorder an account of Rose Irish potato that weighed one pound.

Geo. Rush fell from a building on which he was at work, dislocated one bone in his arm and broke the other.

Elder Row is conducting an interesting meeting at the Florence Christian church.

Another "festibule" broke out among the darkies in St. Georges Chapel last Saturday night. This one did not conclude with a jubilee of the first magnitude, but peace and love did not prevail during the entire evening. The principal "brigade" was the result of one of the females scooping the proceeds of the festival for the purpose of liquidating a bill she had against the officiating minister.

Thursday Hensly Smith's nag ran off, threw him over a fence and demolished his buggy.

Dry goods store of Roger Clements, in Union, was robbed one night last week. Three suspects—L. Grippin, Stony and a learned Kentucky were arrested. All the parties were discharged as the examining trial.

Another Change of Schedule

The rural mail carriers began their departure on a 7 a. m. schedule last Monday morning which is a half hour earlier than the mail arrives from Covington. They should not leave the Burlington office before the morning mail arrives from the last year. The department will be requested to give them a schedule that will allow them to remain in Burlington until they receive the morning mail for delivery in the rural territory.

DUST AND VISITORS

Are the Features of the Day at Camp Taylor.

Louisville, September 30.—Swirling clouds of dust and thousands of pedestrians were competitive visitors at Camp Taylor today. The pedestrians, however, outlasted the former, and were rewarded with a pleasant afternoon with friends, acquaintances and relatives.

Only brief routine followed today, including for the first time general muster, regiment by regiment. Afterward more than half the soldiers on the ground were excused from duty and several thousand came into Louisville on an afternoon visit.

Religious services were held at the camp this morning, mass being held at the Knights of Columbus building and Bible services at the Y. M. C. A.

One hundred and seventy new buildings will rise at the camp this week on additional acreage secured of material. One thousand additional men will be put on the work to-morrow morning.

WHY NOT SKIN THE PIGS?

Here is a Suggestion For Overcoming the Leather Shortage.

The high cost of shoes and other necessities that are made of leather is world-wide and is attributable in large part to the scarcity of material. Nor does the Federal Government's recent survey of the leather situation offer much hope of early relief. About the only hope, in fact, lies in the possible utilization of leather supply sources hitherto neglected.

Which has given rise to the query: Why not skin the pigs before making them into hams? There is an old-fashioned idea that the pig is a creature of no value, but science has discounted it, and the exigencies of these times may work to banish it entirely. The idea—which is kept alive only by custom—that the porker must be killed in the market skinned or hided is not correct.

Pigskin is valuable for a variety of purposes is well recognized. And it is employed to a limited extent for the manufacture of shoes. Shoe manufacturers, however, are slow to seeking ways to utilize it in their business and great quantities of it in place of cowhide and calfskin but for its scarcity.

That swine could be made a potential supply of leather is indicated by the United States Department of Agriculture's estimate that there are about 10,000,000 of these animals on American farms today. Yet the output of pigskin leather is negligible. Federal statistics show that at only seven of the principal stock yards of the country last year were marketed. Yet all of that pigskin was wasted.

It was cured with the hams and bacon, ultimately to be skinned off in strips and thrown in with the garbage.

Industry and markets naturally would require considerable making over and facilities would have to be supplied for the process of skinning before anything like the possible quantity of pigskin leather could be put into use. But with the tremendous price for leather for the growing list of purposes for which a substitute will not serve, and for shoes for the soldiers, to say nothing of the leather being added to the by-products of the hog is not without merit. And the prediction that seven of the principal stock yards of the country last year were marketed, just as does the ox and the mutton, may not be altogether visionary, and need not be alarmingly sound and reasonable.—Atlanta Constitution

HARVEST SHORT

According to Hoover Supplies Are Less This Harvest Year Than Last Year.

Washington, Sept. 29.—A renewed appeal to the American people to unite in food conservation was made tonight by Herbert C. Hoover, chief of the department, in an announcement setting aside the week of October 21 to 28 for completion of the campaign to save the country's food resources.

Food Mr. Hoover declares, will win the war. Its conservation, he said, is the greatest duty of humanity and honor. The appeal follows: "The week of October 21 to 28 has been selected for national wide campaign to complete the enrollment of our forces in conservation of our food supply. The harvest is now in hand and we can measure the world's food resources."

The available supplies this harvest year are less than last year; the demand on us to grow the food is greater than the last harvest we exported more than we could really afford. We can only meet the call upon us next year by saving and reducing our consumption, which cannot be transported.

BOONE COUNTY BOYS

Pleased With Training Camp—Plenty to Eat and a Good Bunk to Sleep On.

Camp Taylor, Louisville, Ky. I will write as I promised to. We all arrived at camp in good spirits, feeling fine and happy. We got plenty to eat and have a good bunk to sleep on, much better than I expected.

A description of Camp Taylor is much more than I can write, for I am sure a wonderful place, and more buildings are being put up. We have done a little drilling, but "commence right" tomorrow, Tuesday. We were vaccinated rather sore, but we are all O. K. tonight.

We are getting lonesome for home, so send some of us some Recorder's as soon as possible. Will write more to next time if Boone county don't forget the boys from home.

Each one of us received his uniform Tuesday, and all are proud of them and hope Boone county will send us of us when we get back home.

FRANK R. KLASERNER, Battery E, 236 E. E. Camp Taylor. (The above was not received until last Friday evening.—ED)

ANARCHY

Existing In Coal Fields of Eastern Kentucky and Tennessee

Louisville, September 29.—That a state of anarchy exists in the coal fields of Eastern Ky. and Tennessee, and that the Government of the states have been called on to rush troops to quell disturbances, due to clashes between striking miners and nonunion workmen, was a report the writer heard here from Chattanooga, Tennessee, tonight.

Refusal of the coal operators to grant recognition to the United Mine Workers of America, after expressing a willingness to meet all other demands of the striking miners, was the cause of the trouble for the trouble obtaining in the coal fields.

At Withert, Haslen County, Ky., Lawrence Scott was shot and killed today. It is alleged, by Arthur Stewart, a striking miner, Scott was driving a team car loaded with mail and freight destined for Withert. He was ordered to leave the car, and when he refused, it is said, Stewart placed a shotgun against his breast and fired.

Three white men and two negroes, suspected of having knowledge of the ambush of employees of the Withert mine, were arrested by the Withert police, and the probable fatal wounding of one of the strikers, was arrested at Withert and taken to Harlan. All gave bond and were released.

Burlington Took Two Games To Petersburg's One

Prof. Carter, of Petersburg, brought his three basketball teams here today to show the Boone County High School teams how to play the game, and to give their instructor a few pointers. The teams of the Petersburg school were the best to make good but two of them were outclassed, one of which were allowed to score. The game between the girls was the closest contest of the afternoon and was won by the fair ones from Petersburg, who were entirely too swift for the Burlington aggregation, the score being 8 to 5 in favor of Petersburg.

Burlington's first team of boys appears to be the strongest the school has ever developed, and if they have no bad luck will be a very fine team. The boys of the season if the game put off last Friday afternoon is any indication of what they will ultimately do. The playing of U. S. on holding the team was a surprise to the spectators and his good throwing was little short of sensational. Of the 40 points his team made he made 29 of them, which indicates that he was half of the works. Each of the Burlington boys have some fast players, and while they had all the time the scores Friday were as follows: First team Burlington 40; Petersburg 15. Second team Burlington 15; Petersburg 10. Burlington girls 15; Petersburg girls 8.

Burlington will play at Behleville next Friday afternoon, and the Friday afternoon following at Lexington. Petersburg will play at Burlington.

James Fullock, of Hebron neighborhood, was in Burlington, Ky. last night and brought 30 rods of wire fencing from W. L. Kirkpatrick.

WHAT SPY MAY DO IN WAR.

Ethics of "Profession." Make It Permissible for Him to Wear Uniform of the Enemy.

Imitating the bugle-calls of the enemy is quite legitimate; so is the wearing of their uniform, with one reservation. A soldier may not fire on the enemy while so dressed. But he may advance, retreat, build bridges and perform any other military operation short of actual fighting, using the uniform as a means of deception.

A soldier may spy as much as he likes. If he worms his way into the enemy's lines he is only doing his duty, and, if captured, there may not be punished, beyond being taken an ordinary prisoner, provided he is wearing a uniform. If he is in any kind of disguise he may be shot.

In the course of his spying he may kill as many of the enemy as he can. When he approaches the sentries he may stab them in the back, or use any trick to throw them off their guard except one. He may not say "friend" if the sentry challenges him unless, of course, he intends to surrender.

Similarly, if suddenly attacked, he may not use any words to make the enemy believe that he is a friend in disguise, and so take him unawares.

ENJOYED HIS TRIP.

TO THE RECORDER:

I want to thank our Representative, Hon. W. P. Cropper, for the pleasant trip from Boone county to the Farmer Boys' Encampment at the State Fair.

Nearly all the boys from the different counties arrived at camp, and it was under the command of Prof. T. R. Bryan, of Lexington, and Prof. Faulkner, of Williamsburg. The first three days were spent on the ground and seeing the exhibits and other things of interest including new types of farm machinery and new patents of all kinds.

Thursday we all went through the old British convict ship, *Succow*, which is the oldest ship afloat, being launched in 1790. It was first used as a prison ship, and then bought by the British Government and used by it as a floating prison for its convicts for years, until it was considered too slow and sold to a company. Not knowing how to man the old craft it sank in 72 feet of water. After two years it was raised by the above company which now owns it. They took it to England and put it on exhibition there and then started for the United States, the same day, from the same port and for the same destination as the ill-fated Titanic. It was shown down the river and on to the exposition at San Francisco.

On its return it was decided to make a trip up the Mississippi and Ohio rivers and it was on this voyage that we visited it in Louisville.

We went through the B. F. Avery Implement Factory, which was very interesting. Friday we visited Camp Taylor and this ended a trip that meant very much indeed to all the Farmer Boys. Not only that, but we saw some approved methods of farming demonstrated and what depends on the farmer but we met boys from all over the county and found out what their counties are doing.

Respectfully, WILLIAM BRUCE CAMPBELL.

We Are the Americans.

A New York woman, long resident in Paris, writes to the newspapers of her native city to protest against the habit of her countrymen, now in numbers in France on war, of constantly alluding to themselves as "Americans." This has gone on for years.

Now it is a nuisance, for it might give offense to the Canadians as well as to all the peoples of Central and South America. Weing countrymen, now in numbers in France on war, of constantly alluding to themselves as "Americans." This has gone on for years.

The point has been made before, and has never attracted more than passing attention, and will not, now. Our neighbors on the Canadian side will not grow angry. They call themselves Canadians and call us Americans, and they have always done so, and will continue to do so. The Mexicans refer to the people of the United States as Americans, and so far as we know, refer to no other people by that name. They say, practically all of them, that they wish to be known as Mexicans.

It is true that a large number of complaints have come from South America, where a few florid writers in the newspapers of the United States are claiming exclusively for themselves a title that belongs to all the people of the Americas. Even in that region, however, the matter has attracted little attention, and the Brazilians are content to be known as Brazilians, the Argentinians as Argentinians and the Peruvians as Peruvians.

At any rate, the matter is not really closed. The people of the United States are not the Americans; they and the other will always bear that title, it is too late to make a change.

A FANCY PRICE

Paid For Grant County Crop of Tobacco—Said to Be a Record Price.

(Grant County News.)

Thirty dollars per 100 pounds, the highest price on record so far as this county is concerned, was paid for a crop of tobacco last Monday, when R. P. Conrad, of the Baton Rouge pike, sold to Leo Aswerus, a Dry Ridge speculator, his crop, estimated at between 10,000 and 12,000 pounds.

There is about seven acres of the crop, Mr. Conrad says, and people who have seen it pronounce it about the best in the entire county. The tobacco was grown on Blue Grass and land and that part of it which is not already in the house is ready for the knife, so it is practically out of danger from frost.

Mr. Conrad estimates that his crop will average 1,500 pounds to the acre, and if it does it will bring him some other place. He broke all records for a crop of tobacco raised on Grant county land.

Mr. Aswerus has bought several other crops in the county at prices ranging as high as twenty-two cents per pound. In most cases it is said he has put up a part of the money in order to protect the grower in case of a big drop in the price.

"ORNERY CRITTERS"

Some Drafted Men Not a Loss To Their Families.

"He hasn't been sober over four days since he passed his physical examination last August. If he isn't fit for the infantry, can't you put him some other place? He hasn't worked in two years. I work every day to support my self and five year old son."

This was the substance of a letter received by Lieut. Col. John H. Allen, Camp Taylor's surgeon, from a wife who is fearful, not that her husband will not be drafted, but that he will not be.

It was one of many such received by Col. Allen, for this most of the soldiers of the county. Allen are from mothers, wives, sisters or sweethearts trying to beg off some loved one, there are many who are above to show that a small percentage of American men come under the heading "ornery critters."

To show the other side, a letter came from a mother who listed the physical defects of her son, making her son unfit to be a soldier. She said she had rheumatism, weak heart and flat feet.

Want Help the Poorer Class.

There is every evidence of a bountiful harvest of farm products this fall, but there is still a shortage of labor. The mechanic or laborer in other walks of life will be able to purchase this abundant yield at a very high price. This, of course, is good for the farmer, but he in turn must unbundle his extra gains in the purchase of groceries, clothing, etc.

To come down to brass tacks, statements the speculators so manipulate things that they have the control of prices all their own way, and the poorer class is forced to suffer because of their heartless and unscrupulous dealings.

Exemptions Rescinded.

The Dearborn County Exemption Board for the past several weeks has been confronted with annoying conditions arising from the action of Hamilton county. Ohio, draft boards who granted temporary discharges to all farmers to January 1st in order that they might harvest their crops. The local board of this county reiterated its statement that such action was unauthorized. Saturday the Hamilton papers announced that all these exemptions must be rescinded and the draftees called in to service within the next thirty days. This, of course, means that the Local and District having exceeded their authority—Lawrenceburg Register.

Farmers of America. In the issue appears the advertisement for the annual farmers' convention. On this is a very suggestive one with Indians and Kennebec people and a picture of a Native American. It is a picture of a Native American, a picture of a Native American, a picture of a Native American.

Boone county folks should be authorized and attend the fair and not neglect to take with them prizes to compete for the little prizes that will be awarded during the fair. Only good words will be necessary to insure a big crowd.

The European War will have to take a battle with the world's base ball series is dropped out of the local fans are not agreed as to the result of the contest, but all agree that the result is believed.

Local Happenings.

Some saw a light frost last Sunday morning.

R. B. Huey saw frost about his premises last Monday morning.

W. L. B. Rouse, of Lima, has bought a five passenger Dodge Bros. touring car.

The pike from the town of Florence to the Kenton-co. line is getting ferociously rough.

Fog cleaned up a big frost along the river last Monday morning before it did any damage.

Weather predictions for the Ohio Valley this week—generally fair with moderate temperature.

Elmer Kirkpatrick has put down a cement sidewalk in front of his residence. Wm Utz did the work.

County Judge P. E. Cason and Sheriff W. D. Cropper were transacting business in Cincinnati last Thursday.

An unusually small crowd was in town last Monday. County court days do not draw the crowds they use to.

T. J. Stephenson and family and Lewis Beeson, of Lima, were Sunday guests at Joseph Fisher's in Verona neighborhood.

Several Covington autos passed through Burlington, last Sunday enroute to Bellevue to be loaded with melons, the crop of which is about exhausted.

Rouse & Co's silo filling outfit is being operated on full time and considerable feed for livestock is being stored by those who have silos.

Those who assume to be scientifically weatherwise say a killing frost will not appear before the 22nd of this month. In that event the farmers will be given ample time in which to protect themselves against any damage by it.

The electric lights have not been turned on in Florence yet but many of the residences are now being supplied with electric light, and the more the people use it the better they are pleased. It will be but a short time before about all the residences in that town will be using electric lights.

The proposition to put in operation a loose leaf tobacco house in Aurora is meeting with favor in this part of the county which has so far been quite a distance from a market of that kind. No doubt a large per cent of the tobacco raised in the northern part of Boone county will be put over the floor of the Aurora house.

Some of the farmers who have been cutting corn say it is very slow and hard work, but they are gratified to discover that their corn is not damaged as badly as they expected to find it. The corn being cut is generally put in half shocks and allowed to remain a few days before the shock is completed. This is necessary because of the stalks being very green, having been kept in that condition by the roots remaining in the ground.

Hugh Ryle and Howard Aylor, two of the select boys who reside in the East Bend neighborhood, were invited to Rising Sun a few nights since to be present at the "off" given for the increment of Ohio county boys who go to Camp Taylor this week, and to say the two Kentucky boys were entertained in a very manner. They were not begin to describe their reception. Nothing was omitted that was calculated to make them glad they were qualified for the position given them and the Indiana boys.

Final Court in Session Tuesday.—Some Important Business Closed.

The Fiscal Court was in session Tuesday, County Judge P. E. Cason, presiding and Justices of the Peace E. J. Aylor, Wm. Stephens, Charles Wilson, Noah Tanner, C. Bedinger and R. H. Tanner present.

Sheep claims were allowed as follows:
W. T. Hall, 6.50
E. H. Surface, 55.00
Herbert Grant, 9.00
Thomas C. Masters, 85.00
Albert Willis, 37.00
According to the best information the fiscal court has at present it will cost about \$16,000 to replace the three bridges destroyed by the recent flood on the Florence and Petersburg pikes. They place the figures as follows, approximately:

Lima bridge, \$1,900.
First bridge out on the Petersburg pike, \$1,900.
Second bridge on same pike, \$1,900.

The salary of the County Superintendent of Schools was fixed at \$1,000 a year to begin the first of next January. Heretofore the court had been allowing that of \$700 a year salary. In asking the court for an increased salary Supt. Gordon stated that when he was a candidate for the office he understood the Superintendent's salary was \$1,200 a year.

The County Road Engineer was ordered to advertise for bids for the construction of the bridges on the Burlington and Petersburg Turnpikes as soon as the State Road Department sent him the plans and specifications for same.

Not Melon Hungry.

Elmer Kirkpatrick took a truck load of watermelons to Crittenden, Grant county, last Thursday afternoon, but did not find the granitic melon hungry, and had to haul a good portion of them back.

Threshed 15,000 Bushels of Grain
George Hewitt threshed 15,000 bushels of grain this season, 7,000 bushels of it being very fine wheat, the remainder being rye, oats and barley. T. W. Bailey had the largest crop of wheat he threshed, 1,900 bushels.

Learning New Stunts.

Ernest L. Arnold, who is at Ft. Benjamin Harrison, near Indianapolis, writes attorney Benj. Riley in a tone that does not indicate he is in love with the life of an artilleryman. He has been put through many stunts that he had never thought of before he enlisted.

A Big Sale of Land

Master Commissioner Chas. Maurer sold land belonging to the J. S. Cullum estate last Saturday, at Constance, as follows: \$24 acres to Elmer Anderson at \$170 an acre; 18.25 acres to J. J. Rucker at \$91 per acre; \$5.95 acres to Charles Hanauer at \$32 per acre.

E. L. Rouse Dead.

E. L. Rouse, aged 73, died at his home in Pleasant Valley neighborhood, died last Thursday afternoon. The funeral took place from the Presbyterian church in Florence last Saturday morning. Mr. Rouse was one of the county's oldest and best citizens. He had been in poor health for some time.

A Good Reminder.

The remnants of the Ford touring car that was wrecked at the railroad crossing in Erlanger have not been taken from the spot where the train dumped them, and are a vivid reminder of the results of reckless driving, and it may be a good idea to let Lizzie continue to rest where it is.

Growers Holding for Big Prices

Quite a number of the tobacco growers in town Monday were interviewed as to what kind of a price they expect to receive for their crops this year and not a man was found who appeared to be willing to consider anything less than 20 cents a pound from the ground up, and some of them say they have crops that will make over 1,500 pounds to the acre.

Increasing the Acreage of Wheat

The 1918 acreage of wheat in this county will be very much larger than that of this year—in fact it will be much larger than for many years in the immediate past. The farmers have been educated up to the belief that it is their duty to produce more bread material owing to conditions brought about by the war, and then the certainty of receiving better than two dollars a bushel for it has been bearing on the increased acreage.

Union School Doing Its "Bit"

In response to President Wilson's proclamation to the school children of the U. S. Junior membership of the American Red Cross has been organized by the pupils of Union Graded School with 23 members. The following officers were elected: Chairman—Nannie Senour, V-Chairman—Ann Huey, Secretary—Kathryn Hicks, Treasurer—Arlene Clements. This is probably one of the first in the State to be organized and all expect to do good work.

Owen Souther Died in Missouri

Renewing his subscription T. H. Cloves of Pleasant Hill, Mo., writes under date of Sept. 29th: "Owen T. Souther, formerly of Boone county, Ky., died at his home in Johnson county, Missouri, this morning. His funeral will be at Strasburg, Cass county, Mo., tomorrow, September 30. Owen was a Sergeant in Company B, Sixth Confederate Cavalry, a Boone-co. company under Captain Wm. H. Vaughn. Owen left Boone county Ky., in October, 1868, and came to Johnson county, Missouri. Kind regards to yourself and all my Boone county friends."

Still Buying Boone County Farms

Anderson & Asberry bought 24½ acres of land of W. A. Gaines last Thursday, it consisting of what is known as the Paschal Rucker place out on the Petersburg pike and a tract owned by Mr. Gaines at Idlewild, across the Bullittsville pike from the Rucker tract. Both these tracts are very fine land and the location is all that can be desired. In the last few months these two gentlemen have bought 760 acres of land in this part of Boone county at an average of about \$30 an acre. W. A. Gaines, real estate agent, pulled off these deals.

An Irish Combak.

An Irishman employed in large factory has been taken off without permission and seemed likely to lose his job in consequence. When asked by his foreman the next day why he had not turned up the day before he replied:

"I was so ill, sir, that I would not come to work to save me life."

"How was it, then, Pat, that I saw you pass the factory on your bicycle during the morning?" asked the foreman.

Pat was rightly taken back, then regretting his presence of mind he replied:

"Sure, sir, that must have been when I was going for the doctor."—Pittsburg Chronicle-Telegraph

Personal Mention

County Clerk Rogers made a business trip to Cincinnati, last Friday afternoon.

Mrs. F. A. Hall spent several days the past week with her daughters in Newport.

Jaifer Wilson was sick several days last week and Sheriff W. D. Cropper subbed for him.

Mrs. Riley, of Covington, was the guest of her son, Atty. Benj. Riley, several days last week.

Mr. and Mrs. Fred Tanner, of Ludlow, were Sunday guests of Mrs. Tanner's sister, Mrs. Albert Conner.

Elbert Riley and wife, of Dayton, Ohio, were Saturday night and Sunday guests of Mrs. Riley's brother, J. J. Duncan and wife.

Mr. and Mrs. Boggs, of Bellevue, Campbell county, were Sunday guests of Mr. and Mrs. Owen Smith, out on the Bellevue pike.

W. T. Riddell and wife, of Dayton, Ohio, spent Saturday night and Sunday with his brother, L. Riddell and wife. They were accompanied by Miss Laura Frances Riddell, who is attending commercial school in Dayton.

Chas. Beall and son, of Francesville neighborhood, were callers at this office last press day. It is a pleasure to say that Chas. sustains his jovial character as he grows older, and, apparently, the longer he lives the more he realizes there is in life.

Judge Gaines held a special term of the Grant circuit court, last week that did not adjourn until late Saturday afternoon, and Monday he began the regular term of the same court, the business of which will require at least two weeks.

John Hogan, who moved to Florence a few weeks since, has bought a house and lot in Erlanger, and will move to that city in about a month. He purchased of Henly Smith, who expects to move to Boston, Massachusetts, and make his home with his son Rev. Miles Smith.

Hon. A. B. Rouse was at home a day or two this week. He is a member of the Congressional Committee that is investigating the Cincinnati mail tubes that have been installed in some of the large cities, and was on his way to Chicago for that purpose, and incidentally will witness one game of the world's series which will begin there. Congressman Rouse is looking fine, is in excellent spirits as usual, and will be glad to get a few weeks rest from his official duties. Congress will adjourn this week.

John C. White and family moved to Walton last Saturday. They had been citizens of Burlington for four years and would have continued to reside here had it been possible for them to rent a house. Mr. White is the pioneer auto traffic man in this part of the county and had given it his entire attention for the last three years, building up a good patronage. His efforts by marketing away. The demand for houses in Burlington exceeds the supply, consequently the population is not as large as it otherwise would be. Mr. White and family were good, quiet citizens and in this instance what is Burlington's loss is Walton's gain.

Classified Advertisements.

For Sale—Two good fresh milk cows R. B. Huey, Burlington R. D. No 1

For Sale—Two sows and 19 pigs six weeks old Ralph Cason, Bellevue

For Sale—Seven shoats and a cow and calf Thos Hensley, Burlington R. D. 1

For Sale—10 shoats—that will weigh about 70 pounds each, two sows and pigs, and one male hog All pure Hampshire Jos Weaver, Union, Ky.

For Sale—Six year old splendid family horse, afraid of nothing; also good as new buggy Bradford make and harness; also nuns and dle John W Hogan, Florence.

R. A. Brady Sold His Farm
R. A. Brady has sold his farm of about 200 acres down on Middle creek to a gentleman in Newport, and possession will be given at an early date. The buyer being a merchant wants to sell his store before coming to the country.

Has the Local Field So Far
Dr. Yelton seems to have the field as the local tobacco buyer this year. The old reliable buyer, Albert Conner, has not made a purchase as yet, but will be in the market later on as he has been handling tobacco as long that it has become second nature to him.

SHIPPING COAL BY THE WAGON ROUTE.

Manchester, Sept. 28.—Several car loads of coal are being shipped out of Clay county each week by the wagon route. The coal is hauled from one to four miles by wagon to get it to the railroad siding.

Women Anxious to Help Nation.

Washington. — American women making the sentiment which will win the war to arouse the women of the nation to the highest pitch, however, there must be more official information about these statements were made today by Mrs. Ira Couch, Wood, Chairman of the Women's Committee of the Council of Defense. Mrs. Wood has just returned from a tour of eight Middle Western States. She has carried her message into the outlying towns as well as the large cities.

"From what I gathered, it is the women of America who make the patriotic sentiment which will win this war," Mrs. Wood said. "It is the teaching of mothers and wives who see their sons and husbands go that is back of the battle."

"American women are patriotically eager to learn about this war. They don't know about it. They have no conception of why we are in it. They have sent their sons and their husbands, but they don't know why."

"More and more information from the government is necessary. In the outlying towns, I found hundreds of women, all asking me as to the cause of the war."

"Various reports have been maliciously spread. I have found many women who have been told that 'it is England's war' and that it is a millionaire war. They have been told that if they don't sign conservation pledges their husbands will be taken to war. Everywhere I found the malicious rumor that Food Administrator Hoover was planning to seize household supplies."

"Then there must be steps taken to curb unparaphrased utterances. In the smaller districts Senators and Congressmen were regarded as deities with little heads about their heads. What effect do you suppose Mr. Hoover's conservation campaign in Missouri can have when I saw papers containing column after column of Senator Reed's attack on Mr. Hoover?"

"The small town papers are not awake to the danger. I imagine three pages of the daily murder trial and a twenty-five word story captioned 'Riga falls.'"

"But the women are going to know. The Women's Committee is going to flood the country with posters. We are going to issue our own war bulletin, and we are going to see that it gets to every woman in the land. We are going to send hundreds of speakers out to every community in the country. And women's clubs there can not be any Greek orators of Del Sarte or Mme. Savignon's theosophic cult this winter. Every woman's club has got to come out with a program to win the war."

"Women will make the sentiment which will send America into the war with all force. But to the war what to know why war is, and why their boys and husbands must go. The government must tell them. More and more information about the war from the government—that is the great need now."

One Cause of High Prices.

Wonder is expressed by a Boston observer who fresh mackerel sells in the home market for 15 cents a pound while in Gloucester only 30 miles away, the price is five cents a pound. The Kansas observer was amazed because the potatoes, which sold there at 4 cents a peck were selling for that amount in Boston. The traveler abroad prior to the great war was troubled because of their ability to purchase American made standard articles for 40 percent below the prices in the United States. An authority who has been assembling these variations has reached the conclusion that they are due to the carelessness and stupidity of the community as a whole. In other words the purchaser must be satisfied by the vendor that he is getting value for his money before the transaction is completed. They will not pay the prices for American goods that he extends the side of the water. To that extent the indictment of the authority is fully supported.

At the bottom of the trouble is the accountable spirit of the American in insisting upon getting what he wants when he wants it. Self-denial is intolerable. He is an infant in all things else, but in his personal needs, maintaining to his personal needs, commercial life the average American would not for a moment purchase in Boston for 13 cents what he could buy in Gloucester for five cents.

Just now there is a national movement for the conservation of all things necessary for life, comfort, and a million teachers are assiduously inculcating lessons of thrift into minds that never knew it before. What is a necessary and collateral lesson is the absolute demand for careful buying. Let the purchaser ascertain what is a fair price in an article, and if the dealer refuses to make an exchange on that basis let the dealings come to an end. After that stage has been reached, depend upon it, matters will soon adjust themselves upon an equitable basis.

For example, observe the action of the steel manufacturers when the government fixed prices at one-half the market figures for months. They acquiesced with no demerit. One of the principal reasons was that the Government knew to a hair what it cost to produce steel, and was aware that the steel industry had been accumulating enormous profits in that case investigation returned upon individuals upon the investigation as a matter of fact it always will. — Bingham.

Tributes of Respect.

Hall of Walton Lodge, No. 719, F. and A. M., Waton, Ky., Sept., 22nd, 1917.

Whereas, Death has again invaded our fraternal circle, and brought sadness to our hearts in the taking away of our beloved Companion and Brother, Dr. Columbus C. Metcalfe, who was called to the Celestial Grand Lodge on High, Sept. 26th, 1917, and feeling the sorrow of our great loss and desire to give expression there to in the following resolutions:

Resolved, That in the death of Bro. Metcalfe, Walton Lodge, No. 719, and McClure Chapter No. 48, have lost one of their best members, and one whose memory will be cherished for his many kindly and fraternal acts; one who was ever ready to minister to the wants of the needy. He was for years the secretary of both organizations and his efficient work contributed greatly to the success of both institutions.

Resolved, That our heartfelt sympathy and condolence is tendered the bereaved widow and the two little children, the father and mother, the devotion of all indicating the great bond of affection that existed between them and our departed brother. We commend them to the tender mercy of the Grand Architect of the universe that may give them comfort in this sad hour.

Resolved, That the usual badge of mourning be worn by the members, these resolutions spread on the minutes of this lodge and Chapter, and published in the Masonic Home Journal and local papers.

Respectfully submitted,
D. B. Wallace,
Jno. L. Vest,
J. Ed. Bristol,
Committee.

Keep the Horse Busy.

The horse that works 1,000 hours a year and costs \$100 for feed, shelter, etc., is cheaper than the horse that costs but \$75 for keep and works but 500 hours. The former costs but 10 cents per hour worked, while the latter costs 15 cents. Wise use of the farm horse to his fullest working capacity is thus a saving to the farmer, according to U. S. Department of Agriculture Bulletin 500, "The Horse and Cost of Keeping." Farm Horse and Cost of Keeping, Labor, embodying the results of the study of the records for 316 horses on 27 farms in Illinois, Ohio and New York.

In Illinois, 154 horses on 10 farms showed an average yearly cost for keep of \$106.65. The average yearly hours worked per horse were 1,053 and the cost per hour worked 9.56 cents. Records for 72 horses in Ohio showed an average cost of keep of \$120.27, average hours worked per horse 826, and cost per hour 13.93 cents. In New York the average yearly cost of keep of 90 horses on 10 farms was \$146.02, average hours worked 1,020, and average cost per hour 14.22 cents.

PENDLETON COUNTY.

There are ten thousand acres of alfalfa in Pendleton county, and our farmers have hundreds of tons for sale. The quality of the hay was never better. Right here at the close of the summer season the growers are asking \$25 per ton for this hay, and with every prospect of the price going higher. This is the highest price our farmers ever received for this crop in September. It seems that the alfalfa boys have been "up" on the price. Right here this year, as the crop is worth four times as much as the to-be crop. Hay at \$25 per ton will make it pretty expensive to winter horses and stock. Grant Dayton, of Wolf Run pike, has probably made the first sale of tobacco this season. He has sold a part of his crop to Grant Dayton at 28 cents a pound straight. It is exceptionally fine tobacco, and the price is exceptionally fine. But every indication points to tobacco being a "wheel horse" in the price at the opening of sales in the coming season. — Fairmount Outlook.

Bravery Rewarded.

Paris, Sept. 29. — The first American soldier to die in the war crossed the palm in John McClain, of Dayton, Ohio, says the Paris Herald. On the night of September 18, a German airplane flew over the village of Dayton and dropped several bombs. One fell within fifteen feet of a building around which some fifty villagers had gathered. Right here a part of his crop to Grant Dayton at 28 cents a pound straight. It is exceptionally fine tobacco, and the price is exceptionally fine. But every indication points to tobacco being a "wheel horse" in the price at the opening of sales in the coming season. — Fairmount Outlook.

SHOT BY OFFICER.

Whitesburg, Sept. 26. — Bony Hall, deputy jailer of Whitesburg, shot and instantly killed Thos. Lawson, 35 years old, at Nepona, above here, this morning. The officer, it is claimed, went to arrest a revolver, who resisted, pulling a knife. Lawson was shot thru the head. The officer came to Whitesburg and surrendered to Sheriff Hall.

NOTICE.

Beginning with Monday Oct. 1, the Clover Leaf Creamery will receive cream but once each week, both at Huntington and Union, Monday at Huntington and Saturday at Union will be the regular receiving days.
JOSEPH HUEY.

COMMUNITY STORE IDEA BROUGHT TO U. S.

What is believed to be the first community store in the United States of the type which is common in England, has been established in Washington, D. C. It is owned by the two or three hundred families which patronize it. Goods are sold at as near cost as possible and the profits are paid to each member of the organization in proportion to the amount of goods he has purchased. The picture shows the interior of the store. Edward Evans, a native of England and manager of the store, is in the center. He was a Congressional minister in Washington for four years before establishing the community store.

SOME SMILES

In a Crowded House.

First Man—Can we stay here all night?
Second Man (helpfully)—We won't take up much room, walk in my sleep.

Quick Witted.

Wife (awakened by noise)—Who is there?
Burglar (sweetly)—It's hic—just me, dear.
Wife—Oh, what a relief!

Tact.

Mrs. Blink—They say large feet are in favor now.
Mr. Link—Then I'm sorry for you, Mrs. Blink, for you'll be hopelessly out of style.

Lucky.

"That fellow imagines he has millions."
"He's lucky. When he needs money all he has to do is to draw on his imagination."

Perfectly Correct.

"It is a shame the way that beauty doctor is selling those pretty girls gold bricks."
"Entirely legitimate business. He is merely grafting peaches."

The Wrong Idea.

"John, you seem to gain flesh every day," the grocery business man agreed with you.
"What do you weigh last?"
"Well, Henry, I really don't know, but it strikes me it was a pound of butter."

Quick, Diogenes, This Way.

Cynic—Funny guy, this man Blinkers.
Al—How's that?
Cynic—Didn't meet the prettiest girl in the world during vacation.

A Family Improvement.

Fond Mother—Johnny, your little brother started to walk today.
The Kid—Good! Now he can walk the floor with himself at night.

Wise and Otherwise.

A good memory test is to remember the poor.
He is a wise farmer who never harrows the feelings of his wife.

Marrying one's Ideal Husband or wife is to take a mean advantage.

A grass widow is a woman who succeeded in getting unmarried.

You may have noticed that of rapid transit facilities.
Forethought consists in knowing where to borrow an umbrella when it begins to rain.

Asleep Up-to-Date.

Once upon a time there was a young lamb, who had never strayed from the confines of the family fold. He was a peaceful lamb, and he remained close within the limits allotted the sheep with which he traifed.

It happened, however, that a war broke out among the beasts of the forest. Came the selective draft, and the lamb was among the first to be chosen.

So he developed fast feet, tuberculosis, arteriosclerosis, astigmatism, varicose veins, and a third arm dependent upon him. But he went, just the same.

When he reached the trenches, the lamb won seventeen medals for valor within the first month of fighting.

MORAL—You can't tell a lamb by its bleat.

"Keep Cheerful and Mind Your Own Business," Is the Message of John Burroughs

John Burroughs, famous American naturalist and writer, a leading disciple of the simple life, is eighty years old. He has lived with nature since boyhood, and knows the birds, the squirrels and the butterflies, the woods, the fields and the mountain streams. He was the friend of Lincoln, of Emerson, of Holmes, of Whittier and of Walt Whitman. His recollections of these great friends are sufficient companions for John Burroughs in his woodland cabin. "I am very happy in my work, and I hope to write a book each year for many more years," he says. He is at his best, despite his age, and leads an active life in the open. His message to the world is: "Keep cheerful and mind your own business."

Mr. Burroughs taught school in his youth, became a bank examiner, and had a promising career before him in financial affairs, when he discovered ambition for wealth to lead the simple life. His first book was his "Notes on Walt Whitman," published in 1887. During the past half-century he has written constantly, and has contributed much to the nature library. He married Ursula North in 1887, and in the winter time he now makes his home with his daughter and grandchildren at West Park, N. Y.

Mother's Cook Book.

The loyal heart is never alone. There are ever comrades real. Who will make the cause you love their own. And stand by you true as steel. — Mary Sangster.

Seasonable Dishes.

Bananas are fruit that should be ripe or well cooked before serving. Baked bananas may be given to the little people. Peel a half dozen bananas and place them in a baking dish with sugar, water, lemon juice and a little butter. Bake them often while baking and serve the sauce with the fruit.

Corn Meal Muffins.

Beat two eggs until light, add three-fourths cup of sugar, or honey may be used—a fourth of a cup of softened shortening, one cupful of sour milk, a half teaspoonful of soda, two cupfuls of flour and a cupful of corn meal with a teaspoonful of baking powder and a half teaspoonful of salt sifted with the flour. Bake in hot buttered muffin pans 25 minutes.

Peach Ice Cream.

Take a quart of thin cream, add a cupful of sugar, a teaspoonful of lemon juice, a fourth of a teaspoonful of salt, and two cupfuls of very ripe peaches put through a sieve. Mix and freeze.

Chicken Pie.

A very good pie may be made from an old fowl. Cook it first as for fricassee, lay the pieces with pieces of pork in a buttered pudding dish, add slice of onion for flavor, season with salt and pepper, add a cupful of milk and cover with a good crust. Just before serving add a cupful of cream which will make any chicken pie delicious.

Roll the bone of a fowl, add two or three tablespoonfuls of gelatine to the broth with a cupful of finely minced chicken well seasoned and mold. This may be served with salad dressing on lettuce.

Germ of Red Cross Idea.

The germ of the Red Cross idea seems to date back into the sixteenth century, when a young Syrian Neoplatonist soldier saw the error of his ways, became a priest, and devoting himself to relieving the plague-stricken, organized the "Fathers of the Good Death," whose members were pledged to the same service and who wore on their breasts a red cross in memory of the suffering of Christ. This was Camillus de Lellis, who fell a victim to the disease he combated, and who, canonized by Benedict XIV. in 1746, became St. Camillus in the Catholic calendar of saints.

Dibowski's Cafe

Mere Money Getting.

As I approach the end, I am more than a little puzzled to account for the instances I have seen of money success—money getting. It comes from a rather low instinct. Certainly, so far as my observation goes, it is rarely met with in connection with the finer or more interesting traits of character. I have known and known tolerably well, a good many "successful men"—"big" financially—men famous during the last half century, and a less interesting crowd I do not care to encounter. Not one that I have ever known would I care to meet again, either in this world or the next; nor is one of them associated in my mind with the idea of humor, thought or refinement. A set of mere money getters and traders, they were essentially unattractive and uninteresting.—Charles Francis Adams.

System Important Habit.

One of the most important habits to form is that of system. It is a habit natural to some women, but to most it is an acquired one. It is generally a cultivated virtue, achieved through dogged persistence and in spite of many a falling from grace. Some of the most systematic persons can recall days when an utter lack of system dominated their lives. The discomfort they suffered then keeps them on guard lest they slip back into their old way of doing. It is best to begin to be systematic when one is young, but there is no bigger mistake than to consider unsystematic ways irremediable after youth has passed. Anyone can cure the fault of want of system and save oneself needless inconvenience and increase one's usefulness to other people.—Exchange.

The Scale.

In a confidential talk to a group of medical students, an eminent physician took up the extremely important matter of the maximum fee. "The best reward," he declared, according to the Post Magazine, "come of course to the established specialist. For instance, I charge \$25 for a call at the residence, \$10 for an office consultation, and \$5 for a telephone consultation." There was an appreciative and perhaps an envious silence, and then a voice from the back of the ambulance spoke: "Doctor," it asked, "how much do you charge a fellow for passing you on the street?"—Youth's Companion.

Black Paper.

It is not always easy to get hold of a good sample of black paper for making masks—a paper, that is, which is absolutely opaque and free from pinholes. The black paper that is used on roll film cartridges is a particularly suitable for the purpose. If the photographer is a plate and not a film user, it is still likely that he will know someone who does use films—or that his dealer develops them—and either should be willing to give him a hand-sampler of what otherwise would be regarded as rubbish. When obtained it should be cut to size and put away flat, under pressure, until it is wanted for use.

Was Very Weak.

Business men often have excuses from debtors for nonpayment of accounts which give themselves away. A short time ago a firm had occasion to press for a much-overdue account. The usual letters were sent, first mild, second stronger, and the third, ending up with the grand ultimatum, which brought the following reply: "Dear Sirs: I am writing you from bed, where I have been ill for several weeks." After enumerating all his family and business worries in a very long letter, he finished by saying: "When I have strength I will write you out a check."

To Clean Paint.

Direction for washing painted walls: Common baking soda works miracles, it has been found. Use two pails of tepid water, wet cloth, spread a little of the soda on it and wash space that can be easily reached. Rinse in clear water and wipe dry. Be sure to wash in one direction in order to avoid streaks when dry. All grease and dirt will disappear with very little rubbing and you will be pleased with results. Use the soda sparingly (a five-cent package will be sufficient for the average kitchen). In cleaning paint add a teaspoonful of kerosene oil to warm water.

Proverbial Wisdom.

All countries have sayings dealing with marriage, mostly taking rather a cynical view. The Italians seem to take a fatalistic attitude, for they say, "In buying horses and in taking a wife, shut your eyes and commend yourself to God." A wholesome piece of advice is contained in the Hindu saying, "Women are wise offhand and fools on reflection—so take your wife's first advice and not her second." The Irish saying is very comforting: "A man's best fortune is his wife."

Measures Speed of Clouds.

The Comanephoscope is a device for measuring the speed of clouds. It consists of an upright brass rod about nine feet long, bearing at its upper end a crosspiece to which a number of equidistant vertical spikes are attached. The observer turns to the crosspiece until the cloud appears to travel along the line of spikes, and notes the time it takes to pass from spike to spike. This time is then divided from which he can find the speed.

METHODS OF DRYING

Three Ways Applicable in Making Dried Products.

SHRED OR CUT INTO SLICES

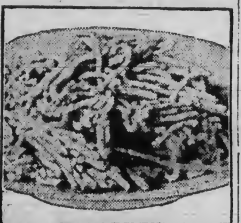

When Artificial Heat is to Be Used, Freshly Cut Fruits and Vegetables Should Be Exposed First to Gentle Heat.

(From FARMERS' BULLETIN 841, United States Department of Agriculture.)

Three main ways of drying are applicable in the home manufacture of dried fruits and vegetables, namely, sun drying, drying by artificial heat, and drying by air blast. These, of course, may be combined. In general, most fruits or vegetables, to be dried quickly, must first be shredded or cut into slices, because many are too large to dry quickly or are covered with a skin, the purpose of which is to prevent drying out. When freshly cut fruits or vegetables are to be dried by means of artificial heat, they should be exposed first to gentle heat and later to the higher temperatures. If the air applied at the outset is of too high a temperature, the cut surfaces of the sliced fruits or vegetables become hard, or scorched, covering the juicy interior so that it will not dry out. Generally it is not desirable that the air temperature in drying should go above 140 degrees to 150 degrees Fahrenheit, and it is better to keep it well below this point. Insects and insect eggs are killed by exposure to heat of this temperature.

Degree of Heat.

It is important to know the degree of heat in the drier, and this cannot be determined very accurately except by using a thermometer. Inexpensive oven thermometers can be found on the market, or an ordinary chemical

These Potato Strings Have Been Cooked, Passed Through Meat Grinder Used in Ordinary Homes.

thermometer can be suspended in the drier. If a thermometer is not used, the greatest care should be given to the regulation of the heat. The temperature in the drier rises rather slowly and the product may scorch unless close attention is given. The reason sun drying is popularly believed to give fruits and vegetables a sweeter flavor lies probably in the fact that in the sun they never are scorched, whereas in the oven or over a stove scorching is likely to occur unless careful attention is given them.

Drying of certain products can be completed in some driers within two or three hours. The time required for drying vegetables varies. However, it can be determined easily by a little experience on the part of the person doing the drying. The material should be stirred or turned several times during the drying in order to secure a uniform product.

The ability to judge accurately as to when fruit has reached the proper condition for removal from drier can be gained only by experience. When sufficiently dried it should be so dry that it is impossible to press water out of the freshly cut ends of the pieces, and will not show any of the natural grain of the fruit on being broken, and yet not so dry that it will snap or crackle. It should be leathery and pliable.

Evaporation of Moisture. When freshly cut fruits or vegetables are spread out they immediately begin to evaporate moisture into the air around them, and if in a closed

Dried Snap Beans Which Were Sliced Before Drying.

box will very soon saturate the air with moisture. This will slow down the rate of drying and lead to the formation of molds. If a current of dry air is blown over them continually, the water in them will evaporate steadily until they are dry and crisp. Certain products, especially raspberries, should not be dried hard, because if too much moisture is removed from them they will not resume their original form when soaked in water. On the other hand, the material must be dried sufficiently or it will not keep, but will mold. Too great a strain cannot be held upon this point. This does not mean that the product must be baked or scorched, but simply that it

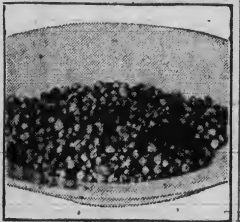

must be dried uniformly through and through.

It will be found advisable also to "condition" practically all dried vegetables and fruits. This is best done in a small way by placing the material in boxes and pouring it from one box into another once a day for three or four days, so as to mix it thoroughly and give to the whole mass an even degree of moisture. If the material is found to be too moist, it should be returned to the drying trays for a short drying.

Directions for Drying. Many of the products for which directions are given here may be dried either with or without preliminary blanching. In such cases both methods are described. Alternative methods are designated by letters.

Sweet Corn. Only very young and tender corn should be used for drying, and it should be prepared at once after gathering.

(a) Cook in boiling water two to five minutes, long enough to set the milk. Cut the kernels from the cob.

Dried Green Peas.

with a sharp knife, taking care not to cut off pieces of the cob. Spread thinly on trays, and place in position to dry. Stir occasionally until dry.

(b) Boil or steam on the cob eight to ten minutes to set the milk. To improve flavor a teaspoonful of salt to a gallon of water may be used. Drain well and cut corn from cob, using a very sharp and flexible knife. Cut grains fine, only half way down to the cob, and scrape out the remainder of grain, being careful not to scrape off any of the chaff next to the cob. Dry from three to four hours at 110 degrees to 145 degrees Fahrenheit. When field corn is used, good, plump roasting-corn stage is the proper degree of ripeness. A pound of dried corn per dozen ears is an average yield.

(c) The corn may be dried in the sun. Dry in oven ten to fifteen minutes, and finish drying in the sun. Sun drying, of course, is not satisfactory in moist weather.

Pack in cartons or boxes for a few days to "condition."

Lima Beans. Lima beans can be shelled from the pod and dried. If gathered before maturity when young and tender, wash and blanch from five to ten minutes. Length of time for blanching depends upon size and maturity of beans. Re-

Sliced Beans in Tray, Ready for Drying

move surface moisture and dry from three to three and one-half hours at same temperature as string beans.

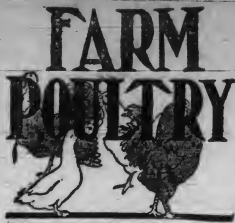

Peppers. (a) Peppers may be dried by splitting on one side, removing seed, drying in the air, and finishing the drying in the drier at 140 degrees Fahrenheit. A more satisfactory method is to place peppers in biscuit pan in oven and heat until skin blisters, or to steam peppers until skin softens, peel, split in half, take out seed, and dry in the air, and finishing the drying in the drier at 140 degrees Fahrenheit. In drying thick-fleshed peppers like the pimento do not increase heat too quickly, but dry slowly and evenly.

(b) Small varieties of red peppers may be spread in the sun until wilted and the drying finished in the drier, or they may be dried entirely in the sun.

(c) Peppers often are dried whole. If they are large they can be strung on stout thread; if small, the whole plant can be hung up to dry.

Spinach and Parsley. Spinach that is in prime condition of greens should be prepared by careful washing and removing the leaves from the roots. Spread the leaves on trays to dry thoroughly. Slicing will greatly facilitate drying.

Parsley should be treated in the same way as spinach. Celery tops, parsley, mint, sage, and herbs of all kinds need not be blanched, but should be washed well and dried in the sun or in the drier. These are good for flavoring soups, stews, gravies, etc.

FARM

WET MASH BEST FOR CHICKS

Only Secret in Growing Fowls Is to Give Them What They Really Like and Plenty of It.

There is nothing a growing chick likes better than a nice, cool feed of wet mash. There is only one secret to growing chicks and growing them rapidly, and that is to give them the feed they like and give to them in such amounts as to satisfy the appetite and as often as is necessary.

For the first 12 weeks of the chick's life the bird will stand considerable forage, after which time the birds will have developed sufficient size of frame and strength of body with which to range and gather most of their own living.

The following wet mash may well be fed from the third week to the twelfth, or for such time as is necessary to produce a good-sized broiler: Two pounds of bran, two pounds of cornmeal, two pounds of middlings, one pound of commercial meat scrap. This mash should be mixed with either skim milk, sweet milk or sour milk. The latter is preferable.

COVERING FOR SITTING HENS

Combination Nest Box and Runway Is Easily Constructed—Roof Should Be Three Feet Wide.

Take this nest box and runway combination by using five 1 by 12 boards to make the frame and partitions. Place these 1 by 12s from 13 to 24 inches apart, according to the width wanted for nests and runways. The roof for the nests should take up about three feet of space; that is, in width. The remainder of the space is covered with chicken netting over the runways. The roof of the boxes is made as shown in the diagram, writes Mrs. Maggie L. Long of Hammond, Okla., in Farm Progress. The back half of the roof is hinged, and this may be left open and used by laying hens until the time comes to put them on eggs.

When used for sitting hens, the door is closed and food and water placed in the runways through an opening in the netting, where it is

Nest Boxes and Runways.

lifted at the end of the runs. The hens are not turned out during the period when the eggs are incubating. The eggs will hatch much better and the whole job is much less trouble. This can be moved and cleaned easily, and the chicks can be kept here for some time after hatching.

MARKET FOR SURPLUS EGGS

No Better Method Than to Organize Co-Operative Club Get In Touch With County Agent.

To secure the best prices for surplus eggs or poultry, there is no better method than to organize in your community co-operative egg and poultry clubs. By getting in touch with the county demonstration agent you can secure valuable assistance, not only in organizing, but afterwards, in finding good markets for all your products. Make sure that the club's rules provide for thorough grading and packing, live up to the rules and your marketing troubles will be over.

PLAN FOR PRESERVING EGGS

Cheapest and Most Successful Method Is Water Glass—Place Solution in Cool Place.

The most successful and cheapest method of preserving eggs is in water glass (sodium silicate). One gallon of sodium silicate, about 50 cents' worth, when added to 15 times as much water, which has been boiled and cooled, be enough to preserve 50 dozen eggs. The solution should be prepared and put in the vessels in a cool place. Then the eggs should be gathered. There should be at least two inches of solution covering the eggs.

CRACKED GRAINS FOR FOWLS

Less Trouble to Purchase Prepared Feeds Where but Few Chickens Are Kept—Look for Grit.

When one has only a few chickens, it is less trouble to purchase the prepared chick feed, but where a considerable number are raised it is sometimes cheaper to buy the finely cracked grains and mix them together. Grain chick feeds contain a large quantity of grit and may contain a grade of poor quality, so that they should be carefully examined and guaranteed as to quality secured before purchase.

Safety and Service

We first look to the safety of the depositor's money and second, to the service we are best able to render our customers.

How well we have succeeded along this line is reflected in the growing condition of the bank which shows resources of nearly One-Third of a Million Dollars.

We are always glad to confidentially talk over any matter of business. Why not mail us your business?

We pay the taxes on all money deposited with us.

About Prisoners of War.

We note in the dispatches a long and very severe indictment of the Austrian Government for its treatment of its prisoners of war, who to the number of about 1,000,000, mostly Russians and Italians, are held in prison camps in Hungary. Complaints, as made specifically relate to the lack of proper food and clothing as they are described in a partial exhibit; that there is no explanation for their having very little food for themselves and for their enough physicians to care for their own wounded. These facts are indeed condone deliberately explain of prisoners, but the Austrians part the situation in this manner.

Considering the prodigious number of men now confined in military prisons, we believe. The Manchester, England, G. disposed to exaggerate says that the enormous number of the men have been total of 4,500,000. Of these many prisoners are undoubtedly dead, but unless the mortality has been much larger than has been supposed, it is fair to assume that close to 4,000,000 men are now held as prisoners of war by the various belligerent nations.

How the prisoners are divided by nationality is not given, other than the statement that Germany holds 1,000,000 Russian prisoners, the Austrians more than 1,000,000. The Germans use their Russian prisoners to advantage. All of these prisoners work ten hours a day seven days in a week, for what they receive in food. The French and British prisoners in Germany are said to be treated better, but as the Manchester Guardian points out, there is little information obtainable about them. Before the United States came into the war the American Ambassador at Berlin was permitted to have inspections made of the prison camps in Germany for the French and British, but not of the camps where the Russians were confined. Since Mr. Gerard came home the Spanish Ambassador at Berlin has discharged that duty, but he has made few reports and presumably is given little authority.

The French have sent many of their prisoners to French Africa, where they are treated well. The British unquestionably treat their prisoners humanely and furnish them with an abundance of food. The Russians have a half million more German and Austrian prisoners back in Siberia where they have not, we hope, been forced during the revolution.

There have been very few exchanges of prisoners of war. Before the left Berlin Mr. Gerard arranged for the exchange of a few thousand British soldiers who had been too badly wounded to ever hope to serve again for a similar number of Germans in the same situation. The exchange of able-bodied men seems to have been given no consideration by any of the warring nations.

One of the young animals kept by Fred Morris last winter won its race at Louisville a few days since and paid \$213 to \$1 bet on it. Mr. Morris says that his horse is going to bet two dollars on each animal he returns to its owner when it is entered for a race.

The farmers of Nicholas county report that about 50 per cent of the tobacco crop has been cut and housed. A hail storm visited various sections of Nicholas county and heavy losses were reported in many districts. Some losses were covered by insurance. There is a shortage of tobacco in the section, as evidenced by the high price in the market. While the crop has been cut considerably, it is estimated that the 1917 crop will be about 50 per cent of the 1916 crop.

Guthrie.—R. B. Merriweather, a farmer, residing a few miles from Guthrie, lost by fire a tobacco barn containing about 10,000 lbs. of fine tobacco. The tobacco was being fired at the time.

Paris.—Allie Rowland, mail carrier on Route No. 1, out of Paris, while cranking his auto preparatory to starting on his regular trip, severely wrenched his back, necessitating his removal to his home.

Owensboro.—Shelby Lucas, of Breckinridge county, was held over to the Federal grand jury on a charge of failing to register under the draft law. He is married and has two children. He said he was of the opinion that he was 33 years of age, but not certain, and entered a plea of guilty to the charge against him.

Ashland.—Owing to an epidemic of scarlet fever the city Board of Health has ordered the schools closed for a week and no children under sixteen years of age will be permitted to attend church, Sunday school, theaters or any public gathering during that time. There are more than 100 cases of the contagion in the city. Several deaths have resulted.

Franklin.—Tobacco growers of this county have declined all offers to sell their crop at the barn, as many who sold last season sustained heavy losses when compared with the prices realized on the home-leaf floor. The impression prevails that the best grade of dark tobacco will bring from \$15 to \$18, while lugs will command an even higher price than last year.

Owensboro.—When his son, who was called for service in the National Army, left for camp Zachary Taylor, Virgil I. Anderson, of Rockport, Ohio county, it is alleged, went to the station with him, and in the presence of the other National Army men and a large crowd, abused individually and collectively every branch of the Government and every public official from the President down to members of his local draft board. As a result Anderson was placed under arrest and brought to Owensboro and placed in jail. He will be given an examining trial before Commissioner Wells.

Hickman.—Valuable walnut logs have been recovered from the bottom of Lake Michigan where they have laid since the great earthquake in 1812, which felled the trees and formed this famous lake. The logs have been shipped to an Eastern factory for the construction of airplanes and hydroplanes. The hundreds of acres of fine walnut and oak which went down when the earthquake occurred in 1812, and which are in the bottom of the lake, can be seen in low water. The value of the walnut lumber has been enhanced a hundred fold by demand for it in the construction of army airplane propeller blades.

Augusta.—The Rev. Father Patrick (Fred O'Neill) is the guest of his parents, Mr. and Mrs. John O'Neill and Mrs. O'Neill, after spending the last four years in Europe completing his studies for the priesthood. Father Patrick was within ninety miles of Gorizia, Austria, when that city was captured by the Italians and could distinctly hear the cannonading. He says the German Powers are short on breadstuffs, milk and butter. Each person is allowed four ounces daily of a bread made from rye, potatoes and turnips. He will leave here next week for Culman, Ala., where he will be a member of the faculty of the college at that place.

Lexington.—A literary prodigy has been discovered in this city in the person of Joe Lee Davis, the 11-year-old son of Mr. and Mrs. R. Lee Davis, of 255 South made his debut as a poet by having issued from the press of a local house an attractive volume of his poems under the title "Boyhood Dreams." In view of the fact that he has been "making rhymes" since he was 7 years old he is the youngest recognized poet in America. All told he has written nearly 100 poems, some of which are of extraordinary merit. Fifty-five of these have been collected and arranged for publication in this volume. He has also written several short stories.

News from Indiana.

(Lawrenceburg Press.)
Rossville Distilling Co. made its last drawing off Saturday, but has not been compelled to lay off any more men besides those mentioned in the Press.

The Bauer Cooperage Co. has closed down its plant indefinitely, and the greater number of its 125 employees are at present without work. This establishment is the largest in the United States engaged in the manufacture of whiskey cooperage exclusively.

The C. L. and A. has placed an order for seven eighteen-ton cars of the improved type in use in Cincinnati. Cars will be lower than the old ones, and will have but one step. Doors will slide instead of being on hinges. It is expected that the cars will be in service by Jan. 1.

A local dealer in automobiles makes the assertion that there are no less than seventy-five persons in Dearborn county who are about ready to place their orders for machines. If Dearborn county is a fair average in this respect, it is easy to account for the phenomenal growth of the automobile industry.

Pass Along the SMOKES

YOU warm-hearted people of Boone county won't let the men who are fighting your fight go smoke-hungry.

Not a bit of it. You are going to see to it that they get all the tobacco they need—just as the folks back home in England and France are taking care of the smokes for Tommy and Poilu.

It isn't much to do—considering. A dollar a quarter from you that gives a little comfort to one of your own flesh and blood, doesn't stack up to much alongside the fact that the very man you are befriending may have to give up his life.

But it's a regular thing to do—and you "regular" men and women will do it.

This is the way. Fill in that coupon below put it in an envelope together with all you can afford to give and drop it in the nearest box now, addressed to

Boone County Recorder Tobacco Fund

Our paper has joined The Courier-Journal and The Louisville Times in this most worthy undertaking.

Approved by the Secretaries of War and Navy, the management of this fund buys its tobacco at cost—every contribution of twenty-five cents means forty-five to fifty cents' worth of tobacco for the men out there. No one profits but the fighting man—rents, postage, advertising are all contributed and the soldier who gets your tobacco will send you a postal telling how much it meant to him.

There's no argument here. Just put your name on that blank line and pass along the smokes.

Recorder, Burlington, Ky.

Inclosed find \$..... to buy..... packages of tobacco (pipe or cigarette tobacco or plug chewing) or cigarettes through the Courier-Journal and Louisville Times "Our Boys in France Tobacco Fund" for American fighting men in France.

I understand that each dollar buys four packages, each with a retail value of forty-five or fifty cents, and that in each of my packages will be placed a postcard, addressed to me, on which my unknown friend, the soldier, will agree to send me a message of thanks.

BROODS OVER DRAFT AND SHOOT HIMSELF.

Carlisle, Sept. 28.—Wm. Atkinson, 22, prominent young farmer and son of Robt. A. Atkinson, was found in bed at his home near Sharpshurg today shot in the temple and in a critical condition. No cause can be assigned for his attempted suicide unless he was brooding over being recently drafted for army service.

TObACCO CRoP HoUsED.

Franklin, Sept. 28.—The bulk of the tobacco crop in this county is cut and housed, and is said to be the best in quality grown in years. Herebefore 3,000,000 pounds have been sold on the Franklin market. A tobacco grower expressed the opinion that double this amount will be sold this season at a higher figure than ever before known in this section of Kentucky.

Three large sales of personal property advertised in this issue. Look them up.

Salmon are being caught in large numbers in the river these frosty mornings.

Mr. Ryle and wife, H. T. Gaines and wife and Mrs. W. T. Ryle spent last Sunday with Chas. J. Craven and wife in Latonia.

A colt Frank Kelly was riding one day last week became obstreperous and before it was straightened out it fell, spraining one of the rider's wrists badly.

Mr. G. M. Foster made a trip to Burlington, Boone county, Ky., his native home; this is the first he has made to Burlington since 1855. All the old settlers were glad to see him.—Madisonville, O., Bulletin.

A. B. Renaker was called to Dry Ridge, Grant county, last Friday because of the death of his sister, Mrs. Quarad. The funeral took place Sunday afternoon and was attended by a very large number of relatives and friends.

Miss Alma Mae Eddins is learning the switchboard at the local telephone exchange with a view of becoming Miss Melva White's successor, the latter having moved to Walton last week with her parents, Mr. and Mrs. John C. White.

CARD OF THANKS.—I take this method of thanking my many friends and customers for their liberal patronage while in the auto bus business in the past four years while in Burlington. My dealings with the passenger traffic during this period has been very pleasant indeed. Thanking one and all for past favors. I remain yours, etc.

JOHN C. WHITE

While on a tour of investigation in his attic one day last week Marce Riddell discovered a box of curios consisting of old pocket cutlery, pipes, match boxes, and so forth and so on, being articles which his grandfather had put away for safekeeping, the existence of which being known to no one since the death of the old gentleman many years ago. They are prized very highly by his grandson.

Following business was transacted by the county court last Monday.

The last will and testament of C. C. Metcalfe admitted to probate.

The last will and testament of E. T. Krutz was admitted to probate, and the widow, Mrs. C. R. Krutz, qualified as executrix. B. H. Berkshire, Eugene Gordon and M. F. Wingate were appointed appraisers.

R. O. Rouse was appointed administrator of the estate of E. L. Rouse, deceased. W. P. Beeman, Edward Clegg and Joseph Weaver were appointed appraisers.

School Notes.

To the Voters of Boone County: On Saturday next trustees in one half of the Sub-Districts of the county will be elected to serve the schools for two years.

The effect that the voting will be held from 1 p. m. to 5 p. m. Now, these positions are the basis of the whole success of an efficient system of schools in the county.

The Sub-District trustees really control the entire school as long as he remains within the limits of the law.

No teacher can be elected over the one he recommends. He must see that the school begins on time, daily, and classes on time; must visit the school and patrons; and encourage the attendance report cases to Superintendent of county which do not attend. He must see that the house is clean and comfortable, that of a permanent character, the grounds fenced, necessary equipment is in the building, fuel, furniture, water supply—in fact, he is to the school what a father is to the family. In fact, if families we find this parental duty neglected, is it possible we find this school obligation of trustees sometimes neglected?

Now, it is up to the voters themselves, both men and women, to see to it that trustees are elected who are willing to meet these duties cheerfully, and when this is done, then, and only then, may we expect to find "an efficient system of schools."

Let all pull together and not "kick" apart, and that we will have as fine schools as any in the State and superior to many counties in the State. Let say, "all pull together and make it better."

J. C. GORDON, Superintendent.

Did not Commit Suicide

It turns out that Herbert Walton did not commit suicide in Kansas City as stated in this column last week. He was killed and shot twice, once in the temple and once in the throat. These facts were obtained from recent letters received by some of his friends here.

Elected Officers Monday

The Farmers Mutual Fire Insurance Company elected the following directors at its annual election last Monday: J. C. Stevens, E. H. Blankenbaker, J. C. Beaman, J. H. Walton, R. C. McGlasson, E. H. Burlison.

"Somewhere in France"

Amusement Archibald McLendon on Oct. 1, McLendon, of Burlington, is now some where in France.

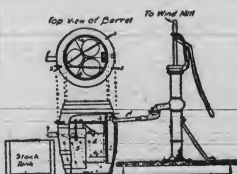

DAIRY FACTS

CARING FOR CREAM ON FARM

Expert of University of Illinois Gives Ten Excellent Rules for Farmer to Follow.

(By H. A. RUEHE, Associate in Dairy Manufacturers, University of Illinois.)

1. Keep the cows clean.
2. Use covered milk pails.
3. Milk with dry hands.
4. Remove milk from the barn immediately and separate it at once.
5. Set the separator so that it will skim cream that will test from 35 to 40 per cent in the winter and from 40 to 45 per cent in the summer.
6. Wash, scald, and dry the separator and all utensils immediately after using. The separator bowl may be dried in a warm oven, though the oven should not be so warm that it will melt the tin on the bowl parts. Setting utensils in the sun is a good practice, as the sunshine acts as a germicide.
7. Keep all utensils and separator parts dry when not in use.
8. Cool the cream immediately after skimming by setting the can in cold running water. Construct a cooling

Properly-Constructed Tank.

1. Inlet, usually 1/2-inch pipe.
2. Wood trough, conducting water to within 2 inches of bottom.
3. Sinks, holding cans in place as shown by cut.
4. Shows position of half filled can; run stick through handle in cover to prevent it from sliding down from the side.
5. Shows position of cap when filled.
6. Shows position of wire mesh, preventing milk from slipping.
7. Outlet, usually 2-inch threaded nipple.

tank so that the cream will be cooled with the water that is used to fill the stock tank.

9. Never mix warm cream with cold cream. Cool the cream before mixing it with previous skimmings.
10. Do not allow the cream to freeze in cold weather.
11. Stir the cream at least twice a day; this will keep it smooth and free from lumps. Do not use a wooden paddle for a stirrer, as it is unsanitary.
12. Deliver cream frequently, at least twice a week in winter and three times a week in warm weather.

PLANT ROUGHAGES FOR COWS

Every Farmer is Advised to Grow Abundance of Alfalfa or Clover—Concentrates High.

Grow an abundance of feed for the cow this season, advises A. S. Neale, specialist in dairy husbandry, division of extension, Kansas State Agricultural college.

"Already the price of concentrates is 'out of sight.' Prices will continue high unless these concentrates are replaced by the cheaper roughages," said Mr. Neale. "Every farmer should plant to grow plenty of alfalfa or clover, and slage. If alfalfa or clover cannot be grown in your crop substitute another leguminous crop, such as cowpeas.

"During the next 12 months the production of dairy products will be due largely to the feeding of roughages instead of concentrates, as has formerly been the case.

"Dairy cows of quality receiving nothing but roughage can produce 200 to 250 pounds of butterfat annually, provided the roughage is fed in abundance and is composed of a combination of slage and a leguminous hay. Of course poor cows will not do so well on this ration."

ROUGHNESS FOR DAIRY COW

Animal is Not Content Unless Stomach Is Full—Feed Grain According to Milk Yield.

Roughness is the first important consideration. A cow is not contented unless her stomach is full. She should always have all the roughage that she will clean up and then the amount of grain she receives should be regulated by the amount of milk produced.

A dry cow in good condition should be fed roughage only, and does not need any grain. In feeding grain to milk-producing cows, the following rule will be used, and is found to work fairly well. Feed one pound of grain for each three pounds or pints of milk produced.

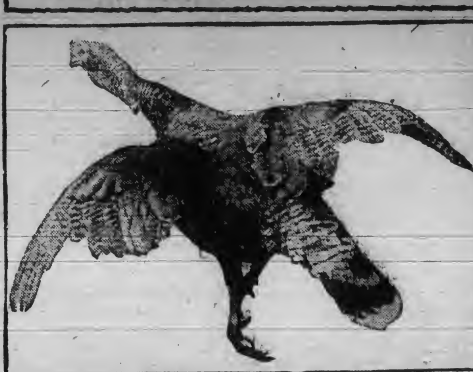

GIVE CALF GOOD ATTENTION

Pen Must Be Kept Clean—Use Plenty of Straw—Furnish Milk, Hay, Bran and Other Feeds.

The calf pen must be kept clean. Use lots of nice straw, not putting it upon a lot of fermented filth, but dig out all manure very frequently and add fresh straw almost daily. Calves are so frisky that they tramp the straw into the manure.

Separator milk, tender clover or alfalfa hay, bran, oatmeal, slage, corn, such feeds are the stuff good calves are made of.

TURKEYS MAKE PROFITABLE SIDE LINE

SELECTION OF BREEDING STOCK IS IMPORTANT.

(From the United States Department of Agriculture.)

Because the number of turkeys in the United States has constantly decreased in the last few years while the demand has perhaps increased, a more profitable side line than turkey raising for those favorably situated for the work could hardly be found. Given plenty of range, it is pointed out by the United States department of agriculture in Farmers' Bulletin No. 701, turkeys will readily find grasshoppers and other insects, green vegetation, the seeds of weeds and grasses, waste grains, and acorns and nuts of various kinds. In this way the cost of raising them is small and the profits large. Grain and stock farms are particularly well adapted to turkey raising, and it is in such places that most of the turkeys are found. Little has ever been done in the way of raising turkeys in confinement, and when it has been tried the results have been discouraging.

Selection of Breeding Stock.

One of the most important steps toward success in turkey raising is the proper selection of breeding stock. Unhatchable eggs, weak poults, and small, scrubby turkeys are largely the result of carelessness in the selection of the parent stock. In selecting turkeys for breeding purposes, strength and vigor are the first points to be considered. To indicate this the body should be deep and wide, and back broad, and the breast round and full. The head should be of good size and of a clean, healthy appearance. A strong, well-made frame is shown by thick, sturdy shanks and straight, strong toes.

Inbreeding is harmful and if carried on very long will result in the loss of vigor and vitality. It is therefore advisable each year to obtain a new lot of unrelated blood, but of the same type. Nothing is to be gained by crossing varieties, as such practice soon reduces purebreds to mongrels. The most satisfactory time of year to select breeding stock is November or December. By purchasing early in the season one not only has a larger number to choose from, but the birds are given ample time to become acquainted with their new surroundings before the mating season, which in the South ordinarily begins early in February and in the North about a month later.

Toms With Hens.

Fifteen turkey hens can safely be mated to a vigorous tom. If 25 or 30 hens are kept, two toms should not be allowed to run with them at the same time, but one should be confined one day and the other the next.

If breeding pens are used to confine the laying hens for a part of each day they should be of hog-proof wire, rail, board, or stone fences are of no value for confining turkeys, which easily fly on top of them and then jump down on the other side. In the case of wire fences, however, there is no place on which to alight, and under ordinary circumstances they do not make the attempt. For this reason steel posts are better than wooden posts for a turkey fence unless the latter are sharpened at the tops.

Good breeding condition means being well fleshed, but not fat. Given free range where there is ample supply of natural feed during the winter and early spring, such as is usually the case in the southern portion of the United States, a good daily feed of grain, preferably oats or wheat, is sufficient to keep the birds in good condition. During the winter northern turkey raisers usually feed twice a day on equal parts of oats, wheat and corn, with vegetables such as potatoes, turnips, beets, and cabbage as a substitute for green feed. Animal feed at this time of year is essential to the best results, and can be supplied by feeding mixed scrap, beef livers and suet, or skinned milk, either sweet or sour.

Care of Eggs.

When there is danger that the turkey eggs may be chilled or destroyed, they should be gathered every day and a nest egg left in each nest. Eggs for hatching should be kept in a temperature of 55 to 60 degrees F., as possible and should be turned over every day. They should be turned as little as possible while hatching, and should be incubated while still fresh, never holding more than two weeks if it can be helped. It is an excellent plan to mark the date on each egg as it is gathered, in order to be certain that no eggs are kept too long before they are incubated.

Turkey hens are very close setters, and if managed properly they are the

surest means of hatching turkey eggs that can be used. Incubators, however, are quite as successful with turkey eggs as with chicken eggs. The incubation period of turkey eggs is 28 days. The first egg is usually piped during the first part of the 27th day, the first poult hatched by the middle of that day, and the hatch completed at the end of 28 days, although in extreme cases all the poults are not hatched before the end of 30 days.

The average number of poults raised under ordinary conditions is about 50 per cent of those hatched, or about seven for each turkey hen. By far the greater part of this loss occurs when the poults are under a week old. Unless there is an outbreak of disease, few are lost after they are a month old. The high mortality among young poults is mainly due to exposure to dampness and cold, improper feeding, close confinement, lice, predatory animals, and inherent weakness, the latter the result of carelessness in the selection of parent stock.

Coop for Each Breed.

A good plan is to have a substantial coop for each breed of turkeys. The mother turkey should be confined in this coop soon after her young are hatched and should be kept there for several weeks while the poults are allowed to run about. The coop should be placed in a well-drained place and should be moved each day. When two turkey hens with broods of about the same age are turned out on free range together they will remain in one flock, and as this makes it easier to hunt them up and care for them it is advisable to turn out two or three hens with their broods together when they are given free range. It is not a good plan to have more than this number of young poults in one flock, however, as they may all try to crowd under one or two hens to be hovered.

Improper feeding, combined with close confinement, has been the cause of many failures in turkey raising. When on free range the poults are busy searching for feed most of the day. Here there is no overfeeding and lack of exercise, such as the poults are often subjected to by those ignorant of their wants. If the range is plentifully supplied with green feed, grasshoppers and other insects, and if the weather is favorable, then the best plan is to allow the poults to feed themselves. It is usually advisable, however, to have them come home at night, and if driven up and fed at a certain place every night they will soon learn to come up themselves.

HOPPER FEEDING IS FAVORED

Experienced Poultrymen Recommend That Chicks Be Given Access to Food While Growing.

Giving chicks free access to food is recommended by experienced poultrymen in order to crowd them to early maturity, and the hopper system of feeding is rapidly coming into favor but the beginner will do well to be a trifle cautious at the outset.

An attempt of this kind may result in diarrhea due to indigestion, as the chicks will sometimes gorge themselves on the theory that in that way they would be less liable to overeat, as might be the case if given such liberty later on. A mixture of which wheat bran formed the principal part, was placed in self-feeders before a flock of chicks about three weeks old. They ate it voraciously, but in a short time bowel trouble developed to such an extent that it had to be discontinued.

DISCARD POOR LAYING HENS

Also Get Rid of Fowls That Show Any Symptoms of Weakness or Disease of Any Kind.

Most poultrymen do not think it pays to keep fowls for eggs after they are two years old and dispose of all the females as soon as they reach that age, and immediately after their second laying season.

Hens that have proved to be poor layers should also be discarded, as well as any that show any symptoms of disease or weakness of any kind. The diseased ones should be killed and the carcasses disposed of but the others should be well fattened, carefully dressed and marketed.

It is easy to fatten hens because they are usually inclined to be inactive and if confined in a house or small yard, kept free from vermin and protected against unusual heat, they will lay on flesh rapidly.

HANDS, ARMS, LIMBS ASLEEP

And Was Run-Down, Weak and
Nervous, Says Florida Lady.

Five Bottles of Cardui

Made Her Well.

Kathleen, Fla.—Mrs. Dallas Prince

of this place, says: "After the birth

of my last child, I got very much

run-down and weak, so much

that I could barely do anything at

all. I was so awfully nervous that

I could scarcely endure the least

noise. My condition was getting

worse all the time.

I knew I must have some relief or

I would soon be in the bed and in a

serious condition. For I felt so badly

and was so nervous and weak I could

hardly live. My husband asked Dr.

about me, telling Cardui. He

said, 'It's a good medicine, and good

for that trouble, so he got me 5 bot-

tles.' After about the second bottle I

felt greatly improved, before taking

my limbs and hands and arms

would go to sleep. After taking it,

however, this poor circulation disap-

peared. My strength came back to

me and I was soon on the road to

health. After the use of about 5 bot-

tles, I could do all my household

and attend to my six children with-

out any trouble.

You can feel safe in giving Cardui

a thorough trial for your troubles. It

contains no harmful or habit-forming

drugs, but is composed of mild, veg-

etable, medicinal ingredients with no

bad after-effects. Thousands of women

wants to furnish them to

PLANT ROUGHAGES FOR COWS

Every Farmer is Advised to Grow Abundance of Alfalfa or Clover—Concentrates High.

Grow an abundance of feed for the cow this season, advises A. S. Neale, specialist in dairy husbandry, division of extension, Kansas State Agricultural college.

"Already the price of concentrates is 'out of sight.' Prices will continue high unless these concentrates are replaced by the cheaper roughages," said Mr. Neale. "Every farmer should plant to grow plenty of alfalfa or clover, and slage. If alfalfa or clover cannot be grown in your section substitute another leguminous crop, such as cowpeas.

"During the next 12 months the production of dairy products will be due largely to the feeding of roughages instead of concentrates, as has formerly been the case.

"Dairy cows of quality receiving nothing but roughage can produce 200 to 250 pounds of butterfat annually, provided the roughage is fed in abundance and is composed of a combination of slage and a leguminous hay. Of course poor cows will not do so well on this ration."

ROUGHNESS FOR DAIRY COW

Animal is Not Content Unless Stomach is Full—Feed Grain According to Milk Yield.

Roughness is the first important consideration. A cow is not contented unless her stomach is full. She should always have all the roughness that she will clean up and then the amount of grain she receives should be regulated by the amount of milk produced.

A dry cow in good condition should be fed roughness only, and does not need any grain. In feeding grain to milk producing cows, the following rule will be used, and is found to work fairly well: Feed one pound of grain for each three pounds or pints of milk produced.

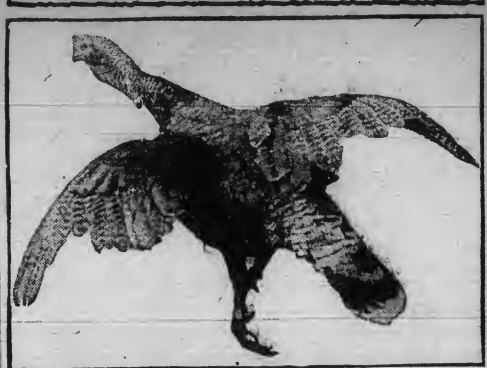

GIVE CALF GOOD ATTENTION

Pen Must Be Kept Clean—Use Plenty of Straw—Furnish Milk, Hay, Bran and Other Feeds.

The calf pen must be kept clean. The lots of nice straw, not putting it upon a lot of fermented filth, but dig out all manure very frequently and add fresh straw almost daily. Calves are as fussy when they tramp the straw into the manure.

Separator milk, tender clover or alfalfa hay, bran, animal, slage, corn, such feeds are the stuff good calves are made of.

TURKEYS MAKE PROFITABLE SIDE LINE

SELECTION OF BREEDING STOCK IS IMPORTANT.

(From the United States Department of Agriculture.)

Because the number of turkeys in the United States has constantly decreased in the last few years while the demand has perhaps increased, a more profitable side line than turkey raising for those favorably situated for the work could hardly be found. Given plenty of range. It is pointed out by the United States department of agriculture in Farmers' Bulletin No. 791, turkeys will readily eat grasshoppers and other insects, green vegetation, the seeds of weeds and grasses, waste grains, and acorns and nuts of various kinds. In this way the cost of raising them is small and the profits large. Grain and stock farms are particularly well adapted to turkey raising, and it is in such places that most of the turkeys are found. Little has ever been done in the way of raising turkeys in confinement, and when it has been tried the results have been discouraging.

Selection of Breeding Stock.

One of the most important steps toward success in turkey raising is the proper selection of breeding stock. Unhatchable eggs, weak poults, and small, scrubby turkeys are largely the result of carelessness in the selection of the parent stock. In selecting turkeys for breeding purposes, strength and vigor are the first points to be considered. To indicate this the body should be deep and wide, and back broad, and the breast round and full. The head should be of good size and of a clean, healthy appearance. A strong, well-made frame is shown by thick, sturdy shanks and straight, strong toes.

Inbreeding is harmful and if carried on a very long will result in the loss of vigor and vitality. It is therefore advisable each year to obtain a new tom of unrelated blood, but of the same type. Nothing is to be gained by crossing varieties, as such practice soon reduces purebreds to mongrels.

The most satisfactory time of year to select breeding stock is November or December. By purchasing early in the season one not only has a larger number to choose from, but the birds are given ample time to become acquainted with their new surroundings before the mating season, which in the South ordinarily begins early in February and in the North about a month later.

Toms With Hens.

Fifteen turkey hens can safely be mated to a vigorous tom. If 25 or 30 hens are kept, two toms should not be allowed to run with them at the same time, but one should be confined one day and the other the next.

If breeding pens are used to confine the laying hens for a part of each day they should be of hog-proof wire, rail, board, or stone fences are of no value for confining turkeys, which easily fly on top of them and then jump down on the other side. In the case of a wire fence, however, there is no place at which to alight, and under ordinary circumstances they do not make the attempt. For this reason steel posts are better than wooden posts for a turkey fence unless the latter are sharpened at the tops.

Good breeding condition means being well fleshed, but not fat. Given free range where there is ample supply of natural feed during the winter and early spring, such as is usually the case in the southern portion of the United States, a good daily feed of grain, preferably oats or wheat, is sufficient to keep the birds in good condition. During the winter northern turkeys usually feed twice a day on corn, parts of oats, wheat and corn, with vegetables such as potatoes, turnips, beets, and cabbage as a substitute for green feed. Animal feed at this time of year is essential to the best results, and can be supplied by feeding wheat bran, beef livers and lungs or skinned milk, either sweet or sour.

Care of Eggs.

When there is danger that the turkey eggs may be chilled or destroyed, they should be gathered every day and a nest egg left in each nest. Eggs for hatching should be kept at a temperature of at least 50 or 60 degrees F., as possible and should be turned over every day. They should be jarred as little as possible while handling, and should be incubated while still fresh, never holding more than two weeks if it can be helped. It is an excellent plan to mark the date on each egg as it is gathered, in order to be certain that no eggs are kept too long before they are incubated.

Turkey hens are very close sitters, and if managed properly they are the

surest means of hatching turkey eggs that can be used. Incubators, however, are quite as successful with turkey eggs as with chicken eggs. The incubation period of turkey eggs is 28 days. The first egg is usually piped during the first part of the 27th day, the first poults hatched by the middle of that day, and the hatch completed at the end of 28 days, although in extreme cases all the poults are not hatched before the end of 30 days.

The average number of poults raised under ordinary conditions is about 50 per cent of those hatched, or about seven for each turkey hen. By far the greater part of this loss occurs when the poults are under a week old. Unless there is an outbreak of disease, few are lost after they are a month old. The high mortality among young poults is mainly due to exposure to dampness and cold, improper feeding, close confinement, lice, predatory animals, and inherent weakness, the latter the result of carelessness in the selection of parent stock.

Coop for Each Brood.

A good plan is to have a substantial coop for each brood of turkeys. The mother turkey should be confined in this coop soon after her young are hatched and should be kept there for several weeks while the poults are allowed to run about. The coop should be placed in a well-drained place and should be moved each day. When two turkey hens with broods of about the same age are turned out on free range together they will remain in one flock, and as this makes it easier to hunt them up and care for them it is advisable to turn out two or three hens with their broods together when they are first free range. It is not a good plan to have more than this number of young poults in one flock, however, as they may all try to crowd under one or two hens to be hovered.

Improper feeding, combined with close confinement, has been the cause of many failures in turkey raising. When on free range the poults are busy searching for feed most of the day. Here there is no overfeeding and lack of exercise, such as the poults are often subjected to by those ignorant of their wants. If the range is plentifully supplied with green feed, grasshoppers and other insects, and if the weather is favorable, then the best plan is to allow the poults to feed themselves. It is usually advisable, however, to have them come home at night, and if driven up and fed at a certain place every night they will soon learn to come up themselves.

HOPPER FEEDING IS FAVORED

Experienced Poultrymen Recommend That Chicks Be Given Access to Food While Growing.

Giving chicks free access to food is recommended by experienced poultrymen in order to crowd them to early maturity, and the hopper system of feeding is rapidly coming into favor. The beginner will do well to be a little cautious at the outset.

An attempt of this kind may result in diarrhoea due to indigestion, as the chicks will sometimes gorge themselves on the theory that in that way they would be less liable to overeat, as might be the case if given such liberty later on. A mixture of which wheat bran formed the principal part, was placed in self-feeders before a flock of chicks about three weeks old. They ate it voraciously, but in a short time bowel trouble developed to such an extent that it had to be discontinued.

DISCARD POOR LAYING HENS

Also Get Rid of Fowls That Show Any Symptoms of Weakness or Disease of Any Kind.

Most poultrymen do not think it pays to keep fowls for eggs after they are two years old and dispose of all the females as soon as they reach that age or immediately after their second laying season.

Hens that have proved to be poor layers should also be discarded, as well as any that show any symptoms of disease or weakness of any kind. The diseased ones should be killed and the carcasses destroyed, but the others should be culled, carefully dressed and marketed.

It is easy to fatten hens because they are usually inclined to be inactive and if confined in a house or small yard, kept free from vermin and protected against unusual heat, they will lay on flesh rapidly.

HANDS, ARMS, LIMBS ASLEEP
And Was Run-Down, Weak and Nervous, Says Florida Lady.
Five Bottles of Cardui Made Her Well.
Kathleen, Fla.—Mrs. Dallas Prince, of this place, says: "After the birth of my last child, I got very much run-down and weak, so much that I could hardly do anything at all. I was so awfully nervous that I could scarcely endure the least noise. My condition was getting worse all the time."
"I knew I must have some relief or I would soon be in the bed and in a serious condition for I felt so badly and was so nervous and weak I could hardly live. I tried almost everything about my running Cardui. He said, 'It's a good medicine, and good for that trouble,' so he sent me 6 bottles. I could do all the second bottle I felt greatly improved...before taking it my limbs and hands and arms would go to sleep. After taking it, however, this poor circulation disappeared. My strength came back to me and I was soon on the road to health. After the use of about 5 bottles, I could do all my housework and attend to my six children besides."
"You can feel safe in giving Cardui a thorough trial for your trouble. It contains no harmful or habit-forming drugs, but is composed of mild, reliable, medicinal ingredients with no bad after-effects. Thousands of women have written me, telling me of the good Cardui has done for them. It should help you, too. Try it."

BEAVER

J. J. Ciesek, 75, who died on the 3rd inst., was one of the good citizens of Beaver neighborhood. He had been in delicate health for a long time, and continuing to get worse his death was not unexpected. He is survived by four brothers, G. O., Joe, V. J., James W. and Frank. He was an extensive and prosperous farmer.

Harmon Polly Slayback, aged about 23, died of tuberculosis on the 8th inst., at his home in Beaver. Funeral and interment at Hughes Chapel yesterday. The deceased was a son of G. A. Slayback and was a most excellent young man. He was married to Miss Nannie Allen about two years ago and she and one child survive him, and have the sympathy of all.

Mr. and Mrs. Henry Afterkirk, of Union neighborhood, entertained the following guests, Sunday: Messrs. Geo. Black and wife, Len Wilson and family, George Miller and family, B. Moore and family, Mrs. Mark Judge, Misses Olga and Adeline Afterkirk, Sadie and Isabel Nelson, Lena Moore, Lee Ford, Myrtle Stephens, Everett Judge, Edward Black, Chas. Allen, Wood Jas. and Geo. Hamilton and Penny Afterkirk and wife.

The Courier-Journal of the 3rd inst., said:

"Two phenomena yesterday made tens of thousands of Louisville turn their eyes skyward. In the afternoon a double rainbow was noticed, and in the evening a cross on the moon attracted attention. Both unusual occurrences were due to the same cause, a cloud of ice crystals, at a height of probably 25,000 feet, being pierced by the rays of the sun and later by those of the moon, according to J. L. Kendall, assistant weather observer at the U. S. Bureau, who said that the double rainbow, which a negro on the street declared was a 'sure sign of peace' was what is termed a 'solar halo'."

"Cloud conditions in the evening are said to have been similar to those in the afternoon, which accounted for what the daily called a 'cross' on the moon. It was, in fact, a lunar halo and occurs rather frequently at this season of the year."

Our meeting at Sand Run church closed Sunday evening. Bro. E. L. Andrews, of Covington, did the preaching and did it well. We had good crowds and good interest. Three candidates for baptism. The meeting was a success in many ways. No grander, nobler people live, than the Boone county folk. C. T. CLAUNCH.

Luther Surface, one of the Boone county select, at Camp Taylor, writes:

"The Boone county boys are enjoying themselves fine and are not so homesick. Camp Taylor is a nice place for young men, and it makes men out of you boys. I will write more next time."

The House ello filling company has completed its annual circuit. The number of silos filled increase each year, and now looks as though there will be a silo on every regulated farm in this part of the county in a few years.

D. B. Wallace, cashier of the Walton Equitable Bank and Trust Co., and correspondent for this paper, has been very ill the past week, and this week is the first issue that he failed to make a contribution of his for several years.

Elmer Kirkpatrick brought out from the city, last week, a sample home sandwich. Those who saw the meat say it is not at all like beef in appearance and no one tasted it so as to be informed in that particular.

According to the statement published this week the Boone County Red Cross Chapter appears to be doing considerable Red Cross business.

Nutting, parties are in order now, but boys generally, have too much pride to get their hands discolored handling walnuts.

A party of Mr. Healthy, Ohio, autoists passed through Burlington late Tuesday afternoon, coming from towards Bellevue.

The weather in the East is interfering with the progress of the base ball series for the championship of the world.

Circuit Clerk Maurer accompanied Sheriff Cropper to Verona yesterday on his tax collecting tour.

Putting up stoves and shaking moth balls out of winter clothing are claiming attention now.

Election officers holding SEAL at KEYS, please return at once, W. R. ROGERS, Burlington, Ky.

If you want your farm posted send your name and 25 cents to the RECORDER.

Tobacco has been doing nicely ever since it was put in the house.

The coal harvest on sand bars in the river grows smaller year by year.

Leaf burning will be in progress at Burlington in the next few days.

Commenced raining Wednesday morning.

The elder making season is here.

VERONA.

On Saturday, the 29th ult., Rev. Runyan, of Latonia, delivered a very able patriotic address to the people of Verona, after which a revival meeting by the Junior Order of Latonia was raised on the school lot. A large crowd being present it was greeted with many cheers. The ladies of the Red Cross organization served dinner in the school dining hall, which was well patronized.

The school has an enrollment of 110 and much interest is being manifested. Mr. Ben Stansier, popular merchant, has presented each of the five rooms a one dollar pencil sharpener, which will be very highly appreciated. "A friend in need is a friend indeed."

BELLEVUE.

Chas. Maurer spent Friday at J. G. Smith.

W. D. Cropper was collecting taxes here last Friday.

A revival meeting is in progress at the Baptist church.

Jack Frost has been putting in full time the last week.

W. S. Huey and family spent Sunday at Stanley Clora's.

Mrs. Joe West was visiting relatives in Lawrenceburg last week.

John Snelling and wife were the guests of Mr. Will Snelling's.

Robert Berkshire, of Petersburg, is making up the assessor's list in this precinct.

Mr. Louis Gott has returned after a week's visit with her daughter, Mrs. Chas. Maurer.

Len Stewart is improving the look of Henry Clora's house by giving it several new coats of paint.

Mrs. Nannie Maurer was the guest of Miss Marella Flick Saturday and Sunday and they attended the Farmers Fair in Aurora, Saturday.

John Clora writes from Gettysburg, Penn., that he likes soldier life fine and is expecting to be sent to Florida soon.

The U. S. Drill Boat has been at Ark a week or more where the new lock dam are to be located near McVie. They expect to be there a month.

Boys and girls basketball teams of Bellevue High School went to Patriot, Friday, and played two good games with the Patriot team. The boys lost but the girls won 14 to 11. They were well pleased with the good treatment they received from the Patriot folks.

HUMS.

Chas. Abdon, of Rising Sun, was at home here Sunday.

Harry Roberts is working on the Consolidated telephone line.

Jas. Waters and wife visited at Richard Dugden's, Sunday.

Mrs. Fannie McNamara is visiting friends in Verona this week.

Miss Gertrude Baker, of Ryle, was a guest at Arch Noell's, Sunday.

Sam Rust and son, of Big Bone, were guests of Buck East, Sunday.

This writer was the guest of T. B. Miller and wife, of Brashear, Saturday.

Mrs. T. B. Roberts and daughter, Ruth, visited Mrs. Boone Williamson, Saturday, near Gunpowder.

Mrs. Rimes and three children, of Latonia, and Mrs. Loren Abdon, of Walton, are guests at Lute Abdon's.

The Mudlick school commenced October 1st under the careful management of Miss Naomi Waller, of Verona.

Omer Noell, of Ohio, was the guest of his grandfather, Uncle Reuben Noell, the latter part of the week.

Cebury Allphin gave the young folks a dance, Saturday night. Jas. Allen gave a dance Saturday night also.

The little daughter of Louis Sach and wife died on the 7th. Funeral at the Hance Hill cemetery Monday. The vicinity extended sympathy to the parents in their sad bereavement. Jesus said suffer little children, and forbid them not, to come unto me, for of such is the Kingdom of Heaven.

Gave Them a House Warming

Charles Hughes and wife began housekeeping last Tuesday and on that night they were given a house-warming. The presents received were numerous and useful.

N. E. Riddell has been appointed to represent the Burlington Masonic Lodge at the Grand Lodge meeting in Louisville.

R. L. Huey and R. L. Green, of Big Bone, church neighborhood, were business visitors to Burlington, Tuesday.

Schanker & Son, of Erlanger, are interested in a number of bargains they have in their store. Give them a call.

Jailer R. M. Wilson continues very much indisposed.

A coal famine is in sight in Cincinnati.

Saylorsville, — Calloway Howard an attorney, and his nephew, Lundy Howard, exchanged shots here today. Later Sheriff S. W. Adams shot and killed Lundy Howard when attempting to arrest him. Calloway Howard was uninjured. The trouble is said to have been caused by a lawsuit involving the Howard estate.

Lexington, — Camp Stanley site, formerly the Lanning farm of 340 acres was sold by the Lexington Development Company to Simon Wise for \$300 per acre. The company paid \$300 per acre.

FLORENCE.

Miss Josie Freeman spent Thursday with Minnie Baxter. Mesdames Linda Ross and Louis Clarkson spent Friday at J. W. Hogan's.

Mr. and Mrs. Lou Thompson had as Sunday guests Albert Lucas and family.

Mrs. Elmer Lucas and children spent Sunday with Mr. and Mrs. Arch Lucas.

Mrs. Edward Snyder spent Thursday with Mrs. Joe Baxter, of Lexington, pike.

Clyde Arnold and Lee Craddock visited their grandmother, Mrs. Eliza Arnold, Sunday.

Mrs. Lizzie Barker left, Monday morning, for a visit with relatives at Junction City.

Mrs. Geo. E. Rouse has returned from a few days' visit with relatives at Fayette, Deale.

Miss Georgia Yealey was the guest of Miss Pansy Craven, of Erlanger, Saturday and Sunday.

Mrs. Mallie Beemon was called to Santa Fe, Mo., Friday, because of the death of her brother-in-law.

Era Willott and wife had as Sunday guests, Robt. Rouse, wife and son and Ollie Rouse, of Devon.

Clint Blankenkner and Elmer Cahill attended the Lexington trot Tuesday and Wednesday of last week.

Mike Cahill, wife and daughters, Minnie and Irene, and Mrs. Elmer Cahill, attended the Hamilton-on, Ohio, fair, last week.

Joe Baxter and wife had as guests, Sunday, Emmet Baxter and family, and William Tryling and family, of Reading, Ohio.

Mrs. Ernest Groger has returned after spending a week with Mr. Groger's mother, who is very ill at her home near Devon.

Dr. B. A. Dulaney died at his home Friday night aged 75 years. He leaves one daughter, three sons, several grandchildren and a host of friends to mourn his death. After a short service by Bro. Wovter and a song by Mrs. Mabel Sayers, he was laid to rest in the cemetery here.

GUNPOWDER.

Best prices went to Covington last Saturday.

Jack Frost's visits have done little damage to vegetation.

Mrs. Shelby Tanner is suffering with a severe case of lumbago.

Ray Rouse, of near Crittenden, Grant county, visited friends here last Sunday.

Edgar Aylor and wife visited her parents, Mr. and Mrs. R. H. Tanner, near Florence, last Sunday.

Mrs. Grace Clora was called to the bedside of her mother, Mrs. P. P. Neal, last Sunday on account of her sudden illness.

The work of filling silos is nearly completed in this neighborhood. Howard Tanner and brothers are doing the cutting act.

Miss Lottie Williams, of Cincinnati, was the guest of her aunts, Mrs. Martha Bradford and Miss Bessie Talbot, last Sunday.

State News.

John Ashley, of Winchester, was said to have twenty-seven prospecting wells on his farm and found no dry holes, and would drill sixty-five more wells. He said some of the wells were better than when first drilled, and would flow without pumping. Ashley's income before the last six were drilled in, was \$355 a day. He is investing quite a nice sum in bluegrass land, — Clay City Times.

J. C. Mills and J. E. Thompson, of the Loretto section, a few days ago shipped a bunch of cattle to the Louisville market that brought \$13 a hundred, the highest price ever recorded in Louisville. There were 25 head in the bunch. The average weight of each one was 1,400 pounds and the price paid was therefore \$182 per head. The cattle after being grazed on grass were finished with cottonseed meal. — Lebanon Enterprise.

Thirteen plug horses were purchased here court day by Cincinnati parties at prices ranging from \$15 to \$20. A butcher shop was opened in that city last week where horse meat is exclusively sold, and it is said that these old dobbies will be slaughtered and sold in that shop. The shop was opened last Saturday, and it had a big run of customers. The people went after the horse flesh as though it was the only meat in town. — Falmouth Outlook.

Local Happenings.

Fine weather for sowing small grain.

Aurora had a fine day for the street fair.

Judge Cason was in Cincinnati last Friday.

Heavy fogs have prevailed along the river the past week.

The cow-pea crop is being harvested, and it is a good one.

Mrs. Nell Scott, of Covington, is the guest of Mrs. Geo. Kraylich.

The supply of coal in the yards in Bellevue is disappearing rapidly.

Several new silos in the county will be filled this fall before they are completed.

It does not require ice now to cool a watermelon down properly for eating.

J. A. Barlow, of Hebron neighborhood, was a business visitor to Burlington, Tuesday.

S. W. Tolin put down a concrete walk in front of his residence property the past week.

Sheriff Cropper has been pretty busy for several days making precinct visits for collecting taxes.

B. F. Zimmer is hauling considerable fruit to market from the orchards out on the Bellevue pike.

The reconstruction work on the Covington and Lexington pike have been completed from Florence to Devron.

A concrete abutment is being put under the bridge over Gunpowder creek on the Burlington and Florence pike.

What has become of the old fashioned woman who at this time of the year peeled and strung up to dry for winter use?

A cool blast that struck this part of the country the latter part of last week were reminders of what is coming a little later on.

Misses Sarah Ryle and Kathryn Sullivan were awarded, in the order named, premiums for riding at the Farmers Fair in Aurora, last Saturday.

Simon Randsell and Taylor Fortner sold their new crops of tobacco, last week, for 85c cents and 30 cents respectively—Owen County Democrat.

The last tidings this office had of ex-Jailer Samuel Adams he had journeyed as far south as Chattanooga, Tennessee, as per post card advice.

Gen. Percy Haley, Collector of Internal Revenue in the Seventh District, has been requested to send eight expert storekeepers to New York and Kansas City to take an inventory of intoxicating liquors stored in these cities.

For the first time in many months the local market was supplied last Friday with beef killed by the local butcher. When the animal is butchered at home you know you are buying horse meat which is being supplied by Cincinnati butchers.

J. H. Walton, who resides away down on the East Bend road, was among the Recorder's Monday callers. He wore a heavy overcoat buttoned up to his chin, and when he was asked when he started there were no signs of frost having visited his premises this fall.

Many improvements are being made in the center of the Court House making the Temple of Justice more comfortable for the occupants. New floors being laid and inside painted. The jail with its far-reaching eyes is having the coal houses enlarged.—Owen News-Herald.

OLD HOSS, OLD HOSS

You've Pulled Many Passengers, But Now You're to Be Cut Up In Big Balogna Sausagers.

The sale of horseflesh for food in Cincinnati has increased so rapidly that Chief City Food Inspector Blume has drawn up regulations to control the business. The regulations in general, providing for inspection of the abattoirs and the sanitary regulations regarding the butcher shops are similar to those prescribed for the regular meat industry. In addition, places where horse meat is sold must bear a sign reading: "Horse Flesh Sold Here." Where sausage or meat is composed partly or wholly of horseflesh it must contain a sign reading: "Composed wholly (or in part) of horseflesh." Where horseflesh is sold, no other kind of food shall be sold. During the first week horse flesh was sold in Cincinnati two horses were slaughtered, during the 2nd week four, during the third week eighteen and during the past week about thirty.

Mr. and Mrs. Geo. Powers and daughter, Miss Grace, and Mr. and Mrs. Ed Yelton and daughter, Miss Eula, of Walton, were guests at Mrs. Ben Norman's Sunday afternoon.

(The above item appeared in the Devron news last week, and last Saturday morning Mrs. Powers called the Recorder and asked it to say that she positively was not one of the guests above enumerated—Editor.)

Harold Gaines and Herman Wingate, members of Battery E, Field Artillery, Camp Taylor, spent last Saturday night and Sunday at home. They are pleased with the military life so far, and apparently are sorry they did not begin it sooner. They reported all the Boone county boys in camp well and, with very few exceptions, entirely satisfied.

There is very little tobacco remaining in the fields in this part of the county and the process of curing has progressed very satisfactory to the growers. If the price expected are realized the growers will be the happiest people imaginable.

Frank Klassenor, one of the sects who was sent from the Constance precinct to Camp Taylor, was turned down in the examination at the camp and has returned home. Don't guess he feels very bad over the action of the examining board, while his people are glad to have him home again.

The government is doing some preliminary work in this part of the county and the process of erecting a lock and dam some time in the future. The work now being done consists of a search for a solid rock bottom on which to construct the dam. Iron pipes are being driven down to locate the solid rock.

NOTICE—Owing to the high cost of living, labor, etc., from now on I will be obliged to raise the price per day for work, which will be impossible to secure labor for cutting corn in his neighborhood. J. J. KIRKPATRICK, Burlington, Ky.

Michael O'Hara and son, of Erlanger, were business visitors to Burlington, Tuesday. Mr. O'Hara said he was in the city to secure labor for cutting corn in his neighborhood.

R. O. Rouse, of Pleasant Valley neighborhood, has been appointed administrator of his father's estate. He has a sale of the personal property advertised this week.

The Burlington school basketball team that went to Union last Friday afternoon won both games with ease, the girls game being a shut out for Union.

Personal Mention

County Attorney N. E. Riddell spent Wednesday in Lexington.

Mrs. Timothy Westbay, of Covington, is the guest of friends in Burlington.

Mrs. John M. Lassing and son, John, have returned to their winter home in St. Petersburg, Fla.

Mr. and Mrs. Gene Long, of McVille, were Sunday guests of her parents, Mr. and Mrs. R. S. Crisler.

Miss Elsie Brattford, of Cincinnati, was the guest of Miss Ruth Hall from Friday evening until Sunday.

Wallace Rice and mother were Saturday night and Sunday guests of her brothers in Beech Grove neighborhood.

R. A. Brady and wife, from down on Middle creek, were Tuesday guests of their daughter, Mrs. Emma Brown.

W. L. Acers, of Cincinnati, was the guest of his brother, Archie, who resides down on Middle creek a few days last week.

Mr. and Mrs. Elbert Clore entertained a large number of their friends from Covington Sunday. All had a delightful time.

Sheriff Cropper and County Clerk Rogers were in Covington, Monday, and Deputy Sheriff Conner was seeking tax-coin at Big Bone.

Mrs. Sarah Jane Crisler, of Covington, returned home the latter part of last week after a visit of several days with Burlington friends.

W. R. Davrainville, wife and son Dallas moved back to their Newport home yesterday, and Newton Sullivan, Jr., and family now occupy Mr. Davrainville's Burlington residence.

Judge Gaines came home from Williamstown, Saturday, and remained over Monday on account of Monday being county court day, which always puts the circuit court there out of business.

Wallace Rice, who has been assistant cashier in the Boone County Deposit Bank for several years, will leave for Cleveland, O., the latter part of this week, to enter upon the duties of Assistant National Bank Examiner. He expects to be assigned to duty in Kentucky, West Va., and Ohio.

Closingout Sale of Fine-Dairy Herd

Chas. Youell, who lives out on the Florence pike, near Limburg, was in Morehead yesterday, in connection with a big sale of fine cows on the 29th inst. He will sell all his dairy stock except the cow and it will be most excellent opportunity for those who wish to invest in good dairy cattle, as he has been breeding up his herd for the last 20 years.

Dr. Benjamin A. Dulaney Dead

Dr. Benjamin A. Dulaney, 76, died at his home in Florence last Friday night. He had been in poor health for many months. Dr. Dulaney had probably been a citizen of Florence as long as any person now living in that town, and many years ago enjoyed a very large practice. He is survived by several children.

Wants Bridges Built

County Clerk Rogers is advertising for bids for the reconstruction of the three turnpike bridges that were swept away by the recent freshet in Woolper and Gunpowder creeks.

W. L. Kirkpatrick received, Monday, from John Walton, Joe Walton and Woods Sullivan sixteen very handsome cattle, most of them Herefords.

Mr. and Mrs. O. L. Alford, of Bondville, were guests of her relatives here the latter part of last week.

LANDS POSTED.

Notice is hereby given that our lands are posted against trespass of any and all kinds, and hunters and trappers are forbidden to go thereon. JULIA S. DINSMORE, MRS. E. L. GRANT, R. O. RYAN, JAMES P. RYLE, O. O. HUGHES.

Japanese Parliament.
The Japanese parliament consists of a house of peers and a house of representatives. The house of peers contains both nobles and distinguished commoners. Princes of the Imperial blood and princes and marquises sit in it by right of title. Counts, viscounts and barons elect members of their orders. The emperor appoints the commoners of distinction, and there are also seats for the highest taxpayers, one from each prefecture. At present the house of peers contains 12 princes of the blood, 13 princes, 83 marquises, 17 counts, 68 viscounts, 60 barons, 122 non-nobles nominated by the emperor and 48 highest taxpayers. Members of the house of representatives are elected by male Japanese subjects twenty-five years of age or over and paying a direct tax of not less than 10 yen (\$5). There are 381 members, 181 from city districts and the rest from the country districts.

Fatted Calf is a Sheep.
Syria is probably the only country wherein the fatted calf is still—metaphorically speaking—killed. It comes about in this way: Each family selects from its flock a particularly fine sheep, has it sheared and brought into the house at the beginning of winter. It is washed and most carefully kept while being fattened with selected food. So overfed is the animal that the owner holds it work its three jaws during mastication in order to complete the fattening process. When some distinguished visitor arrives, or some great event transpires, the sheep is killed. As the Syrian people eat only fresh-killed meat, never refrigerated meat, the entire animal must at once be disposed of—cooked—so it can be stored for future consumption.

"Fresh" Fish in East.
Each year millions of pounds of fresh halibut and salmon are transported from the Pacific to the Atlantic seaboard cities, or about 3,000 miles to market. Millions of consumers residing along the Atlantic seaboard, of the history of the fish they consume, imagine that these once played in the waters of traditional New England. They congratulate themselves upon living so close to the ocean and being able to have a fresh supply of luscious fish the year around. They never dream that men have worked night and day along the shores of distant Washington, Oregon, California and Alaska, that railroad trains have been rushed across states, all for their benefit.

Could You Do This?
On January 23, 1901, Harry N. Pillsbury visited Kansas City, where he played twelve games of chess and three games of checkers with local devotees of those games. The games were, of course, carried on simultaneously, Pillsbury sitting with his back to the boards, the moves of the players were called out to him. He would immediately call back the name of his own piece, specifying on which of the sixty-four squares it was to be placed, and on every game. In Chicago, in 1900, Pillsbury played sixteen simultaneous games simultaneously in four hours and thirty-five minutes, winning twelve, drawing three and losing one.

Under Perpetual Cloud.
There are people who, through constitution mental or physical, have let themselves fall into the depressing habit, so that life is under a perpetual cloud. They are always expecting the worst things to happen; they indulge in positive orgies of evil anticipation. One might even say they luxuriate in it, to the detriment of their own activities, the destruction of their peace, the annoyance of their friends. So far as anyone can help this, they are to be pitied; but very often they can help it, or at least could have helped it before they allowed the habit to take possession of them.—Exchange.

Worse and More of It.
Will Tellum was furious. He dashed into the editorial sanctum of the "Chin Wagger" over the prostrate form of the office boy, and confronted the editor himself. "Look here," he bellowed. "This paper said I was a liar!" "Oh, no, it didn't!" replied the editor calmly. "It did, I say!" "I say 'No'!" "Well, some paper said it!" spluttered Tellum. "Possibly it was our contemporary down the street," said the editor sweetly, flinging a paper weight. "We never print stale news!"

Liked it Better Before.
Edna wanted to go to the play with her mother, but was told she would not enjoy it. However, after much coaxing, she was allowed to go. When she returned her father asked her how she liked it. "Well, daddy," she replied, "I liked it a whole lot better before I went than I do now."

Chewing Gum.
Much of the best chewing gum is made from the gum of the chicle tree, found in Mexico. It was first introduced into the United States in 1870, and soon largely replaced other gum materials then in common use.

Mirrors.
Mirrors should never be hung where the sun's rays will fall directly upon them. The chemical action of the light and heat on the quicksilver at the back of the glass is such that it causes the reflective powers and dulls the glass.

INCREASE IN DAIRY PROFITS

Breeders Find It More Profitable to Have Cows Freshen in Fall—More Milk Produced.

Because more milk would be produced in the year and calves would be raised cheaper, farmers find it most profitable to have their cows freshen in the fall months. Cows bred now will drop calves by early fall.

The cow gives a large flow of milk at the beginning of the period of lactation. In the spring the milk yield, which gradually falls off, is suddenly increased when the cow is turned on fresh pasture.

Calves born in the fall need mainly milk and eat little grain during the period of winter feeding. When spring comes they are ready to be turned on pasture. Spring calves consume milk and grain during the cheap pasture season and require the same high-priced feeds during the following winter, when they are older and thus eat more. The fall-born calf at the same age needs only pasture.

At the Ohio experiment station some calves born in the fall were raised for about \$5 less than others born in the spring. Under average farm conditions this difference would be fed to fall-born calves on pasture, while those at the station were given grain because of a shortage of pasture.

SKIM MILK FOR DAIRY CALVES
Found to Be Nearly Equal in Value to Whole Milk in Experiment at North Dakota Station.

In feeding the dairy calf, the aim is to cut down the period of whole milk feeding. At the North Dakota experiment station, two lots of four calves each were fed as follows: Whole milk first three weeks both lots. From then on lot A was fed one-half whole milk and one-half skim milk till six months old. Lot B, after three weeks old, was fed skim milk with flaxseed. Just enough flax was added to supply as much fat as was given the calves in lot A in their whole milk. Each calf

Promising Young Holstein.
was given two gallons of milk a day. The whole milk calves made the best gains the first three months but during the next three months the skim milk calves nearly caught up, the four lacking but 15 pounds of weighing as much as the whole milk calves, and several expert cattlemen who examined the two lots pronounced the calves in lot B as in as thrifty a condition as those in lot A. The saving in using skim milk and flax in place of the whole milk amounted to \$19 per calf for the six month period. The grain and hay cost the same for both lots.

NO CURE YET FOR ABORTION

Rare Opportunity Offered Proprietary Remedy Shows—Handle the Herd Properly.

(By GEORGE H. GLOVER, Colorado Agricultural College, Fort Collins, Colo.)
The proprietary remedy shows have been found in contagious abortion a rare opportunity. Beyond the appropriate handling of the herd and disinfection there is nothing to offer at this time. The following brief statement is found in a recent United States department of agriculture folder: "It should be understood that no effective cure for contagious abortion has yet been found. Do not depend on drugs and proprietary remedies."

CLEAN MILK WINNING FIGHT

Making Gains Because of Demands of People—Takes Good Dairy to Score 75 Per Cent.

Clean milk is winning its fight slowly, and dirty milk is losing out—because—clean people buy clean milk. It is a good dairy that will score 75 per cent on the government score card. The only milk that is better than certified milk is the milk the suckling calf gets from its mother. In securing this milk we are obliged to give 100 per cent on method and equipment.

What is Real Food Economy?

By Dr. Samuel G. Dixon
Commissioner of Health of Pennsylvania

Hysteria of the individual is very catching, often becoming an epidemic. Community hysteria is a representative form of government destroys its efficiency. Hysterical people are apt to run to great excesses and neglect those things in life which are of the greatest importance, not only to the success of the individual but of the community. At present, we find individuals and whole communities hysterical on the economy of foodstuffs, even to the extreme of confining themselves to a maize (corn) diet instead of having a well balanced diet with the variety of food that will not only stimulate the appetite and the digestive glands, but will meet nature's demands.

Man is an omnivorous being. We can best economize by eating what agrees with us. To resist tuberculosis and other wasting diseases and to keep in the best form for the working of our physical and mental body, particularly in these times of high nervous tension, we should have meat or some good vegetable protein as a substitute in moderation once a day.

In addition to this we want fat, preferably butter or cream or fats of animals, the latter only cooked sufficiently to heat them through. With the proteins and fats we want a carbohydrate (starch or sugar).

Today there are many diet lists being given to the public worked up into tables based upon their hant-producing power. The trouble with these diet receipts is that they are based upon tests made upon those having perfect

digestion and a normal amount of physical exercise in a normal atmosphere. Life is a factor scientific medicine cannot measure. It forbids the human body from being compared with an inorganic machine or test tube experiments in the laboratory.

The digestive tract and its many glands that vary in their powers to prepare food for the assimilation of the body, are governed by the nervous system. They vary greatly in their life power to produce digestive secretions. For the reasons given each individual, after once realizing that meats, fat, starches and sugar are necessary in various proportions to maintain his health, will have to make an intensive study of what digests, so as to give him the best health and keep up his weight to give him energy, and permit him to sleep, and to be of good cheer.

You will always find that people differ from each other in their selection of foodstuffs, some doing well on a large proportion of vegetable food, others doing better on a reasonable amount of meat and carbohydrates or starch, while others have to avoid starches and sugar to prevent violent indigestion and ill health.

We often find powerful men who live on very little food, while many frail, ill nourished people have good appetites and eat plenty. These things are hard to explain. The laws of nature are so profound that even today in this scientific age we find the digestion of people differs so that we must at present attribute it to the variation of life force.

From our actual experience in life, after long devotion to the feeding of people, we have learned that a mixed diet is essential to good health. The practical experience of the individual must be a factor in guiding him in the selection of foods and the quantity he can eat.

SOME SMILES

Making a Good Start.

"We are going to reorganize this business," said the expert.
"That's the way to talk," answered the head of the firm.
"Efficiency will be the watchword."

"Fine!"
"Your son must go."
"Let me shake your hand. I've been waiting to fire him for three years, but didn't have the courage."

Mean Imagination.
"I do dislike foreign phrases, though I use them now and then."
"But I notice you dislike for them is not pronounced."

His Choice.
"Only a few can be rich."
"Yes, but that's one of the times when I'd rather be in the minority than the majority."

Heard at a Party.
Edith—That Mr. Dublight you introduced to me is a fine dancer; he's so light on his feet.
Marie—When you get better acquainted with him you'll discover he's light at both ends.

"Touching" Father.
"Your boy's going to business school, isn't he?"
"Yes. He's learning the touch system."

Typewriting?
"No. Dadwriting."

Resignation.
"If you had your life to live over again you'd probably make the same mistakes."
"Probably. And if I did marry some other woman she'd doubtless turn out the same."

A Suggestion.
"Why did the umpire put that man out of the game?"
"He struck the umpire."

"This is foolish."
In such a slow game as this a fellow with that much fight in him ought to be left in.

Getting Results.
"We are not eating as much meat at our house as we used to."
"Neither are we; ever since I presided at war economy the cook orders only enough for herself."

On the Farm.
"Yes, plants have their ailments."
"To be sure," said the sweet summer boarder. "I have heard of hay fever and I am not surprised the hay gets feverish out in the hot field."

A Joyful Event.
"There's one thing I'll say for the kaiser: His funeral will break the world's record for attendance."
"That so?"
"It's a cinch. Think of the millions of people in the world who would like to go to it right now."

Less Unemployment Likely In America in Near Future As Result of the Great War

At present, and in all probability in the near future, according to a report of a medical committee on social insurance reported in the American Medical Journal, this country will have less and less unemployment, and there is no question that with the war and the destruction of life and peoples in Europe, in the very countries from which, in recent years, this country has drawn its vigorous unskilled labor, the immigration which has come here these shores so abundantly will enormously diminish, and there will be a dearth of labor and a rise in wages.

At present, however, there is no question that even in good times the wage earners of this country are unemployed for from one-fifth to one-fourth—20 to 25 per cent—of the working days of the year. Those who are dependent on their daily wages have thus to consider a further diminution of what is apparently their actual wage. All investigations on the amount of wages have shown that about four-fifths of the men and nineteen-twentieths of the women earn less than \$600 a year to support their families, and this amount of wage is not able, even in this country, to support those families on a fair standard of living. This is one cause of the enormous mass of woman and child labor.

POULTRY POINTERS

(By H. L. Kempster of Missouri Agricultural College.)

As the chicks grow they need more room. It does not pay to let them crowd.

Tough grass is of no value as a green crop. Better sow some quick-growing crop.

Feed hoppers greatly reduce the work. If they are kept filled, the chicks will never go hungry.

If your chicks are not doing well something is wrong. Look out for lice and for worms in the intestines.

Two-year-old hens had better be sent to the market. They seldom pay for their feed if kept over a third season.

Shade is one of the most important essentials during the hot months. Get the chicks into the orchard and cornfield.

Young stock will do better if not compelled to pick their living with the old. There will also be less trouble from lice.

Orit and oyster shell should be included in the ration for both young and old. To neglect this would be poor economy.

A growing chick will not thrive on short rations. If the right kind of food is fed, there is little danger of overfeeding, especially if they are given plenty or range.

Dibowski's Cafe
—THAT—
Neat Little Place
For Farmer, Workman, Merchant, Clerk and Professional Man.

You may have had ancestors at Lexington's Auction will help you find them—\$1.00 subscription, 700 N. New Jersey St., Indianapolis, Ind.

Fishes Sense of Smell.

In connection with the entrance of salmon into rivers and other bodies of water, Doctors Shelford and Powers say it is evident that they find their way by virtue of the presence or absence of acids and alkalis. Fish are said to be able to determine the direction they must go to reach water even when hundreds of miles out at sea, and find their way by taste, harbors and inlets when their mating season demands it, by the chemical conditions of the water. It is not necessary to appeal to "instinct" to explain the return of certain salmon to certain rivers or the running of herrings in certain localities. These new chemical discoveries are said to make it all clear that smell and taste are the senses most concerned, and these are highly developed in certain species.

Twas a Horse on Him.

There was once a Scotch farmer famed for his strength who was often challenged by people from a distance who had heard of his reputation. One day there arrived from London Lord Derby, a well-known amateur athlete. He found the Scot working in the field. "Friend," said his lordship, after first trying his horse to a tree, "I have come a long way to see which of us is the better wrestler." Without saying a word the farmer seized him around the middle, pitched him over the hedge and resumed his work. His lordship, somewhat gathered himself together, whereupon the farmer said: "Weel, hae ye anything mair the say me?" "No," but perhaps you'll be so good as to throw me my horse."

Raw Eggs Keep Longer Than Boiled.

Raw eggs keep much longer than boiled eggs, even when these are hard boiled. This was proved by Dr. Leon Lindet, a member of the Paris Council of Hygiene, after many French soldiers had reported that the hard-boiled eggs they received from home had gone bad, while the raw eggs remained edible for weeks. Doctor Lindet explains this fact by saying that the boiling makes the inner membrane pervious to gases, liquids and microbes, and the white of the egg becomes an agglomeration of coagulated albumen and particles of a germ that is an ideal medium in which microbes thrive.

Solving a Clerical Problem.

A certain minister who is usually supplied occasionally for a congregation found a ready welcome, for he was genial and full of jokes. But somehow, says the Christian Herald, he usually seemed to leave the joke on someone else rather than on himself. Because of this hostess once approached him with a note, and for G—, can you tell me why it is that ministers' children are nearly always so bad? "Well," the doctor replied meditatively, "I'm sure I don't know, Mrs. McA., unless it comes through association with the congregation."

Piece Without Victory.

The ancient joke about the Winged Victory in its present battered state was revamped in the light of later history in an art class. A plaster cast of the Victory was before the class. The young models in clay were made around and went away. One of the models had chosen only to work upon the hem of Victory's garment, so to speak, and left behind a replica of a mere fragment of the Victory. The next day the student found written on his fragment this inscription: "This is a piece without victory."

But He Soon Would.

A new minister who thought to do a little missionary work within his parish stepped into a grocery and engaged the grocer in conversation with the idea of branching the subject of religion. "Now, as I understand it, you're not a church-going man, but, no doubt, you obey the injunctions of the Decalogue, do you not?" "Don't believe I quite understand you, sir," responded the grocer. "You keep them, you keep them, don't you?" "Well, to tell the truth, reverend, my stock's a little low at present, but I've got some ordered."

Fifty-Fifty.

A little boy of seven was in school in a room adjoining one in which his grandma lay ill. He motioned toward grandma's room and quietly said: "Sh—! It's too much for her; I'll wear her out!" Later grandma thanked him for his consideration, whereupon he replied: "Don't mention it; that was fifty-fifty—part for you and part for me."—Everybody's Magazine.

"A No. 1."

When you say anything is "A No. 1" or "A No. 1," you unconsciously use the expression employed in Lloyd's register to indicate that the ship belongs whose name this notation occurs in is in first-class condition and is well equipped with stores for a voyage.

Manila Hemp True Banana Plant.

Manila hemp, from which the best rope is made, is known in the Philippines as abaca. It is a true banana plant and in appearance closely resembles the banana grass (L. glabra). The species is most tenacious.

Should Be Satisfied.

"Jonkins claimed that I insulted him," "Did you give any satisfaction?" "I guess so. He pouted me until he was red."

Honor Roll Boone Co. Hi-School

The first month of school has been a very good one. There has been a disposition on the part of the colored pupils to do good work. The report cards are being sent out this week and the teachers desire a careful examination of same by the parents. This is the best way for the parent to keep in touch with the school and to know what kind of a child is doing.

School is out in the afternoon at 3:15 and if the child is not at home in a reasonable time thereafter, the parent may know that the child has been kept in or is loafing on the way home. Please instruct children to come home just as soon as school is out.

To be on the honor roll a pupil must not be absent or tardy during the month, must receive a department grade of 90 and a grade of no less than 70 in every study. This is a high standard but there is no reason why every pupil should not be on the honor roll.

Honor roll for September.

High School—Elizabeth Kelly.

Primary—Mary Pees Cromper.

GRADE 1.

Margaret Ryle, Helen Walton, Robert Hensley.

GRADE 2.

Robert Maurer.

GRADE 3.

Lee Artie Franka, Dorotha McMullen, Edgar Maurer.

GRADE 4.

L. L. Clendenen, Catherine Huey.

Intermediate.

Franklin Huey, Georgia Kirkpatrick, Mary McMullen, Arthur Maurer.

Given Warning.

New York, Oct. 7.—A warning that summary action will be taken against a few flour mills in the United States which are seeking to accumulate profits in excess of that indicated by the Food Administration where specific instances of such violation are discovered, was issued here tonight by the milling division of the administration.

Aside from these few infractions the statement declared that J. S. P. Bell, chairman of the division, is being perfectly co-operative, shown by the milling trade at fulfilling the program mapped out by the division. Reminding mill owners, who have not yet been apportioned supplies with which to operate, that the division has been in existence only three weeks, the statement admonishes them to the certain they have complied with the division's full directions, then receive payment with the assurance that the organization, which is being perfectly as rapidly as possible, and their wants will be given attention before long.

The advantages which will result from the control of the flour has been established on a smoothly running basis will more than offset any present inconveniences, says the statement which adds: "A great many mill owners who are complaining that they have not received wheat fall to realize that in numerous instances this arises from their failure to comply with the rules and regulations of the milling division, or to follow instructions in making reports and requisition for supplies."

"There are quite a few mill owners who have not executed their mill agreements. Their failure to do this is working a hardship on the general milling plan and will react to the present and future disadvantage of the mills. It is imperative that every mill, large or small, for his own interests as for the nation, should sign his agreement, should furnish the necessary information and should comply in all respects with the food administration which adds: "The milling division has only been in existence three weeks, Mills can not expect to have everything running smoothly in so short a time. However, we are anxious to perfect our facilities and before long it will help us by doing their part we will soon have an efficient organization which will properly care for the milling situation."

"The action of a few millers in attempting to take high prices and to accumulate profits in excess of that indicated by the food commission is creating an unfavorable impression and reflects upon the entire integrity of the milling plan."

"Mills should be warned that the accumulation of profits at this time in anticipation of unfavorable periods to follow must be discontinued. We do not propose to have a few mills jeopardize the whole, and where specific instances are named, we will deal with them summarily."

The United States Department of Agriculture is recommending that there be sown in the United States this fall 5,310,000 acres of rye, which will give an average yield, will produce 83,630,000 bushels, or an increase of 22 per cent. over that of last year, when the largest increase in the history of this country was produced, or an increase of 87 per cent. over the 1912 to 1916 average. Rye can be planted in many fields with less labor and gives a better average yield. It is a high priced crop, and there is every indication to expect that its price next year will bear a satisfactory relation to wheat—L. L. D.

A Big Negro.

(Owenton News-Herald.)

One of the greatest religious revival meetings ever held by the colored population in the entire history of Owen county is the one now in progress at the Second Baptist church, Owenton, conducted by Rev. T. Timberlake—the State Negro Evangelist from Georgetown. Great throngs of people, regardless of color, crowd the church to its utmost capacity to hear this great divine, orator and colored man from this distinguished town preach the gospel. Truly, it can be said of Rev. Timberlake—he is a big negro.

He is a member of the First Baptist church, Jefferson street in Georgetown near the Big Spring—a village and a stream made famous more than a century ago by Rev. Elijah Craig, one of the first Baptist Ministers in Kentucky. Georgetown—famed for George Washington—and called the Belle of the Bluegrass—is noted for her educational institutions, and a Baptist stronghold. Besides, it is one of the most historical places in all Kentucky. It is then with a feeling of pride that the negroes of Owenton welcome Rev. Timberlake, because he deserves a credit for the great good he is doing in a place where so little evil exists. He is a big gun—superior to Rev. Peter Viagar, and the equal of Booker T. Washington. We, too, welcome him.

His sermon, "God's journey through Jerusalem looking for a man," on Sunday afternoon, captured six-four candidates for water and two for consideration. This sermon was for "men only."

On Sunday night he preached on "The Railway to Hell." When he reached Gamble's Station he found the Sisters, and had to give information from Pastor Robinson as to the name of the game they were playing. "Whisk!" exclaimed Robinson, and on the train went to Louisville.

Pastor Robinson is busy assisting Dr. Timberlake in this great meeting. He is not a product of Georgetown, but near the limits of that city is the home—"Canaan"—of this Gov. James F. Robinson, now known as the Sisters of the Visitation—a Catholic school for young ladies.

Rev. Robinson deserves great credit for the good he has done in Owenton. The colored people are egotistic in their indefatigable efforts to show their appreciation of "the man for his work."

But the News-Herald on behalf of "Uncle" Fuller, Joe Dorsey, Tom Brown, William Meeks, and all the offerings of the old landmarks of time in Owenton and Owen county, will say without favor, or fear of contradiction, that in fidelity and industry, these negroes are the equal of any number of negroes anywhere on the face of God's green earth. They are Southern negroes, and love their Southern homes.

The Conscript Cook.

In the cantonments, Camp Zachary Taylor and the rest, drafted men are to be trained as cooks. As becomes its importance, much time and thought will be devoted to making "the camp cooks chefs. They will be taught to cook in the field as well as in barracks."

Soldiers in days gone by lived roughly. Not only did they subsist upon the resources of the territory occupied by them—occasionally previously oftentimes by a devastating war—as well as devouring a horse—but they ate and drank in a raw state the eatable and drinkable resources.

Kipling in "Gunga Din" compares the life of the living of the soldier at Aldershot with the catch-as-catch-can plan of living in actual service. The water which was brought by the faithful Gunga Din was "crawling" and it stunk, but it was pointed out to the yet to be initiated soldier that "service 'you will do your work on water," and "you'll lick the bloom" boots of him (that's got it."

It is quite different nowadays. The drafted man may have eaten fare badly chosen and badly cooked when he was at home, but in barracks and in the trenches he must be provided with an efficient diet. He must eat the right things and they must be cooked right. He must drink water that not only is not "crawling" but also is not the container of tasteless and invisible germs. He must live more hygienically and sanitariously than he ever imagined himself living.

Cooks, the sine qua non of all civilized life, must be well-titled, and not empiric. They must be true bachelors of the art of cooking, or doctors of the philosophy of batty grub. No cook shall be allowed to practice upon the digestive organs and the dispositions of the defenders of the flag.

Best of all, the army cooks are conscript cooks. Only experienced housekeepers know how much better than all the rest this will be. The cook who can be shot for desertion is a jewel of a cook. A kohlnoor compared with which the liberty loving cook of civil life is a ten-cent store diamond.

The Enemy's Losses.

Admiral von Tirpitz, the famous advocate of ruthlessness in submarine warfare, recently issued a statement to the German people purporting to give figures as to the loss in tonnage by the allied and neutral nations since the beginning of the ruthless warfare. The figures are swollen beyond recognition and are certainly three and probably four times as large as the real losses.

An official of the British Admiralty discusses the von Tirpitz statement, and concludes that, wildly inaccurate as the figures are, it would doubtless be an injustice to assume that von Tirpitz made them up. This officer thinks the German submarine commanders, in handing in their reports, enormously magnify the amount of the damage done. They get credit at home according to the amount of damage they do, and it is only human nature that they should make the figures as large as possible.

President Lincoln in the days of our Civil War, put this thing in a very clear fashion. Asked on one occasion how many men he believed the Confederates were having, he answered: "I don't know, but I know the population of the Southern States could possibly enlist 2,000,000 soldiers, and Mr. Lincoln added: "Why that is nothing. The total Confederate losses up to date have been 2,250,000. I know these figures in this way. The Union now has approximately 1,000,000 men under arms, and our losses of all kinds certainly reach 750,000. All of our commanders report that they are invariably opposed by twice as many soldiers as they have available, but nevertheless they inflict three times the loss we suffer. Therefore, if we have 1,000,000 men, the enemy must have 2,000,000, and if we have suffered a loss of 750,000, the enemy must have lost 2,250,000."

Iowa is to try out the patrol system of maintaining roads. The law requires all the county roads to be under the supervision of patrolmen giving their entire time to the work. Each patrolman must go over his part of the mileage at least once a week. He is this system is essentially that used on the state roads of New Hampshire, which are famous for their excellent condition and their very low annual cost.

It is needless to say that if these dirt roads can be kept in fair condition by proper working and watching, there is no valid reason for rough and muddy highways in this part of Kentucky where pikes have been laid down and given ordinary repair and attention should maintain them both winter and summer.

Philadelphia, October 3.—Philadelphia is to be the seat of an experiment by Herbert C. Hoover, National Food Administrator, in the preparation of a five cent loaf of white bread. It also is proposed to establish a standardized method of mixing and making bread. The new loaf will, it is said, effect a saving of sugar, lard and milk, and yet be wholesome.

The Department of Agriculture, in cooperation with Mr. Hoover, has sent D. R. Jacobs, of the Bureau of Chemistry here, to instruct bakers in the preparation of the bread.

According to Mr. Jacobs, the new bread is the result of experiments carried on to determine, if possible, whether there might be some way in which the steadily increasing price of the staff of life could be lowered.

Four wells were driven recently in the Brashear and Ryle neighbor hoods in upper Gallatin, and in all of them water was struck at a less depth than usually obtains in the bottoms around Warsaw. Ran som Alphin had a well driven in this well struck at a depth of 10 feet. Roy Stewart one at 51 feet, John Feyton one at 99 feet and John Willford one at 91 feet. In many cases where drilling for water has been done around here water has frequently been struck at no less than 160 feet, which is just another illustration of the fact that there is little certainty as to the depth one will have to drill to drill in the same section of low land—Warsaw Independent.

J. T. Stephenson and L. S. Beemon, of Lima, attended the Hamilton, Ohio, fair, last Thursday. Mr. Beemon has an appointment to attend the Hamilton fair on Thursday next year.

Hickman—A. H. Lee, proprietor of the Woodlawn Farm, has probably set a new record in filling his silo by making the corn from six acres of ground fill an eighty ton silo. It usually requires about ten acres of ground to do this.

Bowling Green—Bowling Green faces a gas famine unless the coal situation in Eastern Kentucky is not adjusted immediately and shipments of gas coal started to this city at once.

Anshand—A nine-pound baby girl born to Mrs. William Large this week was the twenty-first child to be born to her, five of whom are living. Mrs. Large is 33 years of age.

The local banks will be closed tomorrow, Friday, it being Columbus Day—a holiday.

Cadiz—Maurer is playing fireman at the court house this week.

Is Your Money Working?

\$25,000.00 is a large sum of money, yet that is the amount we have paid out to our customers in interest on deposits during the past few years.

Did You Receive a Part of this \$25,000?

If not make a deposit with us now and see how much interest we will pay you in a short time, or try the convenience of a checking account in this bank.

We pay all taxes on deposits and assist you with your investments, notes, etc.

U. S. Liberty Loan Bonds or Boone County Road Bonds purchased for you without charge or commission.

Both bonds bear 4 per cent interest.

CONSTRUCTION LUMBER

Used for Fuel to Keep Soldier at Camp Zachary Taylor Warm.

Louisville, Oct. 8.—Topcoats and military jerseys were much in evidence at Camp Taylor today, where chilling blasts kept every rookie wondering through the day how their barracks would be heated tonight. This interest was due to the fact that coal on hand was less than enough to keep a single regiment warm. Late in the day, when it was determined that more coal would not arrive before tomorrow an immense reserve pile of construction lumber was ordered cut up and tonight wood fires were roaring in every unit of the cantonment.

Division headquarters tonight announced that 8,000 men of the third draft contingent had arrived. The last men of this quota were scheduled to arrive by midnight Sunday, but about 50 stragglers have not reported. The next quota will come on October 17th, and its size will depend on condition of crops and the harvest about the country. The remainder of about 12,000 men, may arrive with this contingent.

Captain H. L. Davis, O. R. C. of New Jersey, arrived today and took command of the division. A remount station where 11,000 horses and mules are to be kept for national army use. An addition to the 100,000 bushels of mail, office where more than 100,000 pieces of mail are being received daily for the soldiers.

Major General Harry C. Hale, division commander, who arrived Saturday, today called upon Mayor John H. Buschmeyer and other city officials. General Hale tomorrow will inspect the official inspection of the Y. M. C. A. buildings in camp.

A total of 22,000 has been subscribed to date for the liberty loan by soldiers at Camp Taylor.

Red Cross Notes.

The Burlington Auxiliary will meet in the grand jury room Friday afternoon at 2:30. As this is the first business meeting for some time everyone is urged to attend.

The Surgical Dressing and Hospital Garments have been received at Cleveland and are to be sent on at once, so we may feel very well satisfied for they would have come back if unsatisfactory.

Union and Bellevue, each, secured ten pounds of wool for knitting. Seventy-five pounds are left at headquarters for the other Auxiliaries. As knitted garments are more in demand than anything else at present, the county Auxiliaries are requested to notify Mrs. Goodridge of the quantity wanted and she will send it to them, it would be better still if they would come for it.

This week the Burlington Auxiliary is making a real pillow for each of the Boone county selected men.

The Lake Division of the Red Cross, to which Eastern Kentucky belongs, is now publishing a paper—The Lake Division News. Boone county is one of 75 out of 291 chapters having a press chair—man or agent—so let's do something worth while and get our name in the paper.

Report of Boone County Chapter for September:

Balance on hand Sept. 1st	\$229.73
Bullittville membership dues	17.00
Irishon membership dues	2.00

Total expenditures	\$167.64

Balance on hand Sept. 30, 1917 \$306.10

Official Government figures representing the exportation of tobacco and its manufactured products from the United States during the month of June, 1917, indicate a very material falling off in the shipments of leaf and quite a gain in the quantities of manufactured tobacco sent abroad. The shrinkage in the exports of unmanufactured leaf is due mainly to curtailment of trade with France and the United Kingdom, the latter showing only 142,470 pounds (taken in July 1917, as against 30,517,773 pounds the corresponding month last year. The record for the month shows that China is becoming a good customer of American-made cigarettes, while Canada, Panama, the West Indies and Hawaii, Australia and the Philippine Islands continue to enjoy a substantial increase in the exportation of plug tobacco.

Pass Along the SMOKES

YOU warm-hearted people of Boone county won't let the men who are fighting your fight go smoke-hungry.

Not a bit of it. You are going to see to it that they get all the tobacco they need—just as the folks back home in England and France are taking care of the smokers for Tommy and Poilu.

It isn't much to do—considering. A dollar or a quarter from you that gives a little comfort to one of your own flesh and blood, doesn't stack up to much alongside the fact that the very man you are befriending may have to give up his life.

But it's a regular thing to do—and you "regular" men and women will do it.

This is the way. Fill in that coupon below put it in an envelope together with all you can afford to give and drop it in the nearest box now, addressed to

Boone County Recorder Tobacco Fund

Our paper has joined The Courier-Journal and The Louisville Times in this most worthy undertaking.

Approved by the Secretaries of War and Navy, the management of this fund buys its tobacco at cost—every contribution of twenty-five cents means forty-five to fifty cents' worth of tobacco for the men out there. No one profits but the fighting man—rents, postage, advertising are all contributed and the soldier who gets your tobacco will send you a postal telling how much it meant to him.

There's no argument here. Just put your name on that blank line and pass along the smokes.

Recorder, Burlington, Ky.

Inclosed find \$..... to buy..... packages of tobacco (pipe or cigarettes tobacco or plug-chewing) or cigarettes through the Courier-Journal and Louisville Times "Our Boys in France Tobacco Fund" for American fighting men in France.

I understand that each dollar buys four packages, each with a retail value of forty-five or fifty cents, and that in each of my packages will be placed a postcard, addressed to me, on which my unknown friend, the soldier, will agree to send me a message of thanks.

Name.....

Street or R. F. D. No.....

FORTY-FIVE BOONE BOYS

Now at Camp Zachary Taylor—Eleven Sent Last Sunday.

Eleven more of Boone county's young men went to Camp Taylor last Sunday to go into training to assist in "doing the Kaiser." Those of the second increment having sent home hope that gave them an idea of what to expect in camp. Sunday's squad left in pretty good spirits. Those who went Sunday were:

Myron Smith,
Dalton Jacobs,
Ira Newton Long,
Carl Edgar Anderson,
Stanley N. Parsons,
James B. Peitt,
Charles Holt,
Jerry Dempsey, Jr.,
Paul R. Aydelotte,
Claude E. Wayland,
Jesse T. Abdon.

Forty-five men have been sent from this county to Camp Taylor, only one of whom, Frank Klaser, has been rejected, and he is back at the camp, but in what capacity is not known.

Who Shall Decide When Doctors Disagree?

So far as I have been able to follow the swift maneuvering of the stream of American war thought, there has not been a single great question of national policy about which there have not been violent and, apparently sincere differences of opinion. There was such a difference about the declaration itself; about the tremendous undertaking; about fixing the prices of food, of coal, of railroad rates; about the way to deal with aliens; about what ought to bear the heaviest burdens of the cost; about the regulations of vice near the cantonments; and we know not what all besides.

Upon both sides of these great problems, were to be found ranged people of seemingly equal integrity and ability to do the confusion of us ordinary people. Like pendulums, our minds have swung between the opposite conclusions, until we wondered whether both were right or both wrong. And who should decide when doctors disagree?

And now appears the most singular, the most astonishing, and the most hopeless of all these contradictions concerning the proper region in which to train the colored regiments of our national army. It would not be so strange if the Northern and Southern people should cherish opposite views. But when we learn that the Southern people can not agree among themselves we are utterly confounded.

One part argues hotly that the North is the proper section, because there is no special prejudice there against their color or their presence, while in the South there is an ineradicable antipathy to having them occupy a situation of such apparent equality with them. And, besides, it would be good for the Northern people to have to perceive the racial problem from so intimate an experience.

The other party declares that is the proper place for this training, because the Southern people know how to deal with the negro and of how to get him to see him in the army, and think of would be unfair to make him spend the winter in an unfamiliar and too rigorous a climate.

We shall content ourselves by saying how glad we are to see him in the army at all. We are firm believers in his capacity, to make a good and faithful soldier, as his record in the Civil and the Spanish Wars has proven. We are firm believers in his duty as a soldier and his privilege, but we are firm believers, also, in the benefits which he will derive from a military discipline.

Every enlargement of his sphere of action is in fact an enlargement of his blessing. As, for example, that of driving motor cars. Can there be any doubt that the increased knowledge of machinery and the new opportunity for travel has done as much for thousands of colored boys as years in school?

What the colored people need is opportunity! Not all of them will know the unfamiliar figure when they see it; nor know how to seize it when it passes. But the race will, as a race—Enquirer.

The closing hours of the war Congress last Saturday were marked by bitter attacks on Senator La Follette by Senators Johnson, Kellogg and Fall. The Wisconsin man made a two hours' impassioned reply, defending the right of free speech in general terms, but failing to answer critics of his recent anti-war utterances in St. Paul. La Follette said the President had led Congress into the war and the pressure of excitement and that the country now had a right to know exactly what it is at war for. Senator Robinson declared that La Follette's speech was a stab in the German Dundreht. The House closing was unsuccessful.

Nicholasville.—Last Wednesday a dog (thought to have been affected with rabies) was killed here after biting Dudley Hughes. The dog was sent to Bowling Green for examination. The State Board of Health reported the animal was affected. Friends of Mr. Hughes are much alarmed.

HEBRON.

GOOD POINTS ABOUT HORSES

Strong Constitution, Endurance and Action are Associated With Well-Sloped Shoulders.

(By R. H. REESE.)

In examining a horse there are several points about the shoulders to look into. Short shoulders do not generally indicate sufficient room for a large heart and for lungs capable of handling a maximum quantity of air.

Straight shoulders favor a low, short, stubby action of the front feet. A low carriage of the head, with a heavy irresponsive mouth are often associated with a long back and a correspondingly short underline, whereas the opposite proportions, namely, a short back and a long underline, are desirable. The concussion or jars on

Deep, Well-Sloped Shoulders With Good Seat for a Collar.

the front legs resulting from their action the ground are considerably relieved by sloping shoulders, while straight shoulders, by not having this effect, tend to promote early unsoundness of these limbs.

Strong constitution, endurance, good front action, and style are associated with deep, well-sloped shoulders. For draft purposes the shoulders should have pronounced offsets, so that the face of the collar will have plenty of bearing surface. The position of the collar on shoulders which are deep enough is not materially changed. The heavier the pull the tighter the collar. On shallow shoulders collar is squeezed back with the result that the skin and muscles beneath the collar are often sore. Sharp, thin, prominent withers add depth and veering qualities to the shoulder. Shoulders that run well into the back in the saddle horse aid in holding the saddle in place.

MORE IMPROVED LIVE STOCK

High Prices Make It Profitable for Farmer to Produce His Own Animals for Feeding.

The recent rapid rise in the price paid for all kinds of live stock is making it more and more profitable for the average farmer to produce his own live stock for feeding rather than to buy the high-priced product of the market for this purpose. Conditions in America today are more nearly like those prevailing in European countries in regard to live stock than they have ever been for an extended period in the history of our country.

If the present conditions remain as they are for a few more years there will be noticed a rapid improvement of the farm herds and flocks. Formerly the range was large enough to crowd out the competition of the cornbelt meat producer. Then the range began to produce only feeders and today the cornbelt farmer is rapidly taking over this phase of the cattle business as the range is becoming smaller and smaller and is more and more unable to supply the demand for beef.

PROPER RATIONS FOR LAMBS

Mixture of Corn, Oats, Linseed Oil Meal and Bran is Recommended for Young Animals.

(Ohio College of Agriculture Bulletin.) A good grain ration for lambs just beginning to eat is ground corn, one part; crushed oats, one part; linseed oil meal, one part; and wheat bran, two parts. Wheat bran is very essential in this ration, and the shepherd should always see that it is present. A grain ration consisting of two pounds of wheat bran, one pound of oats (crushed oats being preferred), one pound of finely ground corn meal, and one-half pound of oil meal has proved to be an excellent grain ration for young lambs. It has also been found that a grain mixture of oil meal and corn meal has given better results than a mixture of cottonseed meal and corn meal.

STATE NEWS.

Nicholasville.—A few farmers have begun cutting corn and getting it out of the way to sow wheat. Most of the tobacco is cut and housed.

Whitesburg.—This year there will be more fall plowing than ever before. Farmers will be unusually busy garnering their crops and putting their soil for next year's crops in readiness for making the largest possible yields. Some of the farmers of this section are making preparations for sowing wheat.

Paris.—Corn is still green and not yet ready to cut. Practically all the hemp in the county is in the shock and most of the crop is above the average. Beans and roasting ears are yet to be had. Preparations are going forward on the farm for sowing next year's crops of wheat, barley and rye. A larger acreage of small grains will be cultivated next year.

The report that an Owen-ton man is going to run an asbestos mine in the county is thought to be somewhat exaggerated. It is to be hoped that boring for oil in old Oldham may prove a success, and it will then be "up to" some expert and enterprising promoter to uncover a good coal mine, close in, in order to obviate the unpleasant necessity of putting up for 35 cent coal in Owen-ton.—Owen County Democrat.

Columbia.—Farmers are very busy cutting corn, sowing wheat and cutting and housing their tobacco. Crops of all kinds are unusually good this year in this county. And with the high price of everything our farmer brethren ought to be a very prosperous people. Some few tobacco buyers have been around, but very few sales have been reported. It is said that a very high price per barrel at gathering time.

Whitesburg.—The illiteracy campaign is to be launched in practically every section of the mountains this week. According to reports coming from the schools, there are to be established in almost every school district in the several counties in Eastern Ky., including Lee, Perry, Pike, Leslie, Knott, Floyd, Harlan and Breathitt. Country district teachers are most interested than ever before and will lead in the campaign.

Versailles.—The past week has been an ideal one. Farmers are getting their ground ready to sow fall wheat. Farmers are sowing rye in some sections of the county, and it is predicted that the largest acreage of oats ever sown in this county will be planted this fall. Farmers are digging for potatoes. They may have only a few sweet potatoes for the local market, leaving the others to mature but say the prospects are that the crop will be a most excellent one.

Winchester.—Corn cutting is now under way in Clark county and wheat sowing is also on hand. The corn crop is being harvested down this year and there is no doubt but what it is good policy to fatten hogs this year while they are being down. Corn or something else of all kinds of feeds are plentiful and everything in the shape of feed will be taken care of. The gardens here have been a great deal of the orchards loaded with apples. The housewives have been so busy canning and drying fruits and vegetables that the fall and winter man's profits on canned goods if nothing else. Especially is this true in the county, but the city women have done a great deal of this kind of work. Frosts are beginning to do some damage in the low gardens.

The Tobacco Crop.

P. C. Bell, of Casey county, sold his tobacco at 17 1/2 cents.

A crop of 10 acres of tobacco in Scott county sold for \$3,230.

A report from Carlisle, says of-fers of 10 to 15 cents are being made for tobacco.

In Bourbon county a crop of tobacco of 14 acres sold for \$250 per acre.

In Jessamine county all of the tobacco is cut and housed and growers are well satisfied with the quality.

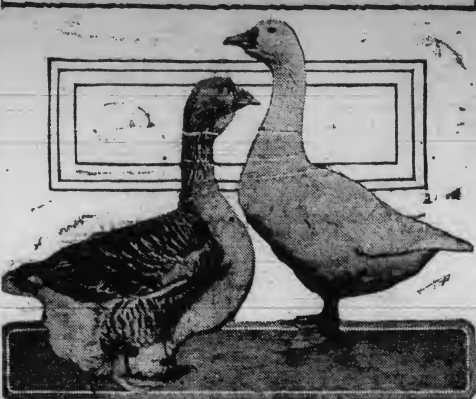

A report from Warren county, says folks are very busy cutting and harvesting tobacco and gathering in the garden products, getting ready for "Jack Frost."

Growers of Carlisle, Ky., report that high prices are being offered for this 1917 tobacco crop, one grower near Carlisle reporting that he sold his crop to a speculator at \$20 per 100 pounds for all grades.

A report from Washington county says farmers are busy cutting tobacco. They state that they have never known a more suitable season for cutting and housing tobacco than that afforded by the weather of the last two weeks. The crop is almost up to the average year in quantity and far above the average in quality. Cutting and firing is still in progress around Clarksville, Tenn. Practically all of the crop has been cut and housed. Firing is well under way and the farmers seem to be taking great care in curing the tobacco this year, which will certainly result in better prices at selling time.

R. H. McLaughlin, of Newstead, lost a barn of tobacco by fire last week. The tobacco had been cured and the flow drawn, but it is supposed that some live coals were left in the barn which started the fire. The loss was destroyed. The loss in tobacco was \$1,000 and \$2,000, and was insured.

PROFIT WITH SMALL NUMBER OF GEESSE

TOULOUSE AND EMDEN ARE POPULAR BREEDS.

(By H. M. LAMON AND A. R. LEE.)

The goose industry is at present on the basis of small flocks raised on general farms, few, if any, are devoted entirely to goose raising. In some producing sections, however, the fattening of geese is conducted as a special business. For this business the geese are collected from general farms, usually over a large area, and are fattened for several weeks before being killed.

Geese can be raised in small numbers successfully and at a profit on farms where there is low rough pasture land with a natural supply of water. Pasture is essential to the success. Geese are generally quite free from disease and all insect pests, but occasionally are affected by the diseases common to poultry. Grass makes up the bulk of the feed for geese, and it is doubtful whether it pays to raise them unless good grass range is available. A body of water where they can swim is considered essential during the breeding season and is a good feature of the rest of the year.

The market for geese is not so general as for chickens. This should be considered in undertaking the raising of geese. The demand and the price paid for geese fattening is conducted on a large scale. Many geese are kept in the South for the production of feathers rather than for their flesh, but the demand for their feathers is not so good as it has been, making the business less profitable. Wherever possible the geese on a farm should have free range. Many farmers in the South keep them to kill the weeds in the cotton fields.

Houses.

Except in winter or during stormy weather, when some protection should be provided, mature geese do not usually need a house. Some kind of shelter, such as a shed open on the south side, a poultry house or a barn is usually provided for the geese in the South. Coops, barrels or some other dry shelter should be provided for young goslings. The geese, houses should be kept clean and plenty of clean straw provided for the floor.

Selecting and Mating.

Geese, like other kinds of poultry, should be selected for size, prolificacy and vitality. They should be mated several months prior to the breeding season to obtain the best results; therefore breeding stock should be bought in the fall. Goose matings are not changed from year to year unless the results are unsatisfactory. A gander may be mated with from one to four geese, but pair or trio matings usually give the best results. The wild gander usually mates with only one goose. When mated, geese are allowed to run in flocks. From four to twenty-five geese may be kept on an acre of land, and under most conditions ten is a fair average.

Incubation.

Geese are fed a ration to produce eggs during the latter part of the winter or so that the goslings will be hatched by the time there is good grass pasture. They are allowed to make nests on the floor of the house, or large boxes, barrels or shelters are provided for that purpose. The eggs should be collected daily and kept in a cool place where the contents will not evaporate too freely; if kept for some time they may be stored in loose bran. The first eggs are usually set under hens, while the last ones which the goose lays may be hatched either under hens or under the goose if she goes broody. If the eggs are not removed from the nest in which the goose is laying she will usually stop laying sooner than if they are taken away. Some breeders prefer to raise all the goslings under hens, as geese sometimes become difficult to manage when allowed to hatch and rear their young. Hens used for hatching geese eggs must be dusted with insect powder and have good attention, as, in the case of geese, the period of incubation is longer than in that of fowls. Good eggs may be hatched in incubators and the goslings successfully raised in brooders, although this is not a common practice.

The period of incubation of goose eggs varies from 28 to 30 days. Moisture should be added to the eggs after the first week if set under hens or in incubators; this is usually done by sprinkling the eggs or the nest with warm water. Four to six eggs are set under a hen and one to thirteen under a goose. They may be tested about the tenth day, and those which are infertile or contain dead germs should be removed. They hatch slowly, es-

pecially under hens, and the goslings are usually removed as soon as hatched and kept in a warm place until the process is over, when they are put back under the hen or goose. Some breeders who hatch with both geese and hens give all the goslings to the geese. Hens with goslings may be confined to the coop and the goslings allowed to range. The latter, especially if the weather is cold, are not usually allowed to go into water until they are several days old. In mild weather the hens are allowed to brood the goslings for from seven to ten days, when the latter are able to take care of themselves. Good-sized growing coops, with board floors, should be provided for the goslings, and they must be protected from their enemies, and given some attention when on range.

Feeding Geese and Goslings.

Geese are generally raised where they have a good grass range or pasture, as they are good grazers, and, except during the winter months, usually pick up most of their living. The pasture may be supplemented with light feeds of the common or home-grown grains or wet mash daily, the necessity and quantity of this feed depending on the pasture. Goslings do not need feed until they are twenty-four to thirty-six hours old, when they should be fed any of the mashes recommended for chickens or ducklings.

Preparation for Market.

Before marketing the young geese the average farmer can feed advantageously a fattening ration either while the geese are on grass range or confined to small yards, but it is doubtful whether it would pay him to confine them to individual or small pens and make a specialty of fattening. Geese are usually killed and plucked in the same manner as other kinds of poultry. Some markets prefer dry-plucked geese, while in other markets no difference is made in the price of scalded or dry-plucked geese. When feathers are to be saved, fowls should not be scalded but should be plucked before or after steaming. On most farms where geese are raised the feathers are plucked from the live fowls at some time prior to marketing.

About 1-10 pounds per goose is the average yield of feathers. Feathers are worth from 30 cents to \$1 a pound and the plucking cost per goose is about 11 cents.

Breeds.

The Toulouse, the largest of the standard breeds of geese, is a good layer, producing from 30 to 35 eggs a year. It does not grow rapidly, and makes a good market bird. However, its dark pinfeathers make it a slightly less attractive market goose than the Emden. These geese are very massive in proportions with short legs, color is dark, and back of dark gray; breast light gray, but descending lighter till beyond the legs and tail they are a pure white. This combination of colors presents a very attractive appearance. They live to a good old age and are easy keepers.

MILLIONS OF EGGS SPOILED

If Delicate Gelatinous Coating is Broken on Egg Will Immediately Begin to Deteriorate.

It is not necessary to smash an egg to spoil it. It is provided with a delicate gelatinous coating for protection which keeps out air and germs only so long as the coating is intact. If the egg is cracked or chipped, even so slightly that it cannot be detected, this protective coating is broken and the egg will not keep so well. Over 15,000,000 dozen eggs spoil annually in cold storage in this country on account of checked shells. This is an immense waste of food which could be greatly lessened if there were greater care in handling the eggs.

KEEP FOWLS OUT OF GARDEN

If Hens are Kept Contented in Chicken Yard Vegetable Plot Will Not Be Disturbed.

Hens are creatures of habit. If they are kept contented in their chicken yard the garden may be near at hand and never be disturbed. But let one old hen fly over the fence, and she has graduated from the chicken yard. She will not only go over again, but she will teach others to attempt the feat. She has the garden habit.

The B. B. Hume Automobile Co., Agents

23-25-27 E. Fifth St., Covington, Ky.

Agents for the following Automobiles and Truck: CHEVROLET, one man top, tire rack, demountable rim, a swell car. No hill it will not climb, have sold 102 and have contracted for 125 more. There is not a dissatisfied customer.

Keep Well

Do not allow the poisons of undigested food to accumulate in your bowels, where they are absorbed into your system, indigestion, constipation, headache, bad blood, and numerous other troubles are bound to follow. Keep your system clean; as thousands of others do, by taking an occasional dose of the old, reliable, vegetable, family liver medicine.

Thedford's Black-Draught

Mrs. W. F. Pickle, of Rising Fawn, Ga., writes: "We have used Thedford's Black-Draught as a family medicine. My mother-in-law could not take calomel as it seemed too strong for her, so she used Black-Draught as a mild laxative and liver regulator. We use it in the family and believe it is the best medicine for the liver made. Try it. Injures on the genuine Thedford's. 50¢ a package. R-75.

DOLLARS AND CENTS IN ENGLAND.

Here is a little rainbow of promise for the schoolboy of the not far distant future. If measures now pending before parliament finally come to be made into law pupils in arithmetic will not be forced to cudgel their brains over the awkward and unfamiliar "1-4" of English money, for that system will be superseded by the simpler and more rational decimal plan known to Americans. Instead of "dollar" the unit will be called "fortin" but it will consist of 100 cents. Five-fortin pieces will circulate instead of the sovereign, with ten-fortin "shillings" or "cagles," while half and quarter fortins will lead the way down to dimes, nickels and cent-pieces. A commission has reported in favor of the change and the question is dividing attention with the war and Ireland for public debate, says Omaha Bee. One of the strongest arguments against the move is that it will upset the present system of accounting and one objector calls attention to the fact that all the adding machines in use will have to be re-built. If the war has jolted John Bull out of his adhesion to the antiquated monetary system to which he has clung so persistently we may look for the readjustment of almost any of the ancient and honorable British institutions. However, the measure is not yet a law.

The May fire loss in the United States and Canada amounted to \$24,900,900, which is ten millions more than the May fire loss a year ago and thirteen and a half millions more than in May fire loss in 1915. This year's aggregate so far is ominously large—\$120,108,455, compared with \$113,528,920 for the first five months of last year and \$81,407,050 for the corresponding period of the year before. This year's May fire loss was swelled by a conflagration—the calamity at Atlanta—but that accounts for only five millions, so that even if it were out of the reckoning May, 1917, would figure as a bad month for fires.

The report of the World's Pathological congress that "green peas are dangerous in the extreme, especially to women, whom they make frivolous, capricious, and reckless," is worthy of as much respect as the declaration by the same congress that potatoes should be eaten by judges and editors, as they develop great mental balance and calmness of reflection, while carrots cure bad tempers, and a persistent eating of them will cure jealousy, melancholy, feelings of wrath, and revenge.

It is one of the paradoxes of war that the men who do the fighting and the killing have less hate than those who stay at home and do the talking. The fighting man realizes that the fellows in the trenches over against him are the same sort of humans as himself; and that they are fighting for the same reason that he is, in the belief that it is a patriotic duty to fight.

As for a field name for our soldiers in Europe, if "Sammy" does not stick "Johnnie Yank" might do. In the Civil war the Northern soldier was "Yank" to the Southerners, and the Southerner was "Johnnie Reb" to the Northerner. A combination would signify the unity that now exists.

A Berlin military critic says that the British fighting on the front is serious. Even this mild way of putting it is a great admission for the Germans who are beginning to stop talk of the invincibility of their lines and the glorious victories of their troops.

The German press is charged with deliberately falsifying reports and boasting of mythical successes, but it should be commended for its moderation in not stating to the general population that the crown prince has established his headquarters in Paris.

The privations caused by the war are on the increase. The price of diamonds is about to go up, and with the engagement ring shedding much of its gorgeousness there will be a rift in love's young dream.

The cable says the slogan of Pershing's soldiers is, "Can the Kaiser." That's the stuff, boys, but don't omit the first essential, which is to catch him.

The circulation of money per capita is about \$45.00, but it is circulating so fast that it is hard to grab any of it.

World war is over the old industry and the new industry are all against each other.

WHEAT PEACE COMES

Industries Must Protect Men Released From the Army—Financiers Discussing Gigantic Effect.

New York.—In the office of one of the high executives associated with the United States Steel Corporation is exposed to view nicely framed, an apothem consisting of these words: "In Time of War Prepare for Peace." Already this corporation is looking far ahead so that it may be in position to meet some of the exigencies and the conditions that are without precedent which are to follow the termination of the world-encompassing war. It is observed that many of the industrial leaders and almost all of those who are leaders in the steel industry and in banking are now taking time to consider what our situation is to be after the war is ended. There does not seem to be general agreement on conditions as we shall find them when the war is over. Many persons think that the Government and Congress, having learned the remarkable lesson which has been taught thru the co-ordination of the railroads, the co-operation and co-ordination of industries and the vital necessity for increasing our shipping, will be prepared so to act as to facilitate the return of the war industry, and especially the settlement of the vital railway problem.

Organizations have already been perfected whose purpose is not only to maintain, but to increase our foreign trade after the war. There is no doubt that the leaders in the steel industry look confidently to a very great increase in our export of steel commodities of all kinds to other nations. In speaking of the period of reorganization, Frank A. Vanderlip recently wrote that, while the period immediately following the war is looked forward to with hope and less apprehension, nevertheless in the realization of possible danger is to be discovered the best assurance that it will be avoided.

Some have spoken with concern about the effect upon industry when the war is over, and the peaceful pursuit of millions of men who have been serving in the armies. That was an apprehension which was voiced by many, leading men in the steel industry in the last year of our Civil War. They could not forecast the effect upon industry of the mustering out of a million men who had been for four years occupied in fighting. These apprehensions were groundless, for these honorably discharged soldiers, a million in number, were not only without appreciable disturbance of industry absorbed in commerce and industry and many of them in railroad construction.

It used to occur to General Grantville E. Dodge, who was a Major General in the Union army, that there might be some industrial disaster when the war was over and the soldiers returned to their homes. In the last years of General Dodge's life when he visited New York he was accustomed to say to his friends that the nation absorbed speedily and with very beneficial results all the soldiers, because there began the work made necessary by the reconstruction of our material forces, and especially by the building and repairing of railroads.

General Dodge himself, as executive head of the Union Pacific Railroad, which was under construction at the time, was employed many men who had been Confederate soldiers and who rejoiced at the opportunity of securing work from the railroad.

That is not Mr. Vanderlip's opinion, Great as our war debt may be, and great as may be those of England and France the payment of them absolutely depends upon the swift and healthful reconstruction of industry. In the monthly review prepared by the National City Bank under the eye of President Vanderlip it is stated that there can be but one opinion among statesmen, financiers and all classes as to the necessity for this needed reconstruction of industry and commerce after the war is ended.

The shops, mills, mines, laboratories and fields will be waiting, and the goods when produced will pay for themselves in the exchange. The resumption of industry and trade has little need of Government credit in the sense of resorting to the taxing power, but it will need coordinating, stabilizing, and thrusting thru the period of reorganization.

Not the least remarkable of the lessons that will be taught by the experience of the war is the profound and sound philosophy upon which the principal of co-operation and co-ordination rests. Many believe that after the war there will be a very great development of hydro-electric energy, and as a part of this development there will be application of this new power to the movement of railroads, an example of which has just been set by the management of the St. Paul Pacific Railroad extension.

There occasionally comes intimation from those who have been in close touch with the Government authorities and some of the leaders in Congress that very likely at the next session of Congress, or certainly at the long session now taken, there will be correct mistakes that have been made in legislation, especially those which have so unfortunately affected the railroads.—Holland in Cincinnati Enquirer.

No Money for Teachers.

The following letter to Supt. J. C. Gordon will explain why the teachers will not be paid October 15.

Department of Education, Frankfort, Oct. 9.—I am writing that you may inform your teachers that the October installment of not more than \$10.00 per month, as I find that there is not enough money in the school fund to pay this installment. This is caused, as you will understand, by the failure of the railroads to pay their full assessment, as fixed by the Board of Valuation and Assessment. We will send you this money as soon as it is received. I am, Sir, very respectfully, V. O. GILBERT, Superintendent.

OUR GREAT HARVEST.

Ohio, Indiana and Illinois Have Broken All Corn Records.

The most glorious sight that can confront the eyes of an American traveler these days, is the sight of the corn fields in the Middle West. In the Willard last evening, I was presented by the fertile fields of the Middle West, Ohio, Indiana and Illinois. The harvest of corn production, corn, corn as far as the vision can reach—nothing but corn—judged by the appearance it would seem that those three states would furnish enough to feed the teeming multitudes of the whole world. Added to that is another prospect quite as pleasing, that of innumerable herds of the slickest, finest bred cattle and thousands of thousands of the fattest hogs.

"In Missouri, Arkansas and portions of Texas in which I lately traveled," continued Mr. Smith, "the conditions are good as in the Middle West. And, in fact, from the Potomac River to the Red River in Texas Mother Earth has simply outdone herself in the matter of big harvests. If this does not prove a year of plenty in the United States, then the country will never know what abundant harvests are. The big crops there is an era of proportionately high prices. For everything the farmer raises he is getting more than any time in the history of the nation."

"People living in cities, who imagine that they are the victims of the high cost of living will be astounded to hear that eggs are retreating for 50 cents a dozen in small hamlets down in Arkansas. In Red River country, Texas, the other day a negro tenant farmer sold a single bale of cotton for \$245, though but a few years ago he would have been delighted to have obtained a fourth of that sum for a similar amount. Cattlemen in Florida, Worth told me that he recently saw a bunch of three-year-old steers sell for \$138 a head. This astounding prosperity is pleasing to most farmers, but it is the spirit of the people everywhere one goes he meets with an expression of intense patriotism and loyalty to the country. President Wilson's name is on every man's lips. In the little towns as well as in the larger cities moving picture shows to the audiences, and the fervid eloquence of local orators, whose utterances about the war are greeted with tumultuous applause. Uncle Sam has reason to be proud of his sons and daughters throughout his entire borders."

Mrs. Worth Clayton brought to this office apples that weighed 33 ounces. It was shaped like a pumpkin, and was as large as a full gallon tin bucket. Some of the oldest inhabitants said it was larger than the 'old novie,' while others said it was the largest they ever saw pulled from a tree. It was red with a thick pink skin and was as sweet as the little milam—Owensboro News-Herald.

PUBLIC SPEAKING

At Court House, Saturday Afternoon, Oct. 20, at 2 p. m.—Everybody Invited.

Hon. Frank C. Greene, Kentucky Director for the American Red Cross, will speak at the Court House in Burlington next Saturday, October 20th, at 2 o'clock p. m. Since the beginning of the war Mr. Greene has given all of his time to the Red Cross, and there is no man in the State that is better posted in this work than he. Mr. Greene states in his letter that he has a message that will be of personal interest to Boone county people, and he desires a large audience. Whether members of the Red Cross or not, he especially wants the members of the County Board present, as a business meeting will be held directly after the speaking. The Rev. Huth Leith, Presbyterian minister from Covington, will accompany Mr. Greene. Rev. Leith is a very entertaining speaker, and has volunteered his services as a member of the Red Cross Speakers' Bureau of Kentucky.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of October 18th, 1877

This has been a very fine fall for farm work.

The Grant county Magistrates allowed over \$3,000 in salaries, at their last meeting.

Boone has a fine crop of corn.

Harry Blyth fell off of a wagon one day last week since which he has been going lame.

Awfully dry.

Lard 15 cents a pound. It costs something to get fat.

Several cases of scarlet fever in southern part of the county.

Jesse Franks and Sonora Powers, of Verona, were married last Thursday.

Tobacco crop curing nicely.

Rogers Association of Universalist will meet at the Burlington church next Friday.

Diphtheria and whooping cough has caused the dismissal of Prof. Jordan's school at Hebron.

A squad of Lawrenceburg spurs led by Andrew Tanner and his men, were out in this neighborhood last Monday.

The Murphy temperance movement has struck Burlington.

Burlington colored people are making an effort to build a church.

Uncle Mat Acra died last Sunday morning.

Mr. and Mrs. L. H. Dills are visiting in Grant county.

Three cases of typhoid fever in Bellevue neighborhood.

W. T. German is attending Masonic Grand Lodge in session in Louisville.

One day last week Mr. Jameson Aylor, of Hebron, was digging potatoes, and one of his little boys came up in front of him, and was so near before he noticed him that Mr. Aylor struck him a severe blow on the head with a heavy potato hook, fracturing the little fellows skull, and inflicting a dangerous wound, from which the child is not expected to recover.

Revs. L. Johnson and C. J. Bagby are conducting a protracted meeting at Verona.

Cholera has appeared among the fattening hogs of Simeon Baldon at Hebron, and several of them have died.

Rabbit Hash—Jno. J. Platt will start south with his flat boat in a few days.—C. H. Acra has moved to Hamilton, this county.—Elijah Scott of Denver, Ill. is visiting relatives here.—Miss Alice Ward is visiting in Louisville.

Normanville.—T. B. Johnson is loading a flat boat with potatoes to take south, and is paying \$6.00 to cents a barrel for them. S. J. Ewalt will leave for Colo. in a few days.

Florence.—Load of hay turned over on Dave Osborn and mashed him and broke badly.—William Osborn and his wife, with the buggy and demolished it.—James Osborn and William Tanner have formed a partnership in the grocery business.—Wm. Stephens, oldest son of Napoleon Stephens, 21, died of typhoid pneumonia last Saturday.—Col. Milton Hamilton has a severe case of rheumatism.

Petersburg.—Married, Albert French and Mary Snelling. Rev. A. Reid officiating.—There was another meeting of the Fat Ladies' convention at Nathan Walton's last Thursday.

The damage to growing crops in the Ohio Valley the latter part of last week was immense. Frost came in a condition for a great part of the worst work of the corn and tobacco crops were damaged badly.

The Submarine Menace.

Some time ago Washington dispatches said the navy was getting the better of the German submarine menace.

A recent piece of news not only confirms this, but gives ground for optimism on the part of every American who wants to see his country win the war.

There is no use barking the facts. The submarine menace was serious, and furnished cause for perturbed thought by the governmental heads of America, England, France and Italy. With the German U-boats running full tilt, there was no only danger that adequate food and supplies could not be shipped to our allies, holding the lines, while we made ready, but there was also the equal danger to our own troops enroute to France and their supplies.

And now comes the message that is bound to cheer. The U. S. Government's War Insurance Bureau has fixed a rate of 5 per cent premium on vessels sailing in the war zone. Late in July the bureau decided this was not adequate, as it had sustained some heavy losses. It raised the rate to 10 per cent. This recently was cut 25 per cent. Now an additional cut of 33 per cent has been made.

If this means anything, it must mean that the cautious experts in the bureau, with all the inside information about the shipping losses and the facts about the submarine activities figure the U-boat menace has been reduced materially since last summer.

The firing of depth bombs, the employment of various devices still kept secret, the increased activity of American destroyers and the larger use of the American plan of conveying merchant vessels—all of these things undoubtedly have played their part in offsetting the activities of the Kaiser's submarines at sea.

If the good work is kept up and perfected, the percentage of shipping losses will be further decreased. The valiant promises of the German rulers cannot be fulfilled. England and France will not be beaten to their knees, and American arms will not be kept on this side of the water.

Instead, it is going to be the happy fortune of our troops to be in at the death of kaiserism.—Cincinnati Post.

The Meat Question.

The present exorbitant prices for meat, together with the reported scarcity of hogs and cattle should cause the farmers of this country some concern for the future. True the scarcity is not so great in this country as in others, but on the other hand our export demand is more ordinarily heavy. It is estimated that since the war began there has been a decrease in the number of meat producing animals of 11,559,000. This has had its logical effect.

Taken all around, this country has increased its supply of meat producing animals, but as we have also increased our demand on has also increased many times. Exports of meat from this country are nearly three times as large now as they were before the war. The demand for meat immediately preceding the war.

Now it is perfectly evident that if we are to continue to meet the heavy demand upon our resources we will be forced to conserve the source of supply. In plain words must bend our energies to breeding more live stock of all kinds.

The feeding season is close at hand, and the farmers and stock-growers will soon begin to sort out the stock that is to go to the slaughter. In this sorting care should be taken that the likely females be saved. With the present high prices, the temptation will be great to let many of them go, but this temptation should be resisted. Each man should study for the future, and do his best to keep up the available supply. During the past two or three years the coal and breeding animals have been sacrificed that, if kept, would put their owners on easy street. All authorities agree that there is absolutely no danger of prices falling to any great extent for some years to come, so that each grower should plan to get the most economic possible out of all his animals.

It now looks very much like the fuel question will be a serious proposition at an early date this winter. A scarcity of coal exists in every direction over the country. The stock at supply points is about exhausted and very few persons have put in a supply for the winter. Mills and factories are suspending operation on account of a scarcity of fuel. In many localities coal is not to be obtained at a price that will look for keeping comfortable this winter is to say the least very gloomy.

Smith's supply of coal at Bellevue was exhausted last Thursday morning, and the fuel in Maure's yard was growing low, while many persons in that neighborhood are not at all in a position to get coal for the winter. They may have trouble later on in securing coal. Charles Westby had two teams hauling from Bellevue, and sent a last week's order to (fill his customers' bins while coal was to be had at Bellevue.

CHILDREN SCALEED.

Fatal Accident Occured Near Dry Ridge, Grant County—One Dead.

(Grant County News.) Two children of Mr. and Mrs. Ed. Lawrence were scaled so badly last Friday morning at an early hour at the home of Moses Lawrence, two miles north of Dry Ridge, that one is dead and the other is so badly injured that its recovery is considered doubtful.

The accident was caused by a tub rolling water, which had been placed in position on a chair for the family washing, being overturned by the children while all of the members of the family were out of the room. The children were aged ten months and two and one-half years. The youngest of the two children died Saturday and was taken to Jonesville for interment.

The physician of the children, Dr. J. G. Renaker, of Dry Ridge, reported Tuesday morning that there was a fair chance to save the life of the oldest child. Both children were boys.

If this means anything, it must mean that the cautious experts in the bureau, with all the inside information about the shipping losses and the facts about the submarine activities figure the U-boat menace has been reduced materially since last summer.

The mail that comes out from Covington in this morning remains in the Burlington office only a few minutes when it is intended for the rural routes, and the collected by the rural carriers goes into the Covington office on the evening of the day of its collection. Under the former schedule the mail was not collected by the rural carriers until it was received in Burlington at 8:30 a. m. one day later in the Burlington office nearly twenty-four hours before the rural carriers could get out on their routes. Those served by the rural routes will appreciate the change of schedule.

The Union High School basketball team came over last Thursday afternoon and played the larger boys' team of the local school. The Union team is composed of boys much smaller than the Burlington boys, but they put up a determined fight and were not discouraged in the least when the visitors had several footers among the Burlington crowd that admired their play.

A package of very fine sweet potatoes, to which was attached the card of Walter Ogden, who resides in the North Bend, had been sent to the editor of the paper the past week. The potatoes were beautiful and they are a sample of his crop he has a very fine lot of the article of food. Mr. Ogden will please send them for the most appreciated donation.

Candidates for back city and county offices are required to file fifteen days before the regular election a statement of expenses. The filing for the period November election will be October 22, next Monday, and unless the law is complied with the candidates become ineligible to hold office and in addition is subject to a fine.

Richard Stephens made his way to Burlington at the soonest possible moment after he discovered that old Boreas had put in his appearance and there was every indication of the weather becoming more uncomfortable for him. Mr. Stephens knows a good place to be when the weather is on the rampage.

Ed. Berkshire is having trouble saving his very large crop of apples. It being impossible to secure a market to gather them, it is said that with the prospect of a heavy crop he will not be done gathering apples by Christmas. If apples could be used as fuel he could find help to store them.

The reconstruction work on the Covington and Lexington pike is completed from Florence to Devotion Station on the Southern Railroad, and it is a dandy road, which a good coat of oil would protect from wear for a long time, and it is a great pity the county is not financially able to have the oil put on the road.

Sheriff Cropper has only a few more precincts to visit to complete his second and last circuit of the county collecting taxes for the past year. He has previously called those who have not met him and paid their taxes will have to call upon him in his office in Burlington.

The price of postage stamps has not increased but their carrying capacity has decreased, and after the first of next month you will find a three cent stamp where a two cent stamp answers the purpose now. War is exactly what Gen. Sherman said it was.

Elmer Kirkpatrick took to market a few days ago for it. He had a large lot of sweet potatoes and brought in 1500 lbs. of them, the total amount received for these being \$307.50.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

John Lane of Ludlow, spent Sunday here with friends and looking after his farming interests.

Miss Eva Cram spent last week at Peru, Indiana, on a visit to her sister Mrs. W. E. Williams. Mrs. Elizabeth Dempsey and Mrs. John Ryan, of the Beaver Lake neighborhood, were visitors to friends here Saturday.

Robert W. Jones and Harry D. Mayhugh, made the trip to Flint, Michigan, last week, for several Buick automobiles sold by Mr. Jones.

Mrs. Cynthia Mason, Mr. and Mrs. J. L. Smith of Hathaway, and Robert W. Allen of Lansing, spent Saturday here with relatives and friends.

Raymond Roberts who is employed on the L. and N. Railroad at Louisville spent part of the week here with his father J. K. Roberts.

Miss Sybil Hurt who is teaching school at Jonesville spent from Thursday until Monday here with her parents Mr. and Mrs. Jas. T. Hurt.

Dr. H. C. Cram who has been at Oakdale, Iowa, the past two years, arrived home here this week on a visit to his parents Mr. and Mrs. W. H. Cram.

Mrs. A. B. Tompkins and son John Hamilton Tompkins, left Sunday for a visit to their sisters at Oklahoma City and Denver, Colorado, expecting to be gone a month.

The meeting of the ladies of the M. E. church of the Covington district held with the Walton church last Saturday was well attended and a very interesting program was rendered.

Mr. and Mrs. Charles Vest, of Latonia, were visitors here Saturday and Sunday. Mr. Vest is prospering in his business of contracting, erecting many buildings for residence purposes.

The Walton Masonic Lodge conferred the entered apprentice degree on Sampson Tomlin at the meeting Friday night, and there will be work in the Master's degree Friday night, Nov. 2nd.

Geo. W. Sleet and son John W. of Crittenden, were here Saturday visiting their many friends. Mr. Sleet will probably buy property at Walton and move here as he has many relatives and friends here.

A. J. Thomas, Chas. W. Ramsey and D. B. Wallace are attending the annual meeting of the Masonic Grand Lodge and Grand Chapter at Louisville this week representing the Walton Masonic bodies.

W. B. Bvarty spent the past week at Middlesboro, Bell county, attending the annual session of the Odd-Fellows Grand Lodge as the representative of the Walton Lodge, and enjoyed a most delightful trip.

James Gayle of Carrollton, was a visitor here Saturday endeavoring to interest a few friends in the coal mine he is operating at East Benetadt, Laureate, which has a very promising outlook. Mr. Gayle is the mayor of Carrollton and is the president of the Carrollton and Northville Railroad Company.

Married—Chester Hogan Rice to Miss Ruth Houghton at Erlanger, Oct. 6th. The groom formerly resided at Walton and is a son of Mr. and Mrs. W. H. Rice of Cincinnati. The bride is a daughter of Mr. and Mrs. Wm. Houghton of Erlanger. The young couple will make their home on Price Hill, Cincinnati.

R. M. Remaker and D. B. Wallace spent last Wednesday at Sanders on business relative to the former's tobacco warehouse at that place. Mr. Remaker is the book-keeper and Mr. Wallace the secretary-treasurer. The work on the building is being pushed to an early completion and everything will be in readiness by Dec. 1st.

W. Tilden Dudgeon, the popular Walton postmaster, spent Friday in the city taking special instructions relative to his reports to be made out by the post office as a distributing office for the other sixteen postoffices in Boone county, which order was recently made by the Washington Department, and which entails a lot of complicated work.

Mr. and Mrs. Jno. L. Vest and Mrs. Julia Adams-Rouse returned Friday from Whitesburg, Letcher county, where they attended the annual session of the Order of Eastern Star of which Mrs. Emma Menefee of Covington, was the Grand Worthy Matron, and gave a most satisfactory report on the administration. The little town entertained over 500 delegates in a most hospitable manner.

Roy D. Stamler, publisher of the Walton Advertiser, and owner of The Royal moving picture show, has been notified to be in readiness to answer the draft call, and he is therefore making arrangements about the draft call, and he is therefore making arrangements about the management of his business during his absence. Jas. R. Wallace will conduct his newspaper and printing office.

W. F. Moore was called to Indianapolis Thursday to attend the funeral of his brother-in-law, Chas. Kallus, who died in that city Wednesday afternoon at 10 o'clock. He had been in a hospital in that city for a surgical operation for enlarged prostate glands but his condition was such that the operation could not be made. While his case was hopeless, yet his death came unexpected. He was married to Mr. Moore's sister. His funeral takes place Friday.

Married—Howard H. Mills and Miss Elizabeth Johnson, both of the residence of the bride's parents Mr. and Mrs. W. Berry Johnson, at Walton. The young couple both taught school in Kenton county, the groom being a brother of the county supt., of Kenton county. The ceremony was performed by Rev. Olaus Hamilton of the Baptist church in the presence of a large number of friends and relatives. The bride is a most lovable and pretty young lady and has a host of friends. Mr. and Mrs. Mills will make their home in Covington.

John B. Cunningham and Miss Lula Bollington were married October 8th, at the residence of the officiating minister Rev. A. H. Ellis, pastor of the Park Ave. Baptist church, Covington. The groom resided at Attica, New York, and is engaged in the real estate and life insurance business. The bride is the daughter of Mr. and Mrs. James Bollington of Walton, and was formerly an operator in the Walton telephone exchange and has been similarly employed in Cincinnati where she met Mr. Cunningham. She is a splendid young lady and will make an excellent helpmeet for the husband of her choice. They will make their home in Brooklyn, N. Y. at Nov. 1st.

Hugh P. Colville and brother, of Covington, were visitors to friends here last Thursday. Mr. Colville recently resigned the position of cashier of the Germania National Bank of Covington, to accept the position of vice president of the Citizens National Bank of Louisville at a salary of \$6,000 per year, and went there a couple of months ago. He is one of the most popular gentlemen in banking circles in Kentucky, and carrying with him his charming personality and business acumen he has already installed himself in the hearts of the people of Louisville and is adding much to the strength of his banking institution. Mr. Colville has many friends in this quarter who have their best wishes for a very happy and prosperous future in his new home.

The friends of Thomas Percival and Mrs. Edith Baker were considerably surprised Thursday afternoon when it was announced that they were married at the home of the bride at four o'clock by Rev. Olaus Hamilton. Only the family of the bride and a few intimate friends were present to witness the ceremony. After they were made man and wife they left for Cincinnati where the honeymoon is familiarly known by his friends is an excellent gentleman and has a host of friends. He is engaged in the livestock business and has been very successful in that line. He is a good hustler and makes good in anything he undertakes. Mr. Baker is the father of Mr. and Mrs. J. B. O'Neal and resided with her parents on Needmore street. She has been employed as operator in the Consolidated Telephone exchange at this place for nearly a year. She is a young lady of excellent qualifications, and while a new comer to Walton has won a resident for only a little over a year, has many friends here. Mr. and Mrs. Percival will in all probability make their home at his present residence. Their many friends wish them much joy on their long voyage upon the matrimonial sea.

VERONA.

King frost caught some tobacco standing in the patch. Sheriff Cropper made his last call here collecting taxes last Monday.

The county assessor is making his annual rounds in the Verona neighborhood. Mr. and Mrs. J. M. Powers were guests of their daughter, Mrs. Lula Roberts, last Saturday. Miss Nannie Powers, has just returned from a pleasant visit at Rev. A. K. Johnson's, in Ghent. W. J. W. was called to the bedside of Rev. Chapman, of Dry Ridge, who got hurt playing foot ball, last Saturday. Harry Ferguson, one of Uncle Sam's boys, located at Camp Taylor, visited his parents Saturday and Sunday. He is well pleased with the training camp.

Many here are without their winter's coal and have been unable to procure any fuel, and many are having wood hauled to take the place of coal.

DEVON.

Mrs. Elizabeth Groger is not so well. Mrs. Chas. Cody was ill last Monday. Mrs. Eli Carpenter was the guest of Mrs. Benjamin Bristow, Friday. Miss Mamie Shadler was the guest of Mrs. Blanche Bagby, last Saturday.

Mr. and Mrs. Benjamin Bristow were calling on friends near Bank Lick, Sunday. Mrs. Wm. Lampton, of Bank Lick, was the guest of her sister here Thursday afternoon. Mrs. John Easton slipped on a rock and hurt her back badly but not seriously, last Saturday. Harry Norman came out Saturday morning and remained until Sunday evening the guest of his mother, Mr. Ben Norman. Mrs. Harry Norman's daughter, Miss Ora, returned to the city, Monday morning after a visit with Mrs. Oscar Mann, of this place. Mr. and Mrs. Ambrose Easton

and Clarence Easton, of Burlington, were guests of their parents, Mr. and Mrs. John Easton, Sunday. Mr. and Mrs. T. J. Hartsell Sundayed with their uncle, William Taylor and family, of Bracht Station, and attended services at the Christian church in Crittenden. Mr. and Mrs. John Roache had for guests Sunday Mr. and Mrs. E. Marshall, of Newport, Mr. and Mrs. William Marshall, of Cold Springs; Mr. and Mrs. Wm. Singleton of Ohio. Mr. and Mrs. Singleton remained for several days.

The sad news of the death of Mrs. Amanda Carpenter, one of our county's noblest women, was received here yesterday. The funeral will be at the M. Zion church Monday at 1 p. m., and burial in the Carpenter cemetery at Richwood.

BELLEVUE.

Mrs. Belle Clore has been sick the past week. Peter Deck, of Petersburg, is here on a visit.

Rene A. Brady, Jr., made a business trip to Cincinnati last week. Mrs. Harriet Stephens is the guest of her sister, Mrs. Eliza Riddell.

Miss Ruby Ryle was the guest of Miss Neva Rice Saturday and Sunday.

Walton, wife and mother were shopping in Cincinnati last Saturday. Revival meetings are in progress yet at the Baptist church, and much interest is manifested.

Bellevue basketball teams played at Petersburg last Friday. Boys won and girls lost. J. J. McNelly and wife and Mrs. Marcus Ryle and son were Sunday guests at C. S. Smith's.

Carlos Cason and Mrs. Nannie Maurer spent Saturday and Sunday with friends and relatives near Florence, Indiana.

Mrs. Sophia Clore and daughter, Miss Alline, Miss Julia Smith and Mrs. Minnie Ryle, were Sunday guests at Pepper Smith's.

Edwin Kelly, who has been in a long time, was taken to a Covington hospital last week. His friends hope he may be benefited.

Orville Rice and cousin, Walton Rice, two of the selectests from here spent Saturday and Sunday with home folks. They look like Uncle Sam is taking good care of them at Camp Taylor.

FRANCESVILLE.

Miss Lucille Eggleston, who was very ill last week, is improving. Edward Eggleston united with the church at Sand Run, Sunday. Walter Ogden and wife were Sunday guests at J. W. Utzinger's. Miss Adeline Scothern entertained her friend, Miss Bessie Muntz, last Sunday.

Mr. and Mrs. Collier entertained relatives from Dayton, Ohio, Saturday night and Sunday.

Frank Aylor and wife, of Harbron, spent Sunday with her parents, Mr. and Mrs. Harry Kilgore. Mr. and Mrs. J. S. Eggleston entertained a large number of their friends and relatives at dinner, Sunday.

Misses Amanda Koons and Sadie Rice were guests of Misses Mary Frances and Emma Goodridge, Sunday.

Graham Markland, of Cincinnati, spent Saturday night and Sunday here, guest of his mother, Mrs. Nellie Markland.

Mr. and Mrs. William Reitmanner had as guests, Sunday, Mr. and Mrs. John Smith and two children, of Cincinnati; Miss Lucy Eggleston, of near Burlington; and Fred Reitmanner and Harry Muntz.

Red Cross Notes.

There is now a new supply of yarn at headquarters, so get yours immediately as all knitted articles must be in by November 1st.

The Burlington High School organized as a Junior Red Cross Auxiliary Monday afternoon.

Rabbit Hash cleared about \$50 at their flag-raising; this is certainly much appreciated money because much needed. Let the auxiliaries that have not given entertainments of some sort, do so.

Do not fail to attend the Red Cross meeting at the Court House, Saturday afternoon. County officials are especially urged to attend.

The Burlington auxiliary will meet next Friday, Oct. 19, at 3 p. m. in the grand jury room. Please come as matters were discussed at the Friday afternoon meeting that should be decided.

Articles suggested for Christmas presents: Khaki-colored handkerchiefs, writing paper and 7x10 envelopes, pencil or fountain pen—jack knife style, snapbook—home-made containing snap shots, jokes, etc., electric torch, fruit cake, mirror, games, dyes, daisies, etc.

Boone County Chapter American Red Cross, Burlington, Ky.

My dear Mrs. Chalmers:

We wish to acknowledge with thanks the receipt of your shipment of surgical supplies, and the same are being forwarded at once. This was an excellent shipment and all beautifully done, but we now have to discontinue the following: Knitted Sponges, 1 yard gauze rolls, 4x4 and 2x2 gauze sponges, drains, fracture plasters, Ispagoulum pads, all mullin rolls.

HELEN GARFIELD, Inspector Bureau of Supplies, Cleveland, Ohio.

Tax-Payers, Notice!

Notice to Contractors

Sealed proposals addressed to the Fiscal Court of Boone County will be received up to 12 o'clock noon Monday, Oct. 22d, 1917, when they will be publicly opened and read, for the building of three bridges in Boone County.

The work as described and shown in the plans and specifications to be seen at County Road Engineer's Office.

Estimated quantities—Linsburg Bridge, Road 8-A-1, Burlington & Florence, 60'-0" Standard Steel Bridge with concrete floor.

Superstructure—32,200 lbs. Structural Steel. 3,900 lbs. Reinforcing Steel. 161 cu. yds. Concrete.

Substructure—180 cu. yds. Concrete. 200 cu. yds. Masonry.

First Covered Bridge, Road 8-B-1, Burlington and Petersburg, 60'-0" Standard Steel Bridge with wood floor.

Superstructure—28,000 lbs. Structural Steel. 4,240 lb. B. M. Lumber. Substructure—133 cu. yds. 1, 2, 5 Concrete. 306 cu. yds. masonry.

Second Covered Bridge, Road 8-B-1, Burlington and Petersburg, 60'-0" Standard Steel Bridge with wooden floor.

Superstructure—33,000 lbs. Structural Steel. 5,200 lb. B. M. Lumber. Substructure—453 cu. yds. masonry. 152 cu. yds. concrete.

Bids must be for work to be done in accordance with the plans and specifications approved by the Fiscal Court and the Commissioner of public roads, on file at the County Clerk's Office in Burlington, Ky.

The Fiscal Court of Boone County expressly reserves the right to reject and all bids.

Before the contracts are binding on first parties, they must receive the approval of the Commissioner of Public Roads.

Each bid must be accompanied by cash or a certified check payable to the amount of the proposal, 5 per cent of the amount of the proposal, which check shall be held until the execution of the contract.

Before the contract is awarded, the successful bidder or bidders will be required to furnish a bond equal to the amount of the proposal for the faithful performance of the work in accordance with aforesaid plans and specifications.

All work to be done under the direction and supervision of the Commissioner of Public Roads.

By order of the Fiscal Court of Boone County, R. ROGERS, County Clerk of Boone County.

Local Happenings.

The cold weather hastened the Koffer pear harvest.

Lead thirty-five cents a pound—butter is about as cheap.

Better save the leaves, you may need them for fuel this winter.

The RECORDER will run your name in the posted list thru the hunting season for 25 cents.

Rev. J. B. Briney will begin a protracted meeting at Bullittville Christian church today, Oct. 18th.

Thos. Craddock and family moved to the Chas. Birkle property in Burlington one day the past week.

Come out next Saturday afternoon and hear Hon. Frank C. Greene at the court house. He will interest you.

Winter came rather unexpectedly, and there was a rush for heavy weight wearing apparel last Saturday morning.

The hunting season will soon be here. Send 25 cents to the Recorder and have your land posted the entire season.

County Clerk W. R. Rogers has taken on grate-setting as a side line. He succeeded in occupying the last week by working over time two or three days.

R. B. Huey and son, Howard, sold one day last week 35 hogs that averaged 170 pounds at 19¢ cents a pound; the total amount realized for them being \$1,130.50.

Jeff Powers, of Verona, and Scott Chambers, of Walton, are Boone county's representatives on the United States grand jury in session in Covington, this week.

The abutments under the bridge at the Geo. E. Rouse gate on the Florence pike are being put in a condition that will make them substantial structures for many years.

Elzie Poston and wife are now citizens of Burlington, occupying the Betty Acres residence which John C. White and family vacated when they moved to Walton about two weeks ago.

Kirtley Rice made a mistake as he was going off the end of the walk in front of Elmer Kirkpatrick's residence, one day the past week, when he fell and bruised one side of his face considerably.

The face of the country indicated that nature was not prepared for the coming of winter. Pastures were green while the corn fields, tobacco patches and gardens carried a mid-summer appearance.

A Red Cross meeting will be held at the Bullittville Christian church, Wednesday, October 22nd, at 1 o'clock, P. M. Many people as can be requested to be present as business of importance will come before the meeting.

The following was copied from the Fifty Years Ago column in last Sunday's Commercial Tribune: "Dr. Benjamin M. Crisler, member-elect of the Kentucky Legislature from Boone county, dies at his residence near Burlington."

The first delivery of coal by truck was made here last week by John Maurer, of Bellevue. He brought two loads of fifty bushels each per day to M. L. Riddell. It will not be long until other coal trucks will be coming to Burlington.

Irvin Hood, who resides down on the headwaters of Middle creek, has shipped to market 100 bushels of onions. Mr. Hood says his crop is not as good as it would have been if he had a better quality of sets when he planted.

Some of the city automobiles that went out the Bellevue Pike last Sunday returned on their homeward trip loaded with nice red apples. It is presumed they were secured at a price far below what they would have cost in the city.

Cashier McNeely, of the Citizens Deposit Bank at Grant, this county, made a mistake when he set the time lock on his safe at the closing hour, one afternoon last week, and he was kept out the safe twenty-four hours longer than he intended to be.

The first snow of the season flew in this section of the county last Friday morning, giving the day an exceedingly wintry appearance. That being the 12th day of the month there should be only twelve snowfalls in winter if the old saying is to be made good that the day of the month on which the first snow falls indicates the number of snowfalls for the winter.

Another ruinous practice that should be stopped, by law if necessary, is the practice of slaughtering very young animals, particularly calves and lambs. The waste of material is too great to be countenanced under present conditions. If all the calves, pigs and lambs in the country are allowed to grow to maturity it will go a long way toward remedying the present great shortage. But above all things do not destroy the source of supply—the females. Intelligent attention to this detail is absolutely necessary if our meat supply is to be kept up to the great demand that will continue to be made upon it for some time to come.

Personal Mention

Miss Shirley Tolin is the guest of her aunt, Mrs. Rose Powell, of Danville, Illinois.

Perry E. Bruce came in early Monday morning and joined the Recorder's army.

L. A. Conner and wife spent last Sunday with Mrs. Conner's relatives in Ludlow.

Meedames Marce Riddell and E. W. Duncan spent Monday with relatives at Walton.

F. H. Rouse is attending the Masonic Grand Lodge in session in Louisville this week.

Miss Lizzie Stephens, of Erlanger, was the guest of Mr. and Mrs. R. S. Cowen, last Monday.

Thos. Z. Roberts from down on Middle creek, was a business visitor to Burlington, last Monday.

Dolpha Sobree and wife were guests of C. A. Rouse and wife, down on Gunpowder, last Sunday.

Miss Sallie Rogers has been visiting relatives and friends in Walton neighborhood for several days.

W. A. Gaines and son, Bernard and wife, are visiting George W. Gaines and family, in Hume, Illinois.

Dr. T. E. Randall, of Petersburg, was looking after the condition of livestock in this part of the county, last Monday.

Geo. Kreylich, wife and daughter, and Mrs. Nellie Scott, of Covington, were guests of Mr. and Mrs. Riddell, last Monday.

Miss Mary A. Thompson returned last Saturday evening from a visit of several weeks with friends in Norwood, Ohio.

N. E. Riddell and wife are in Louisville, he spending several days at the Masonic Lodge at Grand Lodge in session there.

Lou Crutcher, one of Hebron's hustling business men, was transacting business in Burlington last Saturday afternoon.

Stanley Eddins and wife spent Saturday night and Sunday with her parents, Mr. and Mrs. Peter Bucher, in Bellevue, Campbell-co.

Master Commissioner William N. Hind and wife, of Covington, were among the autoing parties who visited Burlington, last Sunday.

Mr. and Mrs. Joseph Kincaid after a visit of several weeks with relatives in the county, left, last Friday for their home in Monroe City, Mo.

Dr. M. J. Crouch and Owen Blankenbaker, two of Union's prominent citizens, were transacting business in Burlington, last Saturday.

John C. Boland chaperoned a trio of Petersburg parties to Burlington last Saturday afternoon, where he spent several hours exchanging yarns with some of the natives.

Wilbur Rice and wife, of Idlewild neighborhood, were Saturday night and Sunday guests of his cousin, Mrs. Lennie Eddins, coming out to see Wallace Rice off for Cleveland, O., Sunday morning.

Congressman A. B. Rouse and wife are at home for several weeks. Mr. Rouse's looks indicate that he enjoyed the last session of Congress, notwithstanding it was somewhat strenuous.

J. B. Berkshire and wife, Eugene Berkshire and wife and Robert Berkshire all of Petersburg, were in Burlington a short time last Sunday afternoon. They constituted an auto party that were talking in that part of the country.

Miss Estelle Huey, who is teaching in the Dry Ridge, Grant-co., High School, was at home from last Thursday evening until Sunday afternoon, with her parents, Mr. and Mrs. R. B. Huey, of Commissary neighborhood.

Chas. Snelling, who resides out on the Lang P. Anderson land at Commissary, was an early Monday caller at this office and gave the Recorder a financial boost. Mr. Snelling is one of the hustling farmers in this part of Boone county and is making good.

Earl Walton, of Petersburg, was a business visitor to Burlington last Saturday afternoon. Mr. Walton is pretty well through harvesting a large crop of various kinds of farm products the proceeds of which will increase the size of his already healthy bank account.

Capt. Rose, of Ft. Benjamin Harrison, was a guest at Edgar Berkshire's from last Saturday evening until Sunday afternoon. His wife was Miss Nellie Berkshire, daughter of Mr. Berkshire, and she is making her home with her father and step mother while her husband is in the service... of Uncle Sam.

Wallace Rice left last Sunday morning for Cleveland, Ohio, to report to the proper authority under whom he will begin his work as Assistant National Bank Examiner. He took with him the best wishes of a host of friends who were sorry to see him leave the town but hope his career in the business world will be onward and upward.

Ernest Arnold, who engineered all the pikes in this county, was in Burlington a few hours last Sunday. It will be remembered that he has been in the training camp at Fort Benjamin Harrison near Indianapolis for several weeks. He was in fine spirits and his looks indicate that the life of a soldier is agreeing with him. He was accompanied by Mr. Long, though the State man who superintended the reconstruction of the Burlington and Florence pike.

Several of the Boone county boys who were at Camp Taylor, Louisville, spent last Saturday night and Sunday at home with their parents.

Years Ago.

Ladies wore bustles. Operations were rare. Nobody awaited the fly. Nobody had seen a sho. Nobody had appendicitis. Nobody wore white shoes. Nobody sprayed orchards. Cream was 5 cents a pint. Most young men had "livery bills."

Cantaloupes were muskmelons. You never heard of a "Tin Lizzy."

Doctors wanted to see your tongue. Milk shake was a favorite drink. Advertisers did not tell the truth.

Nobody cared for the price of gasoline. Farmers came to town for their mail.

The hired girl drew one-fifty a week. The butcher threw in a chunk of liver.

Folks said pneumatic tires were a joke. Nobody "listened in" on a telephone.

There were no Sane Fourths nor electric meters. Strawstacks were burned instead of baled.

Publishing a country newspaper was not a business. People thought English sparrows were "birds."

Julius Verne was the only convert to the submarine. You stuck tubes in your ears to hear a phonograph, and it cost a dime—Pike County (Ill.) Republican.

The government has decided to temporize no longer with them, but to force them to operate under government license, with strict limitations as to profits.

Examination of baking company records, and actual baking tests by the government itself, prove the public is being held up when it is charged 10 cents for a 14 or 16-ounce all-wheat loaf.

With the baking industry under license the price reduction to be required will approximate 25 per cent.

This probably will be secured thru the standardization of a 20-ounce loaf to retail for 10 cents, yielding 25 per cent more bread for the same price.

It is believed the larger loaf will be more satisfactory than maintaining the pound standard and fixing the price at an odd figure such as eight cents.

Government tests show the ingredients in a one-pound 10-cent loaf at present prices of flour cost the bakers only from 3.44 cents to 3.73 cents.

Charles Westbay has been hauling coal all fall for other people, forgetting that he would need any fuel when cold weather came, and last week when old Boreas got busy in this section, Charles discovered that his coal bin was exhausted and there was none to be obtained at the coal yards in this part of the country. He declares that hereafter he will look after number one a little closer.

The Recorder carries this week advertisements of four big safes, the first of which, will be met Saturday, followed on the 24th inst., next Wednesday by Rouse & Bradford's. Look these advertisements over.

Albert Conner has improved the looks of his house by having it given a couple of coats of fresh paint, Chester Aylor doing the work.

Ryle's freight truck passed thru Burlington at noon, Monday with a sundry manifest.

The immense undertaking is to straighten Panther creek south, and will drain 55,000 acres of land, and 2,100,000 yards of dirt are to be moved. The contract is for \$475,000.

BOONE CO. RECORDER
W. L. RIDDELL, Publisher.

Gushing Use of Slang.

There is an element of common talk that points to the close observer the difference between the genteel folks and those who have grown up under less favorable environments. The correct handling of the King's English is a gift both pleasing and one much appreciated by one's associates. Sentences correctly spoken and grammatically constructed and free from slang are builded with care in the early training of youth. Environments must be clean and the school room is a place where correct manner of expression should be taught and its usage insisted upon.

There is a practice indulged in by many of using as much slang as possible, each vying with the other in the objectionable use of phrases and sayings not found in any standard work of literature or used by any speaker of note—and more's the pity, these slang artists seem to think their versatility and facility in this line marks them as being very gifted and up-to-date in the art of conversation. This, indeed, may please the groundlings, as will Shakespeare remarked, "but it must make the judicious grieve, and to many it is very unpleasant if not nauseating."

A practice of reading each day a chapter of Charles Dickens will help greatly in the use of pure English and in sound thinking. In fact if all who would spend a few hours each day reading and studying the work of some good author we should be less inclined to let upon society a gushing sw of slang which means nothing and denotes nothing save as proof only of an empty, idle brain.

We do not necessarily mean that we should be always serious, solemn or precise, but rid our vocabulary and general conversation of rowdy, slang and frivolous phrases that signify nothing, unworthy and idle thought that tends to degrade rather than to improve our manner of speech, our moral fiber or mental force.

Two Distinguished Americans.

Two Americans, of whom any country and any church may well be proud, reside in Baltimore and Minneapolis. One is Cardinal Gibbons and the other is Archbishop Ireland.

Yesterday the newspapers published the stirring appeal of Cardinal Gibbons to the American people incident to his acceptance of the chairmanship of the National Unity League. It is only one of many noble utterances. Cardinal Gibbons ranks with Dr. Eliot, the distinguished retired president of Harvard University, as an American citizen whose advice is invariably received with respect by his countrymen, and upon whom the weight of years sit lightly.

Long before the war came upon the world the influence of Cardinal Gibbons had been felt in the advancement of meritorious causes, but we are mistaken if the Cardinal has not won for himself a new place in the hearts of his countrymen by the robustness of his Americanism and the ardor of his patriotism since the war began. At every succeeding crisis in the long domestic struggle with Germany the voice of Cardinal Gibbons was raised to call upon his countrymen to stand by America and the President, and since this country came into the war Cardinal Gibbons has rendered services of increasing value.

The stand of Archbishop Ireland in Minneapolis has been less commented upon, but it is worthy to be compared with that of Cardinal Gibbons. There has been since the war between this country and Germany began, a nest of traitors in Minneapolis. Against these men Archbishop Ireland has fought with age and courage and indomitable energy. For weeks at a time he has been on the platform, urging his countrymen to stand by America, upholding the honor and the President, denouncing if being in words that cut like a knife the traitors in his part of the world.

Both Cardinal Gibbons and Archbishop Ireland are old men. Both are drawing near the ends of lives that have been eminently useful and honorable, and both are regarded by those of their fellow citizens who are not of their denomination with an esteem that cannot be too freely acknowledged.

Louisville.—Plans to raise \$400,000 in Kentucky were formulated by the War Council of the Young Men's Christian Association. The funds will be used to finance war work being done by the association for a period ending next July.

The base ball series for the championship of the world have been played, the war news has been placed on the front page again.

JOHN J. CLEEK.

Death has again entered our midst and called one of our old and most highly esteemed citizens. John J. Cleek, son of Jacob and Sallie Cleek, was a man of many high and ennobling qualities, one of the chiefest of which, he was a lover of home. Being bereft of his companion early in his married life with two little daughters to care for, instead of leaving them in the hands of a nurse and finding his solace and comfort in mixing and mingling with the world his greatest delight was in administering to their comfort, which he did with the deftness and tenderness of a woman; he became both father and mother and with the assistance of his own beloved and sainted mother made a home for his children and they were reared to christian womanhood under their tenderest and painstaking care. Another admirable quality that needs mentioning. He was kind and considerate of the poor, he never was a man to sound a "strum" and many a kind deed was done and kindly word of encouragement spoken, known only to his family and those intimately associated with him. He had no time or patience with sham or dishonesty; he was honest to a penny in all of his dealings with his fellow-men; he never sought to take advantage of those less fortunate. He was outspoken against idleness and profligacy. Thereby some may not understand the depths and tenderness of his inmost nature. He wished all men well and only regretted when his neighbors failed to live up to his high standard. His death came as a shock to his many friends and neighbors. While he had been in poor health for some time we had hoped that he would soon be restored to his usual health, but there comes a time in the lives of all mankind when we have to say or ought to say to say "Thy will not mine be done."

We want to express our heartfelt sympathy to the family in this sad hour and commend you to the care and comfort and sustaining grace of Him who doeth all things well; who has said in holy word, "you do not understand now but if you are true and faithful all things will be made plain when we come to stand face to face—in the Great Beyond with our Savior."

Charles O'Hara, Erlanger.

FARM HAND DECAPITATED.

Young Man Had Many Relatives in Boone County.

Lawrenceburg, Ind., October 16.—Furnish Aylor, 33 years old, employed on Fitch Bros. large farm near the state line, was killed from here, had his head severed entirely from his body today when a knife on a corn shredder was feeding feed out of the machine.

The unfortunate man had a large number of relatives in this county, and was a namesake of Dr. J. G. Furnish, of Covington.

NO ORDERS ISSUED.

Frankfort, Oct. 16.—No order for movement of any more drafted men from Kentucky to Camp Zachary Taylor has been received by Adjt. Gen. J. Tandy Ellis and none will be sent there for at least two weeks. He received a telegram from Washington yesterday stating that he will receive two weeks' notice. It was announced in the telegram that there will be no appeals to the adjutant general from the district exemption boards in regard to occupational exemptions. Recently the department ruled that exemption cases might be reopened under certain circumstances, but this modification limits it to action arising before the local boards, which have nothing to do with occupational exemptions.

A petition is being circulated by the present board of town trustees to stand for reelection at the regular election next month.

The people down on the East Bend road hope to be ready to begin piking that road early next spring.

Some are predicting a nice fall notwithstanding the winter weather of last week.

The work on the addition to C. C. Roberts' residence is about completed.

The leaf harvest is on in Burlington again.

Pass Along the SMOKES

YOU warm-hearted people of Boone county won't let the men who are fighting your fight go smoke-hungry.

Not a bit of it. You are going to see to it that they get all the tobacco they need—just as the folks back home in England and France are taking care of the smokers for Tommy and Poilu.

It isn't much to do—considering. A dollar or a quarter from you that gives a little comfort to one of your own flesh and blood, doesn't stack up to much alongside the fact that the very man you are befriending may have to give up his life.

But it's a regular thing to do—and you "regular" men and women will do it.

This is the way. Fill in that coupon below put it in an envelope together with all you can afford to give and drop it in the nearest box now, addressed to

Boone County Recorder Tobacco Fund

Our paper has joined The Courier-Journal and The Louisville Times in this most worthy undertaking.

Approved by the Secretaries of War and Navy, the management of this fund buys its tobacco at cost—every contribution of twenty-five cents means forty-five to fifty cents' worth of tobacco for the men out there. No one profits but the fighting man—rents, postage, advertising are all contributed and the soldier who gets your tobacco will send you a postal telling how much it meant to him.

There's no argument here. Just put your name on that blank line and pass along the smokes.

Recorder, Burlington, Ky.

Inclosed find \$..... to buy..... packages of tobacco (pipe or cigarettes tobacco or plug chewing) or cigarettes through the Courier-Journal and Louisville Times "Our Boys in France Tobacco Fund" for American fighting men in France.

I understand that each dollar buys four packages, each with a retail value of forty-five or fifty cents, and that in each of my packages will be placed a postcard, addressed to me, on which my unknown friend, the soldier, will agree to send me a message of thanks.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

RICHWOOD.

J. S. Cason is building a new house.

J. J. Summers is able to be about after a severe illness.

Silo fillings, seeding and corn cuttings are the order of the day.

Wiley Grubbs has returned from a six weeks trip to Middletown, Ohio.

Our pike man is still on the job and is making good headway nowadays.

Mrs. Amanda P. Carpenter passed to the Great Beyond, Saturday, Oct. 13th, at 11:30 p. m., after a lingering illness of several months. She leaves a son, Theodore, his wife and 4 grandsons to mourn her death. Aunt Amanda was born Feb. 12, 1839, and was the eldest daughter of Andrew and Dinah Glacken, and married the late John R. Carpenter, who passed away several years ago. Funeral services were held at Mt. Zion M. E. church, to which Aunt Amanda belonged for 30 years. Her popularity was attested to by the large number that visited her while sick and her large funeral. Interment at the Carpenter cemetery. Aunt Amanda raised Will W. Woodward from infancy and gave to him a mother's love and care and will has proven his worth and his devotion by being with her and helping Theodore and family care for her to the end. Of the large family of Andrew Glacken, Aunt Amanda is the last.

UNION.

William Rouse is still very ill.

Mrs. John Newman is still numbered among the sick.

Linnie Love and family spent Sunday at J. C. Love's.

Mrs. and Mr. J. S. Head spent Sunday with Mrs. J. A. Smith.

Miss Mary Allen, of Missouri, is visiting friends and relatives here.

Mr. and Mrs. E. A. Blankenbaker and daughter, Alma, spent Sunday at Clint Blankenbaker's.

The soldier boys of this vicinity spent Saturday night and Sunday at their homes.

The boys of Union played basketball with Burlington Thursday afternoon. They played a good game, but were defeated.

Mr. Carroll and Miss Edith Frazer returned to their home in Mt. Vernon, Monday, after a visit of a few days with their uncle, a L. J.

HUME.

Lute Abdon made a business trip to Lexington Saturday.

R. Schwinkey shipped some fine hogs the first of the week.

Arch Noel and wife visited Less McCrandes and family Sunday.

The village blacksmith, Mr. Cayton, made a trip to the city Monday.

Mrs. Sarah E. Roberts visited her granddaughter, near Ryle, last Thursday.

Mr. and Mrs. Crouse and children visited R. Schwinkey and family Sunday.

Miss Ruth Roberts was the guest of Miss Lena and Kathryn Binder, Sunday.

Lester Moore and wife visited the latter's mother, Mrs. J. G. Finnell, Sunday.

Miss Ray Pollard, of Glencoe, is the guest of her aunt, Mrs. J. M. Jackson.

George Smith, wife and two children, were guests at Abdon's Saturday and Sunday.

Died, William Sutton, of South Fork, on the 8th inst., of kidney trouble. He was 69 years old. He leaves a wife and four sons, viz: Lee Sutton, of Covington, Charley Elmer and Ben, all living at South Fork. Burial at the family cemetery.

Mr. Sutton was a good neighbor and a kind and loving husband and father and his death will be mourned by a large circle of friends. The community extends to the bereaved widow, children and relatives, sympathy and commend them to the care of Him who doeth all for the best, and who alone can comfort in time of trouble. The funeral was in charge of Edwards & Son, of Walton.

HEBRON.

Preaching next Sunday morning at 10:30.

School opened again Monday after being closed two weeks on account of diphtheria.

The Helper Circle will meet with Miss Ruth and Gladys Rebenben, next Saturday afternoon at 2:30.

W. L. B. Rouse, wife and daughter, Miss Isabella, and Ed. Baker and family spent Sunday at J. S. Lodge's.

Mrs. Lena Tammung, of Bromley, is helping Mrs. Jesse Aylor with her telephone exchange, since Miss Mahala Garnett left there.

The little daughter of Mr. and Mrs. Stanley Graves, was taken to Cincinnati last week to be operated on for a throat trouble.

RABBIT HASH.

Wallace Stephens and wife, of Lawrenceburg, are visiting relatives here.

S. N. Riggs is serving as petit juror in the U. S. court at Covington, this week.

Z. T. Kelly, J. Colin Kelly and son, Orville, spent Sunday visiting friends in Rising Sun.

Mr. and Mrs. Nat Rogers, of Bellevue, spent Saturday night and Sunday with Charlie Wilson and family.

Clarence Ryle and wife moved to Cincinnati last week, where Clarence will attend a veterinary college this winter.

Raymond Hodges and wife moved to Rising Sun, last week, where he has employment with the Water & Light Co.

Lee Stephens has returned to work at a machine shop in Cincinnati, after a two months stay at home, laid up with asthma.

The Red Cross flag raising here Saturday afternoon was attended by a large crowd and was successful in every particular. Rev. O. A. Trinkle, of Rising Sun, and Rev. Edgar C. Riley, of Burlington, were the speakers. The proceeds amounted to about \$60 of which \$37 was thrown into the flag, and six of our girls carried it through the crowd. The flag was raised by Mrs. Harriet Walton who was the oldest person present, she being past 90.

Charlie Wilson and wife gave a dance Saturday night in honor of Hugh Ryle, Howard Aylor, Reuben Hager and Paul Damrath, who have been conscripted and expected to be called into service soon. Everybody was invited and all the young people and many of the older ones responded and filled the house.

Dancing proceeded without a stop until about 11 o'clock when the four boys were called into the dancing room where they were presented to the crowd by Bluff Kirtley in a brief but appropriate speech and while the musicians played "Old Kentucky Home" all joined in singing. All present passed along and shook hands with the boys and wished them God speed. It was a demonstration of patriotism that will not be forgotten soon by those present.

WATERLOO.

Mrs. Annis Close has been visiting relatives here the past week.

Mrs. Manly Ryle, who has been sick for several weeks is improving.

Mrs. Belle Beemon is visiting her daughters, Mrs. Everett Close and Mrs. Hogan Ryle, at this place.

Orville Rice and Walton Rice came home from Camp Taylor and spent Saturday night and Sunday.

O. W. Kite filled his silo last week and was several days at it on account of the bad weather which delayed the work.

Wm. Babree and wife and Dolph Babree and wife spent Sunday at G. A. Ryle's, it being Mr. Ryle's 16th birthday.

FLORENCE.

We are glad to report Little Russ sell luck improving.

Miss Mildred Boyce was the Sunday guest of Nannie Corbin.

The electric street lights were turned on Saturday night and are fine.

Mrs. R. B. Walker, of Latonia, is visiting her daughter, Mrs. J. H. Grant.

Bro. Royer left Tuesday to attend the Miami Synod at Springfield, Ohio.

Mrs. Nannie Crouch, of Union, spent Sunday with Dr. and Mrs. Castleman.

Mrs. Nannie Crouch and sister, Mrs. Castleman, are spending a week in Burlington.

Mrs. Emma Dulakey, of Nicholasville, was the guest of her daughter, Anna, last week.

Mrs. Thos. Craddock and children were guests of Mrs. Eliza Arnold, Saturday and Sunday.

Harvey Latham was home, last Thursday, from Chillicothe. He says he is getting along fine.

William Aydelotte, of Camp Taylor, spent Saturday night and Sunday here with his parents. He looks well.

Several have received letters and cards from the boys who are stationed at Montgomery, Ala. All are satisfied.

The Crescendo Club will give a Halloween mask dance at the Odd Fellows Hall the 31st of Oct. Good music by McGlasson band.

William Boyer, who met with a very dangerous accident last Monday, is getting along fine and expects to be out in a few weeks.

Mrs. Lloyd Aylor and Mr. and Mrs. Harvey Mitchell spent Saturday and Sunday with Mr. and Mrs. Carl Clutterbuck, of Oakley, Ohio.

Mr. L. A. Popham and wife, Mrs. Amanda Tanner, Mrs. Martha Souther, Mr. and Mrs. Will Waters, Elmer Tanner and Gordon Lake were Sunday guests at Robert L. Brown's.

W. T. Arnold, who is helping cook for the "Sammy's" at Chillicothe camp, spent Sunday and Monday at home. He is looking well and says they have plenty to eat.

PT. PLEASANT.

The silo filling season is about over.

H. L. Tanner has fifteen tons of pumpkins to haul to market.

The corn crop is not all harvested and some will not be cut owing to the badly tangled condition and early frost.

We with B. A. Floyd and wife, Gunpowder, motored to Hebron last Sunday afternoon and called at the home of Ben Padlock and Mrs. Amanda Rouse.

The first snow of the season was seen flying in the air last Friday the 13th, which, according to the sign, means that we will have twelve snows this winter.

HORSES PREPARED FOR SHOW

Some Extra Care and Attention Needed
of Draft Animals—Feed Brood
Mares Some Grain.

Draft horses that are to be shown at the county fairs need some extra care and attention. To show at an advantage horses should be in good condition, well manured and well groomed. Brood mares and young horses on pasture should be fed some grain for a considerable time before they are shown. The amount of grain will depend on the condition of the animal and also on the pasture. Equal parts of corn and oats have been found to be a good mixture to feed. Stallions and work horses that are to be shown should be fed enough grain and hay to put them in good condition. A little grass or green feed of some kind is useful as a conditioner and as an appetizer.

Draft horses are shown at halter except in the case of draft pairs. It is good form to show mares and young horses with rope halters. Halters made from half-inch rope are preferable except for foals when halters made from three-eighths inch rope are more in keeping with the size of the animal. Draft stallions are shown with heavy bridles. Horses should be

Ready to Take a Prize.

taught to stand and to lead before they are brought into the ring. Most horses show to good advantage when stretched slightly. It is advisable to exercise all horses to be shown for considerable time before the show, both at the walk and at the trot. Find a level strip of road and let the animal walk and trot back and forth over a space of 100 feet for 10 or 15 minutes each day so that animals may know what is expected of him when shown. Always stand a horse with his front feet on slightly higher ground than his hind feet.

SUPERIOR TONICS FOR SWINE

Hogs Are Especially Sensitive to Lack of Variety in Feed—Satisfactory Mixture Given.

(By DR. R. H. WILLIAMS, Animal Husbandman, University of Arizona, Agricultural Experiment Station.)
Hogs are comparatively sensitive to lack of variety in their feed. Under domestication they make rapid growth and it is hardly possible to supply them with sufficient quantities of all the food nutrients they require to make the most economical gains. On this account they often become restless and have a craving for certain constituents lacking in the diet. The following mixture has given satisfactory results:

Charcoal, 8 pounds; air-slacked lime, 8 pounds; common salt, 6 pounds; hardwood ashes, 8 pounds; powdered sulphur, 4 pounds; powdered bone stone, 2 pounds.

These should be thoroughly mixed and kept in stock so that a small supply may be before the hogs at all times. A low box makes a useful container. Such a mixture is especially cheap and will return big profits in the way of increased gains. It should be mentioned that this preparation is more of a tonic to keep the hogs in good condition rather than to safeguard them against disease. At the present time we have no hog food that will save pigs from contracting or dying from hog cholera. This tonic, however, has a beneficial effect in making the animals more vigorous and maintaining them in better condition to overcome the attack of diseases.

CAUSE OF SCOURS IN LAMBS

Very Often an Examination of Water Supply Will Reveal Trouble With Young Animals.

One of the causes of scours in lambs is filthy water. We generally look for the cause in the feed, but quite often it is due to impure water. Everybody is familiar with the disturbance in the human family which follows the use of bad water. The stench of the lamb and even the sheep, is quite as susceptible to danger from this source as is that of the shepherd. We often see flocks on furry good pastures, that ought to do well as well as the sheep, showing a lack of thrift and a general dullness for which there is no reason, at first thought, or apparent cause. Very often an examination of the water supply will reveal the cause.

THE KITCHEN CABINET

The sea of ambition is tempest-tossed
And thy hopes may vanish like foam.
When sails are shivered, and compass
lost,
Then look to the light of home.

GOOD THINGS TO EAT.

A dish which is both wholesome and appetizing is clabbered milk. Set away a bowl of milk and allow the cream to rise and the milk to sour. Chill and sprinkle with brown or maple sugar and a little nutmeg and serve in sherbet cups for dessert. Nuts with the sugar and spice may be added if more nutriment is needed to supply the menu.

Swiss Eggs.—When eggs are plentiful this is a dish we may enjoy with a clear conscience. Break an egg for each serving into one of the small brown serving dishes, sprinkle with salt and a dash of red pepper, a thin layer of finely chopped ham, grated cheese, and over all some buttered crumbs. Set into the oven in a pan of water and bake until the eggs are set. Serve with a tart of water cress.

Cherry Brown Betty.—This is best made from fresh berries, but the drained fruit with buttered crumbs may be used, alternating the layers, and use a little of the juice to moisten when the dish is filled. Serve with either cream or hard sauce.

Spring Salad.—Slice tomatoes and cucumbers and place them on head lettuce that is well chilled. Just as it is time to serve the salad pour over a French dressing, highly seasoned with onion juice, red pepper and a half cupful or more of Roquefort cheese; stir until well blended.

Ginger Pudding.—Cover the top of a ginger bread before baking with a cupful of chopped almonds; a few raisins may be added to the batter. Cut with a fork while hot and serve with a hard sauce.

Princess Cream.—Wrap one pint of cream, add sugar and vanilla to flavor. Crumb some stale cake and moisten with orange juice and grated rind. Put a layer of the cream in a glass bowl, then a layer of the crumbs and a few pieces of jelly, cut small; more cream and cake until the dish is full. Garnish with cubes of jelly and chill well before serving. Nuts of various kinds may be added if so desired.

Cooked chestnuts in almost any salad of apples and celery with chestnuts is a good combination.

I wrestle and frown,
And topple down;
I wrench, I rend, I uproot;
Yet the violet
Is born where I set
The sole of my flying foot.

GOOD COMPANY DISHES.

When cooking peas always save the pods for soup, or boil them and strain the liquid, using it to cook the peas in, making a much finer flavored dish. For variety add a bunch of mint to green peas when cooking, this adds a delicate flavor. Always save the water in which vegetables are cooked either for a sauce or to serve with them or to add to the soup stock.

as valuable mineral salts are soluble in water and are lost if this is thrown away.

Walnut Ice.—Cook to a thread one cupful of granulated sugar, one cupful of water and pour it over three well-beaten egg whites. To this add one pint of whipped cream one teaspoonful of vanilla, one cupful of chopped walnut meats, folding them into the cream with care. Pack in ice and salt and leave until frozen, then cut in squares to serve.

Hindu Salad.—Shred some crisp white lettuce leaves and arrange them upon salad plates. On these lay four slices of tomato, cover two with chopped celery and onion, the others with finely minced watercress. Pour over a plain French dressing.

Bishop's Bread.—Beat three eggs and add a cupful of sugar, beating until the sugar is well dissolved; add a pinch of salt and flavoring of lemon or vanilla. Then add two cupfuls of flour, sifted, with two teaspoonfuls of cream of tartar and a teaspoonful of soda; a little of the flour may be reserved to cover a cupful of raisins. Spread in a thin sheet in a buttered tin and cover with a cupful of unblanched almonds, carefully cut in strips or in halves. Cut in oblongs or squares before it is cold.

Roiled Beefsteak.—Heat a round steak well and spread with any well-killed stuffing used for fowl. Roll up neatly and tie to keep it in shape. Put into a dripping pan with a little water and a teaspoonful of vinegar, basting it frequently. When ready to serve spread a tablespoonful of buttery over it and make a thickened sauce with the liquor in the pan. Cut as jelly roll when serving.

Trees Contribute to War.

In the manufacture of gunpowder large quantities of charcoal are used, but this grade is made from hardwood only. Wood alcohol is used in the manufacture of smokeless powder, gunpowder, and also in hospital supplies. Acetic acid, or wood vinegar, is used in making cordite and dinitro, two high power explosives, and more indirectly trees contribute heavily to warfare.

Seagoing Mowing Machine.

California now has a seagoing mowing machine. It is in use off the coast as a part of the government experiments to obtain potash from kelp. The curious craft has blades at the bow that cut the kelp from three to six feet below the surface of the water. A belt driven by a motor is attached to the bow where other knives cut it up and other belts distribute it in the hold. The vessel harvests about two hundred tons a day, when dried is reduced to 20 tons; that, in turn, yields about five tons of potash. The rise in the price of potash from \$40 a ton to \$100 or more times that sum gives a new value to kelp, which grows in virtually unlimited quantities along our shores. Farmers have long used the kelp itself as a fertilizer. Youth's Companion.

Nellie Maxwell

Marrying Against Wishes of Family

By Laura Jean Libbey

An old farmhouse with meadows wide,
Sweet flowers on either side;
A bright-eyed youth, who looks from out
The door with wistful eyes, and sighs,
Wished this one thought all the day:
"Oh, if I could but fly away
From this dull spot the world to see,
How happy I would be!"

What youth of one and twenty and maid of sweet sixteen if they happened to become enamored of one another would not tell you that there is just one person in the world for them, and each has met that one? It is all in vain for relatives or friends to attempt to dissuade them from their feeling. The young man declares he will leave home and go to sea to earn fame and fortune for the girl he has chosen. The maid declares that if she cannot wed the hero of her heart she will never, never marry. Though her lips may not complain her sad eyes will be a reproach to those who have separated her from her love for all time to come.

How the parents are to deal with such a determined young couple is a problem. The youth's parents know that it is his nature to fall quickly in love, and as quickly climb out of it. The girl's parents realize that the kind of man who fills her fancy at sixteen should be possibly be heartily tired of at two and twenty.

They met at a ball. The girl in her tulle party dress, white gloves, white

slippers and pink roses, looked very alluring. He has taken her home from the dance, perhaps a half-dozen times and at the end of that time proposed marriage. Neither had peeped beyond the first chapter of the book of life. Their entire conversation had been about other girls and boys—what a jolly good time they had had at the skating rink or horse dance. Yet these two kittens considered themselves in love and had the notion that they ought to wed.

The boy's father does his best to have a serious talk with his son, endeavoring to make him understand that married life is something more than continuous love-making; that it entails obligations, such as winning the support of two, to start with; that a pretty sweetheart transferred to the kitchenette is not always the amiable companion a youth fondly believes she would be.

The girl's parents do their best to make her understand that a young man should have at least a start in life before he essays matrimony; that all love-making, no work, would put out the kitchen fire. If, despite earnest parental advice on both sides, the young people take their own heads and marry, they have only themselves to blame for much of the tribulations that may follow. Parents on both sides should be eager for the match, then it will turn out happily.

Everything in Russia Is
New Since the Revolution;
Even Smile Is Different

Everything is new in Russia. As one correspondent sees it, and Petrograd in particular, he declares that even the smile is different. It is without sickness or hypocrisy. The ladies are wearing revolution-color skirts, red feathers in their hair, young men, The Nevsky prospect has become a kind of Quai d'Orsay. Book hawkers line the pavement and cry sensational pamphlets about Rasputin and Nicholas, and who is Lenin, and how much land will the peasants get. Returned exiles fit through the crowd, recognizable by the Rue Berthelet cut of their clothes and their hair.

Even that ancient institution, the five-o'clock procession of Chivonovks going home from government offices, has lost its typical coloring. One misses at first the staid, familiar figures, till one suddenly realizes that those rather long-haired young men, who are slithering along with portfolios under their arms, must, of course, be the new Chivonovks.

Newspapers used to carry papers in a bag. Now there are so many papers and such a demand for them that the hawkers have had to improvise stalls pushed there and watch the play of political sympathies and antipathies as the hard-faced young workman buys the Maximilian Pravda, or the dreamy student buys the Radical Den, or some stout elderly gentleman buys the Novoe Vremya with a melancholy air of resignation.

Around the World.

Iceland has no saloons.
Ohio has 135,000 war gardens.
Britain has 7,000,000 house cats.

England has tea put up in tablets.
Spain irrigates one-fourth of all its farms.

Kansas City, Mo., is seeking more factories.
United States airline output is 25,000 tons.

Pennsylvania pensionals all public school employees.
Virginia boy scouts are on strike because farmers pay small wages.

It Helps!

There can be no doubt as to the merit of Cardui, the woman's tonic, in the treatment of many troubles peculiar to women. The thousands of women who have been helped by Cardui in the past 40 years, is conclusive proof that it is a good medicine for women who suffer. It should help you, too.

Take CARDUI

The Woman's Tonic

Mrs. N. E. Varner, of Hixson, Tenn., writes: "I was passing through the ... My back and sides were terrible, and my suffering indescribable. I can't tell just how and where I hurt, but all over. I think ... I began Cardui, and my pains grew less and less, until I was cured. I am remarkably strong for a woman 64 years of age. I do all my housework, try Cardui, today. Edie

BRIGHTER OUTLOOK IN CHINA.

Civil war in China, which a few weeks ago seemed imminent, has been averted by compromise, and the split which threatened to destroy the republic is likely to be healed without leaving any serious scar. The Chinese have had their taste of civil war, and are in no mood for another experience. The militarists and the southern constitutionalists are each extending olive branches, and the election of a new parliament will doubtless put an end to their troubles. But if China is averse to civil war, she is unquestionably eager for participation in the war against Germany. The constitutionalists, who see in a German triumph the downfall of constitutional democracy throughout the world, are as strong for war as are the leaders of the military party, says Cleveland Plain Dealer. If there is any antipathy in China its numbers are small. The trouble at Peking arose largely because of the desire of each party to assume responsibility for the conduct of the war. The parliament presented an attempt to act without the authorization, while the anti-parliamentarians sought to put the responsibility in the hands of a military clique.

Plans alone won't win the war, but there is satisfaction in the reflection that all our war plans have been big, two-fronted plans, unhesitatingly adopted, says Philadelphia Press. When we set about filling a war chest we poured \$2,000,000,000 into it as a first installment. When we set about raising an army we enrolled about 10,000,000 young men from which to choose. Red Cross necessities presented itself, and so we raised more than a hundred million dollars for that in a single week. About shipbuilding we have been a bit slow in starting, but before long we shall have that project working on a liberal and comprehensive scale. That is the American way.

"War will never be outgrown until women take a greater part in all human life and processes," was the conclusion reached by Charlotte Perkins Gilman in her discussion of the general subject of "War and the World Hope." Mrs. Gilman reasoned that because the life of the world is dominated in great part by men, and because it is the natural masculine instinct to fight for the pure love of fighting, our humanity is a fighting humanity, says Springfield Republican. The human processes of life have been denied to women, and, therefore, women retard the development of the world.

In many cities Baby Welfare leagues are being formed to take care of the country's babies while their fathers are in the army. In every war the children of the babies have suffered neglect. The people of America are determined that this shall not occur now. The food and the discipline of the children will be looked after to the end that the babies of the war period may be as perfect as those of any other time in our history.

At first there was a bit of tremor in the thought of sending men to France. But the welcome accorded our vanguard and the enthusiasm for the cause aroused by those Americans in the midst of a people fighting for existence and for civilization, is certain to set burning in the heart of every red-blooded young American the desire to get over and be in the thick of the excitement.

A statistician reports that the purchasing price of money is declining so that a dollar was equivalent to 47.8 cents in April, compared with 48.5 cents in March and 60.3 in February. We defy him to figure out how long it will be before a dollar is worth nothing.

A plan made in defense by the traffickers in the necessities of life in this crisis is that they are human. But the men who make the greatest sacrifices for their country and their fellow-men are human also.

Uncle Sam has bought 200,000 wind-proof shirts for his blue-jackets. A wind-proof shirt may be fine for blue-jackets, but a laundry-proof shirt would find a bigger market.

All we have to do to deal with the spy effectively is to study Germany's method of dealing with those that within her own borders.

The amount of butter fat in the city's milk supply may be slipping somewhat, but the price is holding up good and strong.

"Do not despise prunes," says a writer on food topics. "They are nourishing." They have nourished the Jews for years.

POTATOES HOG FEED

Culls Can be Fed Profitably—Should be Cooked and Combined With Nitrogenous Feeds.

Where cereal foods are high, as now, and potatoes are cheap and plentiful, hog feeding of cull potatoes and any surplus of the poorer grades which may be available is profitable. It is estimated that 15 bushels of potatoes equal one bushel of corn in producing weight gains on hogs. The feeding of marketable potatoes is therefore unprofitable unless the crop work four and one-half times as much as potatoes. But, as above stated, there are the culls and other unmarketable potatoes which might advantageously be fed to hogs for several reasons—a waste is utilized and more valuable feed is saved, transport charges on a poor product are saved and the potatoes marketed bring a higher price than they would if the small ones were included.

Potatoes resemble corn in composition, and this is especially true of sweet potatoes. Both corn and potatoes are poor in protein and carbohydrates, thus they make fat rather than bone and muscle. The potatoes should be boiled or steamed until they form a mealy mash, which should be mixed with some other feed, such as corn meal, shorts or bran. Only enough water should be added in the cooking to prevent burning, and to make a thick mash. While some potatoes may be fed raw to add succulence to the ration they should be given out at intervals and in small quantities. Too many are likely to cause scours. A potato ration should be supplemented with feeds rich in nitrogen, such as old-process linseed oil meal or fish meal. Where sweet potatoes are plentiful and cheap a combination with gluten meal and skim milk makes a good ration.

In one case of experimental feeding, shoats made one pound of gain for each 3.15 pounds of grain when they are allowed to do their own harvesting of raw sweet potatoes. Sweet potatoes are said to be the best crop for pigs for fall and winter feeding, in the cut-over pine lands of the South. The meat of potato-fed hogs is in quality to pork from a grain ration, but the latter is likely to carry a greater finish. After cooling there is no appreciable difference in firmness of the carcass, and the potato-fed and a grain-fed animal.

HUMAN FACE ON CRAB'S BACK

Queer Legend is Attached to an Oddity of Nature Which is found in Japanese Waters.

A crab with a human face is one of the oddities to be found in Japanese waters. Not only that but the face is surprisingly like that of a Japanese warrior in the "old, unhappy, far-off days of the past." This face is formed by the strange figuration of the carapace. To one of the creatures crawling on the sand is a human face moving across the beach.

According to Japanese history, the nation was beset by a plague of piracy a few centuries ago, says the New York World. The coasts were ravaged, vessels sunk and terror spread generally by marauding sea rovers. Then the people organized a fleet and set out to exterminate the pirates. A great battle followed in which all of the pirates were slain.

At this point legend steps in. It is said that not long after the battle of the crabs appeared. With added years the crabs increased in number until they were quite common. And not only do they bear the face of a fierce old warrior, but it is strange to find a dead man who had been drowned. The superstitions among the natives say that the souls of the pirates entered into the forms of the crabs.

How a Bullet D ops.

In what position does a rifle bullet return to earth? In order to solve the problem a special stand was erected in Germany recently, and experiments were carried on among the shores of a lake. The findings were as follows, says the Popular Science Monthly. The ice was covered with strong planks. It was shown that a bullet fired from a machine gun in a vertical direction passes downward in the same position in which it passed upward. In other words, it came back again to earth with its bottom first.

Why was it not upset at its culmination point? The answer, it is found, is that the forces cease to act at the culmination point. But the twist has as yet not stopped, and therefore it starts its fall with a twist. Even on impact the twist has not stopped, as was indicated by the warping of the wood fibers in the plank on the ice.

Don't forget to post your farm against hunting and all kinds of trespassing. For 3 cents the Recorder will run your name the whole winter season.

BANK ROBBERS CAUGHT.

All But \$34 of \$5,300 Lost By Granville, O., Bank is Recovered. Newark, Ohio. — All but \$34 of the \$5,300 stolen from the Granville Bank at Granville, was recovered with the capture of two men in soldiers' uniforms by C. O. Burke a former Newark police man. The robbers were civilian attired when they entered the bank. Assistant Cashier Harry Pearce and the bank stenographer, Miss Addie Slack, were backed into the bank vault at the point of pistols by the robbers, who escaped with all the bank's currency not locked up.

Sheriff's posse was quickly organized and the surrounding country searched. Several hours later Burke overtook the two men walking along a country road. He offered them a ride in his automobile which they quickly accepted. They were taken to the Hebron jail, where later they were identified by the bank cashier. The money was found concealed about their clothing.

Henry Ford, Patriot.

When asked for the terms on which he would turn over his big eastern assembling factory to the government for war production, Henry Ford replied, "No terms at all; take it." Of course there are those who will belittle the remark, but it is a remark that can well afford it, but it is none the less a princely act of loyalty. And it stands out in such vivid contrast to the actions and words of many professedly loyal people that it is especially noticeable. Mr. Ford did all in his power to prevent this country going to war, even going so far as to subject himself to ridicule in his efforts for peace. Now, however, that his country is at war, he has his energy, his resources, and we doubt not his life as well if it were required, are at his country's order. Of such stuff are Patriots made.

WHAT THIS WAR MEANS.

A Short and Spirited Manual of The Loyal Citizens Duty.

The United States is at war with Germany.

That means that every person, whether native or foreign born, who claims the protection of the United States flag, is at war with Germany.

War is more than fighting. War is service. War is sacrifice. War is the limitation of self. War is country first and the individual last.

This war will directly or indirectly affect every person living in the United States. This war will not be won unless every person does his or her part, gives his or her service, self behind the need of the nation.

The flag means freedom for us all, but the flag in time of war, does not mean freedom of action for the individual.

The flag means restraint, cooperation, obedience, recognition of authority, preservation of law and order.

Most of all it means economy. It means loyalty in the daily things—well as loyalty to the great principles of our Government.

It means the conduct of our lives so that the nation may be hourly a credit to the world.

It means the giving of our best effort for the universal good.

It means careful living. It means saving of waste. It means the utmost use of our resources, our abilities and our strength for the Great Cause.

It means guarding our talk and avoiding useless discussion.

It means that the United States is first, paramount, supreme and that the want or pleasure or action of the individual must be subordinated to that fact.

Three cheers for the Red White and Blue!—New York Police Bulletin.

The Harvest Moon.

During the last days of September and the first few in October the world was bathed in the rays of the Harvest Moon. The peculiarity of the harvest moon is that it shines throughout the entire night, rising just after sunset and staying on duty until the sun has made his appearance. The schedule is followed for several days. Why the deviation from the usual schedule, none second hand knows. In the countries of Europe it has been utilized more or less to "have daylight" in the harvest operations. It also has been favored by lovers presumably since Adam and Eve in the Garden. The harvest moon figures largely in the folklore of the northern countries.

Enjoyed His Habit.

W. P. Sullivan saw a big, fat buck rabbit last Friday afternoon, and Saturday morning his wife prepared it for breakfast after the manner of an excellent cook. Mr. Sullivan ate freely of the Mollie and then took a skate on the creek and came over in town feeling like a skated deer. Rabbit meat, the morning's exhilarating atmosphere had the exercise on the ice acted like a charm reclaiming the old man.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of October 25th, 1877.

Some small grain looks well.

Some of the farmers are husking shock corn.

Born on the 20th to Ira Percival and wife, a daughter.

A new boat is being built for Lawrenceburg ferry.

Dr. L. C. Cowen and Miss Jennie Hastings were married at the home of the bride's parents, Mr. and Mrs. J. A. Kirtley officiating. The bride wore a dove colored silk dress, white tulle veil and orange blossoms, while the groom was attired in a suit of black. A sumptuous wedding feast was served.

Frank Need succeeds John W. R. Bradford as driver of the Burlington and Cincinnati bus. Mr. Bradford had been in charge of the bus for a little over a year and is very popular with the public.

A toll-gate now commands the entrance to Burlington by way of the Bellevue pike.

Henry Hoffman has moved to Burlington.

Judge Cave Graves, of Versailles, and Ot Graves, of Missouri, are visiting Joseph C. Graves.

Peace and quiet no longer hovers about the congregation of colored folks, that, for some time past, has been holding its services at St. George's Chapel. The festival had there some time since produced fruit for a disturbance on the street, the result of which was the arrest of several persons.

Peace and quiet no longer hovers about the congregation of colored folks, that, for some time past, has been holding its services at St. George's Chapel. The festival had there some time since produced fruit for a disturbance on the street, the result of which was the arrest of several persons.

There will be enough coal to go around, he says, if we will cooperate in keeping maintain equitable distribution of the coal.

There will, for instance, be coal enough this month for everhouse hold to have enough for its current needs.

FISCAL COURT IN SESSION

Lets Contracts for Rebuilding Three Bridges at a Total Cost of \$20,563.02 of Which the State Will Pay One Half.

The Boone fiscal Court was convened in special session last Monday for the consideration of bids for the reconstruction of the bridges on the Burlington and Florence roads. The bids were received by the clerk of the court, and the following were the successful bidders: The following Justices of the peace were present: E. J. Aylor, Wm. Stephens, Charles Wilson, Noah Tanner, John C. Bedinger and R. H. Tanner, and County Attorney N. E. Riddell and County Clerk W. R. Rogers. The Judge presided.

Things That Are New.

To keep a woman's hands warm in a muff a nickel cylinder which when heated on a stove, will regulate the heat for hours has been invented.

For use in French colonial waters where rank vegetation would foul submerged wheels shallow draft boats have been built and are driven by aeroplane motors and propellers.

Of German invention is a camera small enough to be carried by a pigeon which takes photographs automatically as a bird flies with it over a place of which information is desired.

To help in adjusting the bearings of car wheels when away from a repair shop in the workshop of a new device that locks a wheel firmly to the track and prevents it being moved.

Padded pockets, with slots through which come car buttons, have been patented for use by persons employed in public places who must share with employees the heat for hours has been invented.

To find leaks in motorcycle tires there has been invented a box to fit over them in compartments of which is loose cotton that is passed over the escaping air as it passes over.

For hair singeing a comb has been invented, that entirely surrounds the hair and also guards against any danger of it catching fire.

A set of aluminum cooking utensils with an interchangeable handle for a easily kept cool, has been patented by a New York inventor.

An Englishman has invented a device to enable aviators in flight to pick up messages from the ground by dropping a grapple at the end of a line.

Attached to a life preserver invented by a German man is a device that enables him to breathe in the roughest water and also to signal for help.

There has been a big change in the looks of gardens since the first of the month. Turnips are the only vegetable that have withstood the frost.

Why Coal Bins are Empty.

Washington, Oct. 2.—Altho more coal has been mined this year than was mined last year, the coal shortage is the most serious the nation ever has known.

This tells why. On Oct. 15, coal production had exceeded by 42,000,000 tons the production for the same period last year, in the bituminous or "soft" coal field alone.

Anthracite production had been 16 per cent greater in 1916. But while America's fuel demands have reached the greatest point known, the natural gas fields of Ohio, Indiana and West Virginia are being failed.

Hundreds of factories and thousands of homes have turned from gas to coal.

This year's late spring wiped out millions of tons that ordinarily lay in domestic bins all summer.

Add to these causes the tremendous increase in railroad and war industry coal consumption and you have the reasons why a coal famine looms despite increased production.

Much coal, too, has been shipped to our allies, and our navy with every vessel in commission and hundreds of auxiliary vessels added, has used more coal than ever before.

The result is that the increased production has not met the increased demand. The mines could have produced more, and mine operators insist would have produced more had railroads given an adequate supply of cars.

As in the consumption of coal, so in the use of cars. The railroads in addition to more coal, have been called upon to handle the ever multiplying volume of supplies turned out of the war.

It has been an endless chain—the more coal moved the more products manufactured, and the greater demand for cars both at mines and shops.

De Harry Garfield, coal administrator, however, insists that—bad as it admittedly is—the coal outlook is not so bad as it is pictured. He insists that the standard of our country, saying the meeting was worth a dollar per capita.

This shows what may be done by a live principal with cooperation, and even against the adverse condition of the world, and the danger of the dreaded infection, diphtheria. This is the pace set for all other associations in the country.

After the Association program, the climax was reached in the spelling contest was announced. The spelling was conducted in quiet and silence so far as the pupils were concerned. It began with a roll call, and the referee announced that Hebron school won, when applause broke forth from the Hebron contingent. Of course the applause from the winner was expected.

FISCAL COURT IN SESSION

Lets Contracts for Rebuilding Three Bridges at a Total Cost of \$20,563.02 of Which the State Will Pay One Half.

The Boone fiscal Court was convened in special session last Monday for the consideration of bids for the reconstruction of the bridges on the Burlington and Florence roads. The bids were received by the clerk of the court, and the following were the successful bidders: The following Justices of the peace were present: E. J. Aylor, Wm. Stephens, Charles Wilson, Noah Tanner, John C. Bedinger and R. H. Tanner, and County Attorney N. E. Riddell and County Clerk W. R. Rogers. The Judge presided.

The following sheep claims were allowed: Mrs. Anna Kenny, \$15; E. B. Farrell, \$78; Walter Johnson, \$81; Jas. A. Huey, \$183.

Harry R. Longbaugh was employed to reconstruct the road, his salary being fixed at \$40 per month as the county's part.

The contracts for the construction of the bridges have been let, the Orelonian Bridge Co., represented by W. W. Mills, of Covington, getting the Florence work, and the Murphy Bros. of Bowling Green, were awarded the stone and concrete work. Complete the bridges will cost as follows:

Bridge at Limburg, \$5,438.20. First bridge out on Petersburg, \$6,135.19. Second bridge out on Petersburg pike, \$7,989.63.

A Big Sale of Cattle

John Binder, of Big Bone, was in Burlington, Friday, and had just received from the stock yards at Louisville, a bill for 16 cattle he had sold there the day before. They weighed 14,760 pounds, the four best animals bringing 94 cts. a pound, after all the expenses of the sale were deducted, he received a check for \$1,188.70. Mr. Binder has the habit of making a drive of the same nature every few weeks, and is recognized as one of the very prosperous men in this community.

Warm Weather is Needed

Warm weather is now needed to bring up the small grain that has been sowed. The work of sowing is in progress in the very direction in this county, and when completed there will be a considerable increase of the acreage of wheat as compared with the crop of last year. There is also an increase in the acreage of rye sowed this fall.

BIG EDUCATIONAL MEET

Hebron School Wins Spelling Contest.—Dates Set for Other Educational Events.

Friday, the 19th inst., the contest was held in Hebron school house to decide the superiority of Orator Spelling in the 6th, 7th and 8th grades in Esq. Aylor's magisterial district. Eight schools are found in this territory. All the teachers were present save one.

The Teacher's Association of Hebron High School District was in session at the same time and place, consequently several visiting teachers were present.

There was some apprehension with the Supt., as to the program being performed, when he knew that the Hebron school had been closed on the 2nd of October, and remained closed for two weeks on account of diphtheria and had been resumed only one week. How the program had at previously been carefully and thoughtfully arranged by the principal of Hebron school and each person notified some time before of his or her part.

Now, just here is the place set for all Associations of the county. Each teacher save one, responded to a part of the program assigned with a timely, well-written, properly prepared paper, covering the subject and filling the time allotted for the same, with a thoughtful message expressed in forceful diction. The room was filled with earnest, eager patrons, visitors, teachers and pupils, even standing room was taxed, and interest was pressing heavily on the floor, enthusiasm, pressing on walls and ceiling.

Agreement was on the faces of all for our schools and the hope of our future. The school rooms were tastefully decorated for the occasion, good cheer prevailed, ideas were exchanged and hearts were in sympathy. Some persons, although not directly interested, measured the benefits of the gathering.

The standard of our country, saying the meeting was worth a dollar per capita.

This shows what may be done by a live principal with cooperation, and even against the adverse condition of the world, and the danger of the dreaded infection, diphtheria. This is the pace set for all other associations in the country.

After the Association program, the climax was reached in the spelling contest was announced. The spelling was conducted in quiet and silence so far as the pupils were concerned. It began with a roll call, and the referee announced that Hebron school won, when applause broke forth from the Hebron contingent. Of course the applause from the winner was expected.

The pupils representing this school are the following: Misses Leona Reegenbogen, Alice Haffer and Master James Beal. J. Tanner was no disgrace to the other schools competing since the score stood one, two three in order.

The meeting adjourned after this friendly contest in good spirits and saying "it is good to be here."

The Spelling Contest was held at the same time in Esq. Bedinger's District at Verona, and I learn that the meeting was pleasant and profitable, Verona winning the banner. The following pupils representing the Verona school: Misses Grace Ransom, Ruth Jenkins and Master John Rogers. The Judge presided.

Next Friday afternoon, Oct. 26, the spelling contest will be held in Esq. Wilson's district at Hathaway, and the Teachers Association will be held in Burlington.

Nov. 2nd, the spelling contest will be held in Esq. Stephens' district at Beech Grove. The Association will be held in Florence.

Nov. 8th, the spelling contest will be held in Esq. R. H. Tanner's district at Rucker's school house and the Association will be held at the same time and place.

Nov. 16, the High School Preliminary will be held in Petersburg and Verona and associations will be held at the same time and place.

Nov. 23rd, the Big Meet, All Day in Esq. Noah Tanner's District at Union. The Grade Contest for District and the High School Contest for the county and Association meeting at Union.

The Bellevue Association has been postponed until Dec. 7th. I feel sure the teachers and especially the principals at the High Schools are giving their efforts, time, energy and enthusiasm while patrons, pupils and people are doing their best for the success of the schools.

Our motto is "forward." In military parlance we say "march." We are with you.

J. C. GORDON, Supt.

One Landmark Disappearing.

Old by one the old landmarks along the Lexington pike between Covington and Florence are disappearing, the last to give way to more dignified structures being the Cary Dollins residence near the Amos Shinn High School. The Dollins building occupied a beautiful building site and the time arrived when it had to disappear.

It had been in progress for two modern structures are to be erected on the plot of land surrounding it. Thus the old landmarks are constantly being pushed off the map to make room for the development of later day ideas.

Local Happenings.

Sleeted some last Friday morning.

"Possums are now good and ripe."

Another scrap of winter arrived last Friday.

Mrs. Cora Strouse contemplates moving to Walton.

Considerable ice in this locality last Saturday morning.

Jailer Wilson is having considerable trouble with his eyes.

A great deal of corn has been cut and put in the shock this fall.

A cement pavement is being put down along Washington street at the Boone Hotel.

Assessor-elect, H. W. Riley, was a business caller at this office Monday morning.

Florence people are very proud of their electric street lights, and why should they not be?

Tobacco is said to be curing nicely and will be ready for stripping at an early date.

The Buckeye Corner communication arrived last week on mail too late for it to be handled.

Road Engineer Goodridge is having repairs made on some of the bridges on the Bellevue pike.

If everything in the food line was as plentiful as apples every body would grow fat this winter.

W. L. Kirkpatrick went to Aurora, Friday, and brought home a Maxwell car with a Sedan top. It is a beauty.

Sol Winkle, who has been living on Mrs. Eliza Walton's farm for some time, expects to move near Erlanger.

A Cincinnati couple married at the court house last Saturday afternoon. Rev. R. H. Carter, of Petersburg, officiating.

An empty coal bin has a very discouraging appearance at this season, when all the coal yards are minus supplies.

Mrs. G. M. Tolin received a telegram from her brother, one day last week, informing her as to his address in France.

The Buckeye Corner correspondent reports the death of William Sutton, 64, on the 8th inst. Burial in the family cemetery.

Hear that the local Red Cross Auxiliary will give an entertainment some time this winter to raise money for the Auxiliary.

Frank Hammon, of the Linaburg neighborhood, who was operated on a few days ago for appendicitis, is recovering nicely.

Dr. J. P. Riffe's wife, who was Walton, died Tuesday at her home in Covington after a brief illness of acute indigestion.

In some neighborhoods in the county the Liberty Bonds are not being subscribed for as liberally as they were when the first issue was put upon the market.

Had not the snow melted as fast as it fell last Tuesday morning it would have been an inch or so deep on the ground. The entire day was very much after the style of an ideal March day.

There will be a meeting of the Richmond Red Cross Auxiliary at Richmond church at 2 p. m., Saturday, October 27th, at which Rev. Leith, of Covington, will speak. All are invited to attend.

The bridge on the Burlington and Florence pike at George E. Rouse's gate was thrown open to travel last Friday. The stone abutments have been reinforced with concrete and the structure is now on a very substantial foundation.

You must bear in mind that beginning the first of next month letters that now require 2 cents postage will require a three cent stamp, and you will have to put another one cent stamp on postcard, it requiring two cents to carry one of them.

The East Bend road pike boosters were in Burlington, Tuesday, and executed the bond required of them in order to secure the county's subscription in aiding to construct the pike as far as the Locust Grove school house. It now seems that the pike will be a go.

W. H. Marshall, Secretary of the Burlington and Walton Telephone Co., requests the Recorder to notify those who are behind in the payment of their dues that they must come forward at once and pay up as the company is very much in need of the money to conduct its business.

The snow storm that swept over this part of the country at 3:30 last Tuesday evening was about the worst at this time of the year ever seen by the oldest citizens. A stiff wind blew from the west, driving the heavy snow fall before it so as to blind those facing the storm. The snow reached a depth of about an inch, but all disappeared during the night. The month of October, usually the pride of the fall, has lost its prestige.

PROFIT IN PORK AT \$15.

Feeding Experiments Show that Pork Can be Produced at \$15 Per Hundred.

Pork can be produced at a profit even with the present high price of feeds. This together with the fact that the ration received by fattening hogs has much to do with the economy of pork production has been shown clearly in demonstration feeding tests conducted at the St. Louis, Mo., stockyards by the University of Missouri College of Agriculture and the Kansas State Agricultural College working in co-operation. R. M. Watkins, manager of the demonstration feed yards at St. Joseph, presents the following data concerning the cost of producing pork with the various rations.

The results given are the average of four successive ninety-day feeding periods conducted at the demonstration feed yards. A ration of shelled corn and tankage required 389 pounds of shelled corn and 28 pounds of tankage to produce 100 pounds gain. The cost of gain was \$15.15 a hundred. A ration of shelled corn and linseed meal required 415 pounds of shelled corn and 27 pounds of linseed meal to produce 100 pounds gain. The cost of gain was \$15.03 a hundred. One period of feeding shelled corn, tankage and shorts showed approximately the same cost of gain as the two other rations. The feed prices upon which these figures are based are corn \$2.00 a bushel, tankage \$10.00 a hundred pounds, linseed meal \$20.00 per hundred pounds. Feeders will note that pork can be produced with feed at its present high price at about \$15. With pork at \$18.00, this makes a margin of nearly \$3.00 to insure a reasonable profit. The unanimous opinion of the feed authorities is to the effect that the present high price of hogs will be maintained for some time to come because of the demand for pork products and the apparent scarcity of them. The fact should also be considered that if crops can be fed on the farm and made to bring as much money as they would if sold, that the fertility left on the farm makes that method highly advisable.

Personal Mention

Irven Rue and wife were shopping in Covington last Thursday. E. E. Kelly and wife were Sunday guests at W. T. Ryle's on the Woolly.

Mrs. Fannie Cropper was visiting at Saylor Park a few days the past week.

Rev. David Blyth occupied the pulpit in the Methodist church last Sunday.

Messadams Edward Rice and Lenie Eddins were shopping in Lawrencsburg, last Friday.

Miss Aitha Mae Eddins kept store Monday in the absence of M. L. Riddell and wife.

M. L. Riddell and wife spent last Sunday with his brother, W. T. Riddell and wife, of Dayton, Ohio.

Mrs. Eliza Rouse has stored her household goods preparatory to going to Newport, where she will spend the winter.

A. B. Renaker, wife and daughter, spent last Saturday and Sunday with his relatives at Dry Ridge, Grant county.

Everett L. Helms of Petersburg, stopped in Burlington a few minutes Tuesday as he was enroute home from the city.

H. H. Berkshire and brother, Eugene, of Petersburg, passed thru Burlington last Wednesday morning enroute to Cincinnati.

Judge Sidney Gaines completed a month's session of the Grant circuit court last Saturday, and began a three weeks' term at Owenton last Monday.

Mr. and Mrs. Owen Smith entertained, last Thursday quite a number of their relatives and friends from Bellevue, Campbell county, at their home out on the Burlington and Bellevue pike.

Benjamin Dulaney and wife, of Cincinnati, spent several hours last Tuesday in Burlington. Mr. Dulaney has been traveling for a time to which the mind of man usually not to be contrary.

Dr. O. E. Senour, of Union, was a caller at this office last Thursday afternoon. As a side line he is selling Ford automobiles and says he has been unable to fill orders as fast as he could secure them but from now on he expects to be able to make deliveries more promptly.

John Clipes, son of Mrs. Belle Clipes, of Bellevue, writes from the camp at Gettysburg, Pennsylvania, that he is delighted with military life. This young man is making good in the estimation of his superiors and has been appointed corporal over many of the young men who have been in the service considerably longer than he.

Roy D. Stamler, owner and publisher of the Walton Advertiser, spent an hour or so last Thursday afternoon at this office, having accompanied the Walton factors to Burlington, where a meeting was held. Mr. Stamler's third on the last list of drafted men in the county certified back to the county draft board by the district board for service, and he is arranging his business to be ready to answer his country's call. Mr. Stamler is one of Walton's many enterprising citizens.

A large number of people passed thru Burlington yesterday enroute to the Boone-Headed sale which was attended by a large crowd. Good prices prevailed, as everything sold was in excellent condition.

To Our Friends in Boone County

HERE'S A PROPOSITION MADE IN GOOD FAITH AND WE'LL Live up to it. Come to our Store, look thru our Stock, see the Choice Merchandise, consider Our Prices, compare Our Values and if you are not pleased—Glad to buy

We Will Pay Your Ferriage

Children's Cloaks

Children's Cloaks...\$1.25 to \$10.00

Rising Sun, Indiana.

State News.

Dave Points, of the Dixie Highway, north of Sherman, sold his farm of 103 acres last week to G. H. Moore of the same neighborhood. The purchase price was \$11,000, a little better than \$100 an acre. Mr. Moore has sold a half interest in his farm in the same neighborhood to his brother, R. G. Moore, of Mt. Zion. Mr. Points is advertising a sale of his personal property for the first day of November—Grant County News.

The heavy frosts and freeze damaged a great deal of corn in Clark county. The whole crop was late and some fields were very late. Very little corn was in the shock before the first killing frost. The apple crop is being gathered in and some orchards are fine, but there is not enough apples to supply the local demands at \$1 per bushel and going higher. Stock are in good condition and there is still fairly good grass in the pastures.

Silas Sheldburne, Lexington tobacco warehouseman, has just returned from South Carolina, and reports very light receipts on eastern tobacco markets and predicts high prices for the Kentucky crop. "The country is 250,000,000 pounds short and the demand is increasing," he says. "We advise our friends to hold their crops and sell on the open market. Keep the barn doors shut and whenever it is possible keep a small fire under green tobacco. We have heard of a few crops being sold at 20 cents. They are good crops and it is very certain that the growers have lost money by selling."

Executor's Notice.

All persons indebted to the estate of E. T. Knitz, deceased, must come forward and settle same, those having claims against said estate must present them to the undersigned proven according to law.

Chicken Stealing in 1917.

Deputy Sheriff Barbour, assistant by Mr. Ewing, of Harrods Creek, who it seems, was called upon to assist because his sympathy could be counted upon to a recent raid upon his henhouse, with the somberness of mid night in the act of removing from the henhouse of H. Mason, a gunnysack filled with chickens which had been assassinated upon the roost, dying without a squawk. They captured one man upon the ground. Subsequently another believed to have been his partner in the enterprise was discovered in a room in Louisville with eight dressed chickens, like a miser with his heap of glittering gold.

Anyone who possesses one dressed chicken nowadays is a person of property. Anyone who is in possession of eight dressed chickens would be suspected of felony even if he were a bishop. Accidental evidence of eight dressed chickens in an apartment with one undressed negro between midnight and morning are without weight.

The circumstance that the attempted removal and the accomplished assassination of the gunnysack of chickens occurred upon the premises of the neighbor of the Deputy Sheriff, whose coop had been robbed, says ground for suspicion that the robberies were planned in series, and that the series was progressing satisfactorily when Mr. Barbour and Mr. Ewing "came in like a nolle prosequi and stopped proceedings."

Chicken stealing in 1917 is not like picking at the paces or picking pockets, perhaps almost empty, in this period of high cost of living. A fat chicken in market makes \$1.00, but like Confederate currency. Eight fat chickens dressed for the market! Figure it out for yourself in the light of what you have paid or declined to pay when you have gone to market seeking what you could afford to devour. If there is a fair chance of immunity, and if chickens are plentiful and easily plucked from the roost by fingers which care and encourage the confidence of a timid pullet, or approached in the dark by an assassin, why, insofar as mere gain is concerned, practice law (medicine or keep shop? Why do in preference to chick-lifting anything less remunerative than manufacturing munitions?

Deputy Sheriff Barbour and his assistant interrupted an exceptionally profitable industry, too late, unfortunately, to protect their own feathered wealth. Only a bold thief would rob a Deputy Sheriff, but the value of chickens is likely to make any thief bold.—C.J.

ECONOMICAL ROAD BUILDING

The successful use of convicts on California road work has been reported from time to time but some definite figures of the economies obtained by such work have recently been made public by Charles F. Stern, one of the State Highway Commissioners. About 33 miles of difficult mountain road have been recently finished in Mendocino county. The engineers estimated that the work would cost from \$35,000 to \$50,000; it was completed for \$200,000, a most unusual instance in these days when estimates are so frequently overrun. The savings required the moving of about 200,000 yards of material over half of it rock, which the engineers figured would cost about 10 cents a yard to handle. Convict labor cut that cost nearly in half. In reaching the actual costs, every item of expense is included, clothing, transportation, food, camp equipment and medical attention. The cost of guarding is not included for the reason that in California the convict road camps are honor camps and representatives of the prison are unarmed, their duties being supervisory. The men are treated like free laborers on the job, and the result of this policy was summed up by Mr. Stern as follows: "Unquestionably this system, sanely and sympathetically handled, means the building of many hundreds of miles of roads that could not otherwise be built at a saving of many thousands of dollars in the cost of construction."

Conserve Farm Machinery.

Put your farm machinery in sheds and fix it up in tip-top shape this winter. The shed will cost more than it did before, but the advance in building materials generally has been nearly as great as that of machinery. It will not fix it up before buying a new one. If the grain binder bothered this fall, give a good overhauling at the first opportunity, and see what new parts it needs. Send for these parts and repair it. It will pay.

Farm machinery will not only rise higher in price but will be apt to be scarce for the next several years. The curtailing of the iron and steel now used in the manufacture of farm machinery is sure to come, and some preliminary reports state that the amount allotted to this purpose will be about one-half the amount used last year. In the past steel and iron have been so cheap we have formed a habit of wasting it. We must conserve it now. It is a business proposition and a patriotic duty.

Public Sale!

Saturday, Oct. 27, '17

10 O'CLOCK A. M.

J. E. RANSOM, Verona, Ky.

Situated on the Verona and Crittenden Pike about one mile from Verona, Ky., I will offer for sale to the highest and best bidder,

THE FOLLOWING:

100-Head of Live Stock-100

HORSES---14 head, 8 good Brood Mares; mares all bred to jack. These mares are all broke to work any place and are of good ages. They are above the average and among them you will find some good saddle and harness mares as well as all round farm mares; 2 Geldings, 4-yrs. old, both well broken and well bred; 2 Colts, 2-yrs. old, one mare and one gelding; 2 Colts, 1-yr. old, one mare and one gelding.

CATTLE, 52 head, 18 Milch Cows. These cows are good milkers, most of them are Shorthorns, good size--the dual purpose cow; 4 extra good Jerseys in the bunch; 7 head of 2-yr. old Steers, will weigh about 1000 lbs; some of these are fat enough to ship now; 3 yearling Steers, 3 short yearling Bulls, Shorthorn Bull 2-yrs. old; three long-yearling Heifers, 6 short-yearling Heifers, 11 weanling calves by Shorthorn Bull.

MULES---8 head; 1 pair Big Mules, over 16 hands; these mules are age mules, will make good for heavy work; 1 pair age Mules, medium size, good all round farm team; 4 weanling Mules, these are extra good colts.

JACKS, 2 Head---One of these Jacks is an aged jack but is a good breeder and quicker than most of the young ones. He is the well-known "Jerry Glass" the sire of many a blue ribbon colt. The other jack is a young fellow, heavy built and has proven himself a good breeder.

HOGS---Sow and six pigs; eight shoats that will weigh 100 pounds; one O. I. C. Sow to farrow before sale.

TERMS OF SALE.

All sums of \$10.00 and under, cash; all sums over that amount will be given six months without interest, 3 per cent discount for cash. Notes payable at Verona, Crittenden and Walton banks---the bank that is most convenient for purchaser. All stock must be properly settled for before moving.

This will be my last sale as I am dividing up the remainder of my land among my children. We will do our best to conduct this sale along straight lines and all stock advertised will be sold. For further information Telephone or Write

SCOTT SMITH, Manager.

CLIFTON RENAKER, Auctioneer.

Hoover Makes Denial

TO THE EDITOR:--

For the past ten days or two weeks rumors have been current that the Federal Food Administration anticipated fixing the prices of live stock, some of these rumors went so far as to say the price of hogs would be fixed at \$10.00 per 100. These rumors have been given credence by farmers and stockmen of the State, and thousands of half fat cattle, hogs and pigs have been rushed to market that should have remained in the feed lots. Mr. Fred M. Sackett, Federal Food Administrator for Kentucky, was acquainted with conditions this week, and at once telegraphed Mr. Hoover asking the real status of affairs. Mr. Hoover made a copy of his reply, and would thank you to give the same as much publicity as possible. We believe you will agree with us that it will be well to print it in full with editorial comment, as we urgently need an increased production of all food animals. This statement of Mr. Hoover makes it clear that stockmen and farmers can bend every energy toward the production of food animals with assurance that they will receive profitable prices. Won't you give a little space to help out in this important matter? Yours Very Truly, Louisville Livestock Exchange.

UNITED STATES FOOD ADMINISTRATION.

Washington, D. C., Oct. 17, 1917. To all Federal Food Administrators:

A statement has appeared in Chicago papers that the United States Food Administration has the intention of reducing the hog price to \$10.00. This statement is absolutely untrue, and has caused a flood of inquiries to which the following is a sample of our reply: Chicago advices absolutely untrue and do not represent opinion or proposed action of the Food Administration, which will take no steps to jeopardize live stock producers' interests. All our policy will be used to keep prices at which allied and governmental purchases are made, on a plane that gives an assured return of cost and profit to producers of meat animals. In our opinion the

best market obtainable for the present corn crop of the country will be through livestock. We need increased production of beef and pork and the only way to secure this increase will be by a profit on production. Will appreciate your giving this widest publicity. Faithfully Yours, HERBERT HOOVER.

SOME LOAVES OF BREAD

The biggest loaves of bread baked to be eaten are those made in France and Italy. In the case of the pipe bread of the latter country, the loaves are between two and three feet in length, and occasionally even longer; while the French people make their loaves in the shape of very long rolls of bread, ranging from four to five feet, and in a few instances even to six feet in length.

Bread in Paris is distributed almost exclusively by women. These go to the various bakeries at 5:30 a. m. and spend about an hour brushing the long loaves with special brushes. When their loaf is cleaned of grit and dust the portouse de pain goes round to the customers.

Customers who live in flats have their loaves propped up against the door of their apartment. Shop keepers, restaurants and other customers who have entrances to their premises in the street, find their portion of the staff of life leaning against the front door when they take down the shutters. The waste of these bread carriers vary from 50 to 60 cents a day, their work being generally over at ten or twelve o'clock in the morning.

Buy a Liberty Bond or Taxed

The man who invests his surplus in Liberty Loan Bonds not only puts his money where it is not taxed but performs a patriotic duty. The government will raise the amount for which it proposes to issue bonds by the sale of these bonds, and if the sale of bonds fails to raise the desired amount a tax will be placed on property to raise the amount, in which event those who have surplus money they refuse to invest in the bonds will pay a penalty for their failure by way of a tax.

COTTON EVERY INCH A KING.

Crop This Year Will Have Aggregate Value of \$2,000,000,000. (San Antonio Express.)

W. W. Morrison, of New Orleans, an economic expert, estimates that the cotton crop of this year will have an aggregate value of \$2,000,000,000.

We used to say that "cotton is king" when the total American crop was less than 10,000,000 bales, and the value, including the seed, averaging less than \$50 a bale. Now, with a crop estimated at 13,500,000 bales, selling at \$100 or more a bale, while the seed is commanding a phenomenal price, there is more reason for claiming the crown for the fleecy staple.

In the West and Northwest, however, they say that cotton is king, and with some show of right when the crop exceeds 3,500,000,000 bushels without causing any slump in the market as in the case of a previous record crop, which was very far below that of the present year.

Mr. Morrison says the world needs more and more of our American cotton every year, in war or in peace, and that the demand for consumption will now and hereafter absorb a crop of 15,000,000 bales or more, as it did a crop half that size only a few years ago, and it is assumed that the price will be in the neighborhood of present quotations, while the war lasts and for a long time after peace is restored, because the tendency of the demand is to outrun production. Some of our theorists who would govern prices artificially have never seemed to properly appreciate the relation of supply and demand to the market quotations, but they have done the farmer some good service in persuading him to market his crop more gradually, than has heretofore been the custom, and to be prepared to do this by not going too much in debt in the making of it, and thereby being forced to sell before he was minded to do so.

Loads of wood are being brought to Bedford. It now appears that wood will be the principal fuel for a time at least, at the county seat--Trimble County Members.

Dibowski's Cafe

---THAT---
Neat Little Place
For Farmer, Workman, Merchant, Clerk and Professional Man.
Commercial Luncheon from 11 a. m. to 1:30 p. m.

Services at Universalist Church

Rev. Thos. Chapman will preach at the Burlington Universalist church next Saturday night, Oct. 27th, at 7 o'clock, and Sunday, Oct. 28th, at 11 and 7 o'clock. You are invited to attend.

Boone County Farms in Demand

Good farms are in demand in this county, the outside purchasers being from outside of the county. The good qualities of Boone county farms have begun to be recognized by the public.

Bung Up at Limaburg

A Covington truck loaded with hay hung up in the block at Limaburg one day last week and it took considerable work to get it out of its trouble. Chas. Westley hooked his team to the machine and assisted it to get out.

Your Bank Will Supply You

If you desire to invest in one or more Liberty Bonds the bank with which you do business will attend to the purchase for you. Inform the bank of the amount you desire to invest and it will do the rest for you.

Paying Good Prices for Tobacco

J. M. Thompson of the firm of Wingate & Thompson, of Petersburg, has opened the tobacco buying campaign in the Bellevue bottoms, and it is reported that he has paid as high as 25 cents a pound for several crops. Mr. Thompson is always a good buyer, giving the grower the best price possible.

A Family Reunion

Richard White and wife entertained last of his brothers and sisters last Sunday, to-wit: Geo. R. White, of Milan, Indiana; Mos. daniel Drexilla Goodridge, Lucy Cloud and Mary Goodridge. Several other relatives and friends were present and participated in the day's enjoyment, and the feast that was spread at the noon hour.

Burlington Got in the Neck

Burlington basketball teams went to Petersburg last Friday afternoon and won one out of the three games played with the teams of the Petersburg school. The scores were as follows: First game, boys, Burlington 21, Petersburg 10; second game, boys, Burlington 10, Petersburg 12; girls teams, Burlington 6, Petersburg 15. As usual Robert Ute starred for Burlington.

Conveying Real Estate

R. C. Gaines and daughter, Miss Virginia, deeded to W. Lee Cropper, one day last week, the farm on which they sold to Mr. Cropper some time since near Idlewild and for which a deed could not be made at the time because of Miss Virginia not being of age. The same day Mr. Gaines conveyed to Dr. Harmon Hays 72 acres of land adjoining the doctors farm near Builleville.

Restoring Their Health

R. C. Gaines and Courtney Walton, of Erlanger, passed through Burlington one day last week of last week enroute to Dillsboro, Indiana, to get the health restoring water to be had at that place. Mr. Walton has been annoyed with carbuncles on his neck for some time and the visit to the Dillsboro springs will relieve him of them. Mr. Gaines accompanied him to keep him in good spirits.

Man Killed in Grant County

Williamstown, Oct. 21. — Marion Ryan and his brother-in-law, Charles Marquis, today were involved in a quarrel and knives and pistols were used, with the result that Marquis was badly wounded and Ryan was found dead in a chair. Ryan's head was almost severed from his body. Ryan's wife, for whom he had been separated for some time, ran into the house when the trouble started and was shot in the breast.

Buying Mexican Money

To meet conditions brought about by a deranged silver market in this country the United States has purchased 5,000,000 Mexican silver pesos at 87 1/2 cents per ounce to be recoined into American money. In exchange the U. S. will export \$5,000,000 in gold to Mexico and that country will raise the embargo on export of silver to the United States. In the meantime an investigation of the inflated silver market is being made to see if it has been manipulated.

Tributes to Respect

Whereas, It has pleased Almighty God, in His wisdom, to call from among our brethren, B. E. McGlasson, who departed this life on Sept. 20th, 1917, therefore be it

Resolved, That in the death of Bro. McGlasson, our church has lost a true and faithful member, the community and his family also his friends, have suffered a loss that can never be repaired and that an honorable and upright citizen, an worthy christian gentleman, a lovable companion and a true and loyal friend has gone to his reward.

Resolved, That we tender our heartfelt sympathy to the bereaved loved ones and comfort them for comfort to those who put their trust in Him.

Resolved, That a copy of these resolutions be sent to the Boone County Recorder for publication, a copy be sent to the family and another be spread upon the records of the Pt. Pleasant Christian church.

Geo. W. Kuttmyer, Thos. Kynyon, J. H. Walton, Committee.

Buy Liberty Bonds and Protect Your Homes Says President of Women's Club Federation

Mrs. George Zimmerman, of Fremont, O., President of the Ohio Federation of Women's Clubs and chairman of the Women's Committee of the Ohio Branch Council of National Defense, has issued this stirring call to the women of the Fourth Federal Reserve District to assist in this second Liberty Loan campaign:

"BUY YOUR BOND FOR LIBERTY TODAY."

"Because it is a good investment."

"Because it helps to keep business going, as every cent of the money raised by these bonds is spent in this country."

"Because if these bonds do not sell, the necessary money must be raised by such heavy taxation as to cripple every industry in the land, and the poor would not be able to provide themselves with the bare necessities of life. Everything would go into taxation. Hence come these bonds as true saviors of the poor."

"Because the buying of a bond gives the investor a real part in winning the war."

"Because it helps save the lives of American soldiers and hastens the day when from the battle front and from the training camps our young men will return to their rightful places in civilian life."

"Remember that this war is more than a national crisis; it is individual in its effect upon the nation. It brings to each and every one the menace of disorder and peril."

"Prussianism is a menace not to France and England alone, but to the United States to your state, to your city, to your home. Women of America: BUY YOUR BOND FOR LIBERTY TODAY TO PROTECT YOUR HOME."

What Our Country Is Fighting For

There is a story of singular beauty concerning a young French officer who, in answer to the question, "What are you fighting for?" stooped quickly, tore a piece of sod from the earth, pressed it to his lips, and exclaimed, "For France, France!"

Commenting upon this incident the New York Evening Sun says: "France is literally fighting for her life. If the enemy were entrenched in American soil, if American cities had been sacked, if American men had died by the thousands, if American women had been put to shame unspeakable, the passion of patriotic love and yearning so touchingly expressed by the French officer who kissed the handful of sod would have its counterpart in the breasts of Americans."

The Germans are still only sixty-five miles from Paris, while three thousand miles of sea separates us from them and cools the ardor of many. Yet in that sea lie the bodies of the Lusitania's dead. The sea, if German victory in France is made complete, will bear to our shores the same crew that enslaved and outraged Belgium.

American young men will soon be lying beside the Frenchmen and Englishmen who have given "the last full measure of devotion" to the cause of human liberty. Let us see it with our mind's eye and feel it in our hearts. Let us, too, seize the soil of our country as a precious thing and hold it to our lips and our breasts. Our country, too, is fighting for national existence.

Our gallant troops are crossing those three thousand miles of sea to make sure that the crew that enslaved and outraged Belgium is made powerless to visit a similar fate on our beloved land.

Back up your country. Lend your money to your government and help win the war for home, flag, and human liberty.

Buy Liberty Bonds.

What Is Back of Your Bond

Much has been written about the investment safety of a Liberty bond. This safety should never have been questioned.

A United States bond, whether Liberty bond or any other kind, is purely and simply the government's promise to pay a certain amount at a given date, with interest at this or that rate during the interim.

And a United States greenback is no more or less lacking, of course, the latter being the only real difference is that the greenback is legal tender while the bond is not. You can pay your grocer, your landlord, any creditor, with the greenback. Before you can pay from your bond investment you must trade the bond for the greenback.

But both are backed by all the resources of the country and stability of the government. Just so long as an American dollar is worth a dollar, a fifty dollar Liberty bond will be worth fifty dollars anywhere on earth.

Uncle Sam will have to go broke before either becomes a doubtful investment.

THE SOLDIERS IN CAMP ARE WATCHING THE FOLKS AT HOME

Brigadier General Charles X. Zimmerman, now at Camp Sheridan, Montgomery, Ala., sends this message to the people of the Fourth Federal Reserve district:

"Ohio soldiers want to get at the Germans as soon as possible and are more than willing to pay part of the cost to fight. That is why officers and men here are buying Liberty Bonds with the same zeal that they are putting into their training. Another reason why they are subscribing to the Liberty bond is because the same liberal Uncle Sam who feeds and clothes them here in camp stands back of every bond."

"It is the safest investment in the world and the Liberty Bond is one of the greatest means yet devised of saving for the future. Soldiers may put aside a part of their pay each month to buy bonds and many of them are counting on collecting interest after the war for many years."

"Many officers and men have made big sacrifices in a financial way in order to be here, but they are throwing themselves into the spirit of the new Liberty Loan Campaign with the same zeal in which they offered their services as soldiers."

"Soldiers realize that the loan must be quickly subscribed if the war is to be pressed with the greatest vigor. That is why they are watching the action of the folks back home. They are confident that they will not be disappointed. My little detachment of four hundred and 15 enlisted men have subscribed \$7,200. Each of the training battalions under my command has averaged \$15,000. Total subscription \$97,000."

Liberty Bonds: An Investment

The purchase of a Liberty Bond is in no sense a gift. It is a sound, conservative investment. The Government is not asking for alms. It is offering to its citizens its own obligation, which is the prime security of the world.

Liberty Bonds have all the characteristics of the highest grade of investment securities.

They are absolutely safe. It is inconceivable that anything could happen to impair the credit of the United States. No country in the world has a more sacred regard for its obligations. The good faith of the Government is representing all the property of all the people—the security for these bonds.

Liberty Bonds will always have a wide and active market. No class of securities are so easy to sell as the obligations of the United States Government. Regardless of economic or market conditions, it is always possible to dispose of the bonds of our Government.

Liberty Bonds are the finest kind of collateral. At times, when banks look with suspicion upon almost all other kinds of bonds, they will readily accept Government bonds as security for loans.

Considering their safety, their marketability, and their availability as collateral, the income return from Liberty Bonds is liberal.

Patriotism involves sacrifice. There is no sacrifice in the purchase of Liberty Bonds unless they are purchased to the extent that the purchaser must do without something that would give him pleasure, comfort, or profit.

The Doctors Hold Meeting

Several of the doctors in the county held a meeting at the court house late afternoon last week. It is said, to consider the propriety of increasing their charges because of the very large increase in the prices of the drugs which they have to use.

A Big Relief in the Fuel Situation

A big relief in the coal situation is expected when 3,500,000 bushels of coal in 300 barges will pass down on the artificial rise in the Ohio river. The coal is piled up in the Kanawha River and its release is expected to relieve the coal shortage between Huntington, W. Va., and Louisville.

Commissioner's Sale.

Boone Circuit Court, Ky. Willis Florence's Administrator, plaintiff, against J. Equity. Willis Florence's heirs, &c., defendants.

By virtue of a judgment and order of sale rendered by the Boone Circuit Court at its August term, 1917, in the above styled cause, I shall proceed to offer for sale to the highest bidder, at public sale, on Monday, the 5th day of November, 1917, at 1 o'clock p. m., or thereabouts, being County Court day, upon a credit of six and twelve months, the following property, to-wit:

Lying and being in the county of Boone, State of Kentucky, on the headwaters of the public's creek and Gimpwood, bounded thus: Beginning at a stone in the old line of the Garnett tract of land, a corner of an old survey, between the then Jordan Anderson and the Jeddiah Foster tracts of land, now Allen Souther's corner; thence with said line 43 1/4 w 40 poles to a stone in said line; thence with said line to a stone in a maple tree, in Anderson's line; thence with it 43 1/4 w 40 poles to the beginning, containing 10 acres.

The interest of the infant defendant, Robert H. Bobbitt, Lyster James, Artemesia Vest, Beulah Francis Vest, Thomas Rogers and Mary B. Redfield shall not be and but shall remain a lien upon the land until the said infant defendants arrive at the age of 21 years, or until the guardian or guardians of said defendants shall have executed bond as required by section 403 Civil Code. For the purchase price the purchaser of said real estate, with approved security or securities must execute bond, bearing 6 per cent interest from the day of sale until paid, and having the force and effect of a judgment, with a lien retained therein until all the purchase money is paid. Bidders will be prepared to comply with these terms.

CHAS. MAURER, Master Commissioner.

Commissioner's Sale.

Boone Circuit Court, Kentucky. S. B. Poland, Adm. of J. B. Castleman and Josephine Castleman, plaintiffs, against J. Equity. John Castleman, &c., defendants.

By virtue of a judgment and order of sale of the Boone Circuit Court, rendered at the August term thereof, 1917, in the above cause, I shall proceed to offer for sale at the Court House door in the town of Burlington, Boone county, Ky., to the highest bidder at public sale, on Monday, the 5th day of November, 1917, at 1 o'clock p. m., or thereabouts, being County Court day, upon a credit of 6 and 12 months the following property, to-wit:

Lying and being in Boone county, State of Kentucky. Beginning in the center of the north fork of Ten Mile creek, a corner with George Anderson; thence 38 1/2 poles to a stone, a corner with George Howard; thence with Howard's line 51 1/4 w 21 1/4 chains to a stone, a corner with Larry and George Howard; thence 83 1/4 w 14 1/4 chains to the center of the aforesaid creek; thence upon the creek with its meanderings 57 1/4 w 5 1/4 chains, 19 1/4 w 8 1/4 chains, 27 1/4 w 1 chain to the beginning, containing fifty acres.

For the purchase price the purchaser, with approved security or securities, must execute bond, bearing legal interest from the day of sale until paid, and having the force and effect of a judgment, with a lien retained therein until all the purchase money is paid. Bidders will be prepared to comply promptly with these terms.

CHAS. MAURER, Master Commissioner.

Commissioner's Sale.

Boone Circuit Court. B. L. Rice's administrator, plaintiff, against J. Equity. B. L. Rice's heirs, &c., defendants.

By virtue of a judgment and order of sale of the Boone Circuit Court, rendered at the August term, 1917, in the above cause, I shall proceed to offer for sale at the Court House door in Burlington, Boone county, Ky., to the highest bidder at public auction, on Monday, the 5th day of November, 1917, at 1 o'clock p. m., or thereabouts, being county court day, upon a credit of six and twelve months, the following described property, to-wit:

An undivided one-half interest in the following described tract of land: Lying and being in the Union precinct in Boone county, Kentucky, and bounded thus: Beginning at a stone in the line of the Union and Vinson road; thence with a line of J. H. Newman, Robt. Newman and Edward Newman 88 1/2 poles to a stone, corner of Ed Newman; thence 88 1/2 poles with L. D. Dickerson to a stone, a corner with J. N. Newman; thence with his line 83 w 37 1/2 chains to a stone in said road; thence with the road 24 1/4 w 5 1/2 chains to the grave yard; thence with the line of the grave yard 52 1/4 w 9 1/2 chains, 88 1/2 w 3 1/2 chains, 23 1/2 w 6 1/2 chains to a pole in said road; thence with the road 84 1/4 w 9 1/2 chains to a stone; thence 87 1/4 w 6 1/2 chains to the beginning, containing 78 1/2 acres more or less.

For the purchase price the purchaser, with approved security or securities, must execute bond, bearing legal interest from the day of sale until paid, and having the force and effect of a judgment, with a lien retained therein until all the purchase money is paid. Bidders will be prepared to comply promptly with these terms.

CHAS. MAURER, Master Commissioner.

WANTED

If you have a small farm to sell, I have buyers for it; also buyers for 200 to 300 acres well located, commission reasonable. Send for my list or call on me at Equitable Bank and Trust Company Building.

O. B. POWERS, Walton, Ky. Real Estate Agency.

Take Your County Paper,

Is Your Money Working?

\$25,000.00 is a large sum of money, yet that is the amount we have paid out to our customers in interest on deposits during the past few years.

Did You Receive a Part of this \$25,000?

If not make a deposit with us now and see how much interest we will pay you in a short time, or try the convenience of a checking account in this bank.

We pay all taxes on deposits and assist you with your investments, notes, etc.

U. S. Liberty Loan Bonds or Boone County Road Bonds purchased for you without charge or commission. Both bonds bear 4 per cent interest.

Write us regarding any business.

Peoples Deposit Bank

Open Day and Night with a Competent and Experienced Man in Charge.

Everything modern and up-to-date. Full equipment of everything for the automobile public. Fire proof building. Charges Reasonable.

Telephones, Nos. 9 and 526

Reaching Garage and Residence.

YOUR PATRONAGE RESPECTFULLY SOLICITED.

Enlist Your Dollars

For the good of your soul and the glory of your country enlist some of your surplus dollars in the national welfare. If you cannot send a boy to the front in the name of humanity and liberty, then for sake of God end justice send a century note.

And when you have once bought your Liberty Bond don't be content to stop at that. Make yourself a recruiting officer in the cause of Uncle Sam's vindication. Go out and round up your neighbors and friends at the bar of self-interest.

Possibly you are one of the vast army of Americans who do not yet realize the full significance of the world war and our country's position. If so, it is high time for you to awaken to its seriousness.

The obliteration of centuries in Europe is threatened. All the traditions of right and justice have been outraged. The overwhelming ambition of Prussian militarism will stop at nothing if triumphant, to entrench the Kaiser in the coveted position of world dictator. And if Europe is humbled so will be America.

The eyes of the Prussian militarists are upon America today. Unless this bond issue is surprisingly oversubscribed they will read in its failure American disheartenment, waning sympathy and support for the war and hopelessness of ultimate victory.

America's paramount duty today is to make this subscription so tremendous, so overwhelming, so enthusiastic, that it will leave in the Prussian mind not the slightest doubt of our grim determination to bring its ruthless, predatory, nation-wrecking autocracy to its knees.

We must show them unmistakably that America is on the job to the last man and that the day of reckoning is an it way.

Do your bit and increase your self respect by buying a Liberty Bond.

BOONE CO. RECORDER

W. L. RIDDELL, Publisher.

RED CROSS SPEAKERS

Greeted By Large Crowd Last Saturday—\$56 Contributed For Red Cross Work.

A good sized crowd greeted the Red Cross speakers at the court house last Saturday afternoon. Hon. Frank C. Greene, Kentucky Director for the American Red Cross, was the first speaker, and he gave a history of the progress and work of the Red Cross in this State, and appealed to everyone to join in the great work, explaining how it is intended to look after the boys when they go to the front in France when they will be far from home and friends. Mr. Greene is devoting all his time to the interest of the Red Cross organization in this state, and the only compensation he receives is his expenses. His speech here last Saturday shows he is heart and soul in the work. He went from Burlington to Nashville, Tennessee, and will spend this week in Tennessee, attending the State convention of Red Cross Chapters, he being one of the principal speakers at the convention.

At the conclusion of his remarks Saturday afternoon Mr. Greene introduced his assistant, Miss Carpenter, of Covington, whose remarks were brief, but timely. Miss Carpenter was followed by Rev. Leich, of Covington, who delivered a splendid address along entirely different lines from those followed by the other speakers. He, as well as each of the other speakers, was given splendid attention and at the conclusion of the meeting each one who heard the speakers was glad that they were present and learned so much about the object of the Red Cross which is engaged in the greatest work ever undertaken in behalf of suffering humanity.

At the conclusion of the meeting a contribution amounting to \$56 was taken up for the benefit of the Boone Co. Chapter, which amount will be of great assistance in securing supplies for the work which the chapter has on hand and which was lagging for the want of funds.

The meeting of last Saturday afternoon can not help resulting in a renewed interest in the Red Cross in this county.

Red Cross Notes.

More work is coming. Saturday's mass meeting was decidedly a success.

At the business meeting held after the speaking the County Chairman ruled that word be sold at \$1.00 per pound to people wishing to knit for boys in the service; heretofore the yarn has been issued only to those wishing to knit for the Red Cross.

A finance committee of three was appointed by the Chairman; it was also decided to hold a county meeting in the Christian church in Florence the first Saturday afternoon in each month.

In two weeks Union made up an entire bolt of fabric. They and a majority of the county are brought in a lot of work and secured more. Walton took material for themselves and the units under them.

The National Organization of the Red Cross in the United States is completed.

While waiting for their Junior Organization to be completed the freshmen, sophomores and junior girls of B. H. S. are devoting their evening period two afternoons a week to gauge work, and they are greatly keeping up to the county's high standard.

Lida Haffor, head of the Woman's Bureau, at Lexington, in a letter stating that she will visit Headquarters in a few weeks, says: "I am proud of the work which you have done in surgical dressings."

Heard From in Florida

Under date of Oct. 18th, Samuel W. Adams writes from Sanford, Florida, as follows:

"We have been in Orlando one week, visiting my sister, Emma, but we will stay here this winter as my wife could not remain in Orlando because of the depressing effect of the atmosphere there."

"Not much doing here in the way of gardening, although there are some early vegetables on the market."

"My goods were on the road 21 days."

"This country is all shot on account of the war and the damage done by the freezes last winter. A farmer will tell you that he is making all kinds of dollars and at the same time he is paying from \$70 to \$80 a ton for the fertilizer he is using. A number of farmers have told me that they are getting about one dollar out of five. The fellows who are making the money are those who are catching the suckers like me who come from the north."

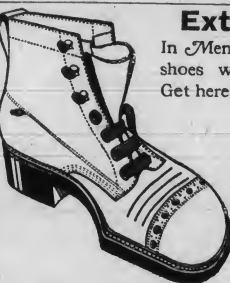

"It has been some hot here, 90 in the shade one last week. Although I am 21 miles from water, station, yet I have been wet in my heart for all the county people."

Seventy Americans Lost

Washington, D. C., October 19.—Seventy American soldiers and sailors lost their lives Wednesday when a German submarine torpedoed the army transport Antilles.

News of the first heavy blow struck against America by Germany reached the Navy Department from Vice Admiral Sims this afternoon.

The Antilles was torpedoed while returning to this country from France. She was under convoy at the time, but neither the torpedo, which sent her to the bottom, nor the submarine was sighted.

The men had no chance for their lives. Struck abreast the engine room bulkhead, the Antilles sank like a plummet, going down in five minutes.

There were about 237 men aboard her. Of these 167 were saved, many being reported to have been fished from the waters by vessels of the convoy. The death list includes three navy officers, four sailors and sixteen soldiers.

The rest of the victims were members of the merchant crew. Secretary of the Navy Daniels tonight authorized the following statement:

"The department is in receipt of a dispatch from Vice Admiral Sims which states that the steam ship Antilles, an army transport, was torpedoed Oct. 17 while returning to this country from foreign service. The vessel was under convoy of American patrol vessels at the time."

"The torpedo which struck the Antilles was not seen, nor was the submarine which fired it. The torpedo hit abreast of the engine room bulkhead and the ship sank within five minutes. One hundred and sixty-seven persons out of about 237 on board the Antilles were saved. About 70 men are missing. All naval officers and officers of the army who were on the ship were saved with the exception of Walker Boyle and O'Connor. Two second-class seamen and two wireless operators were killed."

"There were about 33 of the army enlisted personnel on board, of whom 17 were saved. The names of the missing army enlisted personnel and of the merchant crew of the ship cannot be given until the muster roll in place of those on board has been consulted. As soon as the department is in receipt of further details concerning the casualties they will be made public."

Flashlights.

(Dallas News.)

Sometimes it looks like Cupid goes "over the top" every time he sees a widow.

Maybe you also have noticed that the folks who wear the fanciest sweaters do very little of the fanciest sweating.

The old-fashioned woman who used to buy red flannel for cash now has a granddaughter who orders lingerie on credit.

It has just about gotten so in this country that if you tell a stout lady she oughtn't to eat starches she wifens up immediately.

Another reason why a regular woman is popular with men is that she considers a city house more important than the triumph of democracy.

In Montgomery county some tobacco was damaged and garden truck hurt. The frost hurt the garden corn a little, and cuttings as being done rapidly everywhere. Farmers have been exceptionally busy in filling silos, and most of this work has been practically finished, and the silos will furnish adequate feed for stock for a long and hard winter.

Corn is not the yield that was expected and where it was saved early weeks ago. Tobacco that was uncut was badly damaged by the frost. Farmers have been very busy sowing wheat and rye and considerable of both cereals is up and are looking well.

The Liberty Bond advertisers finally opened their purge to the rural press for a small "bit" out of the national sum set aside for publicity work.

MAXWELL

Most Miles per Gallon

Most Miles on tires

We used to say:

"The Maxwell's real greatness is on the inside--the mechanical parts you can't see."

But the wonderful new 1918 Maxwell has just been delivered to us.

Now we've changed our tune.

Today we say:

"The Maxwell is great inside and out--great in EVERY POSSIBLE way."

Always the most efficient--most economical light car built, the Maxwell now has--

A 6-inch longer wheel base, making it larger and roomier.

Heavier and more rigid frames--6 inches, instead of 3 inches deep--and yet is 50 pounds lighter.

Compensating underslung rear springs--the last word in spring suspension at any price.

A sloped windshield--style of body equal to the highest priced car.

Friends, the 1918 Maxwell is the best looking, best built car for the money we ever saw!

Touring Car \$745

Roadster \$745; Coupe \$1095; Berlin \$1095; Sedan \$1095. All prices f.o.b. Detroit

Beaver lost one of its highly esteemed young men in the death of Harmon Polly Slayback, who joined the loved ones gone before in death's peaceful sleep at 2:45 in the afternoon of Oct. 8th.

He had been ill for a long time with tuberculosis of the kidneys. He was born March 30, 1872, died October 8th, 1917. None knew him but to love him. None named him but to praise him, and should we grieve that such a life gives up the battle of earthly strife?

Better rejoice that his tasks are done. We extend our sympathy to the bereaved father, mother, wife and son, and his many dear ones, and commend them in this dark hour to the infinite love and tender compassion of Him, who is the same yesterday, today and forever. The family desire to express to all for their many kindnesses during the illness and death of their son and husband, their heartfelt gratitude for the sympathy and friendship shown them.

As the Independent Company's oil truck was attempting to pass another truck on the concrete road near W. P. Sandford's last Monday morning, it left the road and turned turtle. The driver was hurt slightly, while a man who was riding with him was injured seriously about the back. The truck turned completely over twice but was not damaged to amount to anything.

County Clerk Rogers requests the officers of election that it is imperative that the keys and seals they have in their possession be returned to him at once that they may be on hand ready for the coming election.

VERONA.

Friday afternoon, Oct. 19th, the Walton seventh and eighth grades met the Verona seventh and eighth grades in a spelling match for the "Spelling Contest Banner," which resulted in a victory for Verona with a score of 16 to 7.

The successful spellers, Miss Ruth Jenkins, Miss Grace Ransom and John Weisenberger, spelled distinctly and well, reflecting great credit on their teachers.

Miss Mattie May, who is justly proud of the fact that her pupils have kept the banner in their possession for three successive years, which fact entitles them to own ship, an honor which has been won by no other school in the county.

Oct. 21st, Halloween, the Ghosts and Goblins are expected to be present and give a free exhibition in the High School Auditorium. Come and witness their weird performance. After the program a pie social will be in waiting. The proceeds to be appropriated to the High School and Eighth Grade Library Fund.

The Baptist Sunday school classes of Mrs. R. P. Coffman and Miss Nannie Powers will serve lunch at the public sale of J. E. Ransom's Saturday, October 27th, 1917.

BELLEVIEW.

Little David Conner was quite ill the first of the week.

Mr. and Mrs. E. E. Parsons spent Sunday at J. G. Smith's.

Mr. and Mrs. Dolpha Seebro, of Burlington, spent Sunday at C. S. Smith's.

Mrs. Belle Cason is spending a few days with her son, Ralph, on Middle creek.

Xen Scott lost a valuable horse Saturday night. It has been ill several days.

Mrs. Eliza Riddell visited friends in Locust Grove neighborhood several days last week.

Mrs. Nannie Maurer spent Saturday and Sunday with her parents near Burlington.

Mrs. Louise Richmond has gone to visit her daughter, Mrs. R. J. Pate, at Akron, Ohio.

Mrs. Harriet Walton returned home last Saturday after a week's visit with her daughter, Mrs. Annabel Brady.

Wm. Smith and family spent Saturday night and Sunday with Mrs. Louah B. Walton, of Walton Heights.

Mrs. C. E. Baker and children are visiting her parents, Mr. and Mrs. J. J. Maddox, of Clayville, Ky., while Bro. Baker is conducting a series of meetings at East Bend Baptist church.

"Resolved, That as a church, express our high appreciation of the kindly character, ability and zeal of Bro. Blanton and of his work among us, and assure him that he takes with him our love and best wishes."

The following resolution was offered at the close of a twelve days' meeting at Belleview Baptist church, conducted by W. R. Blanton, of Latonia. The resolution was presented by T. Z. Roberts and unanimously adopted by the church.

WARNING TO SOLDIERS' WIVES.

Some people who read the newspapers are likely to remember what befell Canadian women who accompanied their soldier husbands across the Atlantic in the early stages of the war. Women are not permitted to accompany an army ordered to the front. These Canadian women, when they could, have returned home. Many have remained in England, adding to the difficulty of the British food problem, and therefore, not especially welcome guests. Had they stayed at home they would have been infinitely better off. There are fears in Great Britain and France that American women may make the mistake of trying to accompany soldier husbands. The object of course, would be to take care of the men in case they should be wounded. On the other side of the case is the threatening shortage of food in the fighting countries. The American embassies at London and Paris have been appealed to and requested to impress the facts on the state department at Washington. In the expedition to France it would be a great mistake for American women to accompany their husbands.

The discovery of an antitoxin for the gangrene that follows various kinds of gunshot wounds, if the report from the Rockefeller Institute is accurate, is like the winning of a great victory on the battlefield. If it had been announced and its efficacy fully confirmed in August, 1914, misery beyond computation might have been prevented. Quite early in the war, Surgeon General Gorgas declared that gangrene infection "seems to be unprecedentedly frequent." "A" "B" infections are fatal in a very large proportion of cases. The antitoxin which Doctor Bull and Miss Ida Pritchett have discovered, and can produce in large quantities for field use, has thus far been employed only on animals. The world will be eager to be assured that, according to the hope expressed by the announcement, it may be as effective with human beings.

Did the U-boats "get" the British and French communications on their transatlantic voyages to the United States and back to Europe? Did they "get" the Italian communication? Did they "get" General Pershing? No. Neither have the U-boats interfered with the safe landing in France of the American engineers and Red Cross units and the ambulance corps. The collier carrying supplies for the American troops in France got through safely. On the whole, there is evidence of a marked improvement in conditions on the Atlantic.

"Let our object be our country, our whole country, and nothing but our country." These are the words of Daniel Webster. They were uttered a good many years ago. The plea voiced then comes to the people across the years with greater appeal than if they were the words of any modern statesman. "Our country"—America—is in danger today for the first time since the War of the Revolution.

When Belgium, alone, stood with its back against the wall and defied the hand of the barbarian it qualified as the biggest little hero among nations. It is therefore gratifying to feel that the civilized world will never forget the sacrifices made for humanity in those first days of war.

Vienna admits the retreat of Austrian troops on the Russian front, but wants it distinctly understood that the retreat was an orderly one, step by step, and with good military results. So is the situation saved by verbal strategy.

When the American forces reach France it will not take long to make them understand what they are to do. They have already the idea that they are going to lick the enemy, and how and when are details they will soon assimilate.

There is a measure of humiliation in the charge that we cannot produce enough satisfactory aircraft for war service, but there is satisfaction in the thought that those we use will be made in France, and not in Germany.

It is hard to do, but the British seem about to have come round to the opinion that what they were fighting for in revolutionary days was not to hold us but to keep up with us.

Don doesn't see why he should be made to sit at the table when he could be outside eating with one hand and playing with the other.

With the huge aviation army and the allied air army the United States is planning it will be literally America Over All.

AND JOHN CAME BACK

The Negro Who Escaped From Jail Captured and Returned to the County Bastile

For Safe Keeping Was Taken To the Covington Jail.

As a sequence to the small item in last week's issue of the Record in regard to the escape of the colored prisoner, John J. Smith, from jail, it was with some degree of satisfaction in view of the sarcastic and rather insulting letters that he left behind, that the town people received the news on Thursday morning that he had been easily captured by Sheriff Cooper and his deputy L. A. Comer.

From the facts in the case and from information gained from the prisoner himself it appears that his escape from the jail was effected in a very easy manner. Jailor Wilson at noon on Wednesday in going into the inside cage to get the mail box, which he keeps the drinking water for the prisoner, failed to properly lock the door upon his exit and as he went over to the cage in front of the house after the water Smith slipped out of the cell and cage and finally the jail and going behind the building, where he remained until jailor Wilson returned with the water and entered the jail. Then the prisoner ran across the lot belonging to W. L. Riddell immediately behind the jail and secured refuge in the barn of Dolph Seabree. Concealing himself in the hay he prepared to wait until darkness. When Mr. Seabree fed his horses that evening he could not have missed Smith more than a foot with the pitchfork as after the darkness showed. After waiting until the mail was delivered, which he saw thru a knothole in the wall, he chose this time to reconnoiter as he knew the court clerk, who was in the clear. He first obtained an old overcoat in Seabree's barn and then going to the garage of W. L. Riddell, immediately adjoining the jail, he helped himself to a pair of overalls and a jacket belonging to County Attorney Edson Riddell.

According to his account he looked Riddell's big Hummobile over carefully but concluded he could not make use of it because there was no water in the radiator. He then broke the lock and secured a saddle and bridle belonging to Riddell's buggy harness, he availed himself of the services of Mr. Rice's horse and immediately hit the high places. But he was evidently against him for John Edson, who was Mr. Rice, in going home from his father-in-law's, happened to notice the barn door open, and knowing such an occurrence was unusual, telephoned and asked Mr. Rice if he had left it open purposely. Mr. Rice then informed the proper officers and Sheriff Cooper and Deputy Comer set sail in their big Overland to overtake him. Following the main road from Burlington to Florence they obtained clues there from Pete Eddins, who had seen a man riding a bay horse towards the city. Following up this tip the officers overtook the fugitive at the Highland cemetery on the Dixie Highway, about half way between Erlanger and Covington. He offered no resistance whatever and soon he was back in Burlington, reposing once more in the little cell in which in his letters he said he was leaving for good as he would spend the winter in New Orleans.

Owing to the physical condition of Jailor Wilson, the authorities concluded that it would be better to take Smith to the Covington jail, which was done last Friday morning. Jailor Wilson concurred fully in the move. It is said the Covington jailor received Smith in the cell he entered the battle, he having been there before. There are enough charges against Smith to send him to the penitentiary. "From now on," as the fellow who got a life sentence said when asked how long he was sent up for.

Three Cent Stamp Required on Letters and 2-Cents on Postal Cards After Nov. 1

Washington, Oct. 25.—When the 3-cent stamp became a requirement Nov 3 postoffices all over the country will be plentifully supplied. The Bureau of Engraving and Printing has its power presses at work now turning out the reserve stock of 600,000,000 stamps kept on hand.

The 3-cent stamp is being printed off the same die now used. The purple ink will be retained. The stocks of two on hand can be used for letters after Nov. 3 by supplementing with one.

A large number of two will also be needed for local drop letter service in cities having carrier delivery. It is for future use, letters being retained.

The Postoffice Department does not look for a decrease in the number of letters because of this 3-cent rate. It will be offset by the natural increase.

Red Cross Making a Drive

In another column is an article which the Red Cross people in this county have published in order to assist them in the drive they are making to raise something over one thousand dollars. The Red Cross is doing a noble work and every person in Boone county should be willing to contribute to the extent of his ability in assisting to provide comfort for the young men of the country who will risk their lives in the great world struggle now on and in which every true American should be willing to do his bit to bring about the victory for his country. The money is not for providing delicacies for the Sammies but it is to secure for them all the real comforts possible. Let each precinct in the county try to outdo all the others in this drive.

Christmas Parcels

Must Be Marked So To Reach "Sammys"—Packages Not To Exceed 20 Pounds.

Washington, Oct. 27.—Most explicit instructions for sending Christmas packages to the American troops in France were issued today by the Postoffice Department.

Postoffices will accept parcels weighing not more than 7 pounds after they have been inspected by the Postmaster and certified to contain no dangerous or prohibited articles. Such mail must be addressed with the name of the soldier, his regiment and company or other unit, and American expeditionary forces. These articles must be conspicuously marked "Christmas parcel," and will be delivered thru the postal service direct to the mail officers with the troops in France.

In addition to the mail service the War Department will transport boxes weighing up to twenty pounds in France, in wooden boxes, not to exceed two cubic feet in volume, well strapped and with a hinge or screw fastener for examination by the military authorities.

These packages must not contain inflammable, explosive or other dangerous material. They will be delivered thru military conveyances.

The War Department announces that such parcel deliveries thru the military mail will begin Nov. 1, not later than December 5.

Whether sent thru the postal service direct or thru the War Department, the rate of postage is 12 cents per pound from any point in the U. S.

Squirrels Preparing for Winter

The squirrels are "cutting hickory" and incidentally raiding the fields of ripe corn, persimmon and other heavy fruits that gives promise of much lushness after the first hard frosts; early flocks of ducks are winging over the creeks and ponds, and the wild geese are dropping their ripe wings in the marshes and on which they feed is thick and long; and in the marshes the wild birds are dropping their ripe wings in the marshes and on which they feed is thick and long; and in the marshes the wild birds are dropping their ripe wings in the marshes and on which they feed is thick and long.

LONG SILENCE BROKEN

John Vest, Who Had Not Spoken for Twelve Years is Talking Again

Many Years of His Life a Perfect Blank to Him.

Twelve or fifteen years ago John Vest, of Verona neighborhood, was doctored a horse supposed to have glanders. Mr. Vest concluded he had contracted the disease and this belief so preyed upon his mind that it became deranged and he was sent to the asylum at Lakeland. The patient's principal peculiarity was the total absence of any desire to talk nor could he be induced to speak. Having been detained at Lakeland several years he was pronounced harmless and incurable and was sent back to this county and lodged in the county infirmary where he remained entirely noncommunicative until a few days ago when his faculties returned and he began talking.

A few weeks since Mr. Vest, who is about 55 years of age, has a slight stroke of paralysis, but there was no indication of any improvement in his mental condition until a few nights ago when he began talking, very much to the surprise of his room mate, Mr. Simms Harrison, who soon discovered that the man was rational.

C. C. Roberts, who was well acquainted with Mr. Vest before his misfortune, told us that when he was informed of the remarkable change in Mr. Vest's mental condition and lost no time in calling on him, and was recognized readily. The two men at once engaged in conversation and Mr. Roberts' surprise "his old friend" remembered all the incidents of his past life up to the time he imagined he had contracted the glanders, but from that time up to a few nights ago his life had been a perfect blank.

Mr. Vest is in a very feeble condition.

A very large crowd attended the sale of the E. Rouse and W. K. Bradford on the 24th ult., and everything brought very satisfactory prices, milk cows bringing \$100 and \$120, and a pair of large mules \$125. There was a large lot of farm implements and tools of all kinds, all in good condition and they brought better prices than articles generally do at public sales. An abundance of lunch prepared by the king of cooks, Owen Aylor, was served and everybody enjoyed it as the weather was just such as to sharpen an appetite for a good meal about the noon hour. By noon it was evident that one auctioneer could not get the job done in one day and G. W. Sandford was called to the assistance of Lute Bradford, who had been employed for the occasion. The work on the part of both men the sale was completed late in the afternoon. The crowd in attendance was composed of people from all parts of the county and the sale was conceded to have been one of the largest in the county for some time.

At the Bradford-Rouse Sale Last Wednesday—Everything Sold at Good Prices.

Plant Sweet Clover

Some farmers hesitate to plant sweet clover on their farms for fear they will die soon as eradicating it when the fields are planted to other crops. The results obtained annually by hundreds of farmers prove the sufficient proof that there is no foundation for such fear; in fact, farmers are experiencing much difficulty in cutting the first crop the second season so high that the plants will not be killed. The new crop of sweet clover, unlike that of red clover and alfalfa, must come from the buds left on the stubble, so when the plants are cut below these buds they will be killed. As sweet clover is a biennial, the seed crop is produced when the first year's growth of sweet clover is to be turned under for green manure it is recommended that the field be plowed after the plants have made some growth the following spring, rather than in the fall of the year. The field is plowed under the same fall many of the plants will not be entirely covered, and these will make a vigorous growth the following spring. When the plowing is delayed until the plants have made some growth the following spring no eradicating them.

Has Moved to His Farm

Ex-County Sup't. of Schools, Edgar C. Riley, and family, have moved to his bottom farm on the Ohio river just below the Aurora Ferry. For several years Mr. Riley has been giving his farm considerable attention, arranging and preparing it for a future home, and now that he is located there he and his family will enjoy the results of his labor. He and his family leave many friends in and around town who wish them well at all times.

BID TURNED DOWN

The State Road Commissioner turned down the bids for the steel for the construction of the bridge at Limburg and the two bridges on the Petersburg pike, as they are advertised as to the steel. The bids for the masonry were accepted and the only thing that will delay that part of the work is bad weather.

SOLD HER DELIGHTFUL HOME

Mrs. Monette Revell has sold her farm north of Burlington, and known as the Wm. Collins farm, to Mr. Barnes, of Butler, Pendleton county. The farm contains 92 acres and the consideration is \$11,500, possession to be given March 1st, 1918. The residence is brick, her excellent repairs to it is all the old buildings. It is the most desirable country home in this locality. J. W. Talarfero, of Erlanger, made the sale.

BLOODY SUNDAY TRAGEDY

Man Killed by His Wife and Brother-in-Law in a Free-For-All Fight.

Williamstown The Scene of Another Horrible Murder.

Marion Ryan was killed at the old hotel building, known as the Thompson Hotel, on South Main street, Sunday afternoon about 3 o'clock. Four bullets penetrated different parts of Ryan's anatomy and he was literally cut to pieces with either a knife or a razor in the hands of his assailants.

Chas. Marquis, his brother-in-law, received a severe slash in the face, extending downward from the forehead, either from a knife or a razor Ryan's wife and brother-in-law are in jail awaiting an examining trial.

Ryan and his wife had been living apart for some time. Ryan had been away from Williamstown for several months until about three weeks ago when he came back here and rented two rooms in the old hotel building, which is now being used as a tenement house. Ryan had been out of town several days visiting relatives at Butler, Pendleton-co., and only returned home Sunday.

Ryan and his wife were seen to meet on the street Sunday, and after talking a while Ryan went down the street together and entered the hotel building and presumably Ryan's rooms. Marquis was sitting in a room on the floor above Ryan's, and it is presumed that he was already in Ryan's rooms.

Pistol shots and sounds of fighting coming from the hotel building shortly after the Ryan's were being enacted, and the town marshal and sheriff hurried to the scene. The fight which met their gaze as they entered the room where the fight occurred was sufficient to shock the sensibilities of the most stolid person. Ryan lay on the floor, face down, blood spurting from the numerous wounds Marquis seeking to stanch the flow of blood from his injuries was sitting in a chair. Mrs. Ryan, covered with blood, was almost in a state of hysteria.

When Ryan's body was turned over and examination made, he was found to be dead. Both Ryan and his brother, Marquis, were placed under arrest. Mrs. Ryan was taken immediately to the hospital. Marquis to Dr. Eckler's office, where his wounds were dressed. While his wounds were serious and necessitated attention they were not regarded as dangerous. After Ryan's wounds were dressed he was taken to jail.

Ryan formerly owned a small farm on the Barton Ridge pike. He sold the farm several years ago and came to Williamstown, where it is alleged he engaged in the illicit sale of whisky. He was in the city on the afternoon of the tragedy. He was later tried and sentenced to prison by federal authorities and died another term in Covington.

His wife refused to testify with him after his numerous court trials and has been making her own living as well as a living for her two small children.

Marquis was employed by a local telephone people as lineman and had been living at Butler. He accompanied his sister home last Sunday.

The two remaining principals in the tragedy Mrs. Ryan and Chas. Marquis, his brother, were brought down Wednesday morning for an examining trial before County Judge Simmons. County Attorney O'Hara asked the court to postpone the trial until Friday morning because there is some question as to the commonwealth was missing. His request was granted.

Ryan was about thirty-five years old. Marquis is about twenty-five. Grant County News.

From Where the Best Wool Comes

Wool from Ohio and several other States has the strongest and best wearing staple of any in the world, and American wool, as a general class, surpasses those of any other country in these respects. We have to import half the wool our mills consume, not because domestic wool is not good enough, but because there is not enough of it. A little fine Australian wool for soft, lustrous fabrics and some coarse China carpet wool for pale carpets and rugs are enough to meet the demand for special use, and these are by no means indispensable for garments. American wool would meet all requirements if the supply was adequate.—New York Commercial.

Will Moved Back to Walton

W. W. Grimsley, the old Rebel who summers at the mouth of Big Bone creek, is making arrangements to winter at Walton again, and will move to that town in a few days. The people of Walton will be glad to have him and his estimable wife among them again.

Breaking in a New Auto

Sunday County Road Engine (Goudridge) broke in a new Chevrolet runabout he purchased of J. Hume a few days before. Mr. Goudridge was also taking advantage of the acquaintance of the machine.

Soliciting for the Red Cross

Mrs. G. W. Tolin and Miss Mary Rouse, of this county, are actively soliciting funds for the Red Cross work and appeared to be having good success. The Red Cross drive is on this week and homecoming is expected to make good as usual.

Soliciting for the Red Cross

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your new items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

R. Leslie Powers and son Nixon of Covington, were here Tuesday on real estate business.

R. L. Greenwell of Mt. Zion, Grant county, was here Tuesday and rented his blacksmith shop to John T. Osborne.

Jno. L. Vest spent part of last week at Owenston attending to some law cases he has in the circuit court there.

Mr. and Mrs. H. A. English and little daughter left Saturday for Williamsport, Indiana, on a visit to relatives and friends.

Y. P. Keena and brother Charlie of Carlisle, Nicholas county, were here Tuesday interviewing Geo. B. Powers about some real estate they intend buying.

Mr. and Mrs. William Grimesley of Hamilton, were here last week arranging to move to Walton where they will occupy the cottage of Mrs. Hattie Metcalfe.

John T. Osborn and son Norman of Folsom, Grant county, were here Saturday arranging to move to Walton where Mr. Osborn contemplates opening a blacksmith shop.

Thos. Aha of Napoleon, Gallatin county, was here last week on business and spent a day at Lexington endeavoring to have one of his sons relieved from the army draft.

George C. Porter, who recently came here from Williamstown, left last week for Florida to spend the winter. His father W. Porter will continue to make his home here.

Alston Callender and son of Jonesville, Owen county, were visitors here Friday looking over some real estate in the hands of Geo. B. Powers with a view to moving to this quarter.

Wm. J. Banks who was badly hurt a couple of weeks ago by his horse being struck by a railroad train and Mr. Banks being thrown down an embankment near Visalia is slowly getting better.

Rev. Ous Hamilton of the Baptist church has been engaged in a very interesting and successful meeting at the Baptist church in Union, and is having good sized congregations at every service.

Mr. and Mrs. D. B. Anderson of Cynthiaana, spent part of last week here looking over some real estate propositions and bought a farm of 40 acres near Crittenden to which they will move in the spring.

Mr. and Mrs. William F. Moore left last week in their automobile to make a tour of the States, states going to Tennessee, Mississippi and Florida, and expecting to spend the winter in the warm climate.

H. C. Crain, the telegraph operator on the Q. & C. Railroad at Williamstown, was the guest of S. H. McCarroll and family Wednesday. His home is at De Kalb, Tennessee, where Mr. McCarroll formerly resided.

Mr. and Mrs. E. L. Barnes, of Falmouth, were visitors here Friday. They are negotiating the renting of his farm to Mr. C. Brock if satisfactory arrangements can be made. The farm is located near Falmouth.

Chas. G. Abernathy who recently sold his farm near Union and has been making his home with his parents near Dry Ridge, was here Friday arranging for a trip to McPherson, Kansas, with a view to locating there.

Brittishmen Bros. have begun the erection of a six-room two-story frame dwelling house on one of the lots near the Christian church on High Street, and when completed will be occupied by G. F. James and family.

The State Convention of the Kentucky Grange met here Tuesday and Wednesday with a fair attendance. The meeting was very enjoyable throughout, and Judge J. G. Tomlinson, address of welcome was a gem of thought and reasoning.

Miss Marie Arnold returned home here last week from Cleveland, Ohio, where she was the guest of her brother Robt. Arnold and other relatives. Miss Arnold now has a position with the Richmond Dry Goods Co., in Cincinnati.

Robt. P. Coffman who was here on a visit to his mother Mrs. Alice C. Booth, returned last week to Camp Lee, Petersburg, Virginia where he is a member of the 155 Field Artillery Brigade, and expects to see service in France before long.

Real Estate Agent Geo. B. Powers made the following sales this week: Wallace Garrison to Daniel E. Dudley, residence property in Walton for \$4,500; Judge J. G. Tomlin to John T. Osborn, of East Boone, Grant county, a lot in South Walton for \$1,000. Mr. Osborn has rented the R. S. Green well blacksmith shop in Walton and will move here at once.

Jno. C. White who recently moved here with his family from Burlington, has a nice position in a harness manufactory in Cincinnati, making the trip on the commuter. His daughter Miss Eva has accepted a position as an operator in the Walton telephone exchange.

Prof. C. Spencer Chambers of Covington, spent Saturday here the guest of his parents Mr. and Mrs. Theo. F. Chambers, and while here sold a fine building lot in South Walton to Geo. W. Sleet of Crittenden, for \$1,100 on which Mr. Sleet will erect a fine residence in the spring time.

Prof. T. C. Frye spent part of the past week in his old home at Vaneburg, Lewis county, being called there by the death of his wife, Mrs. Mary Frye. Mrs. Frye is now improving.

Frye was able to resume his work as principal of the Walton graded school Monday.

Raymond M. Renaker has accepted a position with the big hardware firm of Barkan & Bell at Louisville, preparatory to taking a place as traveling salesman on the road after the loose leaf tobacco season is over as he will be the bookkeeper of the loose leaf tobacco warehouse at Sanders during the selling season.

John E. Williams purchased a fine 100 ton tile silo for his farm near Walton and had it erected last week. It is the finest silo made and will be a big addition to his fine new place as he is feeding a large number of high grade cattle.

Jas R. Wallace sold the silo, and has closed contracts for about a dozen silos in that quarter during the past season.

Mr. and Mrs. Hugh McClanahan moved from Cynthiaana last week to the Ira Aylor farm near Kensington where he recently purchased having sold his farm in Harrison county. Mr. McClanahan is a fine gentleman and a wide awake business man, and he and his family are welcome additions to Boone county.

Friday morning, shortly after 4 o'clock, the large barn of Chas. C. Hoppert on his farm in South Walton was discovered to be on fire, and the flames spread so rapidly that it was impossible to save the building. The contents, the origin of the fire is unknown but it is supposed to have been caused by someone sleeping in the barn carelessly over dropping a lighted match. Hoppert estimates his loss at about \$3,500, on which there was no insurance, the policy having been cancelled. The barn contained about thirty tons of hay and other agricultural products, farm implements, and 11 hogs, all of which were destroyed by the fire.

BELLEVIEW.

S. B. Scott has a new five passenger Ford Deek is visiting relatives at Cleves, Ohio.
Harry Roseberry and wife have a new girl at their home.
Edward Maurer spent Saturday and Sunday with home folks.
Stanley Clor and wife were Saturday guests at J. J. Maurers' Belleview basket ball teams will play at Walton this afternoon.
Mrs. Pattie Selmes leaves today, Tuesday, for a visit to New York City.

Mrs. Belle Clor received a picture of her son John in full uniform.
Mrs. Wm Smith spent Sunday with her mother, Mrs. Louella B. Walton.
Stanley Stephens and wife, of Middle creek, entertained with a chicken soup last Thursday night.
Mrs. Stephens dined maximum sum \$100 in this district to be used to purchase yarn for the Red Cross.

Pepper Smith and wife, Mrs. Henry Clor and Miss Julia Smith spent one day last week with their mother and sister in Newport.
Carlos Cason has been overruled in his truck this week. He has made two trips after night and a trip each day to Cincinnati.

Stanley Mason, of Camp Taylor, writes home that they are under a special set of officers and are given good treatment and paid well for their work, and realizes he is there for a long time.
Petersburg basket ball teams came down last Friday and played Belleview. Girls team 20 to 12 in favor of Petersburg; boys team 20 to 7 in favor of Belleview; second team boys 5 to 2 in favor of Petersburg. The Belleview first team is going to try to win the championship of the county.

GRANGE HALL.

Joe VanNess left for Ill. Thursday to husk corn.
Mr. and Mrs. Cad Wilson and child, of Dillsboro, Indiana, are visiting relatives here.
Mrs. Lou VanNess returned Friday from a visit with her daughter, Mrs. Walter Fritz, of Milford, Ohio.

Mr. and Mrs. Mort Sink, of Elrod, Ind., and Mrs. Ray Sink and child, of Dillsboro, Indiana, spent Sunday at B. N. Riggs.
Rev. Robt. McNeely, assisted by Rev. Baker, of Belleview, is conducting a protracted meeting at the East Boone church.

Ryle Bros., Herman and John, traded for a new 3-ton Schacht motor truck and will make regular trips to Lexington, hauling freight both ways. They made their first trip Monday.

T. B. Miller and wife, of Gallatin county, spent last Saturday night at R. T. Stephens' Sunday, accompanied by Mrs. Stephens, they motored to Aurora to see Mrs. Hester Ryle and to meet Lee Stephens, of Cincinnati.

Murdered in California
Last Friday R. T. Stephens, of Rabbit Hash, received a telegram from San Francisco, announcing the murder of his son-in-law, C. H. Moler, by an Italian, and that the murderer was in jail. The funeral took place at Reno, Nevada, Monday. No other particulars have been received. Mrs. Moler has been with her parents at Rabbit Hash and visited Burlington last week during the time. She returned home in September.

VOTE FOR THE CONSOLIDATION OF DUAL PHONE SYSTEMS

The voters of this county, in common with voters all over the state, will find on their ballots at the coming November election, the line for ratification of the constitutional amendment passed by the last legislature, providing that telephone lines in Kentucky may absorb other telephone lines, for the purpose of eliminating the double system of telephone wherever it is deemed advisable. First, public endorsement of the amendment has come from the Frankfort Chamber of Commerce, and similar commercial bodies all over the state are taking up the matter in the hope of securing a big affirmative vote. There is so little argument to be presented against ratification of the amendment that such efforts are being made for fear that the voters may neglect to vote on it, rather than for fear of any substantial opposition. The dual system of telephones is not feasible. It is expensive and annoying and absolutely destructive to the proper functioning of the long distance system. It forces business houses to keep two telephone rents going, and puts people who have only the one line out of touch with those who have the other, whereas the prime purpose of the telephone is to knit communities and territories together by means of its facilities. The legislature was quick to realize the need of removing present restrictions which prohibit the absorbing of competing lines, and it is imposing the idea.

The amendment passed by the Senate with only one dissenting vote and encountered no opposition whatever in the House. The representatives of both parties recognized that only by means of this amendment to the Constitution could the state be saved the annoyance and expense of two telephone systems in the same community. Some of the larger cities, particularly Cincinnati, New York and Washington, early recognized that two telephone systems were an unnecessary burden on the community and have granted to more than one company a franchise for a telephone system, with the result that every telephone user in each of these cities is in direct communication with every other subscriber.

In Kentucky, in the early stages of the development of the telephone business, numerous small companies were organized. They did not connect, different kinds of equipment were used and the standard of maintenance was not universal, which retarded the advancement of telephone development in keeping with other states more progressive. Nearly every community in Kentucky has, at some time in its history, experienced a telephone war that engendered hard feelings, as each side had its partisans, and the public has been deprived of the convenience and economy that one telephone system affords.

The public interest is thoroughly protected under the proposed constitutional amendment, as no purchase can be made without the consent of the city council. The passage of the bill providing for the constitutional amendment and the practically unanimous vote it received in the General Assembly is evidence that it was passed in response to a wide-spread and popular demand for relief from present telephone conditions.—Paducah (Ky.) Evening Sun.

The Y. M. C. A. Call
Boone county will be called upon to contribute \$2,500 for use of the War Council of the Y. M. C. A. Boone's contribution has been apportioned as follows: Burlington, \$500; Walton, \$1,000; Petersburg, \$500; Florence, \$250; Richmond, \$250. The work of raising this money in Boone county is in charge of John C. Bedinger, Chairman, Walton, and B. H. Hickey, Boys' War Chairman, Burlington.

Hogs Dying of Cholera
Thomas Baisly, of North Bend, has lost, in the last few weeks, about 80 hogs of cholera. The hogs would have been valued from 250 to 300 pounds each. Baisly called on Dr. H. H. Hickey, who examined the herd and said that disease had such a hold on it that nothing could be done. Mr. Baisly has sustained a heavy loss.

In this issue the Tri-State Butte Company, Cincinnati, advertises to pay 60 cents a pound for butter fat. In its dealings with the Tri-State the company has found it prompt and reliable.

Only house wives are expected to sign the food conserving coupon trip. Mrs. Essie Enule Wilson, Burlington R. D. 1.

R. A. Brady is now a citizen of Burlington all are glad to say. Re-member he will have a sale next Saturday.

Hon. W. P. Cropper was the guest of the family, Sheriff W. D. Cropper, yesterday.

A recent letter received from C. M. Baidon located him at Davenport, Iowa.

Considerable has been sowed in North Bend bottoms.

The war has shot the weather to pieces.
J. W. Quigley, of the firm of Quigley & Beeson, Linsburg, was a business caller at this office Tuesday afternoon.

BOONE COUNTY BOY

Tells About His Trip Across the Beautiful Deep Blue Sea.

Torpedo Crosses the Ship's Bow

Under date of October 22, L. N. Uts writes his mother from the Marine Barracks, Norfolk, Va., as follows:

"Dear Mother—It has been some time since I was able to write a satisfactory letter on account of the censorship regulations, but as I am again in the good old U. S. A. they want both me for a while anyway. I am feeling fine as the weather here is crisp but not cold enough for frost."

"I will try to give you some idea of where I've been and what I've been doing. We left New Orleans July 22 and reached Key West July 24th. Left Key West July 30th, arriving at the Bermuda August 4th, and anchored in St. George's harbor."

"Today, my birthday, we got liberty. This being a winter resort there was not much going on. There is some beautiful scenery here and I went out and saw one of the numerous caves. Some bananas grow here. The next day we loaded ships and got under way that evening. We went east all the time, and on the night of September 8th we saw the Northern Lights or Aurora Borealis. On the 11th we sighted a steamer that looked like a merchantman. We ran our colors up to the mast head, but she seemed like she did not like our looks, so she did not show her colors and tried to get out of our way. Everybody thought she was a German raider, so had 'general quarters' and gave chase. A little while, however, she saw we meant business, when she commenced signaling and ran up the Norwegian colors."

"Early on the morning of the 15th we sighted one of the Azore islands, and the next morning we dropped anchor in the harbor of San Miguel on the island of Ponta. Did not get to go ashore here as we were coaling both days. The U. S. S. Castine came in while we were here and left with us on the 18th. The sailors on the U. S. destroyers here were betting 2 to 1 that we would never reach our destination."

"On the 22d, at 2:30 p. m., we sighted the coast of Africa and a little later, the coast of Spain, and were soon in the straits of Gibraltar, arriving in the harbor at Gibraltar about 6 p. m. The next day, Thursday, the 23d, we received mail from the States, which was the first since leaving Key West. Got liberty that afternoon and went ashore. Gibraltar is a town of about 35,000 including about 8,000 British soldiers. It is built on a rocky island of the rock which is three-fourths of a mile long and one-fourth of a mile wide and 400 or 500 feet high. A good part of the population are Spaniards. That night after the liberty parties had returned we received a message to go to the aid of a merchant ship which had been torpedoed outside of the straits. The Machias and Nashville got under way cruised up and down the coast but saw nothing."

"We came back to Gibraltar on the 27th, coaled on the 28th, and on the 30th with the Castine and Sacramento, we took a convoy of 17 merchant vessels out. We left the convoy at one o'clock in the morning opposite Cape St. Vincent, Portugal, and headed back to Gibraltar. We took several convoys as far as Cape St. Vincent and took one trip into the Mediterranean sea."

"On the 18th while under way with a convoy of 18 merchant ships we received a wireless message from Gibraltar that we were being followed by German submarines, so we did not leave the convoy at the usual time. The next morning a torpedo crossed our bow, missing the ship about four feet. Directly we had General Quarters and headed in the direction from which the torpedo came. I happened to be on watch at that time. The U. S. S. Machias came and we were coming and submerged before we could get a shot. We caught only a glimpse of it as it was submerged. That was the last we saw or heard of it. We got back to Gibraltar on the 23d, and that was the last trip we made made on the Machias. We already had orders from the Major General Commandant of the Marine Corps to be transferred to the U. S. S. on the first available transportation, and on Wednesday the 25th were transferred to the U. S. S. Birmingham, the flagship of the squadron at Gibraltar, where we stayed a week when we went aboard the U. S. S. Allamanna, October 3. The Allamanna was a German liner which was interned at New York when the war began. We got under way October 6th, with two other merchant vessels, but left them in a day or two and made the remainder of the trip alone, making an average of 14 knots an hour coming over, arriving at Newport News about 6 a. m. October 18th. That afternoon a government tug took us to the Norfolk Navy Yard, where we were transferred to the Marine Barracks."

"I am just getting settled and think I will like it here. 58th Co., Marine Barracks, Norfolk, Va.

Rev. T. J. Loomis, pastor of the Baptist church at Anchorage, has filed suit for \$500 damages against Richard Litty, one of the members of his congregation. He charged him by hitting his left hand on the little finger thereof. He says that on account of the hitting he lost a great quantity of blood and suffered much pain and humiliation. — Stanford Interior Journal.

The Red Cross Calls for Funds

The Boone County Chapter of the Red Cross needs money. A deficit is now shown in the report and other clothes, yarns and gauze are needed. The following finance committee has been appointed: W. A. Gaines over Bullittsville, Burlington and Petersburg; Dr. M. J. Crouch over Florence, Constance and Union; Miss Emily Hughes over Beaver Lick and Big Bone; Mrs. Patty Selmer over Rabbit Hash and Bellevue; and John L. Vest over Walton and Verona.

The apportionments of the precincts of the county are:

	Maximum	Minimum
Rabbit Hash	\$ 75	\$ 50
Bellevue	85	60
Burlington	135	100
Petersburg	100	75
Bullittsville	100	75
Walton	90	40
Florence	100	75
Union	125	100
Walton	135	100
Verona	100	75
Big Bone	95	75
Beaver Lick	100	75

The call is for this money to be all raised and paid by November 6th. Let each precinct have printed in next week's paper the raising and paying of the maximum apportionment or more. This call was sent out last Friday and the precincts have reported as follows:

During the period of the war many calls for money for wounded and sick soldiers will be made. We must prepare to meet these calls. Every county is expected to meet its quota of all calls made. Goods sent to the French soldiers may help France to win before we get there. Boys who have been exempted or do not have to go ought to answer all these calls. If some one is in the line where you would have been ought you not to give five or ten dollars for his sake? All officers of the local auxiliaries are urged to get to work on this. Next week we will announce the name of the first precinct to raise and pay its apportionment."

NO SLACKER PRECINCTS IN BOONE COUNTY is the red cross cry until Nov. 6th. These next few days are to be made Red Cross Days.

EDGAR C. RILEY.

Personal Mention

Mrs. Eliza Rouse has gone to Covington where she will board this winter.

W. R. Davranville, of Newport, spent Sunday in Burlington with his wife's relatives.

Clifford Norman, of Gunpowder neighborhood, was a caller at this office a few days ago. These next few days are to be made Red Cross Days.

R. Lee Huey, of Big Bone church neighborhood, was a business visitor to Burlington last Saturday.

J. W. White, of Flickertown, and W. G. Kite, of Waterloo, were among the Monday callers at this office.

B. Kirtley, of East Bend, and B. Wilson, of Rabbit Hash, were business visitors to Burlington, last Saturday.

C. C. Pigg, of Plattsburg neighborhood, called early Monday morning to give the Recorder a financial boost.

Reuben Hager, of East Bend, came up Saturday to visit his school mates and other friends in Burlington and vicinity.

Rev. David Blyth occupied the pulpit at the Baptist church last Sunday night at the request of the pastor, Rev. DeMoss.

R. O. Rouse, of the Grange Hall neighborhood, was in Burlington last Monday looking after business pertaining to the settlement of his father's estate.

Jeff Williamson and Manly Ryle, of Waterloo, were transacting business in Burlington, last Saturday.

Mr. Williamson is getting along nicely with the construction of the Gunpowder and Rabbit Hash pike.

N. W. Carpenter and wife, Mrs. Alice Snyder and Miss Amelia Corbin returned Saturday from a visit of several days with Grover Snyder and wife, at North Madison, Indiana. They made the trip in Mr. Carpenter's new Maxwell.

Judge Lassing, of Newport, was in Burlington, last Friday, making arrangements to move his furniture etc., from Newport to Burlington. He is going to live in his family will hereafter be citizens half of the year, spending their winters in Florida. Judge Lassing and wife will receive a royal welcome by the citizens of Burlington.

Had a Bad Day But a Big Sale. Monday was not a good day for a public sale, but notwithstanding a very large crowd attended that of Chas. Youell, and everything brought top-notch prices. For example: A Hereford cow and calf, brought \$15; Jersey cow, \$13; Jersey cow and calf, \$10. A good lunch was served and the crowd seemed to enjoy the rain that fell that afternoon.

Edgar C. Riley added another of his numerous callings, that of auctioneer at which he made a decided hit.

Letter From Florida.

Writing from Sanford, Florida, under date of October 27th, J. S. Adams says:

"It is some cooler than it was when I came here, and there was a light frost this morning. We had a wind from the north for two days and it sure was cool, and I worked with my coat on most all of the time, and Mrs. Adams had to heat an iron to take to bed with her. I have been told by several this is kind of weather they have here all winter—about three days of sunshine and then a rain followed by cold. Nix on a place like this."

"I have been hand-pulling celery and lettuce which looks fine. The man has 50 acres of lettuce and 5 acres of celery, and is putting out 10 acres more celery. He has 18 hands employed at \$3 a day, which is good money, but work setting celery is hard as you have to crawl on your knees. It am getting \$1.50 a day, but my rent is \$10 a month and my wife and I have to eat everything we buy is most as high as it is with you, nearly out of sight."

"About 100 acres cotton was raised in this county last year. Near here is cotton mill and a great mill combined, and quite a bit of corn is being raised here, but I have not seen any that compares with that grown in Kentucky."

"Toll the boys I feel as game as a fighting cock. Tell Chas. Maurer I have seen some chickens here but none that will come up to his bunch. Tell Chas. Westby to keep his hat on. I saw the top of his head shining the other day."

"SAM ADAMS."

Red Cross Notes.

The Bullittsville unit will meet Wednesday, November 7th at the home of Mrs. Will Graves. Mrs. B. C. Gaines visited this unit at its last meeting.

The grand jury room is now being used as County Headquarters and is proving a decidedly convenient, comfortable place. It is open every afternoon except Saturday, and all day Monday and Tuesday.

The box of knitted articles, must be in Cleveland by November 15; if it comes the time even nearer than was at first supposed when the above date was given for completion.

Hebron sent in a quantity of muslin bandages last week, but desired more work and their allotted knitting is off of hand.

This week's Lake Division News says: "The Surgical Dressing situation has become so important that Major Murphy cabled the following to Washington: 'The Red Cross has direct responsibility of supplying us with surgical dressings, and nothing in the whole situation here is equally important. Red Cross standard dressings in millions must be sent over with all possible speed. If this is not done as soon as possible, a serious calamity and national disaster is inevitable. The American women, who compose the Red Cross chapters, should prepare with all enthusiasm and speed possible the dressings which are going to mean life and death to our men.'"

And Boone County Chapter is practically out of gauze due to the lack of funds; the very best anyone can do is contribute to the 'drive' now in progress.

The following are assisting Mr. W. A. Gaines in the Red Cross 'drive': Dr. Nunnally, Wm. Watts and Mrs. B. C. Gaddy, Bullittsville; Benjamin Padwick, Hebron; R. H. Berkshire, J. M. Thompson, J. C. Hollis, Petersburg.

The following sums have been contributed to the Red Cross drive: Burlington—B. C. Gaines, \$10.00.

Those giving \$5.00 are A. B. Renaker, E. C. Riley, C. W. Goodridge, A. B. Rouse, Albert Conner, Dr. W. Duncan, John C. Acra, W. D. Cropper, Newton Sullivan, Jr., W. L. Riddell.

Those giving \$2.00 are Irvin Rue, Benj. H. Riley, M. A. Yellon, G. W. Tolin, S. W. Tolin.

Those giving \$1.00 each are M. L. Riddell, E. E. Kelly, W. L. Kirkpatrick, Mrs. White, Mrs. A. B. Renaker.

Giving 50 cents, L. T. Clor.

Hebron and Bullittsville—Giving \$10.00, Dr. R. H. Crisler. Giving \$2.00, J. A. Duncan.

Those giving \$1.00 each are E. K. Stephens, Cleve Hankins, Clarence Easton, B. C. Gaddy, Louis Hardin, James Masters, Mrs. Corinne Riley, Bernard Berkshire, James Bullock, Ben Jones, John Jones, Dr. Nunnally, Walton.

Those giving \$5.00 are Scott Chambers, J. G. Tomlin, P. E. Bedinger, John L. Vest; Walton Baptist Sunday School \$6.45; 7th and 8th Grade Pupils \$1.00.

Miss Eunie Willis, who was appointed to take charge of the food conservation movement in this county, received under date of October 26th, the following telegram from Herbert Hoover:

Miss Eunie Willis, Burlington, Ky. Housewives, food conserved, families enrolled, America invincible. Strike hard. Washington looks to you. Herbert Hoover.

The above message shows the great emphasis our Government is putting on the food Administration. Realizing the importance of Boone's enrollment, set at 1905 by the State Director, we must give all our energies to this campaign.

A meeting will be held at Red Cross room, Burlington, at 3 p. m., Monday, November 5. It is imperative that all precinct chairmen be present or send alternates.

Cut out this coupon, align and mail it to me if you believe in this move. EUNIE WILLIS.

To the Food Administrator: I am glad to join you in the service of food conservation for our nation and I hereby accept membership in the United States Food Administration, pledging myself to carry out the directions and advice of the Food Administration in my home, in so far as my circumstances permit.

An Ounce of Prevention

By Dr. Samuel G. Dixon
Commissioner of Health of Pennsylvania

Before the causes of disease were known for the practical application of nature's ways of producing immunity to disease, we had to suffer an attack of sickness and then trust to drugs and nursing for cure.

This was a difficult task and the death rate was sometimes enormous, both in times of peace as well as of war.

Then the day of prevention came. Gradually the laws of nature unfolded until today we know methods of preventing diseases and antidoting the poisons generated by germs in the body.

It was even as late as the Spanish-American war that we lost more soldiers from preventable diseases than we did from bullets. This was a disgraceful thing, as sanitarians could have prevented the high death rate.

From what we can learn through the newspapers and other sources, France today is short of disinfectants in her trenches. We do not see any great public excitement over this condition, or any concerted action of our good citizens to give their mites to purchase and transport disinfectants for the French trenches so as to prevent disease.

Therapeutics or drug treatment seems to continue to have a hold on the lay mind, and possibly, to some extent, on the medical mind.

Both the people at home in every-day life and the soldiers in our army are much to blame for the sickness that exists. The medical profession's advice is not taken when these persons are well, but the moment they get good and sick they call, "Oh, doctor, do relieve me from this awful pain," or "Oh, doctor, save my life!"

Perhaps this call comes too late. A few words of prevention from the doctor to the patient, and those few words obeyed, might have prevented the sickness and saved suffering and sorrow.

Do not let us lose sight, individually or collectively, of preventing diseases both at home and in our military camps, let them be where they may.

POULTRY POINTERS

Remember, milk is meat when it comes to feeding chicks or hens.

The best eggs for hatching come from flocks that have free range.

Watch for head lice on the ducks. If found rub top of head with a small piece of lard free from salt.

It is a good plan to force egg production, but nature may be materially aided by good feed selection.

The production of ducks especially should be emphasized at this time, because of the rapidly with which they grow.

To destroy mites and keep the flock free of their depredations, insecticide sprays and a sanitary building are necessary.

Ducks of most of the meat breeds, properly fed and managed, frequently weigh from five to six pounds at ten weeks of age.

If it is worth keeping poultry at all, it is worth making a good job of it, and nothing except a good job will make a profit.

After the grass gets tough chicks can catch worms and indigestion and will grow better on loose soil. The cornfield furnishes ideal conditions.

A laying hen is nervous; if she is frightened or even startled much, there is apt to be a miscarriage of eggs. For this reason, the poultryman should carry on the work in the henhouse quietly and evenly.

The Leghorns today are a much better breed than they were years ago. The tendency has been to breed larger birds and still retain all their characteristics as producers of a large number of eggs. With larger bodies also has come the production of larger eggs, which is an added merit to the breed.

The Monitor Comes Back.

British monitors are playing an important part in the Italian advance toward Trieste. The monitors have again proved themselves in this war. They appear to be the only type of craft that can carry big guns into shallow water and bombard coast fortifications successfully. Submarines cannot follow them into these shallows, and they have so little freeboard that they present a difficult mark for the enemy to hit.

Dardanelles took up the set work at the Dardanelles after the battleships had been lost or had been driven by submarines to seek protected ports. Monitors shell the Belgian coast when attacks are made on the German bases there. Now they are shelling the Austrian coast ahead of the Italians. And so far there has been no report of a single monitor lost.

Red Cross Dog Heroes.

The Belgian dogs, on account of their ability to detect and capture criminals, and the great St. Bernards, which were famous for their rescue of travelers lost in the Alpine snows, were considered the greatest heroes of the canine world until the present war introduced the Red Cross dogs, whose deeds of valor in front-line trenches have saved the lives of thousands of sorely wounded. From the National Geographic Magazine.

DAIRY

PLAN FOR CONVENIENT BARN

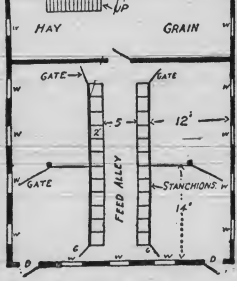

No Better Way to Keep Young Animals Than to Provide Pens in Which They Can Run Loose.

(By C. C. HAYDEN, Ohio Experiment Station.)

There is no better way to keep calves or yearlings than to provide pens in which they can run loose in small groups. Mangers and stanchions should be provided along one side of the pens, in which the calves can be fastened while eating.

The accompanying sketch shows a simple yet convenient plan. The dimensions are 30 by 40 feet. A space 10 feet wide is taken across one end to be used as a feed room. The remainder is divided into four pens, two on either side, each 12 by 14 feet. A feed alley 5 feet wide runs through the manger with six stanchions to a pen.

The stanchions as shown are two feet apart which is sufficient for one yearling if fastened only while eating.

Convenient Barn Plan.

ing. The width of the manger, the spacing of the stanchions and height of the pens should be varied in different pens to suit sizes of calves.

The partitions between the pens should be about four feet high and a gate provided so that both pens can be thrown together. Gates can be placed at each end of the mangers, giving easy access to all pens from the feed alley. The stanchions, partitions and gates may be made of 1 by 4-inch stuff.

Ventilation should be provided the same as in any dairy barn.

FEED DAIRY COWS ROUGHAGE

Should Be Given to Limit of Animal's Capacity—Soy Bean Hay Is Classed With Alfalfa.

"Roughage should be fed to the limit of the cow's capacity," says Prof. C. C. Hayden of the Ohio experiment station. "Relatively, the roughages, like hay and corn and stover, are much cheaper than grains and hay is of unusually good quality. Roughage, of course, should not be fed exclusively, as such feeding might lead to compaction and death even in dry cows and heifers. Some grain is needed in every dairy ration."

This dairy specialist also declares: "Choice alfalfa hay at \$20 a ton is cheaper than bran at \$20. Our experiments show that soy bean hay is in the same class as alfalfa, and clover is third. With corn at \$1 a bushel, clover hay should be worth about \$20 a ton, or \$5 more than it is now quoted."

Timothy hay is recommended for milking cows only in small quantities to replace such grains as corn and barley. Leguminous roughages have proved far superior in numerous experiments to timothy for cows in milk.

SILO OF GREAT IMPORTANCE

Huge Receptacle Means Saving of From 8 to 10 Cents in Cost of Producing Butterfat.

Practical dairymen who are silo users say that the silo on the farm means a saving of from eight to ten cents a pound in the cost of producing butterfat. Beef feeders say that ensilage saves from \$1 to \$1.50 per hundred pounds in producing beef.

Feeding experiments bear out these statements. On this basis ensilage under normal conditions is worth \$4 a ton. With an increase of 50 per cent in feed prices it is worth \$6 per ton. Reports from farmers show an average cost of \$2.75 a ton for corn ensilage, including all factors incident to its production. The inadvisability of doing without a silo seems to be more important than the question of whether to build one.

CAUSE OF BULL'S UGLINESS

Confinement in Small, Dark Stall Makes Animal Ugly—Give Him Daily Run in Yard.

No wonder a bull gets ugly when he is shut up all the time in a small, dark stall.

Give him a daily run in a good-sized yard, and you will have a bull that is kind and gentle and a sure stock getter for many years.

It is foolish to sell a bull after a season's use unless he is a poor one.

LIVE STOCK

DON'T SACRIFICE BROOD SOW

Important That All Animals Be Used to Increase Food Supply—Retain All Spring Gilts.

A sow is a good investment. This is true even in these strenuous times of high prices of food concentrates. The quotations on these feeds are controlled to a considerable extent by the price at which meat animals sell. Hence concentrates usually command a high price when hogs on the hoof at large packing centers sell at more

Poland-China Sow.

than 16 cents per pound. However, record prices for swine as well as feed concentrates have been a great incentive to farmers to "cash in" all the hogs available. That many sows have been included is evident from the fact that the bureau of crop estimates reports approximately three per cent fewer sows on farms in the United States than a year ago. Further, this is the first year the supply has not increased since 1913.

Breeding sows are at a premium and the demand for young stock is unprecedented. The hog buyers state in their reports that they are compelled to take anything that looks like a hog. The fluctuation in the number of hogs in the United States is subject largely to the fluctuations in the financial condition of the country. The high prices paid for hogs are a big inducement to farmers to market their hogs. The high prices of corn caused them to cut loose during the latter part of the year. The high prices paid for hogs and an increasing export trade are the two main factors which make the hog business especially attractive at the present time. Millions of farmers would purchase sows to fatten this coming season if they could, but this is almost an impossibility. Those farmers who are fortunate enough to have retained their breeding sows

Chester White Sow.

will play an important role in placing spring hogs on the market. The spring gilts from these litters should not be sent to market for meat purposes, but should be retained or sold only for breeding purposes in order to augment the pig crop next year.

ARE LITTLE PIGS OFF FEED?

Look Out for Germ Disease Affecting Soft Tissues of Mouth—Trouble Is Contagious.

(By DR. F. B. HADLEY, College of Agriculture, University of Wisconsin.)

Watch out for some mouth disease in little pigs this year. A germ disease which affects the soft tissues of the mouth, causing ulcers and dark red borders, is common in many brood pens. Unless treated right and without delay the disease may cause death.

Swab the ulcers with a solution of potassium permanganate made by dissolving one ounce of crystals in two quarts of freshly boiled water. Then wash out the mouth with this disinfectant fluid. Treat bad cases twice daily, others once a day.

Some mouth is contagious. To prevent its spread clip the heads of the pigs in the same solution. Clean up the pens and disinfect them with some good commercial disinfectant. Do not put fresh litters in a pen once used for infected pigs unless it has been well cleaned.

TRAINING FOR SHOW ANIMALS

Work is an Art and Requires Considerable Experience to Get Them at Best Advantage.

It is always a mistake to show animals that have not been properly trained. This may easily be done by making a little time each day to get the animals to stand properly and go where directed. This work is an art, and it requires considerable experience to make an animal show to best advantage. Before show time the animal will require considerable exercise and this may be had by leading, which will also help to train the animal to respond to guidance with grace.

GOOD CONDITION OF HORSES

Proper Care and Feeding, With Good Grooming, Are Essential for Securing Best Work.

The better the care that is given to horses the easier they can be kept in good condition with moderate feeding. Proper care and feeding, with good grooming, are the essentials necessary to securing the best conditions for work.

DAIRY

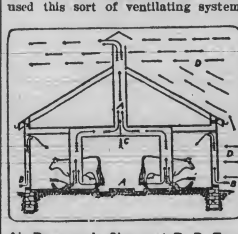

VENTILATION OF DAIRY BARN

Better Health of Animals Is Assured by Supply of Fresh Air—King System Described.

More of us every year are building barns with ventilating flues or putting flues into stables already built. Fresh air means better health in herds.

The system described by F. H. King, the Wisconsin authority on ventilation, never has been outclassed. It is the natural way.

In illustration, the movement of the air is shown by arrows. The pure air comes in above the animals and the foul air is taken out through the outtake shafts which have their openings above the stalls and extend up through the roof or to the cupola.

Air Pressure Is Shown at D. D. Forcing Air In at B, B, and Out by Suction at Top of Shaft A.

A general rule seems to be well tried out that thirty square inches of outtake and intake area are about right for each grown animal housed in the stable. This being true, there would be needed two shafts, each 10 by 15 for a herd of ten cows. The intake openings should be of the same area.

A damper in the ceiling at C can be opened if the temperature of the stable grows too warm. There can be no regular circulation unless there are as many and no large intakes as outtakes. Also, the intakes should let air in at the ceiling or above the level of the lower openings in the outtakes or foul-air shafts.

HANDLING MILK IN SUMMER

Whether Intended for Table, Creamery or Market, It Must Be Sweet to Bring Best Price.

It is no trick at all to keep milk sweet in cold weather. It may stay in the sun half a day in December without any damage, but in June and July it must be handled very carefully. Whether the milk or cream is intended for the table, the creamery, or the milk market, it must be sweet if it is to bring the best price.

To keep milk sweet just two simple things must be very carefully looked after: (1) It must be cooled as completely and quickly after milking as possible, and (2) absolute cleanliness of pails, pans, and cows must be secured. If this is done, thunderstorms will no longer sour the milk. The warm, damp weather which we have just before thunderstorms really does tend to cause milk to sour if it has not been properly cared for.

This souring takes place because little invisible plants called bacteria get into it in dirt or by lurking in the corners and seams of poorly cleaned pails and cans. The remedy is plain. Keep the bacteria out by using seamless pails and cans and seeing that absolutely no dirt or dust gets into the milk in the stable or anywhere else.

DAIRY PRODUCTS IN DEMAND

Impossible to Buy First-Class Dairy Cows at \$80 Per Head—Breed Up the Common Stock.

The great demand for dairy products has caused the price of good dairy cows to be very high. Reports from associations of dairymen show that it is impossible to buy first-class dairy cows at even \$80 a head. With dairymen there has been a steady increase in the demand for good dairy cows moved into new dairy territory. So, the only way new districts can be supplied must be by breeding up the common stock by the use of good dairy-bred bulls.

ALFALFA FAVORED FOR COWS

Amount of Protein Necessary to Feed in Form of Expensive Concentrates Is Reduced.

(By PROF. J. C. KENDALL.)

Where alfalfa is available for dairy cows the amount of protein that is necessary to feed in the form of expensive concentrates is materially and profitably reduced. For cows that do not give large yields of milk, a balance may be made by feeding alfalfa hay and ensilage. This makes a home-grown ration that can be produced cheaply, a very important factor in the economical production of dairy products.

Dibowski's Cafe

THAT
Neat Little Place
For Farmer, Workman, Merchant, Clerk and Professional Man.
Commercial Luncheon from 11 a. m. to 1:30 p. m. Supper 5 to 7 p. m.
No. 6 Pike Street, Covington, Kentuck. Ky.

THE IMPORTANT THING

When getting a pair of glasses is to have your eyes fitted right. We have had 25 years' experience and guarantee to fit you exactly right. We grind every lens we use on our own machinery and take plenty of time to test your eyes carefully. Our prices are reasonable for first-class work.

Took Two Prizes at the Field meet
H. W. Smith, of Erlanger, had two dogs in the field meet at Dillboro, Indiana, last week, one of which won fourth money in the open derby, and for which he took \$300. His other dog took third money in the bench show. Mr. Smith has been a very successful breeder of bird dogs.

Walton, Florence Burlington and Petersburg will each hold a town election on the 6th inst to elect town officers. Florence is the only town of the county which has more than one ticket on its ballot, the voters there being given their choice between two sets of candidates. (Walton will vote on a proposition to bond the town to the extent of \$8,000 for street improvements.

Clifford Rouse Home on Furlough
Wm. Rouse, of Covington, was transacting business in Burlington, last Monday. He was accompanied by his son, Clifford, who belongs to the U. S. Navy, and is home on a furlough, and will report at Boston, Massachusetts in a few days, from which place he expects to leave shortly on a battleship. He has been in the service since last May, and having gone through the training school is much better pleased with the life of a seaman than he was. Young Rouse is a robust man and is anxious to render Uncle Sam service anywhere he sees fit to send him. Of such men as young Rouse is a good Navy composed.

Has Moved to Erlanger
John W. Hogan, of Florence, for a few weeks has moved to Erlanger to which postoffice he has ordered his Recorder sent. He will continue to claim his citizenship in this county and vote at Florence. It seems that Boone county people do not like Kenton county politics, and when they move to Erlanger they refuse to take their citizenship with them. Mr. Hogan is entrusted to the tender care of Courtney Walton, S. C. Gaines and the other members of the Boone county contingent. Be good, "Shon."

A Large Sugar Beet
Mrs. Stella Crawford left at this office one day last week, a specimen of a large sugar beet of her own raising, which is the largest beet we have seen this season. It is 16 inches in diameter, 18 inches long and weighs 14½ pounds. Mrs. Crawford states that this variety of beet is delightful for table use and that she raised quite a quantity of them in her garden this year. The large beet may be seen suspended in one of the windows of The Reformer office—Butler Reformer.

Can be Finished by December 10th
The contractor for the masonry required for the three bridges left out by the fiscal court at its last session told the court that if the weather would permit he could have the abutments for the bridge at Limaburg done by the tenth of December, in which event the new bridge at that point should be opened open to traffic at least by the holidays.

Coming to Kentucky for a Wife
The news has been waited here from away off Florida that it will not be many months before a very enterprising doctor will journey to Kentucky for a bride, the fortunate young lady being one of Erlanger's handsomest and most accomplished ladies, an erst while citizen of this county.

To Vote on an Amendment
Doubtless only a few people are aware that a constitutional amendment is to be voted on next Tuesday. If the amendment is adopted the legislature will be permitted to pass a law by which telephone systems in the State can be consolidated under a single law which will throw around the proceedings.

Buying Horses but not for Meat
C. Scott Chambers, of Walton, passed thru Burlington, Monday, with four or five good looking horses, which he said was for the local meat market, but you know Scott did not mean what he said, as he thinks too much of a horse to sacrifice it on the butcher's block.

Had Good Intentions
They say that John Smith, the negro who stole Ed. Rice's horse to get out of the country on, intended to sell the horse after he reached safety and invest the proceeds of sale in Liberty Bonds and send the bonds back to Mr. Rice.

Will Have a Sale of Livestock
Frank Walton, of the Bellevue neighborhood, has a large sale of livestock advertised in this issue. If you desire to purchase horses or cattle it will be well for you to look over his advertisement.

Qualifying to Hunt
The hunters are taking out license for the season, and the indications are a large number of men and boys are going to qualify. Better post that farm of yours if you want the hunters to keep off.

Turkey Meat Will be Dear
Turkey meat will be worth too much money for the average individual to feast on next Thanksgiving day. Ask Chas. Clure, of Hebron, what turkeys will be worth.

Quite a number of people from town have been attending the fair at Burlington, Monday. Had they all been in town at any one time the crowd would have been equal to that of a court day.

FOOD PLEDGE IMPORTANT FACTOR IN WINNING WAR, SAYS SACKETT

Federal Food Administrator for Kentucky Explains Reasons for Card Campaign Next Week

To the Housekeepers of Kentucky:

DURING the week beginning Sunday, October 28th, a campaign will be conducted in all parts of the United States for signatures for the Food Conservation Pledge prepared by Mr. Herbert C. Hoover, the National Food Administrator.

The campaign will be made during the week in question by the patriotic women who have joined the organization of the Food Conservation Division of the Council of Defense in each county of the State, and the object of this address of the Federal Food Administrator for Kentucky is to explain exactly what will be asked of the housekeeper of the State of Kentucky, why it is asked and what may be accomplished for our country and ourselves.

We wish to say at the outset that the campaign is city wide, state-wide and nationwide. No sectarian or denominational lines are involved. The campaign is endorsed by the clergymen of all the churches of the state, by our leading professional and business men, by all who understand the importance of food conservation as a factor in winning the war.

It is best to state exactly what will be asked by the canvassers of the housekeepers of Kentucky. They will be asked, first, to sign the Pledge Card of the United States Food Administration. What does that card bind the housekeeper to? Here it is, so all may judge for themselves:

To the Food Administrator: I am glad to join you in the service of food conservation for our nation, and I hereby accept membership in the United States Food Administration, pledging myself to carry out the directions and advice of the Food Administrator in my home, insofar as my circumstances permit.

This is the pledge and the entire pledge. There are no dues of membership. Signers will then be asked to hang in the front windows of their homes cards bearing the shield of the United States in colors attesting the fact that they are members of the organization.

What the Pledge Means.

It is wise, we think, to say a few words in regard to the pledge. It means no more and no less than it reads. It will be observed that signers of the pledge are not asked to bind themselves to any particular things. They are not asked at this time to promise to observe meatless days or to abstain from using any particular kind of food. They simply agree to carry out the directions and advice of the Food Administrator "insofar as their circumstances permit." We are aware that conditions differ in different homes; that what is only a sacrifice to one may, under unusual circumstances, be an impossibility to another. Therefore the qualifying clause "insofar as their circumstances permit" appears in the pledge.

This qualifying clause brings the execution of the Food Administrator's advice down to the individual conscience of the housekeeper who signs the pledge. It is not expected that because of this qualification the pledge will be so nothing. It is, in fact, our hope and belief that those who sign this pledge will consider themselves units in a great army of American housekeepers who propose to serve their country and themselves by following as closely as may be possible the directions and advice of the Food Administrator, knowing as we do that those directions will be reasonable.

It seems hardly necessary for us here again to contradict the foolish rumors that have been circulated that it is the plan of the Food Administrator to seize food found in private homes. No such thing was ever contemplated and will not be contemplated. The only purpose of the propaganda purposely designed to defeat the objects of this great conservation movement.

Importance of the Work.

We feel that we can add little to what has already been said by the President, by Mr. Hoover, and by others qualified to speak on such subjects in regard to the importance of food conservation during the coming winter, and yet, as a housekeeper, speaking to housekeepers, I wish to say that we understand the importance of this work and believe that the housekeepers of the state will understand it.

Our country is engaged in a great war. Our sons are going out to give, if necessary, their lives for our country. These brave boys are willing to make, if necessary, the supreme sacrifice, that American ideals may endure, that American homes may be kept safe from the invader. All of us have work to do at this time and the work that may be done in the individual homes of America in avoiding waste and saving food may prove not the least effective move in winning the war.

Kentucky goes into the present winter in some ways well prepared. Employment is general, but prices are very high. The less that is wasted in the average household the less will have to be bought. The prices of foodstuffs are high, and it is in our power to keep the prices of foodstuffs low and to keep the food that can be used for ourselves, for the allied nations and for our men at the fighting front. They know that if the same prodigality in the waste of food continues in America, if the same bounteous hospitality and lavish use is maintained in our own homes, who will not be sufficient to maintain the armies who are fighting our battles on the western front of Europe.

They do know, however, that if there begins at once a concerted movement in all American homes to eliminate all unnecessary waste, a movement to follow the advice of the Food Administrator for the substitution of some foods for others which we are short, that the cumulative effect of that movement, covering throughout the country 23,000,000 American homes, will provide during the coming winter the food that will be necessary for us to export, in order to keep the civilian populations of France and England supplied, the armies upon the battle line and the wonderful army now being prepared by the United States, in their best fighting condition.

It is a real emergency in which they appeal to us, an emergency which can be met in no other way, and they are issuing this call to the women of America to look upon this matter in all seriousness and to be assured that the sacrifices they will make during this coming winter will provide the food which the President of the United States has said is one of the three great elements necessary to winning the war.

No suggestions will be issued that are not felt by those in authority to be extremely necessary, but they do hope that the people of America will respond to these suggestions as patriots determined to do their bit for the cause of civilization throughout the world and the maintenance of democracy.

Federal Food Administrator for Kentucky.

Winchester.—A much needed rain has fallen in Clark county, making a stand of wheat almost a certainty. A large acreage of corn and more attention than ever before was given the seed, seed bed and seedling. The corn crop, while not heavy, is a good one when the season is considered. Most of the crop is in the shock. The corn in the field has yet been made, corn will not be sown bushel than ever before in this county, that is at gathering time.

F. M. Sackett.

What the Pledge Means.

To the Food Administrator: I am glad to join you in the service of food conservation for our nation, and I hereby accept membership in the United States Food Administration, pledging myself to carry out the directions and advice of the Food Administrator in my home, insofar as my circumstances permit.

This is the pledge and the entire pledge. There are no dues of membership. Signers will then be asked to hang in the front windows of their homes cards bearing the shield of the United States in colors attesting the fact that they are members of the organization.

What the Pledge Means.

It is wise, we think, to say a few words in regard to the pledge. It means no more and no less than it reads. It will be observed that signers of the pledge are not asked to bind themselves to any particular things. They are not asked at this time to promise to observe meatless days or to abstain from using any particular kind of food. They simply agree to carry out the directions and advice of the Food Administrator "insofar as their circumstances permit." We are aware that conditions differ in different homes; that what is only a sacrifice to one may, under unusual circumstances, be an impossibility to another. Therefore the qualifying clause "insofar as their circumstances permit" appears in the pledge.

This qualifying clause brings the execution of the Food Administrator's advice down to the individual conscience of the housekeeper who signs the pledge. It is not expected that because of this qualification the pledge will be so nothing. It is, in fact, our hope and belief that those who sign this pledge will consider themselves units in a great army of American housekeepers who propose to serve their country and themselves by following as closely as may be possible the directions and advice of the Food Administrator, knowing as we do that those directions will be reasonable.

Federal Food Administrator for Kentucky.

Whitesboro.—Only a small percent of the fall plowing has been done so far. The mountain sorghum crop has been practically ruined by the recent frost and much of it will not be worked out.

Versailles.—Farmers finished sowing their wheat this week and some have been busy sowing rye. It is said there will be an unusually large acreage of rye, notwithstanding the cost. Most of the corn has been cut, and the tobacco is curing nicely.

Commissioner's Sale.

Boone Circuit Court, Ky.
Willis Florence's Administrator,
plaintiff,
against
Willis Florence's heirs, etc., defendants.

By virtue of a judgment and order of sale rendered by the Boone Circuit Court at its August term, 1917, in the above cause, I shall proceed to offer for sale to the highest bidder, at public sale, on Monday, the 6th day of November, 1917, at 1 o'clock p. m., or thereabouts, being County Court day, upon a credit of six and twelve months, the following property, to-wit:

Lying and being in the county of Boone, State of Kentucky, on the headwaters of Elijah's creek and Gunpowder, bounded thus: Beginning at a stone in the old line of the Garrett tract of land, a corner of an old survey between the then Jordan Anderson and the Jeddiah Foster tracts of land, now Allen Souther's corner; thence with said line north 40 poles to a stone in said line; thence N 3/4 E 40 poles to a stone near a maple tree, in Anderson's line; thence with E 1/4 S 1/4 E 40 poles to the beginning, containing 12 acres.

The interest of the infant defendants, Robert H. Bobbitt, Lyster James, Artemesia Vest, Eulalia Francis Vest, Thomas Rogers and Mary R. Redfield shall not be paid but shall remain a lien upon the land until the said infant defendants arrive at the age of 21 years, or until the guardian or guardians of said defendants shall have executed bond as required by section 408 Civil Code. For the purchase price the purchaser of said real estate, with approved security or securities, must execute bond, bearing 6 per cent interest from the day of sale until paid, and having the force and effect of a Judgment, with a lien retained therein until all the purchase money is paid. Bidders will be prepared to comply with these terms.

The Tobacco Crop.

STATE NEWS.

The Fleming county crop is about 80 to 85 per cent. of an average.

Frosts did not damage the tobacco in Woodford county, as the crop was safely housed and is curing nicely.

Early cut tobacco in Montgomery county cured out rapidly and is in fine condition and some of it shows the prettiest color it is possible to see.

No material damage was done to the Bourbon county crop by the recent white frosts. They caused the farmers to hurry up with their work and practically all of the crop is safely under shelter.

The North Carolina market sales in September showed a gain of 35,000,000 pounds over corresponding month of 1916. High prices offered in all sections of the state are responsible for the increased sales.

Paris.—Every moment of time was utilized resulting in the sowing of a large acreage of wheat and oats, fall plowing earing for the tobacco and dog manure things demanded at this busy season.

Flemingsburg.—Great progress especially has been made in regard to corn cutting and sowing of wheat. Corn cutting has been exceedingly difficult in some parts of the county. The prospects for a large wheat acreage is the prediction for this county. All of the farmers who intended sowing wheat this fall have about finished.

Harrodsburg.—Z. B. Tucker, of this place, served the first horse at a dinner at which he was host at the Rensselaer & Prewitt restaurant. He ordered one steak from all of the horses who intended sowing wheat this fall have about finished.

School Notes.

Jupiter, with his powers, Acolus with his blasts, Vulcan, with his fire and forges, and Aquarius with his floods, tried but in vain to subdue the spirits of the teaching corps in Burlington High School, District during the past week, so that the plans of the Teachers' Association, which was to be held at Burlington on the afternoon of Friday, Oct. 25, might be thwarted. However, the resolute determination of the pedagogues was not to be crushed, nor are they composed of the class which has no backbone, as the teacher would say, no cerebral cells or resolution.

Accordingly the self-willed teachers met at Boone High School against a howl, blow, flurry and rain and performed the program that had been arranged by Prof. Caywood, and assigned, every teacher responding to the subject assigned with a good, well selected or written paper, and he said the whole ground was covered.

First, we had the study period treated from its different phases, and viewed from its every angle. The thoughts suggested the ways in which the teacher can assist the child in the study periods, when the recitation is called for, and becomes a time of information and a source of inspection.

Next, we had the recitation and the subject presented with such knowledge from experience that it was presented full of suggestions and directions that any teacher or patron would have been well paid to have heard the same.

Our next subject was method. It is here that many are at a loss to proceed because of want of method or too much method and no teaching, which ideas characterized the readers paper. The climax was no one method, or even all pupils in the same class, or expediency of methods must be used and selected from to meet the individual case.

Then came management, which was presented as to play-ground, entrance in school, seating in room, recitation, dismissal and control but not tyranny was the main thought. This paper was terse and well planned, pointed and valuable.

Next, discipline, which was introduced and discussed by examples rather than by theory, making the subject specific rather than general so that a teacher could learn just what to do and how to deal with many cases which come under his or her experience.

The last number on the program was a digest of a book which had been read and studied, in which the teacher showed how much can be gotten by reading a book in the proper way rather than to pronounce the words only. This book had been read as Bacon advises, "to weigh and consider."

We observed the entire, gamut had been run: the study, recitation, method, management and discipline. Such meetings are wholesome and valuable to teachers, patrons and public. We are more than encouraged and feel the teachers are on the alert.

The Association will be at Florence on Friday, Nov. 2nd. The spelling contest is to be held at Beech Grove for Eq. Stephens district. Let's have a full attendance and duties will be performed.

I find a fine cooperative spirit through the districts I have visited.
J. C. GORDON,
Superintendent.

Visited His Son in Camp Sheridan
F. F. Robinson, of Richmond, returned a few days since from Camp Sheridan, Illinois, where his son, Earl P. Robinson, is in the officers' training camp, being a member of the 1st Battery, 2nd Regiment, Mr. Robinson has been in the employ of the government for the last six years, being engaged as civil engineer in the River and Harbor Improvement Department, being the 2nd man on the work where he was stationed, having full charge much of the time. It was eight weeks ago that he went to the training camp, where he and four thousand other young men of twenty thousand were accepted. He is well pleased with his treatment at Camp Sheridan and is anxious to go to the front in France. While visiting his son Mr. Robinson took in several points of interest in the United States, among them a Sucker State Marine Camp. He says Uncle Sam is taking good care of the young men who are in his service, and feels proud of his son who has always taken high rank and any collection of men with whom he has been associated, and believes he will serve Uncle Sam with distinction.

Cynthiana—The end of the past week has brought about the farmers to the close of fall plowing and sowing. The weather has been fine for preparation of the land and the sowing of wheat.

Relief From a Sugar Famine

Washington, Oct. 24.—Relief for the sugar famine in the Northeastern States is in sight, the United States Food Administration announced tonight. It has arranged for 200,000,000 pounds of Louisiana sugar to be shipped immediately to New York, Philadelphia and Boston. This amount is expected to prevent a famine and afford a supply sufficient for all necessary purposes.

Louisiana sugar producers, after a two-day conference with John M. Parke, Louisiana Food Administrator; George M. Rolph, of the sugar division of Mr. Hoover's staff; and Earl D. Babst, President of the American Sugar Refining Company, agreed to sell the company named 200,000,000 pounds of sugar for \$13,000,000.

The Food Administration transportation division has obtained pledges of transport for one-half of the sugar sold to the refineries at Boston, Philadelphia and New York. The first cargoes will leave next week. The American Refining Company will rush its processes and get the sugar on the retail market as rapidly as possible.

This plan not only will alleviate the shortage, but will give the Food Administration its first real grip on the retail price of sugar. The refineries will be able to sell the sugar at a steadily reducing figure, starting from 83 cents a pound, Eastern seaboard, and reducing to 73 cents at the end of the year. With the refineries price at 85 cents the wholesaler should not charge higher than 86 cents, it was said tonight. This figure will give the buying public to get sugar at the normal price.

Retail prices of sugar are causing the Food Administration much concern. Prices from the manufacturers are regulated, and wholesale dealers will come under license Nov. 1.

Two methods will be used to make the retailer keep his prices down. Refiners and wholesalers will be instructed not to supply retailers who charge exorbitant prices, and public will be employed in every city to show the buying public what wholesale prices are, thus to guard them against extortion by the retailers.

The Food Administration pointed out tonight that the supply of Louisiana sugar does not mean that the shortage is wiped out. On the other hand, conservation is being urged more insistently than ever. More than that, a campaign is being started to induce people to use corn syrup instead of sugar, whenever possible. Methods to utilize sirup for sugar and to substitute corn starch for flour and corn oil for fats, were discussed today at a conference with many big corn products manufacturers of the Middle West. The big corn crop, it is thought, may offset wheat, sugar and fats shortages.

Can't Come Home to Vote

Replying to inquiries received from political leaders in various towns and cities of Kentucky, Indiana and Southern Illinois, the Division Staff at Camp Zachary Taylor has announced that there will be no furloughs granted to members of the National Army for the purpose of returning to their homes and voting in the November election.

There has been a rumor among the Indiana troops for several weeks to the effect that they would be allowed to go home the first week in November. The announcement of the Division Staff there was a sad blow to their hopes.

The letters received requesting information regarding the granting of furloughs consisted of three classes. One group merely asked the question whether or not the boys would be permitted to return home. Another class was from political leaders who had large numbers of men of their respective parties in camp and who were very anxious to have them return home and perhaps "save the day." Still another class came from leaders of parties who had more opponents than friends among the soldiers and who were extremely desirous that the men be given a furlough in several towns the writers mentioned the fact that their local races would be so close that the presence of the soldiers would throw the election one way or the other.

Col. Laurence Halstead, Division Chief of Staff, when asked if any furloughs would be granted, declared that there was not the remotest chance, unless the War Department issued special orders to that effect. While the subject of leave during the fall elections was being discussed tonight, it was made of leave for Thanksgiving and Christmas. No information has been received as to how the War Department views the matter, but officers deem it very unlikely that a furlough of any kind will be granted as long as the Division is in training.

Every officer who was questioned as to how he felt about the matter of leave was decidedly against any leave granted, not because they do not care to have the men enjoy the pleasure of a few days at home, but because they firmly believe that a few days away from camp would mean a setback of weeks in the training, and consequently a long delay in getting to the front.

Y. M. C. A. Meeting

The people of Kentucky are being aroused to appreciate the work the Y. M. C. A. is doing for the boys in the camps of the country. A mass meeting will be held in the court house on Monday at 1:30 p. m., to let the people of Boone county know what this work is. Good speakers, all come.

To My Friends and Customers.

Owing to the high cost of living I am sorry to say I am compelled to sell for cash, beginning the first day of November, from that day on every article that you buy from me will be strictly CASH.

Under this rule I think that I will be able to sell my goods on less percentage than I did on the credit basis. Give me a call and let me prove this new ruling of my business method to you.

Yours Respectfully,

W. L. KIRKPATRICK.

\$745

F. O. B. DETROIT

There are visions—now and then—in business and industry.

The Maxwell motor car is a wonderful vision that has been made real.

The fixed purpose of the Maxwell builders was in the beginning, and is now, to produce a car which would be, in the highest sense, efficient, durable, economical, comfortable and standard in equipment.

Many years experience in production on a vast scale has taught the Maxwell manufacturers two things.

One is that such a car as they have always made their aim—a car in which efficiency, durability, economy, comfort, beauty and standard equipment are all present cannot be built for less than \$745 with materials at their present prices.

The other lesson is that, for more than \$745, they could not give you anything more than the Maxwell now has—except greater size or luxuries, pure and simple.

In other words they are convinced—and they have convinced us—that they have found the great MIDDLE LINE where you get dollar for dollar in ABSOLUTE VALUE.

Russell Sparkes and wife attended Mr. Ransom's sale at Verona, Saturday.

Samuel Abdon and son, George, visited relatives in Rising Sun and Lawrenceburg, Friday and Saturday.

Married at Waraw, on the 21st instant, Larry Young and Miss Emma Stachel, of South Fork neighborhood.

Mr. Catherine L. Baker and Mrs. Eliza Moore, of Big Bone, visited their parents, Sunday.

J. M. Barker returned from Louisville the first of the week with two boxes full of clothing. He also visited his cousin, Dr. Tom Barker, and reports him better than he was in the summer.

Monday the sun shined, the wind blew, it thundered and the rain descended, a cold wave arriving about dark. Tuesday was a good winter day, the sun

Herbert S. Bigelow, who was kidnapped in Newport last Sunday night and conveyed in an automobile to a lonely spot in the country where he was lodged, wrote this account of the affair for the Cincinnati press. Bigelow's loyalty to this country has been a matter of record.

"On Sunday, afternoon, Oct. 1, I left the Grand Opera House and went to my office at the Odd Fellows' hall, to get a copy of the peace prayer to the newspapers. I went to the Metropolitan Hotel to take supper with my wife and daughter. On my way I boarded a York street car to go to York and Sixth streets, Newport, Ky., where I was to meet a Mr. McLean. On my way I stopped at the office of the Enquirer and left the copy for Charles Dean, reporter who had been waiting for me at the Grand Opera House meeting. My friends with me were Vernon Rose, of Kansas City, and Prof. J. H. Paine, of Louisville, both of whom had spoken with me at the Grand Opera House.

"I arrived at the stop about 15 minutes past 6. A pleasant young man stepped up and addressed me, saying they were afraid I was not coming, and that they had just telephoned after me."

"I asked him his name, which I understood to be Money, and I introduced him to Mr. Rose and Prof. Paine."

"The entrance to the hall was on Sixth street, and I noticed some parties then gathered on the sidewalk. I saw a man who appeared to be the door of the entrance. Seeing the men, I asked Mr. Money if there were prospects of a meeting. He answered in the affirmative. But by that time I was up against some of the men in the crowd, and I was unable to get a willing turned to me and said:

"I said 'Yes' and put out my hand. He took my hand and said: 'We want you to go over to headquarters before the meeting.'"

"Instantly another man seized my hand. They snapped handcuffs on both wrists."

"I said: 'Where are you going to take me?'"

"To headquarters."

"I made no response. I supposed they were Government Secret Service men. I preferred to rely on my own good sense and stand upon the justice of my Government. Resistance would have been likely to involve my friends with me in personal injury and serious consequences. I had already formulated such a thought at the time."

"I was put on the back seat of a large limousine. When I was standing at the curb, my two captors seated themselves on each side of me holding the handcuffs."

"One man got in in the rear and stood in a stooping position, facing the crowd, with a revolver in his hand. The top of the machine was up and the curtains were quickly closed apparently by some one on the outside. There may have been a fourth man in the rear, for, while the machine started and some smooth-tongued, some one tied a padded cloth over my mouth and tied ropes around my feet. After that the bag was slipped over my head. In the rear position I rode with my silent companions over city pavements, across bridges, up and down hills, on country roads and through woods. I had, of course, had no sense of direction and little sense of time. But I could tell that we were riding at a fast rate of speed, and we were on city pavements. The horn was being sounded almost continuously."

"Finally the machine halted. There was a light from the rear which I could see through the bag, and I was deceived by that in supposing that we were near the city lamps. At that time I heard an approaching train. This told me that we were near a railroad, and I concluded that they were waiting to load me on the train. I speculated as to whether I should have to be exposed with the handcuffs on the train. Just before we came to a halt a light shined over me apparently to discover weapons. He took from my overcoat pocket a box of candy which had been given me by my daughter."

"The sound of the train died away. There were whistles and movements. The curtains were pulled back. The men at my side began to take me out of the machine as though they were looking for confederates on the road."

"Instantly my feet were untied, the bag taken off my head and I was helped to the ground. I then still gagged, I could see. It was a bright moonlight night. There was a woman, a man and perhaps, wearing white masks and aprons or skirts of the same material."

"These men appeared to be gathered from a line of automobiles in the rear. This explained the light I had seen through the bag. The machines that had followed remained too far in the rear for me to see them. One who acted as leader held aloft an electric flashlight, though there was no need of lighting it. I had a sense of this, but he insisted on it, telling me that the company was to ascend the hill. It was rather steep but short."

schoolhouse. I was led around the farther side of the building out to the rear. Before alighting, from the machine my hands had been tightly fastened together. When they were released, my hands were disjoined. Other line cords were tied to each handcuff, and two men drew my arms by them, rope around my neck.

"Then the leader said: 'Off with his clothes,' and my arms were released sufficiently to enable me to take off my overcoat, coat and vest," he supplemented.

Then a man with what appeared to be a blacksnake whip, which I had seen coming up the hill, stepped forward and ordered me to strike. He awaited the words of the leader, who said: "In the name of the women and children of Belgium and France, lay off."

"I was struck probably six or eight times, the man hauling off and swinging as if with all his might. When he stopped to rest or for further command, he was ordered to continue. I can not tell certain whether the same man or another continued whipping. How many more times was I struck, I am not sure, but as many perhaps, 10 or 12 in all.

"After this, while standing almost motionless, I saw the locks of hair off the top and front of my head. Then something out of a large bottle was poured over my head and sopped over my hair. The liquid was crude oil, which it turned out to be.

"Permit the man to dress," the leader then commanded.

The men began waving the men away. The most of them disappeared around the schoolhouse, and I could hear the noise of starting machines.

"Before the leader said: 'You are to remain there 10 minutes after we are gone.' By this time I was stood up with my feet on the ground.

"The leader further said to me: 'You are to be out of Cincinnati in 36 hours and remain away until the end of the war.'"

"I was urged also to guarantee me. One pointed a revolver at me and ordered me to sit down on the cover of the cistern. Then he took me, pointing the gun at me:

"'You have been tried in the balance and found wanting.'"

"He said: 'O'ha, ha, ha!'"

"He said: 'That is known by the company you keep. When we strike we strike at the top.'"

"After more of this sort he announced that he would go home too, were gone, I must stay there 10 minutes.

I asked him in what direction was home and how far away it was. He said: "The direction in which we had come and," said I, was quite a distance.

"I asked him if I could walk home and he said: 'No.'"

"He told me that I should inquire my way to a certain farm house, the first house on the right."

After he left I began to speculate on why they put oil on my head. The only theory that seemed reasonable was that it was intended to make me invisible.

"I concluded that other might be waiting at that house to do a deed which the big crowd couldn't be trusted to witness, so I decided to go back there to make sure that the wrong man would not be assassinated.

"So I decided to go in the other direction."

"I had walked about two hours when first one machine and then another came up in my rear. I eluded both of them; once I stepped into a field of corn. The second machine followed me, climbing over a bridge and dropping down on a railroad track.

"I knew I was walking in the direction of Erlanger, as I indicated by the road sign. It was buggy, it occurred to me that the pursuing machines were hostile they would probably learn from the couple that I had picked up the woman to danger."

When I reached the Lexington pike I turned on out, coming to Florence, better known as Struggle Pike. Saw what was evidently the temple of "Catholics" church and determined to go to the house of the priest. While looking for this house I saw what I thought was a Good Samaritan and I knocked and the door of a Good Samaritan was opened to me.

"I had never seen Dr. Grant before, but he seemed strange to me—but the doctor said his wife could not have done more for me had they been life long friends. The most difficult part of Dr. Grant's work was to get laborious shampoo to get the oil out of my hair. I reached Dr. Grant's house about 1:30 a. m., and he taught me that not to betray my liberators."

At the telephone that night, The doctor and I sat up the rest of the night and saw the sun-up.

When they departed for breakfast with the doctor and his wife and little daughter. Then I telephoned to my family and found that they were safe. Klein at my house, searching for me. The box of candy which the men had taken from me and later returned I gave to Dr. Grant's little daughter, whom they detested. I insisted that my daughter, or whom the box was intended, would be satisfied this time with what her father did."

W. L. Kirkpatrick has just received a barrel of new Sorghum molasses which he is selling very reasonable. Read his ad in this issue.

John A. Finch will have a big

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Roy D. Stamler sold the Royal moving picture show and airmode to F. C. Gee of Covington, who took care last week.

W. Lee Gaines and son Alan, and C. Scott Chambers have been buying a number of horses for the army at prices ranging from \$100 to \$150.

Mrs. R. F. DeMolisey who underwent a surgical operation in a Cincinnati hospital is improving and expects to be able to return home next week.

Joe C. Hughes spent last week at Hume, Illinois, the guest of his brother Geo. W. Hughes, and attending the marriage of the latter's daughter Miss Mary to Frank Page of Hume, Illinois.

Mr. Ora Riley and little daughter are visiting relatives near Crittenden, and since going there the little girl Alma has become ill with typhoid fever and it will be some time before she can recover.

Dr. D. M. Stamper of Carlisle, was here last week and bought the Ed. Hopperton farm near Crittenden, containing 72 acres, and will move to the place in the spring, and practice his profession of veterinary surgeon.

Dr. W. E. Flister, veterinary surgeon, formerly of Bellevue, Campbell county, has located here for the practice of his profession and has his office in the Johnson Hotel in the Kipp building, and is already having a nice patronage.

J. Waldo Cross of Union, was here Monday going to Elliston where he bought a span of five year old mules from the D. R. Wallace farm there and will bring them through to his farm near Union, wanting them for work purposes.

Mrs. Anna Stapleton spent part of the week in Cincinnati and bought a farm of 55 acres within two miles of that city for \$2,500 and will get possession in the spring time. The place is known as the Geo. W. Dollar farm, and is well improved.

Walton Lodge, No. 719, F. and A. M., will have work in the Master's degree Friday night, Nov. 16th, when the stereoscopic lecture will be delivered by Geo. W. Jno. L. Vesel, and a lunch will be served. All members are cordially invited to attend.

Elmer Roberts who is a carpenter's mate on the super-dreadnaught Wyoming of the U. S. Navy, spent the past week here with his parents Mr. and Mrs. Geo. S. Roberts, being given a thorough English education and is ocean twice since he enlisted, and is well pleased with his service in the Navy.

Last Friday H. E. Hutchinson who is employed on the Winston Brown farm near Brant, was nearly bitten in the left arm by a young jack that he was handling in the stable. Dr. G. C. Rankins was called and gave the necessary attention. Hutchinson is getting better but his arm is in a serious condition.

Roy McCubbin who is a member of the 4th U. S. Infantry, stationed at Fort Bliss, Texas, sends his greetings and best wishes to his Boone-co. friends and proudly boasts of his regiment having been selected for 50,000 of Liberty Bonds to show their patriotic feelings. Roy has also made a fine record at target shooting, exceeding most of the crack records.

V. P. Kerns of Carlisle, Nicholas county, has sold the D. E. Dudley farm recently purchased by him, to his brother Albert Kerns of Carlisle, who will move to the place in the spring. V. P. Kerns purchased the J. R. Conrad farm near Verona last Friday and speaks of buying additional property in Walton. Geo. R. Forders made the sales through his real estate agency.

The Walton branch of the Red Cross meets every Wednesday afternoon at the home of Mrs. G. C. Rankins, and every Friday afternoon at the school hall. A great many sweaters, wristlets, shirts and surgical dressings have been finished and sent to headquarters. The need for more work is great and every woman in Walton is asked to be present at either of those meetings.

The Red Cross is greatly in need of knitted articles, and hospital supplies and just now a very urgent call comes for knitting flannel night shirts; these can be taken home and made; so please call and get one and the directions for making and do your bit to help the poor fellows in the trenches.

The tobacco market is becoming quite active and high prices are being offered and with few exceptions the farmers are selling as they realize that the loose leaf market is the medium of sale that is best for the tobacco growers. Quite a lot of tobacco has been sold at twenty cents and John C. Bedinger sold the crop raised by Geo. Friend on his farm near Richwood at 30 cents per pound all around, and the crop contains all around, and ten thousand pounds, Noah Blasecock & Co. being the purchasers. The market is going to be very high on the loose leaf as the big manufacturers will all have buyers on the market, and the supply is reported short to a degree that will stimulate prices to an astonishing degree.

The bond issue voted on in the town of Walton Tuesday, carried by a large majority. The ticket in Florence known as the electric light ticket was renewed under badly.

Burlington and Bellevue farmers will be in the market tomorrow afternoon.

Y. M. C. A. WAR COUNCIL

Big Meeting Held at the Court House Monday—Boone County to Raise \$25,000.

A good sized crowd assembled at the court house last Monday to hear the speeches in the interest of the Y. M. C. A. war council. John C. Bedinger, of Walton, acted as chairman, and B. H. Riley, of Burlington, secretary.

Invocation by Rev. David Blyth. Speeches were made by Prof. Fogg, J. B. Heiser and Rev. J. W. Hagin, of Covington; a Mr. Youtsey, of Newport, and Mr. Camden, State Secretary of the Y. M. C. A. work and others.

The speakers were given excellent attention and much interest was manifested in the proposed work. The following officers were appointed for this county:

Dr. E. W. Duncan, Chairman. J. C. Bedinger, Vice-Chairman. B. C. Gaines, Secretary.

President chairman were appointed as follows:

Verona—W. E. Waller, Bellevue—Al Rogers, Beaver—John DeLachaux, Petersburg—O. S. Watts, Bullittsville—Dr. Nunnelly, Walton—Chas. Rensler, Florence—Winfield Myers, Constantine—A. F. Miller, Big Bone—R. L. Huey, Rabbit Hash—Geo. Ward, Union—J. A. Huey, Burlington—R. L. Huey.

The above is preliminary to assist in the national drive to be made November 11 to 1918 inclusive for the raising of \$35,000,000 to carry on until July 1, 1919 the war work of the Y. M. C. A. among the American soldiers and sailors at home and overseas, and among the 14,000,000 troops of the French, Italians and Russians.

The amount Boone county is expected to raise as her part of the \$35,000,000 is \$2,500 and is apportioned among the several voting precincts as follows:

Rabbit Hash	\$150
Bellevue	270
Burlington	270
Petersburg	250
Bullittsville	225
Constantine	120
Florence	220
Union	270
Walton	320
Verona	200
Hamilton	10
Beaver	225

The dates for speakings will be fixed later when the assignment of speakers will be published.

Red Cross Notes.

The Burlington unit worked in gauze last Friday night. From now on they will meet each Tuesday and Friday night for that purpose.

Messadmes Chas. Goodridge and B. C. Gaines attended the Red Cross meeting at the Sinton, last Wednesday.

Material was purchased last Saturday for the cotton flannel hospital garments now needed. The cut articles may be secured this week. The knitted articles will be Saturday. Another box will be sent later.

The County Board met at Florence last Thursday. In the absence of the chairman, Mr. Riley Mrs. B. C. Gaines presided. Headquarters open all day Wednesday and Thursday of each week.

Farms for Sale.

No. 1—Farm of 100 acres, near Union, Boone county, Ky., well improved, plenty of tobacco land. Will sell at a low price and on reasonable terms. A splendid farm, slightly rolling and no water land. No better value offered in Boone county.

No. 2—Farm of 73 acres, between Union and Beaver Lick, Boone county, Kentucky; 2 good houses and barns, orchard, etc., plenty of hill and ridge land; well located on pike. A fine good chance to get your money's worth.

These are samples—we have others. Get our prices and you will look at them and wonder how and buy a home. Now is the time to pay for one. Call on or write.

DR. M. J. CROUCH, Union, Kentucky.

No matter how active the brain is when a fellow is angry it can't keep up with his mouth.

America has no world policy except its desire to see the world safely democratic.

Public Sale.

I will offer for sale at my residence on Gunpowder creek, and half mile from Hathaway, Boone county, Ky.,

Saturday, November 10, 1917

the following property:

Brood and work mare. Work Horse. Culling two year old mare. 3 Milk Cows, 2 Heifers. Hayrack, Mowing Machine. Road Wagon, Box Bed.

5 tons Hay in Barn, Corn in field. Hay Fork, Rope and Pullies. 30 gallon Iron Kettle. Wire Fence Stretchers. Haul Frame, two-horse Sled. 280 Tobacco Sticks and other articles too numerous to mention.

If my farm is not rented by the day of sale it will be offered for rent that day.

Terms—Sums of \$4.00 and under, cash; on sums over \$5.00 a credit of six months will be given, purchaser to give note with approved security, payable in the Citizens Deposit Bank of Ky.

No property to be removed from the premises until the terms of sale are complied with.

Sale to commence at 1 p. m. SARAH E. WHITE.

Public Sale

I will sell at public sale at my residence three miles north of Bullittsville, Boone county, Ky., on

Saturday, November 10, 1917

the following property:

5 good work horses. About 300 bushels of oats. 1 stack of hay. Lot of harness. 3 buggies, 1 spring wagon. Lot farm implements. 3 iron Kettles, 1 hog box. Stoves, wash tubs and kitchen furniture and other articles too numerous to mention.

Terms—Sums of \$10.00 and under, cash; on sums over \$10.00 a credit of nine months without interest will be given, purchaser to give note with good security, payable at the Farmers Bank, Petersburg, Ky.

No property removed until the terms of sale are complied with. Sale to begin at 12 o'clock noon. HENRY T. SNYDER.

Notice to Contractors

Sealed proposals addressed to the Fiscal Court of Boone County, will be received up to 11 o'clock p. m., Friday, November 9, 1917, when they will be publicly opened and read, for the building of three bridges in Boone County.

The work as described and shown in the plans and specifications to be seen at County Road Engineer's Office.

Estimated quantities—Linburg Bridge, over Road A-1, Bullittsville and Florence, 60'-0".

Superstructure—32,000 lbs. Structural Steel. 3,800 lbs. Reinforcing Steel. 161 cu. yds. Concrete.

First Covered Bridge, Road 8-B-1, Burlington and Petersburg, 50'-0". Standard Steel Bridge with wood floor.

Superstructure—28,000 lbs. Structural Steel. 4,240 ft. B. M. Lumber.

Second Covered Bridge, Road 8-B-1, Burlington and Petersburg, 50'-0". Standard Steel Bridge with wood floor.

Superstructure—32,000 lbs. Structural Steel. 5,250 ft. B. M. Lumber.

Bids must be for work to be done in accordance with the plans and specifications approved by the Fiscal Court and the Commissioner of public roads, on file at the County Clerk's Office in Burlington, Ky.

The Fiscal Court of Boone County expressly reserves the right to reject all bids.

Before the contracts are binding on first parties, they must receive the approval of the Commissioner of Public Roads.

Each bid must be accompanied by cash or a certified check payable at sight to the order of the County Treasurer for one per cent of the amount of the proposal, which check shall be held until the execution of the contract.

Before the contract is awarded, the successful bidder or bidders will be required to furnish a bond equal to the amount of the proposal for the faithful performance of the work in accordance with aforesaid plans and specifications.

All work to be done under the direction and supervision of the Commissioner of Public Roads.

By order of the Fiscal Court of Boone County.

J. R. ROGERS, County Clerk of Boone County

C. L. GRIFFITH, Walton, Ky.

For Sale.

Six cows and pigs. WARREN LARRING, Union, Ky.

Take the Recorder. Take your County Paper.

A Week's News

The moon changed yesterday.

Small crowd in town last Monday.

The freezes last week caught many apples on the trees.

This part of the country has had one month of winter weather.

Remember Frank M. Walton's sale will begin at one o'clock p. m.

Not many leaves burnt on the streets here this fall as generally are.

There has been frost enough to take the pucker out of persimmons.

No Indian summer yet. Some say it is bound to come before winter comes to stay.

What do you know about the facts regarding the war after reading everything in the paper today?

Dr. Yelton made a swing around last Saturday and bought several crops of tobacco, paying fancy prices therefor.

R. B. Huey and W. Lee Cropper each delivered a good mule to Renaker & McClanahan, Walton buyers, last Saturday.

Edgar Hensley, of Locust Grove neighborhood, shipped five nice hogs to market, last Friday, on W. L. Kirkpatrick's truck.

Dr. Yelton is having a new shingle roof put on the building in which he will receive his large purchase of tobacco.

The Odd-Fellows and R. Eberens will give a chicken soup at Bellevue next Saturday night for the benefit of the Red Cross.

H. W. Carver, of Sparta, sold a purchase of 50,000 pounds of tobacco to P. Higgins, of Louisville, at 20c cents per pound.

There is a very ugly hole in the pike a short distance north of Florence. A culvert evidently excavated in near the edge of the road.

Bud Hammond of the Limsburg neighborhood, who was operated on for appendicitis several days ago has about recovered from the trouble.

Burlington was not given its annual Halloween shake-up this year, but some of the neighboring towns did not escape these festivities.

Edgar Berkshire has had several elder making parties this fall. It was made on the halves, Mr. Berkshire having more apples than he could handle.

Many wild geese and wild ducks have been seen in this locality the past week. They are waiting their way to southern waters to spend the winter.

Mr. Billie, who has the contract for reconstructing the Lexington pike in this county is out of rock too often to make the headway he desires.

Jasper Beemon from across Gunpowder creek called in last Saturday to have his land posted, in an effort to forestall the depredations of hunters.

R. S. Cowen says he has corn that is yielding 65 bushels to the acre, and there is very little soft or damaged corn in it as a result of it being down badly.

Deputy Sheriff L. A. Conner made a business trip to the Split Rock neighborhood last Friday. By the way he was considerably under the weather all last week.

Last Friday was a fine day for bass fishing according to the piscatorial adepts that has been handed out by Jas. Mitchell, David Williamson and Edgar Berkshire, who are conceded to be Boone county's best authority on that class of sport.

It takes three cents to carry a letter now and two cents to send a post card on its way, except in case of dropped letters, and under this head come all letters that are sent to the Recorder over the Rural routes that come into Burlington.

The road around the missing bridge at Limsburg was repaired last week, putting the crossing at that point in pretty good condition again. If the bridge is not put in there this winter it will require considerable attention to keep the crossing in proper shape.

Judge Tomlin and Judge Strother, of Walton, were in Burlington, Thursday attending a special session of the county court in which exceptions to the settlement of Judge Strother as administrator of Mrs. Mary W. Moore were being heard. Mrs. Moore's will was probated in 1914.

The Senior Class went on a "mass hunt" Thursday night on a "Magnificent" Hayes. They roamed the woods, and at last came to a large fire where the hostess served lunch, and marshmallows were toasted over the fire. Miss Gray one of the High School teachers acted as chaperon. The seniors all had a delightful time. —Owen News-Herald.

Ballots Arrived Late

The poll books for the county were not received until last Thursday afternoon and it kept county clerk Rogers hustling to get them to the polling places by Monday night.

Received Several Horses Here

Robert Grant, of the Petersburg neighborhood, was in town last Friday and delivered to R. D. Hedges several horses and a mule for S. C. Hicks, of Union, for which Hicks paid long prices.

One-Sided in This County

It will not require the official count of the vote cast Tuesday to satisfy the people of this county that those nominated at the August primary election are duly elected and entitled to the offices for which they were nominated.

May Have to Use Wood

Some of the people in the country who have been using coal for fuel are buying sawdust and axes with which to get wood for use this winter and it may be that before the snow flies Burlington will be buying fuel from them.

Should Make Full Pantries

The abundant apple crop should make full pantries as there are so many ways in which the fruit can be prepared for use in the winter, canned, preserved, jellied and so forth and soon until you are sick of hearing of apples to be handled.

Going a Little Slow

"Pepper" Smith, of Bellevue, who is generally a live wire in the tobacco trade, has made a very small purchase to date. He does not see where the big profit is coming in it to come in following the high prices for which tobacco is selling.

Telephone Out of Business

The telephones in the county and circuit clerk's offices at the court house are not in use any more. The justices of the peace and the incumbent of these offices could not agree as to the terms upon which the telephones should be retained.

Has Not Caught His Usual Number

David Williamson has caught between 20 and 30 bass this year. He would not average quite a pound. He uses a spinner with which he is very successful when the water is in the proper condition. He says his catching is falling which interferes with his sport at the creek.

Few Lists Collected

The number of tax lists collected up to the first of this month was a few short of the number the sheriff had collected up to the corresponding period last year. A very large amount of tax lists have been collected up to date, but by the time the penalty goes on only a few hundred dollars will be outstanding.

Went to See a Specialist

Charles Rue, of the Bellevue neighborhood, was taken to the city, last Saturday, to consult a specialist in regard to some trouble from which he has been suffering intensely at times for several weeks. He was accompanied by his neighbor "Pep" Smith and Dr. Yelton. He is one of the drafted men who passed a good examination.

Lafayette Keaton Dead

Lafayette Keaton, aged 59, died Monday morning at his home on Walnut street. He had been crippled in one leg nearly three years, and had not been able to do any work in that time. The body was taken for burial Wednesday afternoon to Bullittsburg, Boone county, where a brief service was conducted by Rev. O. W. Bowman. —Lawrenceburg Press.

Passed 95th Mile Stone

Arthur P. Marshall, of Aurora, a native of this county, passed his 95th birthday the last day of October. Mr. Marshall has been confined to his bed for nearly two years, but is in good spirits and the giving up the battle of life is about the last thing he intends to do. His father, John Marshall, and one or two of his brothers lived to a great old age.

Had a Good Sale

The sale of R. A. Brady last Saturday at his former home down on Middle creek, was attended by something like 200 people, and good prices prevailed. It was a delightful occasion and all were in the best of spirits and were willing to pay a good price for anything wanted. An unbroken young mare brought \$150; a heifer to be fresh in 3 months, \$75; an aged cow to be fresh soon, \$80; corn to be put in there, \$175 a bushel. Very few farm implements were sold. Mr. Butler, who bought the farm, having bought them. O. W. Sanford was the auctioneer and did excellent work.

Don't Want You on Their Lands

By reference to the list of farmers who are posting their lands it will be seen that quite a number do not want hunters on their lands. It is probable the party who posts his lands states that he does not care anything for the rabbits that would be killed, but most of the hunters are utterly careless in what shooting and often wound their stock, and if this does not happen their stock is so badly frightened by the frequent firing that they will break out of the pastures and leave the premises. If you want to hunt it is advisable to obtain permission of the land owner before entering his fields.

Personal Mention

Dudley Blyth and wife entertained friends from Petersburg last Sunday.

Miss Gwendolyn Goodridge entertained several Erlanger friends last Sunday.

R. E. Kelly and family visited relatives in Waterloo neighborhood, last Sunday.

Miss Eva Akin, of Plattsburg neighborhood, is the guest of Mrs. Newton Sullivan, Jr.

Chas. Goodridge and wife were Sunday guests of friends in Bullittsburg neighborhood.

Mrs. G. L. Alford, of Bondville, this State, is the guest of her aunt, Mrs. W. L. Riddell.

Richard Marshall of Bark Works, Indiana, attended R. A. Brady's sale last Saturday afternoon.

Edward Rogers, of Bellevue, went to Danville to witness a big game of foot ball last Saturday.

Mrs. J. G. Furnish and Tim Westbay, of Covington, attended the Brady sale last Saturday afternoon.

Mrs. P. H. Shearer, of Erlanger, and Mrs. H. W. Shearer, of Newport, were guests of Mr. and Mrs. F. A. Hall, Monday.

Mrs. Martin and wife, of the Pleasant Valley neighborhood were guests of her parents, Mr. and Mrs. C. C. Roberts, Sunday.

Richard Stephens, of the Rabbit Hash neighborhood, came up Saturday to visit his wife and son, and remained over until Monday.

Attorney O. M. Rogers, of Erlanger, passed through Burlington on high speed, Sunday afternoon, headed towards Bellevue.

Misses Kathryn Brown and Margaret Hughes, who are attending commercial school in Cincinnati, were at home last Saturday and Sunday.

James H. Stephens, of Grange Hall neighborhood, was the guest of his son, Elijah, out on the Florence pike last Saturday and Sunday.

W. H. and Mrs. Weber, of Devon neighborhood, passed thru Burlington last Saturday afternoon in their big six cylinder Buick touring car.

Mrs. Sallie Hallam and Miss Alice Revell, of Washington, D. C., are the guests of Mrs. M. C. Revell. They are sisters of the late J. C. Revell.

Howard Kirkpatrick and sister, Mrs. Newton Sullivan, Jr., spent Sunday at the home of Mr. and Mrs. B. F. Akin and family in Plattsburg neighborhood.

W. A. Gaines went to Lexington, Monday, to attend a meeting of the directors of the Henry Clay Insurance Company, he being a member of the board.

Thomas Rouse, of Mt. Healthy, Ohio, who never fails to be on hand at his old home on election day, came home Tuesday. He just can't help being a Kentuckian.

Miss Laura Frances Riddell came home from Dayton, O., last Saturday afternoon and remained until Sunday afternoon. She is delighted with the study of shorthand.

Wallace Rice, Assistant National Bank Examiner, was at home from Saturday night until Monday morning with his parents, Mr. and Mrs. Edward Rice. He had been in Cleveland and Toledo, Ohio, since the 15th of October. He is pleased with his work but does not like to be away from home such long periods. He went to Mayville, Ky., Monday.

WILL YOU HELP?

For the past five years Mr. C. B. Martin and a few faithful friends have been trying to establish a workshop for the adult blind in Louisville, Ky. They have succeeded in giving comfort and happiness to several of these unfortunate, and by so doing have demonstrated beyond a doubt the humanness and the practicability of this noble work.

Ohio, Indiana, Illinois, Maryland, Pennsylvania, Massachusetts, Wisconsin and many western states have provided very liberally for this work through state and municipal appropriations and contributions and bequests by individuals.

Shall Kentucky let her 1500 blind adults remain in darkness and loneliness, eking out a miserable existence on poor farm or begging on the street corner?

The good people of Kentucky have always been very quick and willing to respond to worthy enterprises, but very few think of the blind. What could be more noble or render greater good than helping work of this kind?

Close your eyes for a moment and think "What would I do if I were blind?"

What is to become of our soldiers if they meet the fate so many in Europe have met, a fate many say is worse than death?

Will you help with donations, bequests, political influence or in any way that you can to establish and maintain this workshop and school in the U. S. for Kentucky's adult blind?

For further information address Susan B. Martin, Supt., C. B. Martin, Kentucky School for the Blind, Louisville, Ky.

Refused 25c a Pound

James H. Stephens, of Hathaway neighborhood, was in town last Sunday in Burlington, last Saturday. His son Hiram, who raised a fine crop of tobacco on his land has refused 25c a pound for it. Mr. Stephens says there is not a finer crop in the county.

The fine weather started the habit of building street crossings again.

In spite of the fact that all other table delicacies have gone out of sight in price indications are that Thanksgiving will be just as Thankful in Scott county, as far as the national bird is concerned this year as in former times. According to Fleming's poultry house, which handles most of the turkey crop of this section, the crop promises to be about the average. The price this year will run a little higher than in former seasons but not in proportion to the advance in other meats. About 21 cents will be paid

wholesale by Flemings, who kill each year about 70,000 pounds. A possible reason why turkeys haven't advanced is that they feed on cheap food and not on wheat. The retail price, however, will be considerably in advance of the wholesale price named above.—Georgetown Times.

Lieut. Lon Williams, the well-known ex-Confederate soldier of Bufile, was going through his old uniform last week, that he wore during the late unpleasantness,

and to his surprise he found an old Confederate check for \$500, that had never been cashed. It was dated March 1, 1863, and drawn in favor of L. L. Youell, A. of M. D., and signed by James G. Tarter, Treasurer of the Confederacy. Mr. Williams does not know how the check came to be in the pocket of his blouse. It is a rare old relic and in good state of preservation, and looks as though it had never been handled in all these fifty-two years.—Falmouth Outlook.

BOONE CO. RECORDER

W. L. RIDDELL, Publisher.

State News.

Augusta.—The weather the past week was not favorable to the farmer. The ground was too wet for sowing seed and a good deal of corn is to be cut. Some farmers have just finished threshing their wheat.

Princeton.—T. S. Downey and Miss Zuline Boynton were married at the home of the bride's parents, Mr. and Mrs. George W. Boynton, Mr. Downey, a lawyer of Parkin, Ark., met his bride six years ago and until today had not seen her since.

Franklin.—More real estate sales were made in Simpson county during October than ever before in its history, with the exception of September. The total sales amount to more than \$150,000. October sales include the McCutchen tract which is to be subdivided and sold.

Morefield.—Corn is all cut and the yield will be fairly good. Late cutting of tobacco has cured very badly. About one-fourth of the crop will be in that condition. Speculators are trying to buy but cannot engage much. Some few have sold at from 15 to 25 cents per pound.

Versailles.—The farmers have finished sowing wheat and rice and cutting corn, and some have been busy husking corn. Some farmers have begun stripping tobacco this week. Farmers are fattening their hogs and are planning to sell them as early as they can owing to the high price of corn.

Padenueh.—Lawrence Harris, 31 years old, a farmer of McCracken county, was ground to pieces in a threshing machine. He was caught in the machine, he was carried out through, being cut to pieces. Harris is survived by his wife and two children.

Carlisle, Ky.—There continues to be active buying of tobacco by speculators in Nicholas county and prices offered are the highest ever known here. Thos. Waugh, of this county, reports that he has sold his large crop to Thomas Asbury at an average of \$28 per hundred pounds for all grades. Others as high as \$30 per hundred have been made for some of the best crops.

Stirling.—Two children, twins, were burned to death in Madison county. The fire broke out when the residence of Peter Taber was destroyed. An older child was rescued. Mrs. Taber had gone to a store and left the children at home when it started. The youngsters turned on the gas, causing an explosion. The residence was in flames when rescued and the child in the children ran under the bed from fright and could not be reached. The parents are prostrated.

Stirling.—Farmers are hating the corn crop which is improving and enriching the soil and in that way the crop put into hogs will bring a higher price than if sold from the field. Fodder is not good, the frost having caused much damage to the blades. There is considerable activity shown in the sowing of small grain and this late much wheat is being sown and a large acreage is yet to be sown.

Williamstown.—Mrs. Mary Ryan and her brother, Charles Marquis, charged with the killing of Marion Ryan on Sunday, October 21, were given a preliminary hearing before County Judge W. P. Simmons. Both parties were held over to the grand jury and bond fixed in each case at \$3,000. They were remanded to the jail in default of execution of bail. Mrs. Ryan and Marquis testified in their own behalf. Self defense was relied upon by both. Defendants stated that Ryan had attacked them with a knife.

Winchester.—The farmers of Clark county were never in more prosperous condition. Everything to sell is high, corn will sell at \$5 to \$6 in the field and fodder will most likely start at 40 to 60 cents per stack. The corn is right around the \$100 mark and logs are bringing the asking price. There is a fair demand for the most favorable of the season was for several years. Meadows were good, oats fair and a fine crop of apples. Butter and eggs, the rise of 10 cents, nothing to buy but a few clothes.

Mayville.—A negro known as Black Jack, is in jail here pending an investigation by the coroner as to who is responsible for the death of John Crosby, a farmer, who was poisoned at his home near here. Crosby became ill immediately after eating his breakfast and died in a few hours. His death was caused by having been poisoned by Paris green. E. Thomas, who was also poisoned, but will recover. Black Jack has made his home with the Crosby family many years, having been taken out of the county infirmary when a small boy.

Extension of Conscription.

If labor strikes continue in these crucial times it may be found necessary to widen the conscription laws to include laboring men and the conscription of all plants that supply the necessities of life. If coal miners who insist on letting the country freeze and starve because of their refusal to work for less than a year ago, or lack of fuel because of a crisis that has given them an opportunity to demand an increase in wages, the government may, in self defense, conscript them for work the same as the young men are being conscripted for the army. If the coal mine owners and the meat packers and the manufacturers to whom the country must look for the necessities of life are determined to line their pockets out of the country's misfortune, let the Government step in and see that they don't. And it is not at all unlikely that this is just what is coming. The President has been clothed with unlimited power and it is not at all probable that he will refrain from using this power to prevent any more hardship and suffering to the people than is absolutely necessary during the war. If recent published statements are to be relied on, many of the striking miners under the present wage schedule can earn more money in a day now than they could in a week a year ago. And at the present prices of coal there are many thousands of people who will have to go without fire and heat because they will be unable to scrape enough money together to buy both food and fuel. It is beginning to be apparent that Government control of many industries will be an absolute necessity until the war is over.—Palmyra Mo., Spectator.

There will be a Pretty Girl Contest, Box Social, and Parcel Post sale at Union school house on Saturday night. Two-thirds of the proceeds will go to the Junior Red Cross and one-third to the school. Everybody is cordially invited.

Washington, Nov. 1.—Cutting of automobile production to an extent which will vitally affect the industry is to follow conferences on here next week. The War Industries Board and manufacturers of automobiles and parts. The idea is to conserve alloy, steel, copper and other war necessities. The curtailment of automobile manufacture is expected to be effected by the conversion of various machines to the making of various munitions. Plans were agreed upon. It is said, will be makers of automobile and parts, as well as sales organizations that the curtailment will make the necessary change with the least possible hardship.

Curtailing Auto Manufacturing.

Washington, Nov. 1.—Cutting of automobile production to an extent which will vitally affect the industry is to follow conferences on here next week. The War Industries Board and manufacturers of automobiles and parts. The idea is to conserve alloy, steel, copper and other war necessities. The curtailment of automobile manufacture is expected to be effected by the conversion of various machines to the making of various munitions. Plans were agreed upon. It is said, will be makers of automobile and parts, as well as sales organizations that the curtailment will make the necessary change with the least possible hardship.

Shortage of Sound Horses

Every Farm Mare Should Be Bred to Good Stallion—Motive Power Always in Good Demand.

Breed every sound mare to a good stallion. There is a decided shortage of good horses and the demands will be very heavy in the months to come. It takes five years to breed and bring a horse to the general market. We will always need more horses than any other form of motive power for farm use.

DAILY DAIRY

DAILY DAIRY

CAN DEPEND ON DAIRY COWS

Preservation of Milk is as Essential as Production—Keep Out All Disease Germs.

PREVENT SPREAD OF DISEASE

Important That Hog Cholera and Swine Plague Be Recognized in Very Incipient Stages.

It is very necessary that we recognize hog cholera and swine plague in the very early stages in order to prevent them from spreading. In some outbreaks the symptoms are not typical and we cannot diagnose the disease by the symptoms alone. In such cases we should destroy a sick hog and make a careful post-mortem examination.

If the disease proves to be hog cholera or swine plague, it is practical under the conditions, the herd should be divided into small bunches. The sick animals should be separated from the well ones and all possible precautions taken against the spread of the disease.

Do not move the hogs to different parts of the farm, nor scatter the disease over the farm. If the yards and hog houses are in such a condition that they cannot be properly cleaned and disinfected, we should move the herd to some convenient place and build temporary quarters.

When the weather is warm the only protection needed is shade. In cold weather it is necessary to provide

Contented Money Makers.

quarters warm enough to prevent the hogs from piling up and catching cold. Portable hog houses are very useful for this purpose.

The yards, feeding floors, troughs and hoghouses must be kept clean. All litter must be removed daily, and the frequent spraying of the hogs, feeding floors and sleeping quarters with a water solution (2 per cent or more) of a tar disinfectant is a necessary part of the care.

WATER FOR HOGS IN SUMMER

Muddy and Filthy Wallows-Holes Are Often Means of Spreading Contagious Diseases.

Hogs should have access to plenty of water during the hot summer months, but the muddy and filthy wallows that are common over the country are often the means of spreading contagious diseases, especially cholera.

Farmers are encouraged to construct wooden or concrete wallows for their pigs, and to keep them in reasonably clean condition. A boarded-up wallow is very satisfactory, but a better way is to dig a shallow hole, big enough for the pigs to lie in, and to use concrete for the sides and bottom, plastering right onto the earth. It is a good plan, also, to put in a drain so that the water may be readily changed.

In addition to making the hogs more comfortable these wallows can be used as a means of ridding them of lice and fleas. To do this, cover the surface of the water with about half an inch of crude oil. When the pigs go into the water they will become covered with the oil and the vermin will be killed.

BOT FLIES CAUSE ANNOYANCE

Parasites Attach Themselves to Lining of Stomach and Absorb Food Intended for Animal.

Bot flies are about the worst annoyance to a horse in summer and early fall. They buzz around his legs and throat and deposit small yellow eggs on the end of the hairs. Later these eggs enter the horse's mouth, hatch in the stomach and develop bots, which attach themselves to the lining of the stomach and there remain until late fall or spring. They absorb some of the food that should nourish the horse and undoubtedly cause considerable annoyance.

Every few days during early fall clip off the hairs that carry these yellow eggs. The number of eggs that reach the horse's stomach and hatch there will be reduced correspondingly.

COMPLETE RATION FOR COWS

Animal Weighing Approximately 1,000 Pounds Should Be Given Wide Variety of Feeds.

A complete ration for a cow weighing approximately 1,000 pounds may be made by feeding one pound of grain mixture for every three or four pounds of milk produced in addition to: (1) 30 pounds of corn silage and 10 pounds of hay (clover or alfalfa preferred), or (2) 30 pounds roots and 15 pounds of hay, or (3) 10 pounds of best alfalfa soaked 12 to 24 hours prior to feeding and 10 pounds of hay, or (4) 20 pounds of hay with 1 to 2 pounds of oilmeal added to her grain.

RAISE BEST HEIFER CALVES

Good Cows Are Becoming Scarce and High in Price—Young Animals Will Replace Them.

It pays to raise the heifer calves from cows of high producing ability as good cows are becoming scarce and high in price. These heifers can then replace any cows that may not be paying well and the cows when sold will bring a good price and add to the farm income.

Dibowski's Cafe
—THAT—
Neat Little Place
For Farmer, Workman, Merchant, Clerk and Professional Man.
Commercial Luncheon from 11 a. m. to 1:30 p. m. Supper 5 to 7 p. m.

Rubber Producing Plants.

Of all rubber producing plants, only guayule grows wild within our borders. In the Big Bend territory in Texas a large district, only second in size to the Chihuahuan field in Mexico, is available. Why not extend this field over the arid lands of New Mexico, Arizona and Nevada? Waste land would be utilized, and a valuable product secured. Guayule is not new to the American rubber man, unfortunately it is almost ancient history to him. It is safe to say that there are scattered over this country at least fifty desinating plants, intended primarily for the treatment of this rubber. At one time they furnished about one-fifth of the entire rubber used in this country. The total production of the Mexican guayule fields was about 10,000 tons of the washed and dried, not dehydrated, rubber a year, from 1905 to 1910. In 1911 it began to fall off, and the recorded production for 1912 is 3,500 tons. About 80 per cent of this production was exported to the United States. Since 1912 guayule has been comparatively neglected. Metallurgical and Chemical Engineering.

Floating Islands.

Many floating islands have at various periods been found voyaging on the Atlantic. These islands were originally part of the lowlying river banks, which broke away under stress of storm or flood and floated out to sea. The Orinoco, the Amazon, La Plata and other tropical rivers often send forth such pieces of their shores. Some of the bits of land are of large size and carry animals, insects and vegetation, at times including trees, the roots of which serve to hold the land intact, while their branches and leaves serve as sails for the wind. Generally the waves break up these islands shortly after they put to sea, but sometimes, under favorable conditions, they travel long distances.

Physics and Agriculture.

One reason why the farmer so often looks upon the representatives of scientific agriculture as impractical may be found in the neglect of the study of physics as applied to living matter. Our studies of physics have generally been confined to mechanical action in the soil, and the physical functions of the plants. The processes of growth from physical soil conditions have been neglected. A study of the physics of the living as well as the dead matter can do much toward bringing light to many of the farmer's most perplexing problems, and make for every-day co-operation between practical and scientific farming.—Los Angeles Times.

Beeswax Used for Lighting.

Beeswax and tallow were used for lighting purposes by the Romans. Lengths of cotton or flax fiber were dipped in these substances, and they usually burned with much smoke and not a little light. The rush-lights of the middle ages, and even of recent times, were rushes that had been stripped nearly to the dry pith and dipped in wax or tallow. When "candle power" was adopted as the unit of light measures by the London gas act of 1860, it was taken to mean the amount of light which would be given by a sperm candle, six of which would weigh a pound, and which consumed 120 grains of the candle each hour.

Late Marriages.

Arguing for early and against late in life marriages, W. M. Gallahan said in London the other day that "the best age for a man to begin the life of wedlock is twenty-five and for a woman twenty," adding: "My best I mean morally, mentally and physically. There is a higher chance of happiness and constancy in marriage when the partners marry young. They are mutually adaptable, and, if they are sensible, they are willing to modify their habits, and to grow, to a certain extent, as one mind."

Use of Mechanical Milkers.

The time saved by the use of the mechanical milker increases with the increase in the size of the herd. Thus with herds of 15 cows or less the average time required to milk a cow by hand is a fraction over seven minutes; by machine a fraction under five minutes. With herds of more than 50 cows it takes slightly under seven minutes to milk a cow by hand and but 4:15 by machine.

British Roads Deteriorate.

In consequence of the depletion of labor and increased traffic in the munition areas of England, road reconstruction is becoming very pronounced and there will be work for thousands of returned soldiers after the war before the surfaces will be returned to their former state.

Navy's First Flag.

The first American flag for the United States navy was flung to the breeze by John Paul Jones, the first American naval officer to engage a foreign foe. This flag had but 12 stars on it, and it flew at the topmast of the good ship Ranger.

Hardly Necessary.

Harold, four, came down late for breakfast and found a very simple breakfast laid out. He took his seat, thought for a moment, then turning to his mother, said: "Mamma, I guess I won't thank God for this little bit of food."

PROPORTION OF MALE FOWLS

One Rooster to Fifteen Hens is About Right When Larger Breeds, Such as Plymouth Rock.

Birds of the general-purpose class, such as the Plymouth Rocks, Wyandottes, Rhode Island Reds, Orpingtons, etc., usually require one male to 15 females, depending upon the vigor of the male. Among birds of lighter

Barred Plymouth Rock Cockerel.

breeds, such as Leghorns, Anconas, Campines, Hamburgs, etc., one male is sufficient for a flock of 20 females. About ten days should be allowed for the fertilization of the flock by the male. However, in small flocks, such as four or five females, only four or five days is needed.

GOOD MEDICINE FOR FOWLS

On Account of High Price of Permanent Potash Substitute Is Sought by Poultry Men.

(Storrs Experiment Station.) Many poultry men have been using permanganate of potash to prevent the spread of cold and other catarrhal diseases. During the past two years this product has risen in price from 50 cents to \$2.50 to \$3 per pound; thus it is not surprising that a good substitute is being looked for.

One authority suggests the use of bluestone, or copper sulphate, which can be used as follows: Dissolve four ounces of the bluestone in a quart of water, this to be known as a stock solution. Add one ounce of this solution to each gallon of the drinking water. This can perhaps be well used for a short period, but should not be too long continued.

Furthermore, one ought to use enamelled or earthenware vessels, as the copper sulphate solution may produce undesirable chemical changes when used in galvanized pans.

GUINEA FOWL IS PROFITABLE

Large Farms Now Being Established Where Guinea Fowls Are Being Raised for Meat Purposes.

Raising guinea fowls in Kansas is profitable, according to N. L. Harris, superintendent of the Kansas State Agricultural college poultry farm.

"Large fowls are now being established where guinea fowls are raised for meat purposes," said Mr. Harris. "The guinea fowls are small and consequently are of little value commercially. They are noisy and good fighters and are not subject to the attacks of hawks."

"There is a good market for guinea fowls. The meat of the young guinea resembles that of prairie chickens and wild ducks. The clubs and stylish cafes use the guinea as a substitute for ducks, prairie chickens, quail, and other game which the laws make it impossible for them to secure."

IMPORTANT EGGS BE TURNED

Comparatively Small Hens Have Trouble in Turning Goose Eggs—Crippled Goslings Result.

Sometimes it is necessary to set goose eggs under comparatively small hens, that have not the strength to turn the large eggs. In setting eggs under a hen, mark them on one side, so that you can tell whether or not the hen is turning them.

If she does not turn the eggs, the goslings will be crippled, unless the eggs are turned by hand.

Hatching Duck Eggs.

In hatching duck eggs in an incubator give them more ventilation and moisture, less cooling and a lower temperature the first week than hen's eggs. The heat must never get above 103 degrees.

Run for Little Chicks.

Give the little chicks a run outdoors on the ground every day when the weather is suitable.

Benefits of Whitewash.

Whitewash your poultry house. It improves appearance and acts as a disinfectant.

HATCH EGGS IN INCUBATOR

Doubtful Whether They Would Do Well in Brooders, Therefore It Is Not Often Tried.

Goose eggs can be successfully hatched in incubators, but it is not a common practice, because it is doubtful whether they would do well raised in brooders.

Either geese or hens are commonly used for hatching and rearing purposes. If the eggs are hatched by hens or incubators, it would be advisable to add moisture to the eggs during the first week by sprinkling the eggs or nests with warm water. From four to six eggs are usually placed under a hen, and from ten to thirteen eggs under a goose.

If hatched by hens, the hen should be kept confined, and goslings not allowed to go into the water, especially if the water is cold. To be assured of success in raising goslings, they should not be hatched until the grass pasture is fairly good, as grass is their chief diet.

In addition to that they should be fed any of the mash recommended for chickens or goslings. Special care should be taken in seeing that all of the "feet" is cleaned up at each meal, as leftover food is very often a source of disease.

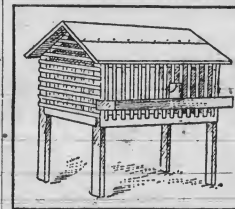

BREAKING UP BROODY FOWLS

Hens Have No Right to Sit and Do Nothing Else While Country Faces Food Shortage.

Eliminate the expense of broody hens. Even the fowls have no right to sit and do nothing at a time when the country is facing so great a food shortage, according to H. M. Sherwood, acting head of the poultry department in the Kansas Agricultural college.

"The average hen lays four to five eggs a week, worth 12 to 15 cents at the present price of eggs," said Mr. Sherwood. "Hens should be 'broken up' as soon as they become broody. It is possible to not let them set over night, for a day saved in shutting them up may save two days of their laying period."

"Broody hens should be placed in airy coops with slat bottoms and kept up off the ground. Too frequently an ordinary box or tub is turned over

Coop for Broody Hens.

them, and as a result they are almost as content to sit on the ground as they were on the nest.

"It is a mistake to starve a broody hen. She should be well fed at this time, so that she will be ready to lay when turned out. Avoid fattening the hen while breaking her up. Give a limited amount of grains and a liberal supply of milk and table scraps. Care should be taken to turn the hens out as soon as they are broken up."

WAYS FOR AIRING INCUBATOR

Best Hatches Are Often the Result of Cooling, Especially During Warm Summer Weather.

One may air the eggs in an incubator in two ways. One method is to air some every day at the night turning, or in the morning, should the temperature be found a trifle high, and the other way is to turn the eggs slowly to inhale fresh air and to confine the real cooling to one or two periods when eggs have been incubated 15 and 17 days and to cool them down until the shells are actually cold. The best hatches are often the result of such cooling, especially in warm weather.

SUPERIOR MASH FOR LAYERS

Good Results Obtained at Maine Station by Feeding Mixtures—Three of Them Outlined.

The Maine station fed the following mash to laying hens with good results:

Wheat bran two parts by weight, cornmeal one, middlings one, gluten meal or dried brewer's grain one, linseed meal one, beef scrap one. The ration might be reduced to wheat bran, shorts, cottonseed meal and beef scrap. Or a fairly good mash can be made of two parts wheat bran, one part cornmeal, one part beef scrap.

Make Study of Fowls.

Select your variety and learn the type that belongs to it, including the correct size and markings. There is a great difference in individual disposition of hens that there is in all other animals.

Water and Grit.

Clear water and grit ought always to be within the reach of poultry.

The shortest and surest way to live with honor in the world, is to be in reality what we would appear to be; all human virtues increase and strengthen themselves by practice and experience of them.—Socrates.

SPRING SALADS.

By carefully covering dandelion plants with boards they will be white, tender and especially delicious for the first green things of spring.

Add to them a little shredded green onion and a French dressing, well seasoned just before serving.

Vegetable Harlequin.—Cook a half peck of spinach in the water that clings to the leaves after washing, when tender drain, if there is any liquor save it as this is valuable in iron salts. Chop the spinach fine and season with salt, pepper and butter. Then three or four small beets, cut in dice and heated in a saucepan, with a little butter; season well and add a pint of peas, heated and seasoned in the same way. Arrange the spinach around a platter, inside the ring place the beets and in the middle the peas, keeping the line as straight as possible between the colors. Sprinkle the whole with finely minced parsley and send hot to the table.

Spinach Salad.—Wash and cook a half peck of spinach, if you are tender it will cook in its own juices and the water that clings to the leaves. Heat it very gradually and watch it to prevent burning. When tender, drain and chop it with six hard-cooked eggs. Add a cupful of toasted, buttered crumbs and a half cupful of minced cooked ham. Pick in small molds and chill on ice. Serve with olives and any desired salad dressing.

Radish Salad.—Slice as many radishes as are needed, lay them in overlapping slices around a bed of lettuce. Place on the lettuce a mixture of green, scallions, minced with salad dressing that are at hand.

Cucumber Jelly Salad.—Peel and cut two cucumbers in slices, add one slice of onion, a half teaspoonful of salt and a dash of pepper. Simmer until the cucumbers are tender in a pint of water, cold at first. Add a tablespoonful of gelatin, soften in jelly. Line a mold with fresh slices of cucumber, cut very thin and pour in the jelly slowly. Set in the ice chest to chill. Turn out on lettuce and serve with French dressing. Garnish with red peppers.

Nellie Maxwell
THE KITCHEN CABINET

How many homes one goes into that have perfectly useless, homely things in conspicuous places? What a gain for repose and beauty, to say nothing of space, if these objects could be eliminated.

How many homes one goes into that have perfectly useless, homely things in conspicuous places? What a gain for repose and beauty, to say nothing of space, if these objects could be eliminated.

GOOD THINGS FOR THE TABLE.

To serve a variety of food and keep within the limits of one's allowance is the aim of all just housewives. If at one meal too much is used it may be balanced by a simpler less expensive food at the next, thus keeping the daily or weekly expenditure well balanced.

Baked Kidney Beans.—Soak three cupfuls of kidney beans over night; in the morning parboil with four large onions. Put into the bean pot with a pint of stewed tomatoes, a third of a teaspoonful of pepper, a tablespoonful of oil of sugar and salt and a half pound of salt pork. Bury the beans in the pork and add just enough water to cover the beans. Bake about five hours in a moderate oven. If the onions are not liked, they may be omitted and a teaspoonful of mustard added to the sugar and salt to season. For those who do not care for the salt pork use a cupful or less of olive oil, baking them as above.

Club Salad.—Take one and a half cupfuls of chicken (cold roasted), 12 slices of cooked bacon, three tomatoes and lettuce. Arrange the lettuce on individual plates, place on this a slice of peeled tomato, a slice of a hard-boiled egg, a slice of diced bacon, and a spoonful of mayonnaise dressing; top with some of the chicken, more mayonnaise and a sprig of parsley. Around each, spoke-fashion, place four or six tiny toast points for a garnish.

Oatmeal Bread.—Pour a pint of boiling water over a cupful of rolled oats and set aside until the mixture is lukewarm; add a half cupful of molasses, a half yeast cake, dissolved in a little lukewarm water, and a cupful and a half of bread flour. When this is light, add a teaspoonful of salt and enough flour to make a dough stiff enough to handle. Let it rise until double its bulk, cut down and turn into greased tins. Let rise again and bake three-quarters of an hour. This makes two loaves.

Another Thousand Island Dressing.—Take a cupful of thick mayonnaise, six tablespoonfuls of chili sauce, two chopped red peppers, half a tablespoonful of chopped chives. Use on pea and washten salad.

Resching Garage and Residence.

YOUR PATRONAGE RESPECTFULLY SOLICITED.

Chicago, October 24.—That nature and cleanliness still are the greatest healers and that the world is yet to discover the perfect germicide are assertions made before the eighth annual session of the Clinical Congress of Surgeons in session here today.

Sir Birkley Moynihan, of Leeds, England, member of the British army medical staff, and Major Geo. W. Crile, of Cleveland, both of whom have worked along the front in France, declared in addressing the surgeons that the increasing method of treating the most serious gunshot wounds did away with both antiseptic solutions and drainage and that perfect healings were obtained in 10 days.

These upsets of theories and inventions all of which were ascribed to the lessons the war has taught, were not accepted without protest Major Edward Martin, of Philadelphia, defended the germicide solutions and declared he believed neither surgeons nor patients would sleep well if a pure washing and seeing light of the wound were the only methods employed.

Nicholasville. The weather is fine for stripping tobacco and the work is being rapidly pushed. The seed is good, and a fair price is offered. There is a fine stand of both wheat and rye, which are getting a good start, before cold weather. Corn churning has begun in earnest, but is not fast to this huge is being cribbed.

Local Happenings.

Coal bins have not suffered the past week.

Miss Mary A. Thompson is visiting at John Early's in Petersburg.

J. E. Markberry, of Hamilton, has a lot of nice maple trees for sale.

A very heavy fog hung over this part of the country Wednesday morning.

Those sticking to their knitting the closest in Burlington are the Red Cross ladies.

William Huey, of Bellevue, shipped a truck load of nice red hogs to market last Tuesday.

The wind has been coming from the northwest for several days and the weather has been delightful.

Burlington reflected the outburst of the crickets Tuesday, and Jerry Fowler was voted for for Town Marshal.

Road Engineer Goodridge is advertising for teams to haul stone. If you are out for a job call him or come to see him.

According to the Recorder's calendar, which is very reliable, there will be more days of bad weather this month than of good.

A very light vote was polled Tuesday. There being no contest for the offices the voters of the county took no interest in the matter.

The local Red Cross people received two very large boxes of material one day the past week for the work in which they are engaged.

Rev. Steers, of Dry Ridge, Grant county, was in Burlington, Tuesday. He is working this part of the county in the interest of his life insurance business.

Samuel Adams and wife have returned from Florida. Mr. Adams was seen in Lexington last Monday. It did not take them long to get enough of the South.

Burlington Lodge K. of P. will go to Petersburg Ky. next Saturday night. Workmen working at the lodge in converting the rank of Knight.

Lloyd Weaver is assisting his father-in-law, Assessor W. P. Beemon, with his official work, and is assessing the Burlington precinct.

Lost—Sunday between A. W. Gaines and Erlanger a small suitcase containing baby clothes. Finder will please return to Mrs. Elijah Stephens, near Burlington.

The ladies of Verona Red Cross will give a supper at the graded school building next Saturday night. All are invited to attend and help along in the good work.

Please do not ask the Recorder to publish poetry. It had to quit that about twenty-five years ago, owing to floods of both original and selected poems that were rushed in upon it.

You can not knock the weather this part of the country. It has enjoyed the past week. Already are some predicting this will be a nice month, and all hope the prediction will prove to be correct.

O. S. Crisler, of Lexington; Dr. F. L. Peddicord, and Ed. Hawes, of Lakeland and B. E. Hume, of Covington, claiming their residence here were on hand early Tuesday morning to exercise their right of suffrage.

The venerable Henry Parsons, of Cincinnati, has the sympathy of many friends in this county because of the death of his wife who departed this life the 32d inst. Obituary in another column.

Persons sending to the county clerk for hunting license should not forget to send a stamped envelope along for their return. The clerk gets only 15 cents for issuing the license and cannot afford to pay the return postage.

From the best information at hand Circuit Clerk Maure's pen in the egg-laying contest at Lexington, has made a very creditable showing. In the value of eggs his hens are considerable ahead of some that produced more eggs.

Hear that the Government is going to draw on Mr. Fuller, who is reconstructing the Covington and Lexington pike in this county, for some of the freight cars which are hauling the stone he is using from High Bridge, in which event another delay in his work will result.

The weather the past week has been exactly what the farmers wanted to take the sap out of the corn and cure tobacco so it can be stripped and prepared for delivery and they certainly appreciated the fine weather after having had such rough sailing during the month of October.

When you read about the Americans being killed and captured by the Germans it begins to seem home to the American people the fact that their country is at war. These reports will be of frequent occurrence from now until peace is declared, and one has any idea when that will

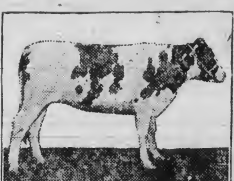

DAIRY

MILK BREEDS ARE COMPARED

Average Percentage of Fat in Guernsey Milk is 5.16 and That of Holstein is 3.42.

The average per cent of solids in Guernsey milk is 12.71 and in Holstein milk 11.85. The average percentage of fat in Guernsey milk is 5.16 and in Holstein milk 3.42. The percentage of solids taken from the milk when separated approximates four-fifths of the amount of fat removed. This being

A Very Promising Heifer.

ing the case, the average sample of Guernsey skim milk will contain about 10.5 per cent solids and the average sample of Holstein skim milk will contain a little over 9 per cent solids. The solid matter in a sample of skim milk from either of these breeds will be divided as follows: Sugar, 50 per cent; proteins, 35 per cent; ash, 13.75 per cent, and fat, 1.25 per cent.

SUMMER DISEASE OF CATTLE

"Pinkeye" Is Especially Troublesome During Hot Weather—Sometimes Results in Blindness.

"Pinkeye" of cattle is a common disease, especially during summer months and sometimes results in total blindness. It is undoubtedly infectious, and is believed to spread from one animal to another through the medium of flies. The disease runs its course in ten days or two weeks, affecting one or both eyes.

A profuse flowing of tears is the first evidence of the attack. The animal keeps the eye constantly closed. For it is very sensitive to light. Gradually a film seems to form over the eye and the ball becomes clouded.

Care at this time is very necessary and may save the animal from blindness. Confinement in a comfortable stall with all light excluded is the best. laxative food will put the animal in good condition to ward off complications. If flies are allowed to irritate the sore eyes they will probably spread the infection to other animals.

Bathing the eyes in a strong solution of boracic acid is a treatment easily applied and generally effective. A better method is to place a few drops of the following mixture in the eyes with a dropper: One-half grain of zinc sulphate, ten grains of boracic acid and one ounce of distilled water.

PRACTICE OF SKIMMING MILK

To Secure Best Results It Is Best to Skim Milk and Churn Cream, Says Clemson.

Experience has shown that in general practice the churning of whole milk results in butter of a poorer fat in the buttermilk than if cream is churned, says Clemson Agricultural College of South Carolina. It is therefore best to skim the milk and churn the cream. The best way to skim the milk is by means of a separator. A farmer who has only two or three cows, but no separator, may put the milk into deep, narrow cans (shotgun cans) and set them in cold water, and when the cream rises it can be removed with a shallow spoon. Where this system is used it usually takes about 12 to 18 hours for all the cream to rise. Care should be taken to keep the milk cold. In order to make the cream rise rapidly. The old method of setting the milk in shallow pans should not be used, as the cream does not rise so completely as when set in deep cans in cold water; furthermore, the quality of the cream is not so good and there are more vessels to wash and care for.

DESTROYING ODORS AND EGGS

Fresh Air and Sunshine Is Death to Both—Place Utensils Where Sun Will Strike Them.

Fresh air and sunshine being death both to odors and to "bugs," there is a close relationship between clean milk and smelling of milk utensils. Do not stopper the cans when setting them out to sun. Let the air work in and out. Choose a place to set them where the sun shines upon them most directly. Turn them bottom side up to keep dust out of them more easily—and possibly ruin. Nature will then do her share toward setting the milk can from taint. She will naturally destroy the number of bacteria hiding within.

To My Friends and Customers.

Owing to the high cost of living I am sorry to say I am compelled to sell for cash, beginning the first day of November, from that day on every article that you buy from me will be strictly CASH.

Under this rule I think that I will be able to sell my goods on less percentage than I did on the credit basis. Give me a call and let me prove this new ruling of my business method to you.

Yours Respectfully,

W. L. KIRKPATRICK.

Fuel Value of Wood.

Persons who plan to relieve the coal shortage this winter by burning wood can figure, roughly speaking, that two pounds of seasoned wood have a fuel value equal to one pound of coal, according to experts of the Forest Service. While different kinds of wood have different fuel values, the foresters say that in general the greater the dry weight of a non-resinous wood, the more heat it will give out when burned.

For such species as Hickory, oak, beech, birch, hard maple, ash, locust, longleaf pine or cherry, which have comparatively high fuel values, one cord weighing about 4,000 pounds, is required to equal one ton of coal.

The available heat value of a cord of wood depends also on the amount of moisture present. When the wood is green part of the heat which it is capable of yielding is taken up in evaporating the water. The greater amount of water in the wood the more heat is lost.

Then There's Garters.

What is jewelry? The answer seems to be simple. But the Government, with an eye for the intricacies of classification, has made it complicated. Thus in preparing a list of the articles to pay a war tax under this head, it includes, among various other things worn on the person, suspenders and garters. The common idea of jewelry is that it is an adornment, something worn to be seen. If suspenders—other wise known as braces or galluses—are to be considered ornamental, there can be no object in concealing them. But it is not always practicable to appear with out coat and waistcoat. Shall the hitherto purely useful article be no longer hid? And garters, too—how shall these be visible? The problem for the man is more difficult. Suspenders worn about the neck or fastened around the waist might add a touch of beauty to the too somber male attire, especially if they were with embroidery richly dyed. Perhaps too more exclusive patterns in the language of hosiery might, might have jeweled buckles; it is whispered that garters have been seen lately distinguished. But to make suspenders as elegant as useful is another matter—Philadelphia Ledger.

\$745

F. O. B. DETROIT

Straight and sure—like an arrow that flies from the bow and imbeds itself in the bull's-eye.

So have the Maxwell builders fixed a price for their product—\$745—which makes it possible for them to say:

"Below this figure there must be something lacking which we have put into the Maxwell—efficiency, durability, economy, comfort, beauty or standard equipment."

And above this figure we could give you no greater practical utility—only larger size or richer and fancier furnishings."

This is the scientific fact—proved and demonstrated by one of the giants of the motor car industry in years of production on an immense scale.

And we stand firm on this finding of the Maxwell builders.

We believe the Maxwell to be the BEST MOTOR CAR INVESTMENT possible today.

An Electric Pistol.

An inventor has turned out an electric pistol built along original lines. It does not use gunpowder or cartridges, but is so constructed that its contents, gases, are expelled by a touch of the button and a projectile is expelled. The pistol consists of a brass cylinder at one end of which is a small battery and coil. The gases are introduced from the outside or from a small pump attached to the pistol frame, controlled by the Electrical Experimenter. Although the use of electricity in this case is merely an experiment, it is evident that it can be used to produce exactly the same powder, explosion in a confined space and the swift movement of a missile. Mankind began with the stone and a stone to deliver blows. The pistol is only a small but speedier weapon than a hand-thrown stone, wounding to a greater distance than is possible with a spear or arrow.

Red Cross Dogs.

The "Boxer" breed of dogs is the result of a cross between the German mastiff and the English bulldog. It is this breed of dog, according to military observers, that has proved to be the king of the Red Cross dogs in the European war. These Red Cross dogs, in whom character and training are said to outweigh pedigree almost without exception, are first taught to distinguish between the uniform of the soldiers of their country and that of the enemy. Then they must learn that their principal business in life is finding and aiding wounded soldiers. By a very special kind of training Red Cross dogs are taught to seek rather than to trail wounded soldiers and to bring back news of finding injured men. This the dogs must learn to do without barking, for the enemy is always on the alert and ready to shoot.

Graphite as a Lubricant.

Graphite, says the Scientific American, is not a lubricant, but an aid to keeping a bearing in good working order by filling up the minute irregularities of the shaft and bearing, and producing a beautiful, polished surface, and in this way reduces friction. To get this result only a very small quantity of graphite is necessary, and if too much is applied it simply collects in yards and defeats the purpose intended. It follows that the proper way to use graphite successfully is to mix thoroughly a small quantity with the lubricating oil at suitable intervals, and not to apply it continuously, for when the above mentioned polished surface is formed it will last quite a long time before requiring renewal.

Four Ways of Making Candles.

Candles are made and have been made for centuries by four distinct processes called "dipping," "pouring," "drawing" and "molding." Few candles of commerce are now made of pure beeswax or tallow, but usually by mixing stearine, a trade name for a mixture of varying animal and vegetable fats; paraffin wax, obtained from petroleum; spermaceti, obtained from the sperm whale; beeswax and mineral wax, obtained from ozocerite. Palm oil and coconut oil are also extensively used in the candlemaking trade.

Getting Something Out of Life.

You are not getting half as much out of life as you have a right to unless you seek to discover the principle involved in your every experience and in every bit of knowledge that you acquire. The acquisition of wealth or power, the garnering of facts, the sensing of joy, sorrow and other emotions mean nothing in themselves. The reason for all experience is the development of the sensibilities in order to broaden the consciousness of the unity of life.

Would Take Any Color.

The family with guests were assembled at the evening meal. The father carved the roast chicken, and as he turned to each person he inquired whether dark or white meat was desired. When little John's turn came he looked gravely up into his father's face and gravely replied: "Oh, it doesn't matter so much what I take, just give me a little of all the other colors that aren't wanted."

What He Was Doing.

After a busy day, Howard was finally tucked away in bed, and his mother retired to the living room for a few minutes of well-earned rest. It wasn't long until there was a commotion and a third which told plainly that Howard had fallen out of bed. On inquiry of his mother what he was doing out of bed, the reply came back: "Dittin' back in."

New Opera Glass.

A reversed opera glass, which reduces instead of magnifying, has been invented, so that persons in the front seats of moving picture theaters may see the pictures on the screen in their true proportions.

To Mark Light Switches.

So that electric light pull switches can be found in dark rooms there has been invented a glass pendant filled with a substance absorbing light in the daytime and becoming luminous at night.

Not the Same

"I can't quite follow the man," said Uncle Eben, "who sells his 'safer' first class, and then up with every fellow for second."

WAR TALKS

By UNCLE DAN

Number Two

Jimmie Collins Tells What He Saw—What Military Training Does for Boys.

"Well, here we are!" exclaimed Bill, presenting his chin, Jimmie Collins.

"I'm glad to see you, Mr. Collins,"

"Aw," said Billie, "Just call him Jimmie. That's the only name he knows. He's the pitcher of our baseball nine, and he's some pitcher, too. Just feel of his arm."

"Well," said Uncle Dan, feeling, "That's a mighty good arm!"

"Now, boys," said Uncle Dan, "what do you want to talk about?"

"Well," said Jimmie, "I was down to Galesburg a few months ago when the boys came home from the Mexican border. They looked fine. Everybody was surprised to see how straight they stood and how manly they were. The boys seemed proud to wear the uniform. I tell you their muscles were as hard as nails. I heard Banker Hockett say that the training and discipline the boys had had was exactly what every boy in the country ought to have, and that now these boys could get a better job at higher pay than they could have had before. Do you think that's so, Uncle Dan?"

Uncle Dan replied: "I have a friend who knows hundreds of young men. He always gives boys having had military training the preference; he says it pays to do so. He finds they are more alert, more prompt, more courteous; they know how to carry out orders; they are quicker to think and to act than those without training. He said from his experience he believed that six or eight months of intensive military training would add at least 20 per cent to a man's

efficiency."

"That's a mighty good arm!"

"Now, boys," said Uncle Dan, "what do you want to talk about?"

"Well," said Jimmie, "I was down to Galesburg a few months ago when the boys came home from the Mexican border. They looked fine. Everybody was surprised to see how straight they stood and how manly they were. The boys seemed proud to wear the uniform. I tell you their muscles were as hard as nails. "Well," said Jimmie, "I was down to Galesburg a few months ago when the boys came home from the Mexican border. They looked fine. Everybody was surprised to see how straight they stood and how manly they were. The boys seemed proud to wear the uniform. I tell you their muscles were as hard as nails. I heard Banker Hockett say that the training and discipline the boys had had was exactly what every boy in the country ought to have, and that now these boys could get a better job at higher pay than they could have had before. Do you think that's so, Uncle Dan?"

Uncle Dan replied: "I have a friend who knows hundreds of young men. He always gives boys having had military training the preference; he says it pays to do so. He finds they are more alert, more prompt, more courteous; they know how to carry out orders; they are quicker to think and to act than those without training. He said from his experience he believed that six or eight months of intensive military training would add at least 20 per cent to a man's

efficiency."

"That's a mighty good arm!"

"Now, boys," said Uncle Dan, "what do you want to talk about?"

DAIRY FACTS

KEEP MILK COOL AND CLEAN

Warm Weather is Trying on Dairymen, but More Especially on Women—Keep Vessels Clean.

The season is rapidly approaching when greater care must be taken of milk. Warm weather is trying on the dairymen, but more especially on the farmer's wife, who must care for the milk from a few cows. Preparations should therefore be made to keep the milk cool and clean.

The facilities for keeping milk on the average farm are very inadequate. Not enough cool space is available for the average farm woman, hence she has difficulties in saving the milk and opening the cream evenly.

In the first place, the milk vessels are important. They should be of the right kind, with no seams in the pans, pails, etc., to harbor germs. There should be plenty of vessels and they should be kept scrupulously clean, aired, steamed and sunned occasionally.

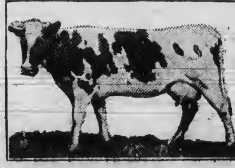

A refrigerator is almost a necessity on the farm these days. There are many perishable foods as well as milk to be kept. The cost of a refrigerator is not great when the utility and economy of keeping foods are considered.

DAIRY COWS RELISH SILAGE

Result Given of an Experiment Conducted at University of Wisconsin—Decrease in Yield.

In an experiment conducted by the Pennsylvania station, according to a report received by the department of agriculture, two lots of five cows each were fed for three periods of four weeks. Lot 1 received silage alone for roughage during period 1 and 3 and mixed hay and silage during period 2, and lot 2 received hay and silage during periods 1 and 3 and silage during period 2.

The milk yield decreased with both systems of roughage, but the decrease was less with silage and hay. When silage and hay for roughage followed silage alone there was a slight increase in milk yield over the initial production. Except in one instance there was a decrease each period. When

High Producing Type.

the cows received hay they consumed practically the same amount of silage as when no hay was included in the ration. Both lots consumed an excess of protein and net energy above that necessary for maintenance and milk production when based on Eckles' standard. There were no apparent undesirable physical effects from the feeding of silage alone for roughage with the grains used. There was very little difference in the cost of the two rations or in the feed cost of milk and milk fat. No perceptible difference was observed in the health of the two lots.

MILK FEVER IS BOTHERSOME

Danger Among Cows Appears Greatest in Late Summer—Keep Animal in Barn and Feed Hay.

Milk fever is a rather serious trouble with good cows, as it is said that none but well-bred, heavy-producing cows have it. It seems to be more prevalent among grass-fed cows.

The danger of milk fever among cows seems to be greatest in late summer or early fall, notably June, July, August and September. The recommendation is to put the cow in the barn and feed dry hay about a week before she comes fresh. Three or four days before calving the cow is given a dose of one with a little ginger. Another dose is also given five or six hours after the calf is born. A bucket of warm water should be given the cow two or three times a day. She should not be allowed to have cold water for some time.

FEED ROUGHAGE TO DRY COWS

Profitable, However, to Feed Sufficient Grain to Have Them in Good Physical Condition.

Dry cows can be maintained on hay and silage or roots. It is profitable, however, to feed cows a sufficient amount of grain during the dry period to have them in good physical condition at calving time.

Cows should be dry for six to eight weeks prior to calving. It does not pay to have them dry for a longer period.

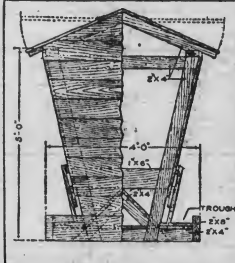

FARM ANIMALS

SELF-FEEDER IS PRACTICAL

Device Has Been Found Satisfactory in Fattening Nearly Grown Shoats or Young Hogs.

(By W. E. FRUDDEN, in Popular Mechanics Magazine)

While a self-feeder is not desirable for general use in swine feeding, it has been found practical in the quick fattening of nearly grown shoats or

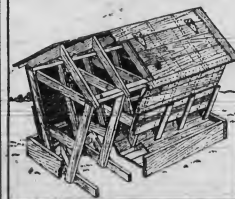

End View of Self-Feeder.

young hogs, and is a useful device where many hogs are to be fed. The feeder shown in the illustration is simple in construction and may be made in the farm workshop. At the left is a sketch with portions cut away, exposing the interior construction. The view at the right shows the end of the feeder, with the right half cut away to show the details of the framing. No length is given, as this may be varied to suit the individual needs.

The framework consists of sections built up of 2-by-4-inch material and set on 18-inch centers. Fixed to them, at the bottom, are 2-by-4-inch supports for the ridge-shaped bottom of the feed bin. The sections are 5 feet high to the upper side of the plate, as shown in the sectional view, and 4 feet wide at the top and bottom. They are strongly braced, to resist the pressure of the contents. 2-by-4-inch braces being used at the top and 1-by-6-inch braces at the apex of the bottom of the bin.

Tongue-and-groove stock is best for the flooring and siding, as well as the roof, and should not be over 6 inches wide. The flow of the feed into the trough is regulated by an 8-inch board, 1 inch thick, fitted to slide

Front and End View.

vertically along the sides above the trough, behind cleats. The rafters are 2-by-4-inch stock, and may be set at a convenient pitch, one to three, as shown. The lids extend one-half the length of the feeder, but may be made the full length if not too heavy. They are supported on strap hinges and have sufficient overhang at the eaves and gables to protect the feeder from rain. Skids may be prepared for transportation.

WARM WEATHER HORSE RULE

Load Lightly, Drive Slowly and Rest in Shade if Possible—Sponge on Head is Good.

Load lightly and drive slowly. Stop in the shade if possible. Do not use a horse-hat, unless it is a canopy-top hat. The ordinary bell-shaped hat does more harm than good.

A sponge on top of the head, or even a cloth, is good if kept wet. If dry it is worse than nothing. When he comes in after work, sponge off the harness marks and sweat,

PRUDENT ECONOMY.

"Should we go on spending as usual? Or should we start economizing and saving every cent we can?" These are questions asked by the financial expert, B. C. Forbes, in Hearst's Magazine. He goes on:

"Suppose luxuries are cut down and expenditures on such necessities as food and clothes and shoes and head-gear are appreciably curtailed. What then?"

"Manufacturers and merchants and dealers in such commodities proclaim that they would have to reduce their forces. Undoubtedly they would. But it is absolutely necessary that a certain amount of labor be released from the production and vending of things we can do without in order that additional labor may be available for things we cannot do without when the country goes to war on a gigantic scale."

"But it is not prudent economy to go half-starved, to wear ragged clothes or leaky shoes. Nor is it prudent economy to forego all recreation, all amusement and everyone of life's little comforts, for we must keep fit in order to meet the extra demands upon our strength and our productive capacity. A common-sense course will yield the best results alike for merchants, manufacturers, tradesmen, labor and our military strength."

The cheapest eating in the world is rice and peanuts, measured by the calories, which constitute the only real test. The former costs 5 cents per 1,000 calories and the latter 7 cents. So that, if a person would eat a good helping of rice and wind up by a plentiful dessert of peanuts, he would get more muscle, brain, nerve and bone out of it than he would out of a diet of roast beef and potatoes, says Ohio State Journal. There is no attention paid to the value of food in practical living. Our sole guide is what hits our appetite. We want what "we'd rather," as the poor woman told Jane Addams. It is going in and buying potatoes by the pile, without regard to the bushels or pecks. There is twice as much living in some kinds of foods as in others and yet we pass up our plate perfectly unconcerned whether it comes back with 500 or 1,000 calories. This is one reason we are poor.

There is a probability that the empire of Great Britain will soon drop the word empire and put commonwealth in its place and be known as the British commonwealth. From this it may be inferred that the big war has resulted in a change in the spirit of the British government. It will be known as a commonwealth, or a government of the people, by the people and for the people.

"Civilization began when men began to build houses. From the house developed the city and the nation," said a banker recently. The hotel has its place. The apartment house has its uses. Even the boarding house may be defended upon the ground of necessity. But it is the man who owns his own ground and his own roof over his family's heads who is the bulwark of society and of the nation.

The two Columbia students arrested for resisting the draft have been punished by losing their citizenship. Yet they will probably feel it as a hardship that they have lost something for whose privileges they are anxious enough, but which they do not want to defend.

It should be impressed upon our Sammys that they surely must capture some German guns, as there are a number of towns in the United States that have no such ornament for the courthouse or city hall squares.

The war department has received several letters from wives asking that their husbands be drafted, and many a husband of experience is hoping that he will be called. Oh, you married life!

A congressman may please part of the people all of the time, or he may please all of the people part of the time, but he cannot please all of the people all of the time.

It is reported that our soldiers are to hold an important part of the line on the west front and if it is not important now it will be after they get busy.

"Another aviator falls 300 feet unhurt." The world is beginning to hear from those "bouncing baby boys" we used to read about.

The government advises the raising of rabbits in great numbers to reduce the drain on meat. Shall we try it on our back yard?

FIFTY-FIFTY

Bellevue and Burlington Basket Ball Teams Play Two Fast and Exciting Games.

Professor Smith, of Bellevue, brought his fast basket ball team to Burlington, last Friday afternoon, getting an even break. The visiting girls had an easy game, winning 24 to 2. They were entirely too fast for the Burlington five, and their easy victory, encouraged the boys to make their very best effort.

The score in the game between the boys was 45 to 32 in favor of Burlington. The members of each team were on their toes all the time and an unusual amount of pep was displayed from start to finish. Burlington took the lead early in the contest and gradually drew away from Bellevue until the last whistle was sounded.

The Bellevue boys are well trained and understand all the permissible tricks of the game besides being ready at all times to take advantage of any fizzle on the part of the other team. The game that Bellevue will realize that it has been in a game that gave it a sure enough work out.

Burlington put up its best game of the season, and the fun was fast and furious. As usual Utz's playing was sensational, while the work of our team mates Brown, Finn, Acra and Hall was along the spectacular line.

A considerable crowd of Bellevue fans accompanied their teams and cheered lustily every good play they made, while the Burlington rooters displayed no less enthusiasm in behalf of the home team.

Clean basket ball prevailed in both games and the best of humor was displayed by the large crowd of spectators. The same teams will play at Bellevue next Friday afternoon.

LOCAL RED CROSS BUSY

Shipping Completed Work To National Headquarters.—Work All Done In the Most Satisfactory Manner.

Last Friday the local Red Cross headquarters had the appearance of a wholesale store, several of the members being present packing and boxing crates for shipment. The Red Cross in this county has turned out a large quantity of work, although there are a number who will not contribute labor because they have been informed that the boys who go from this county may not get the articles that are being sent out. If the boys from Boone do not get the benefit of the work those from some other quarter will.

BAN PUT ON USE OF CABLES

By American Citizens Who Unwittingly or Otherwise Send Information to Germany.

Washington, Nov. 8.—The Government is about to deny cable communication with neutral countries. If the boys from Boone do not get the benefit of the work those from some other quarter will.

Telegraph and cable companies, it was stated today, will be given lists of names of persons who have been under surveillance, with instructions to refuse transmission of their messages.

Some of the men under the ban are said to have been engaged by neutral organizations or corporations in the European neutral countries or in Mexico, South America and elsewhere.

Although these agents in some instances unwittingly acting in the enemy interests, the avenues of communication will be closed to them by the Government, controlling control over cable, telegraph and mail messages entering or leaving the United States.

More drastic measures also will be taken, it is said, to restrict the movement in this country of the thousands of alien enemies who now are permitted to go almost anywhere except within zones about camps and fortifications.

Very Kind of Some Mail Clerk

The package of Records started out to the Verona postoffice were broken open somewhere enroute and were returned to the Burlington office in last Friday morning's mail. The paper that was packed in the package was not stout enough to hold them. It was very kind in some postal official to let them in a bundle and return them that they may be securely wrapped.

Do You Remember Him?

What has become of the old-fashioned editor who filled up half the front page of his paper with a notice of a funeral or a notice following an election?—Lawrenceburg Press.

Convenient for Boone Co. Growers

In this issue appears the advertisement of the Aurora, Ind., loose leaf tobacco warehouse, which is very favorably located for securing the patronage of a large per cent of Boone county growers. It is under the control of some of the best tobacco men in this part of the country, and those who put their tobacco on the floor of the Aurora house will have no fear of not receiving its full value. The house will be equipped with all the conveniences of the most modern sales house, while buyers from all the large factories will be present at the sales. You want to have your tobacco ready to take advantage of the first sale made by the new company.

Considerable Sappy Corn

It is seldom that there is as much sappy corn at this season as the farmers are finding this fall. A great deal of losing corn is taken where it is put in large bulks, which fact makes the work of cribbing corn slow work.

RETAIL COAL PRICES

Cut in Price Planned—Fuel Administrators Empowers State Administrator to Change Methods.

Washington, Nov. 8.—Possible reduction of retail coal prices was indicated today by instructions to State fuel administrators empowering them to change methods of fixing retail margins. Investigation has disclosed that the margin now allowed which is the same as that taken in 1915, in many instances is too high. The instructions to fuel administrators make it their duty to investigate.

"It has been called to our attention that in certain communities retail dealers are charging an excessive retail price for coal. In some localities retail merchants enjoyed both in 1915 and in July 1917, a margin of profit which under present circumstances would appear to be unreasonable. This situation may exist, even though the retailers may be basing their present price strictly in accordance with coal regulations."

"When such a condition is reported in your territory we suggest that your local committee make a careful investigation of the costs of doing business by each of the dealers and if it appears that more than a reasonable profit is being enjoyed that the committee require a fair and reasonable profit to be allowed the retailer, send their recommendations to the State Administrator, who will pass upon them to determine whether their findings are equitable and just to the consumer and retailer as well."

The State Administrator then will confirm such prices in that town or city, subject to appeal to the United States Fuel Administrator.

"Your local committee, in arriving at a fair retail price where the price margin is too great, should allow each retailer a reasonable profit. It is advisable to base the profit on a flat value basis rather than percentage, since the latter would give the less efficient dealer a high cost a large actual profit than the more efficient dealer with lower costs."

It has been noted in some cases to average the costs of dealers in the same town."

A LARGE CROP

Rube Riley, Colored, Sells His Large Crop of Tobacco at Fancy Prices, and Buies More Good Land.

Rube Riley, of Big Bone church neighborhood, was in Burlington, last Friday, closing up a purchase of land, which makes him the owner of something over 400 acres. Much of this is very productive. It has been only a few days since he sold 25,000 pounds of tobacco—10,000 pounds at 27½ cents per pound and 15,000 pounds at 23 cents per pound. The purchase advanced him \$500 on the crop. It is hardly necessary to state that Rube Riley is the most thrifty colored man in Boone county, and when he makes a crop, he has when there is no crop fishing on his part.

War Certificates for Christmas.

Sparkling new gold pieces are doled this year to Army presenters. War economy is the reason.

Instead of \$5 coins the government will be the holder of the nation's bulletin stock filled with \$5 war savings certificates bearing five per cent interest.

Frank A. Vandiver, director of the country's war thrift crusade, expects to have the gigantic \$4,000,000 campaign launched early in December. He says that the commercial and financial menace of extravagance and useless Christmas buying.

To avoid floods in the future Samuel Hall has moved to higher ground his tool and wagon shed. The shed was near being carried down Woodcock creek by the flood that stream a few months ago.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of November 15th, 1877

Kentucky, Tennessee, Virginia and North Carolina have found fine crops of tobacco.

Gov. Williams, of Indiana, appointed D. W. Voorhees to fill the vacancy caused by the death of Senator Norton.

Hubble Foster died in Cincinnati, last Sunday.

John Cornelius and Miss Hattie Varner, of Florence, were licensed to marry last Thursday.

Jerry Delph and Lewis Tanner have bought the saw mill at Florence X-Road.

Rev. J. A. Kirtley has been engaged in a revival meeting at Madison Avenue Baptist church, Covington, for two weeks.

Rev. J. W. Henley will preach at the Universalist church next Sunday.

Mr. Arthur Blyth is in a fair way to recover.

Union—A large congregation at Sardis last Sunday. T. M. Lillard was a guest here last week. Lewis Weaver spent a few days last week up in the mountains.

Petersburg—Turnpike fever has attacked the farmers living along and near the road from here to Bellevue. Rev. W. S. Keene is making arrangements to move to Florida. Dr. J. E. Terrill will accompany him.

Scatterville—Farmers are gathering a good crop of corn and stripping tobacco. Lewis Conner started to market Monday with 22 fine, fat hogs. Others will drive soon. The sale of J. M. Acra, deceased, Tuesday, Nov. 6, was well attended. Ben Rice, administrator and Thos. M. Finch, auctioneer. Jerry Weaver and Jno. Rouse have opened a store across Gunpowder creek near the residence of Lewis. Attendance at Prof. Sullivan's school is on the increase. An effort is being made to organize a debating society at the school house.

Bellevue—Thos. Z. Roberts is erecting a dwelling on his farm on Middle creek. Robert Aylor shipped 61 350 pound hogs Monday night. A good crop of broods, shipped to nests of baskets. Chicken pox has broken out in Mrs. Walker's school. Harvey Akin has moved to his farm and Wm. Reeder has moved the house he vacated and opened a saloon.

WITHIN THREE MONTHS

Men From Camp Zachary Taylor May Set Sail For France.

The word was passed around Camp Taylor last week that 15,000 men, comprising the first and second draft contingents quartered in camp, will be on the way to France within three months, probably by January 1. The balance of 40,000 men assigned to the Eighty-Fourth Division will be detained until March or April, respectively.

Following orders given company and battalion commanders to speed up training, more progress has been made during the last week than during the preceding four weeks. The camp has been supplied with guns, while a week ago most of the men were without rifles. Today practically all of them are taking advanced rifle drill.

Washington, it is understood, has ordered the commander of each national army camp, including Camp Taylor, to make all haste with training. In none of these orders, however, has been included the need of men who are needed for immediate service in France.

"Let every man in readiness as soon as possible," has been the gist of orders.

Less than two months ago Camp Taylor received the first of its army of untrained civilians. Friday these men will begin the advanced work of training in trench warfare, and several British and French officers are hurrying to Louisville to aid in the work of teaching.

Modern Improvements.

Up-to-date cases have been put in the Circuit Clerk's office, making that department have more modern look, adding very much to convenience of handling the papers that appear in that office. A new book rack has been placed in the Circuit Clerk's office which modernizes that department considerably. But these offices are now pretty well equipped.

The work on the shutments for the bridge at Lexington is progressing very nicely, and they will be ready for the steel by the time it can be put on the ground.

Rifle Stock Material Short.

Verailles, Ky., Nov. 6.—Lieut. C. H. Lehman, U. S. A., of Washington, and W. A. Maclean, of New Albany, Indiana, president of a company which has a large contract for making rifle stocks for the Government, were in this county today in search of black walnut timber. Black walnut, it is said, is the only wood for army rifle stocks that proves satisfactory, and contractors are having great difficulty in getting enough of it to supply the Government's need. War Department representatives are making a direct appeal to land owners having walnut timber on their places to sell it for patriotic reasons. The timber must be had at once and the price cuts small figure. Contractors are able and willing to pay good prices for cause of the shortage of black walnut three is declared to be the fact that for many years prior to the war German agents were buying up this timber and shipping it to that country. Hundreds of fine trees were cut down in Woodford county for export to Germany, it is said.

TO MEET COAL SHORTAGE

Operators Lay Situation Before Garfield—Reduction in Output 400,000 Tons Daily.

Washington, Nov. 7.—Steps to meet the serious curtailment of production of coal in the eastern fields were taken today by directors of the National Coal Association, representing more than half of the country's entire output of bituminous coal.

S. W. McComb, of Harlan, president of the McComb Coal Company, and J. H. Wheelwright, of Charleston, president of the Consolidation Coal Company, represented the Kentucky fields.

The operators in conference with President Woodrow Wilson estimated that the reduction below capacity is 350,000 tons a day, and the car shortage was blamed for most of this. A car shortage has resulted in falling off of 40,000 tons a day, the operators declared.

For the past ten days, the operators told Dr. Garfield, estimated that the reduction below capacity has been not less than 400,000 tons a day. As the capacity of production is 1,000,000 tons daily, the shortage of the bituminous mines in the country is approximately 2,500,000 tons daily it will be seen how far the loss of tonnage has been during the past ten days.

Large mines and small, some of them capable of producing 3,000 tons or more daily, stand idle for production. The operators are working only on part time. This is in the face of activity which are daily increasing the demands for coal so that the shortage is much more vital to the nation than it would be under conditions of peace.

Conditions under which the operators are endeavoring to cooperate with the Government by producing more coal are promising to become worse, the operators asserted, unless steps are taken promptly to remedy the situation. Mines operating on three or four days a week, because of the shortage of cars and the slow movement of cars over congested roads, are facing the possibility of losing the men who can find steady and well paid employment in other industries on a full-time basis. The situation, Garfield was told, is thus rendered more acute and the necessity of devising methods to obtain a full supply of cars for the mines is made more imperative.

Average figures showing car shortage and congestion, Dr. Garfield was told, do not tell the story of the coal industry's situation today, inasmuch as the congestion and shortage are greatest on several of the most important routes. Conditions are so bad on some of the roads, operators asserted, that the mine organizations are becoming demoralized.

General remedial measures were discussed, informally, including the advisability of giving coal shipments priority in certain sections, and the need of more efficient co-operation on the part of the railroads with one another in the expeditious handling of shipments and empty cars, particularly in the use of terminal facilities.

Will Make Alcohol of Frozen Corn.

The 50,000,000 bushels of frozen corn in Indiana and southern Illinois will be utilized in the manufacture of alcohol for powder making, thus saving farmers from total loss on the crop.

This information was brought to the attention of a committee of distillers, farmers and grain dealers who conferred with the government authorities.

Eating Rabbits in Camp

Twenty-six thousand men responsible for the winter and roll call at Camp Zachary Taylor Thursday. The winter will be a daily feature in the future. Rabbit was on the menu of several companies Thursday. The boys killed them in an orchard near the camp. They didn't shoot a gun but knocked the rabbits down with clubs.—Lawrenceburg Press.

Y. M. C. A.

War Council Work Inaugurated—Meeting Held and Speeches Made at the Court House

The Y. M. C. A. War Council drive was inaugurated in the Burlington precinct last Sunday by a well attended meeting at the court house in the afternoon. The meeting was presided over by Postmaster Orie S. Wade, of Covington, Rev. A. B. DeMoisy, pastor of the local Baptist church. The purpose of the meeting was to place before the people the object of the drive, and emphasize the good to result therefrom. The speakers were accorded close attention as they told of the benefit to the boys in the trenches that is sure to result from the purchase of Boone county war bonds. The meeting probably had been given more publicity than any of Boone county, and responding liberally to the call for money to be used in making the soldier at the front as comfortable as possible, but straight to say there are yet those to be found who are unwilling to contribute anything to the comfort of men who are fighting to preserve the peace and to be found who are unwilling to contribute anything to the comfort of men who are fighting to preserve the peace and to be found who are unwilling to contribute anything to the comfort of men who are fighting to preserve the peace.

NEW BUILDING DEDICATED

The Lutherans Dedicate Their New Church Edifice

An Immense Crowd Present, and a Big Dinner Served—Building Cost \$10,500.

A crowd estimated at one thousand, and a hundred people assembled at Hopeful last Sunday to witness the dedication of the new Hopeful church building. The service was held in the morning, and was conducted in the church auditorium, where very able sermons were delivered, but by the time for the afternoon services the crowd had assumed such proportions that it was necessary that two overflow meetings be conducted in order to accommodate the large number of people who were present. The learned and eloquent speakers in attendance. At the noon hour an immense feast consisting of every kind of good that is produced in this part of the country or that was obtainable, no attention being paid to Mr. Hoover's prohibition to conserve food. The crowd was so large but for one many hundreds larger had been prepared, and the good ladies in charge of the feast endeavored to make their guests partake of it so freely. It was a particularly one of the greatest days in the history of Hopeful church, and will be pleasantly remembered by everyone who was present.

This edifice is the most elegant rural church building in this part of the State, and is complete in all its appointments, having a commodious kitchen and dining room in the basement, the building is lighted throughout by a Delco Electric Light Plant, and the large auditorium in which services will be held is arranged in a manner that makes it a pleasant apartment in which to worship is not only its house, but to the country surrounding, and much praise is due those who have so faithfully and unceasingly taken the beautiful building might become a reality.

A good road leads from the Burlington and Florence pike to the church and before they quit the members of the congregation will have all the church surroundings in keeping with the new building, and the church and grounds will be one of the most inviting spots in this county.

The building complete cost \$10,500 about \$4,000 of which was made up last Sunday.

Be a Careful Hunter

The hunting season opened today. Thursday, and the Nimrods are abroad in every direction in search of game. No doubt going on lands the owners of which would rather they would omit from their list. The high price of game has caused a command to induce many a man to go afield that has not been in the habit of hunting, and while he is out he will not pass up an opportunity to shoot a deer. The person on whose land he is hunting. The careless hunter is the party against whom farmers are seeking protection. Are you one?

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Mrs. Louise Kendall, of Zion Station, spent Friday here with friends.

Mrs. Kate Jones of Ludlow, spent the past week here with relatives and friends.

Mrs. Susan Senour and daughter Miss Pearl left last week for Covington to make their home during the winter months.

Mrs. Sidney Hume of Indianapolis, spent part of the past week here with relatives and friends.

Miss Myrtle Edwards of near Warsaw, spent part of last week here the guest of John Grubbs' family.

Mr. and Mrs. A. P. Boswell and lady were guests of his sister Mrs. Fred Wayland and family Sunday.

Mrs. Scena Caniff of Louisville, spent part of last week here the guest of her brother Ed. Fullilove and wife.

Howard Smith formerly of Walton, member of the 10th Cavalry, 2nd Platoon, and is located at Ft. Thomas.

R. S. Holloway of Humboldt, Kansas, spent part of last week here with his brother Dr. G. F. and family.

Jno. L. Vest spent part of last week at Clarkson, Grayson county, in relation to some of his law practices.

W. R. Rogers, of Burlington, the accommodating county clerk, spent Monday here on business and with friends.

Joseph Reed who is employed in the tobacco business at Covington, spent Saturday and Sunday here with home folks.

Miss Julia Powers of Augusta, spent the past week with Mr. and Mrs. John K. Feagan at their country home in Kenton county.

R. O. Hughes of Richmond, spent the past week at Dundee, Mississippi, looking after some interests he has in land in that quarter.

Penj. Johnson, son of W. R. Johnson, who recently enlisted in the army is now stationed on the Mexican border and is pleased with army life.

Mrs. W. M. Tichenor who has been here on a visit to her daughter Mrs. E. F. Holloway returned to her home at Senora, Hardin county, last week.

C. E. Young, W. L. Young and J. R. Wilhoite, of Scottsboro, near Georgetown, were here Tuesday looking over some farms with a view to making a purchase.

Mrs. Lula Bolington-Cunningham who has been here on a visit to her parents Mr. and Mrs. Jas. Bolington, left last week for her home in Brooklyn, New York.

Mr. and Mrs. John H. B. B. were at Brooksville last week attending the funeral of their nephew, Alger Powers, who was accidentally shot and killed while loading a gun.

Wm. P. Beemon, the efficient County Assessor, of Boone county, spent the past week here making the annual assessment. He is a first class official and is doing excellent work.

Noah Sheldon, of Winchester, Boone county, spent part of the past week here looking over some farming lands with a view to making a purchase.

A. Bays and M. F. Martin of Georgetown, were visitors here Friday and Saturday looking over several farms with the intention of making a purchase and moving to Boone county.

The vote on the issue of \$5,000 bonds to construct good streets in Walton was carried by 67 to 11. The present board of trustees were re-elected as was Police Judge T. F. Curley.

Rev. Dr. W. W. Evans who has been spending several weeks with his relative Smith Davis and family left last week for Oakland, California, to spend the winter with relatives and friends.

Dr. A. N. Jones and brother Robt. W. Jones spent part of last week in Louisville guest of relatives and friends, and Dr. Jones attending the annual meeting of the State Medical Association.

Rev. Olaus Hamilton will begin a protracted meeting at Walton Baptist church next Sunday, Nov. 18th, and will have special music in charge of a gentleman who makes a specialty of this class of religious music.

C. E. Galbraith, E. D. Case, Chas. Yager, Geo. H. Monahan and J. C. Browning of Germantown, Mason county, were here last week looking at some farming lands in the hands of Geo. B. Powers expecting to make a purchase.

Mrs. Lottie Brown and daughter of Seattle, Washington, Mr. and Mrs. Clara Hoffman, Mr. and Mrs. Clay Holder and daughter and Mrs. Blanche Soule of Hamilton, Ohio, were the guests of Mr. and Mrs. L. T. Grubbs a part of last week.

Kenneth Johnson, son of Mr. and Mrs. John B. Johnson, has secured the appointment as page in the next session of Congress through the recommendation of our Congressman Hon. Arthur B. Rowe and will go to Washington next month.

W. R. Powers and son Harry spent the week in Owen county advertising the opening of the Sagers Lumber and Tobacco Warehouse for Monday, Dec. 10th and Jas. R. Wallace and A. R. Johnson have been advertising the Walton Lumber and Tobacco Warehouse in Boone and Kenton counties, the opening sale being Wednesday, Dec. 12th.

Mr. and Mrs. John E. Williams were called to Augusta, Bracken county, by the death of her brother E. V. Griffith, a prominent citizen of that city, who died Tuesday from pneumonia brought down caused by too close application to business Mr. Griffith was about fifty years old and leaves a wife and several children.

Mr. and Mrs. W. F. White sold

farm of 169 acres north of Walton, V. H. Korns of Castle, Nicholas county, for \$10,000, and will move to the place in the spring. This is three farms Mr. Korns has bought in this quarter, and all of the sales were made by Real Estate Agent George B. Powers.

The sale of personal property of Mrs. Lucy F. Williams and M. M. Lucas on the farm of Mrs. Williams at Banklick last Saturday was fairly attended and good prices prevailed. About twenty cows were sold at prices ranging from \$55 to \$305, most of them selling in the neighborhood of \$100 each, the highest price being the premium cow that Mr. Lucas paid \$350 for, and produced 16,000 pounds of milk last year.

Stahl of near DeMossville, was the purchaser. The corn sold at \$6.75 per barrel, or \$1.35 per bushel. The sale was made on nine months time without interest.

Mrs. Anna Banks, wife of Wm. J. Banks, died at her home in Walton, Sunday night, after a brief illness from cancer of the stomach. Mrs. Banks had not been seriously ill until the accident befell her husband whereby he was dangerously hurt by being struck by the railroad near Warsaw, and the shock prostrated her and she was immediately confined to her bed, and died in about two days after the accident. Mrs. Banks was about 50 years old and was a native of Scotland, and leaves a husband and one child, son, and other relatives in this county. Her funeral took place Tuesday from the Walton Christian church, Rev. E. C. Lacy conducting the services after which the internment took place in the Baptist cemetery.

LANDS POSTED.

Notice is hereby given that our lands are posted against trespass of any and all kinds, and hunters and trappers are forbidden to go thereon.

State News.

Bradfordville.—A fine crop of corn in this section. Tobacco is good. More wheat sown than usual. Stock of all kinds high at the sale of Robert Taylor in Casey county.

Mt. Sterling.—Farmers continue quite busy in this county sowing wheat and rye and it is likely that the work will all be completed within the coming week. Early sown crops are looking well.

Winchester.—Clark county farmers are still very busy. Some fields of corn are very late and soft. Shoats are in demand to eat this as it will not winter. Sales of farm stuff are being attended and everything is going high enough.

Midway.—Loads of pumpkins, kershaws, turnips and apples have been coming in as the huckster wants to get rid of his crops with the market in good. Milk is getting scarce. The acreage of navy beans have been doubled this year.

Flemingsburg.—A good deal of corn yet remains to be cut and grain to be sown. The season is late and wheat and rye will not have much time to get started in order to stand the winter. It is now rather late to sow grass seed and most of the seedling will be done in the spring. Some timothy will yet be sown, however. Early cut tobacco is curing nicely.

Georgetown.—There are lively prospects that the abundant corn crop raised in Sept county will be sold at a price approximating \$6. The demand to buy a security of hay all over the country. The potato crop has turned out better than was expected. Wheat has been sown rather late this fall, but the acreage will be larger than the past twenty years.

Hickman, Nov. 6.—The Hickman Masonic Lodge is in receipt of an interesting letter from the Royal Arch Masons of Paducah. The letter was written December 27, 1851, by the Hickman chapter to the Paducah chapter. It was written on a piece of paper in use, folded and sealed with a wax wafer. The postage, 5 cents, was paid to the postmaster here, but no stamp was used. A similar letter was mailed from Troy, Tennessee, Sept. 3, 1850, asking the consent of Paducah to confer work on George Shucks, of Hickman. None of the men who were officers of the lodge then are living. Although 67 years old these papers are remarkably preserved.

The Tobacco Crop.

Very little has been stripped in Fayette county.

Rent for tobacco land in Kentucky is advancing.

Farmers in Bourbon county are expecting record prices.

The Kentucky Crop Report as of November 1 gives the estimate on Burley yield per acre of 881 pounds as compared with 881 pounds in 1916; and dark tobacco at 879 pounds per acre as compared with 827 pounds in 1916.

Scarcity of labor is causing much concern among the tobacco growers of the State, and it is feared that the situation will become acute before stripping is finished and brought to market. The crop is good, higher than ever known.

The work of stripping tobacco was begun in Nicholas county, and while tobacco is not in the best condition for stripping, some farmers are pushing the work in order to get to the market early. The early cut is in good condition for stripping, but the late crop contains a considerable amount of water.

In Montgomery county sales are reported every day at prices ranging from 22 1/2 to 25 cents. Some growers say they have refused to strip the crop until it is light in weight and it is expected that the extremely good prices which it will bring will more than offset the light weight.

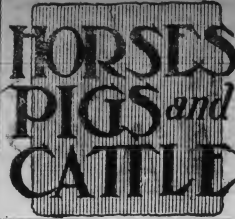

THANKSGIVING DAY

At Camp Zachary Taylor To Be Devoted to Sports and Dinner. Louisville, Nov. 11.—Camp Zachary Taylor will resemble scenes of an Olympic contest Thanksgiving Day. Practically every red-blooded sport will be staged in dozen lots.

Every tradition pertaining to appropriate observance of the day will be found at the camp with the deplorable exception of the menu. The old reliable turkey, now in high society, will necessarily be omitted from the list of dinner for privates. Officers, however, may deny themselves a now pair of puttees and invest the money in turkey meat.

The football team, which is officially representing Camp Taylor, will meet in mortal combat with a team from the University of Louisville at a Louisville park. Dozens of company games will be held at the camp. Boxing bouts, croquet, basketball, baseball, tennis, tug-of-war and even tennis and base ball will have the breezes for the Thanksgiving athletic bill, shows, lectures and other "indoor" sports will be provided.

Preparation for the sports this week for the reception of the new draft quota. The day on which the recruits will begin to report has not been announced.

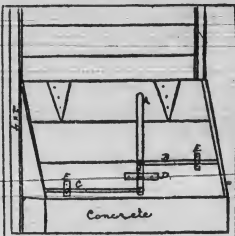

FEED TROUGHS OF CONCRETE

Doors, Sides and Tops of Device Illustrated Were Constructed of Red Elm Lumber.

My earliest recollections of hog feeding remind me of the unsatisfactory locks provided on the doors of hog troughs. When we built a new hog house with 22 farrowing pens we made the doors shown in the cut after considerable thought, writes F. C. Schroeder in Wisconsin Agriculturist. The troughs were built of concrete. The doors, sides and tops were made of home-saved, well-seasoned one-inch red elm lumber. The 2 by 4s were hemlock. Elm lumber will withstand very much abuse and is excellent for such purposes.

Lever A is 3-16-inch by 1 1/4-inch iron, the length being governed by the width of the door. An offset in the lever makes it easier to operate. The distance between bolts M and N is 4 inches, the bolts being counter-sunk to prevent friction on the door. O and B are 3/4-inch round rods flattened where bolted on the lever at M and N and are held in place by clamps.

Highly Satisfactory Feeder.

E and E. Clamp D keeps A firmly in position when operated. In four years' time we have experienced no trouble, and to all appearances will last a lifetime.

We constructed the troughs the same on the pen-side as shown in the illustration, so that when feeding we could look them back. The weight of the hogs on the doors did not injure the latches nor were they able to open them. The work was done by a blacksmith, but could be done at home if supplied with a forge and tools.

SUPERIOR RATION FOR SWINE

Pigs Fattening More Rapidly on Pea Ration Than Any Other at Washington Station.

(By FRED SCHROEDER.) Experiments being conducted on the Washington state college farm with a pea ration for pigs show that the hogs are fattening more quickly than on other standard rations. Fifty hogs are being used in the experiment being conducted by Benton M. Bangs, whose work in supervising the experiment will entitle him to master's degree in agriculture.

The animals are divided into four lots, and are being fed as follows: Lot 1, barley 60 per cent, shorts 30 per cent, oil meal 10 per cent; lot 2, peas 60 per cent, shorts 30 per cent, oil meal 10 per cent; lot 3, peas 60 per cent, shorts 30 per cent, oil meal 10 per cent; lot 4, barley 60 per cent, shorts 30 per cent, tankage 10 per cent.

Lot 2, handled, is showing the best results, with lot 3 second, both being a major ration of cleanings or cracked peas. The hogs are being weighed every week, the experiment being conducted over a period of eight weeks, being now in the last week.

DEMAND FOR PORK IS SHARP

Farmer Who Does Not Raise Hogs Is Losing Chance to Expand Profitable Phase of Farming.

Disease, such as cholera, has been taking a smaller toll the past season than in recent years; more purchased and high-grade hogs are available than ever before; prices of hogs are now past the 10-cent level; demand for pork for home consumption and for export is keen. All of which means that the farmer who does not raise hogs is losing a chance to increase the supply of pork and thus serve the country and at the same time expand a profitable phase of farming.—United States Department of Agriculture.

WOVEN WIRE SHEEP FENCE

Two or Three Additional Strands at Bottom of Barb-Wire Fence Is All That Is Needed.

Woven wire makes an ideal sheep fence, but if you have a good, three-strand barb-wire fence, such as every one should have who keeps cattle and desires to be on good terms with his neighbor, all that is needed is two or three additional wires at the bottom, and you have a good sheep fence.

MAKE GEESE LAY MORE EGGS

Toulouse and White and Brown Chinas Are Considered Good Breeders—Do Well on Pasture.

There has been very little done along the line of increasing egg-production in geese, says a writer in an exchange.

There are some varieties such as the Toulouse and the white and brown

Toulouse Geese.

Chinas which are considered quite productive breeds. They lay on an average of about 50 eggs a year, and are very likely to increase their egg production as they grow older.

The customary way of raising geese is to let them shift for themselves to a great extent, and if they have plenty of good grass pasture they do very well. Experience has shown that geese do not do well on a ration consisting largely of grain. Grain is an essential in the diet of the goose, but I doubt the advisability of feeding sour milk to any great extent, as I believe anything which will force egg production would likely have some detrimental effect upon the fertility of the egg.

While fat and oyster shells are essential, they are not usually provided because geese are not confined like chickens, and pick up enough of such material at most any time of the year.

IMPROVEMENT OF EGG YIELD

Crushed Oyster-Shell Food Should Be Kept Before Laying Hens to Secure Good Hard Eggs.

The department of agriculture, Washington, recommends that crushed oyster-shell food be kept before laying hens as a means through which a good hard egg is produced. A record kept at the government chicken yard of the amount of oyster shells fed to a laying hen showed that in the year one and three-tenths pound per hen was consumed at a cost of about 1 cent a hen per year.

It is also pointed out that the calcium mineral matter taken in by the young chicken in the feeding of oyster shells may have a tendency to strengthen the frame of the young pullets and make them stronger and healthier in later life. It is further shown from actual experiment that when beef scraps were fed to hens the average egg yield was 137 eggs per hen a year and when beef scraps were not fed 90 eggs was the average yearly yield.

RATIONS FOR LITTLE CHICKS

Bread Crumbs Mixed With Hard-Boiled Eggs, Rolled Oats or Johnny Cake Best at First.

Dry bread crumbs may be mixed with hard-boiled eggs, making about one-fourth of the mixture eggs, or rolled oats may be used in place of the bread crumbs, for young chicks. Feed the bread crumbs, rolled oats, or Johnny cake mixtures five times daily for the first week, then gradually substitute for one or two feeds of the mixture finely cracked grains of corn, finely cracked corn, and oatmeal or hulls oats, to which about 5 per cent of cracked peas or broken rice and 2 per cent of charcoal or millet or rye-meal may be added. A commercial chick feed may be substituted if desired. The above ration can be fed until the chicks are two weeks old, when they should be placed on grain and a dry or wet mash mixture.

KEEPING EGGS FOR HATCHING

Basement Is Satisfactory Place Provided It Is Dry and Free From Injurious Odors.

Eggs held for hatching purposes ought to be kept in a cool place. Such a place as the basement is very satisfactory provided it is dry and free from bad odors. They should be turned every day to prevent the yolk from adhering to the membrane. They should be set as soon as possible and never should be held longer than ten days.

Dibowski's Cafe
—THAT—
Neat Little Place
For Farmer, Workman, Merchant, Clerk and Professional Man.

Thinks It Is Craft.
Time was when the ambitious young man or woman who wanted a job in this city armed himself or herself with a word of recommendations from the family minister and set out to triumph over the trials and perils of a great city. Or, at least, they did it that way in books, says the New York Times. Now, however, they have apparently found a more effective way, and one which is causing more than one manufacturer or wholesaler in this city to scratch his head and ponder over a new form of "graft." The scheme now is to come here armed with letters from the largest buyers the home town or city affords, the latter generally being willing to write them in the hope of capturing the family trade. Then it is up to the victim in this city to decide whether he wants to employ someone he doesn't need or run the risk of losing an account. It is said that quite a few garment models are getting their jobs in this way.

Medieval Recital Singers.
From approximately the eleventh to the thirteenth century was the golden age of the medieval recital singer, who cultivated the art of song as distinct from the popular song of the lower order. Troubadours, trouvères and minnesingers haunted the castles and rose gardens of Provence, Northern France, Subbia and Aragon, hastening along the roads which led from one to another, running in the pastures and while they scanned the horizon for the next mounted grange or beetling keep. We doubt if the records of their premieres are preserved even in the yellowing parchments of dusty archives, for it was a careless age, and without the thought of posterity, hardy knowing that it is they who advertise, says Frederick H. Martens in Musical America.

Oil, though long known to be effective in calming a sea, has only recently been proved of value in preventing fog. Air is prevented from coming in direct contact with water which is warmer than the air. Thus condensation of water vapor is hindered. It has been found that olive oil when spread out over a calm sea will begin immediately to lift the fog. "Grass islands" entirely obscured by the fog bank at only a few yards have been discerned as far away as a mile, in line with the clearing made by the oil. Wind, of course, tends to counteract the effect of the oil, except in the direction in which it is blowing. Popular Science Monthly.

Migratory Perplexities of the Ricebird.
The bobolink, or ricebird, is a common songster in the eastern regions of the country. It winters in Central America and the West Indies. Up to a short time ago the bird was excluded from the Western states because, being a frequenter of damp meadows, it could not cross the intervening arid belt. But the progress in irrigation extended the bobolink's area of habitation. We now find the ricebird almost close to the Pacific. Curiously enough, the return journey from its winter quarters follows the old route, i. e., the Eastern states, the birds having evidently not yet learned a short cut across New Mexico.

Derivation of "Cribbage."
The word "cribbage" is simply "crib" plus "age." The "age" is the common English noun-forming termination acquired by our tongue from French and traceable back to the Latin neuter "atium." The "crib" is not from the name of the crib used in the game, but is from the verb "to crib," say the dictionaries; this point seems rather finely drawn, since the crib itself may derive its name from the verb, to crib, indicating that the dealer crib or draws cards from the other players.

Mexican Known by His Hat.
In Mexico, the hat is the symbol of a man's standing in the community. The grandees of old Spain enjoyed the privilege of standing covered in the royal presence. The result was that they vied with one another in the size and splendor of their hats; and the common people followed this example as best they might. In time, therefore, the hat became as distinctive on the heads of the men as the mantilla on those of the women.

All to Do Over Again.
Alex started to go upstairs to bed, but, being rather tired from too strenuous play during the day, he made his way somewhat drowsily and finally stumbled and went rolling to the bottom of the steps. Fortunately he was unhurt, but was a little bewildered when they picked him up. As soon as his mind was in working order again he exclaimed, somewhat regretfully: "Oh, pshaw! Now I'll have to climb those old stairs all over again!"

Fine Canal Locks.
Some of the locks of the New York barge canal are the finest in the world, the fire at Waterford being the greatest series of high lift locks in existence. They have a combined lift of 109 feet, one foot less than the total lift of every lock in the Panama canal. The upper gates weigh 40 tons and the lower about 100 tons.

Nothing Doing.
Boss—No, Fordland, no; I can only admire and respect you on thirty a day. I could not possibly love you less than one hundred.

Million Letters in the Mails Today Bearing Magic Words "With the Colors"

Keynote of the Splendid Work the Y. M. C. A. Does Among Our Men In Uniform Is Keeping Them In Touch With the Folks at Home.

STAMPED WITH STARS AND STRIPES AND RED TRIANGLE

Multifarious Ways in Which the Association Appeals to Your Boy, Your Neighbor's Boy, or Some Boy You Know and Love—Creates a Helpful Environment in Cantonment, on Way Overseas, in Front Line Trench and Beyond—First to Aid as He Comes Tottering Back—Give Your Share of the \$35,000,000 Required to Accomplish This "Last Evidence That Somebody Cares."

It was evening on the broad Hempstead Plain, Long Island, where the Rainbow division was spending its last night before embarking for France. It had been raining hard in the afternoon—a cold, steady autumn downpour—and there was nothing to suggest the rainbow in the outward aspect of the camp. Lines and lines of sudden canvas covered 27,000 men, gathered from 27 different states. The ground was dotted with pools and quagmires. Under the wet canvas it was damp and cold, with a penetrating chill. Lit by flickering candles, the tents were far from cheerful shelter for a man's last night in his native land.

But there were seven big tents where electric lights, numbers and friendliness made the night pleasant.

Music, Games, Good Reading and Correspondence Facilities in Y. M. C. A. Building.

In each of these a soldier was strumming on a piano; others were reading books and magazines; hundreds were writing letters home. Behind the raised counter at one end three or four young men were busy passing out notepaper and envelopes, selling stamps and weighing parcels, which the men were sending home. One of the soldiers said to me as I stood in the tent used chiefly by men from Iowa: "We came all the way here from Des Moines, and we were mighty lonely. Then we found this Y. M. C. A. on the job, and it's been a home and more than a home to us. It gave us what we wanted when we needed it most. We'll never forget it. The boys' best friend is the Y. M. C. A."

Fine, Clean-Cut, Outstanding Fellows.
How close those benches were packed with men, bending over the long tables absorbed in their writing! What an appeal to the sympathies those great groups of soldiers make! Fine, clean-cut, outstanding fellows, some of them mere boys, one thinks immediately of the sacrifice they have made for the rest of us and how precious they are to some one back home. Somewhere, in far off farm or village or city street, there are parents or brothers or wives who would give all they possess for one glimpse of those unburned faces as you and I see them on their last night before going across. And it was with a throb of the heart that I watched them, bent over their letter paper, in one after another of those seven big tents.

These were the tents of the Y. M. C. A. On that last night in America the association was serving the soldiers in the best of all ways—giving them as opportunity to write home. On previous nights they had enjoyed boxing bouts, movies, concerts, dramatics and a score of healthy entertainments as well as religious meetings. But on this last night home-ites were strongest. And perhaps that is the keynote of the splendid work the Y. M. C. A. is doing among our men in uniform—keeping them in touch with home.

Magic Words, "With the Colors." In these times there are some letters that mean more to us than any we have ever read before. They are written on sheets of paper stamped with the Stars and Stripes and the red triangle of the Y. M. C. A., and they bear the magic words, "With the Colors." There are many more than a million such letters in the mails now while you read this. Perhaps one at

least is on its way to you. Each one of our 16 cantonments, where the new national army is being trained, is using more than a million sheets of this paper every month. In the draft army alone that means 16,000,000 filaments of love every month reaching out from the great encampment where the men are being trained into the greatest army this nation has ever dreamed and binding them to the hearts at home. Multiply that by thinking of all the other places where Uncle Sam has men with the flag—in navy yards, on the high seas, in arsenals and officers' training camps and "Over There" in France. In all these places men are writing home. Those unassuming little sheets of notepaper gladden millions of hearts a day. They transfer more love from one

forego coveted possessions or even necessities. The work must go on, because there is no one thing that contributes so much to the spirit and efficiency of the troops. The Y. M. C. A. is working night and day to help the government win this war. And every penny that is given to aid the work is a direct assistance to the health, happiness and strength of your boy and mine.

Snapshots of Kaleidoscopic Work.
In all the big cities in France where our men pass through in large numbers, the Y. M. C. A. is operating hostels, where they can get beds and meals at a minimum cost. In London the American Y. M. C. A. has erected a large building for our soldiers and a clubhouse for American officers.

There are Y. M. C. A. dugouts right behind the front line trenches, where the soldiers can get hot drinks, crackers and other comforts at all hours. Over 2,000 men who had been rejected on account of physical disability have been able to get into the British army by reason of the physical work of the British Y. M. C. A.

A fleet of motor cars leaves the big Y. M. C. A. headquarters in London at midnight every night to pick up soldiers who are wandering about the streets without any wholesome lodging in which to spend the night. These cars are operated by Englishwomen of position and refinement, who report that they never meet any discourtesy at the hands of the soldiers. The importance of this service can be estimated by the fact that at least 50,000 soldiers are on leave in London every week. Over half of these sleep in Y. M. C. A. beds every night.

Entertainment on Vast Scale.
The Y. M. C. A. has erected a big auditorium, seating 3,000, in each of the big draft camps, and huge chalet-aqua tents, seating 2,500 in the other encampments. The association is running a 22 week entertainment circuit among the camps and is paying its companies of entertainers, who are traveling to 30 camps performing before the men.

In each of the draft camps the Y. M. C. A. has ten secretaries engaged in educational work. The association is seeing to it that every man who cannot speak English is taught to do so. In many of the camps the association has a singing director, who is teaching the men to sing the popular and martial airs that do so much to keep up their spirits.

Of 64 Y. M. C. A. men at Camp Dix only three are being paid full salaries. In all the camps the majority of the Y. M. C. A. men have left lucrative positions to do this work simply because its appeal is irresistible to any red blooded man. Harry Lauder, the famous Scotch singer and comedian, now on his farewell concert tour in the United States, is giving all his spare time to the service of the association and is elating to the soldiers at all the camps he can reach.

In one of the draft camps the Y. M. C. A. is supervising athletics on 120 playing fields, providing full athletic equipment. The winners of the inter-camp games will play the champions of the other camps. One of the greatest services rendered by the association is the making

A Red Triangle Dugout in the Trenches.

out of money orders by which the men can send their pay home to their families. In some of the big camps the Y. M. C. A. is providing banking facilities for the men as well.

Do Your Bit With a Tennyson.
This month (November) the Y. M. C. A. must raise \$35,000,000 to carry on its work among our soldiers and their allies until next July. Of this \$35,000,000 about \$24,000,000 will be spent on the work with our own troops or about \$10 for every man in Uncle Sam's uniform. If everybody who has received letters from soldiers and sailors were to contribute \$10 the task would be easy. Are your boy's health and happiness and clean soul worth \$10 to you?

Your town mayor, your pastor, your school superintendent, will know who is the treasurer of the campaign committee in your county or town. Otherwise send a check or money order to Cleveland H. Dodge, treasurer, 194 East Twenty-eighth street, New York City.

Only sacrificial giving by millions of persons will make possible the continuation of this vast work for American soldiers and for those of our allies.

SELMAR WACHS

IS THE MAN that can give you the values in clothing. He is the man, that has the reputation of having the largest trade among the people of BOONE COUNTY.

AND WHY? Because he is a first-class, reliable dealer, and only handles first-class merchandise, which he knows will give elegant service and the best of satisfaction.

War to Stop War.

What is the fundamental, essential motive of the allies in their titanic effort to win the war? Can anybody tell? Is it conquest, a contradictory, simple-what? It would be good to know.

Undoubtedly, it is a hodge-podge; an omnium gatherum, a muddle of individual, national and even racial ambitions looked at in one way. The aims of the British, the French, the Russians, the Roumanians, the Serbians and the Americans are different. Each has a personal interest; a yearning, a hope, a purpose that is particular and special to itself—the enlargement of the territory, the rescue of lost provinces, the prevention of national aggression, the avenging of injustice, making the world safe for democracy or what not.

None of these nor all together could, however, make so many nations in an effort so colossal, and a more comprehensive motive emerges into view—the prevention of another military tyranny. By an educated instinct the world has become sensitive to that hairy peril. Lulled to sleep by its hopes of a coming millennium, humanity failed to observe a little cloud no bigger than a man's hand, which rose slowly above the German horizon until suddenly, it overspread the heavens and stabbed us wide awake with its jagged lightning. It was their deadly fear of this startling portent that roused so many nations from their sleep and armed them for the fray. It was an appeal more nearly universal than all the others put together. It was far more vivid and more easily comprehended; but we do not ourselves consider it the deepest, the most vital and essential motive, the very reason which has leavened this conglomerate lump of peoples.

What we believe, to be more strictly honest, what we want to believe, is that, down at the bottom of the universal heart, is to be found the purpose to make this mighty struggle to make war against war itself; to win this war so that another will never have to be won; to demonstrate the essential lifelessness of war; its incompatibility with civilization; its utter and frightful futility.

If we could only adopt the slogan, "War to stop war," we should have one greater, even though war "to make the world safe for democracy."

There is deadly peril of the spread and establishment of the belief that war is inevitable; that war is normal; that war is the thunderstorm of the political atmosphere; that is as necessary as other tempests.

It will be so long as we believe it to be! The necessity for war exists in the minds of the universe. There could be no war among men who hated war.

To triumph so gloriously in war as to destroy forever the insane hope that any single nation can dominate the world by force would be the greatest achievement of the human race.

FISCAL COURT NEWS.

The Boone Fiscal Court met in special session last Friday, all the Justices of the Peace being present, and Esq. N. C. Tanner presided in the absence of County Judge P. E. Cason.

Sheep claims were allowed as follows:

R. O. Hughes, \$15.
E. L. Grant, \$65.
J. T. Roberts, \$30.

Motion to fix salary of J. C. Gordon, County Sup't of Schools, were lost. The amount proposed was \$1,000, \$1,100, \$1,200.

Walton Loose Leaf Warehouse was directed to raise the Lexington pike six inches from the railroad crossing to the end of the spur, and make the road six feet wide where raised.

The Virginia Bridge Company's bids for the building of the bridges on the Burlington and Petersburg pikes were accepted and was as follows: Bridge at Limburg, \$3,480; first bridge on the Petersburg pike, \$2,320; second bridge on the Petersburg pike, \$3,320. The bid will be certified to the State Road Department for acceptance or rejection.

The commissioners, R. L. Husy, C. H. Yonell and County Road Engineer C. W. Goodridge reported against the construction of a bridge across South Fork creek at the point proposed by Galatin county, and recommended a crossing 150 or 200 feet below the present crossing.

County Road Bonds to the amount of \$10,000 was ordered delivered to each, the Boone County Deposit Bank and Peoples Deposit Bank, and \$5,000 to the Union Deposit Bank. The bonds draw four per cent.

Judge Tomlin of Walton asked the court to have the telephones reinstalled in the county and circuit clerk's offices as a matter of convenience to the public as the people out in the county were saved many trips to Burlington by the presence of the telephones in these offices. The court appeared to think if the public needed telephones in their offices it was the duty of the officials to provide them. The same might be said of the office fixtures which are much more for the benefit of the clerks than the public. Any way a deaf ear was turned to Judge Tomlin's plea.

Hubert Bachelor bought a new Ford last week, and made his last appearance in it at Hospital last Sunday.

Many of the farmers are done gathering corn.

Red Cross Notes.

Petersburg had an all day meeting last Thursday, and will work every afternoon for the next week or so. Miss Emily Willis, who has taken a course in standard and special dressings, is supervising their work.

The Bullittsville unit had an all day meeting last Wednesday at the home of Mrs. Will Graves. They made 53 flannel dressings.

At last Tuesday night's meeting the Burlington unit made 110 4"x4" compressors.

All the outing flannel bought last week, except one bolt, has been cut and distributed throughout the county. Someone is certainly working.

A new policy is now being followed as regards inspection of gauze. Instead of all work coming to Burlington, Miss Emily Hughes is to inspect the work of Walton, Richwood and Union. Miss Emily Willis, that of Petersburg, Bullittsville and Harbison. The work of the remaining units will come to Burlington. So far the work since last shipment has not come up to the former standard.

It is requested of each chapter that they make a shipment every two weeks from now on. The box sent Monday contained:

74 hospital slings.
About 90 sweaters—knitted.
50 scarfs—knitted.
50 pairs socks.
30 wristlets.
1 helmet.
5 slings and abdominal bandages.
25 sanitetas.
10 flannel bandages.

Within the next two weeks it is desired to make a large gauze shipment.

A nation-wide Christmas membership drive has been planned by the Red Cross War Council. The building up of the Red Cross membership to 15,000,000 in the U. S. is the goal of the campaign. This is to be accomplished by Christmas eve.

Dr. Pleasant secured more buttons and membership blanks last week. That sounds promising.

Belleview brought in 24 shirts, 5 muffers, 5 sweaters, 3 pairs socks, 15 wristlets, 25 four inch compressors, 37 one inch compressors.

Petersburg sent in 22 sweaters, 8 pairs socks, 160 gauze sponges, 120 folded gauze strips.

An all-day Red Cross meeting will be held at the home of Mrs. B. C. Graddy, Bullittsville, on Wednesday, the 21st inst.

Benefits of School Meeting

The Association of Teachers at Walton, last Friday, was not so largely attended as the previous one on account of the confused dates and arrangements, but we found a bevy of ladies as busy as a bee—active, engaged in Red Cross work in the school chapel.

Among these were teachers and patrons, and those who have the idea of responsibility, obligation and duty towards their fellowmen, and especially were they engaged in doing their "bit for the boys," who are to protect our flag and assert our rights at home and abroad.

As soon as it was learned that it was desirable that the program of the teachers was to be put on the president of the Red Cross chapter very quickly suggested we follow the combined work and program as had been practiced in some church congregations. Accordingly the suggestion was accepted, and our combined efforts were put into action.

No more fitting number could have been selected than the song, America, as the first number, for teachers and Red Cross workers felt all were engaged to save and preserve our country from the devastation of war, and the tyranny of ignorance.

The program was then continued in its dual nature, some ladies cutting, others folding, some sewing, others assorting, while Dr. Hollaway lead the teachers part with a talk of the necessity of compulsory educational law, and left the question of the derelict open for solution, which is proving quite a menace to our school work and the result to be obtained. Next, Dr. Hollaway gave a talk of old school and the modern school, old school and the modern school, showed many good things of the old school, which would be well to incorporate into our schools of today.

The superintendent then made an appeal to the Walton people to accept the conditions which belong to them, and reap the full benefits of their rights and privileges that surround them, by reason of having the greatest assets of any school district in the county. A discussion followed in which the successes of the Walton school were presented and appealing to the citizens for general cooperation in the enjoyments of a district so fortunately situated.

Prof. E. H. emphasized the fact that all school workers were in perfect accord, not being a syllable of discord in the entire forces of the largest graded and high school in the county. This report was very encouraging to those present and especially the county superintendent.

Remember the preliminary contest in High School spelling at both Verona and Petersburg next Friday. At the same time and place the Teachers Association will be held. May there be a full house of patrons at each place.

Charles White, who resides out on the East Bend road, was in town last Monday. It will be remembered that he had been in very poor health for several months, but it is a pleasure to announce that there has been a marked improvement in his condition since he was in town the last time before Monday.

A post card from W. T. Davis announces his removal to his new home, Riverview, Florida.

Miss Edna Kanaley, bride-elect of Guy Aylor, was given a miscellaneous shower at the home of Miss Lucille O'Hara last Saturday evening. The house was artistically decorated with white and yellow crepe paper and chrysanthemums. A large number of attractive and useful presents were received. Miss Kanaley and Mr. Aylor are a very popular young couple of Boone county. They have the best wishes of their many friends for their future.

PETERSBURG.

Frank Smith, wife and children were Sunday afternoon guests at the home of Mrs. E. A. Smith.
The week-end at Lucy Crisp's home, and Mrs. Robert McNeely were guests at R. E. Berkshire's Sunday.
Mrs. Sam Hensley is at home after a visit with her daughter, Mrs. Nichols, in Latonia.
A large number of K. of P. from Burlington were guests of the local lodge Saturday night.
A little girl was welcomed into the home of Mr. and Mrs. J. W. Saturday, from the Orphans' home at Louisville.
Misses Aline Chambers and Ruth Snyder, Henry Mathews, Karl Botts and Albert Stephens, were guests of Miss Agnes Thompson, Saturday night.
Miss Ormal Klopp, Miss Mary Thompson, Mrs. Mary Berkshire, Rev. Edgar Riley and family and James Hilton were Sunday guests at the home of Mrs. J. W. Brown.
Miss Annie Willis has been visiting friends here during the past week and gave instructions to the Red Cross workers each day about surgical dressings.
Rev. Lacy, of Walton, is assisting Rev. Carter in the revival services at the Christian church during this week and next. Everyone is cordially invited to attend.
Rev. James Hilton, of Louisville, addressed the congregation of the Christian church on the subject of the Widows' and Orphans' Home of the Christian church at Louisville, Sunday morning. His talk was very impressive and instructive.
Annetta Alloway and Ed. Lambkin were married, Sunday, Nov. 4, at the home of Rev. and Mrs. H. Carter. Rev. Carter performed the ceremony. Miss Lizzie Shinkle and Henry Alloway were the attendants. Arthur Alloway and wife, Charles Shinkle and family, B. A. Stott and wife, Mrs. Mary Snelling and family, H. Carter witnessed the ceremony, after which the wedding party returned to the bride's home where supper was served.
The campaign for the Y. M. C. A. work was started in this precinct Sunday afternoon, when Edgar Riley delivered an address on the subject of the Methodist church. O. S. Watts, precinct chairman, made a fine talk before introducing the speaker. At the close of the address, the Y. M. C. A. work was discussed. Mr. Watts and Robert Berkshire were appointed to raise the fund as follows: James M. Thompson, M. F. Wingate, J. M. Grant, Harry Stephens, Stephen Gaines, John Klopp.

VERONA.

Wheat that was sown early this fall looks fine.
Many are preparing for the hunting season which opens today, Thursday.
J. E. Young spent last week at Carrollton investigating the tobacco situation.
J. D. Powers and sisters have completed a large cistern at their farm, west of town.
A. Y. M. C. A. was organized here last Sunday afternoon at the graded school building.
Bro. Jackson, of Louisville, has accepted the call of New Bethel church for the coming year.
The oyster supper given by the Red Cross last Saturday night at the school building, was a success.
Quite a number at this place have sold their tobacco at prices ranging from 15 to 25 cents all round.
Master Jake Cleck and mother, of Walton, and Miss Senora Fry, of J. B. Commins, last Sunday.
Earl Ashcraft, one of our hustling tobacco growers, is preparing for another crop by burning beds this fall.
Mathew Cleck, who purchased the T. J. Griffith farm east of town, has burnt several late tobacco beds preparatory to raising a large crop another year.

BUCKEYE CORNER.

Geo. Burris has moved to a farm near Walton, Sunday.
W. W. Grimley and wife will move to Walton this week.
Warren Alphin fell and broke his arm one day this week.
Mrs. W. W. Grimley sold to Joe Scott her farm of 36 acres in Gallatin county.

W. W. Grimley, J. W. Ewbanks and J. T. Ross each went to the city to make a large shipment of hogs and cattle this week.
T. J. Ross and wife, of Atlanta, Mo., spent several days visiting her cousin, J. T. Ross and family and other relatives in this community.
Mrs. Leslie McRander, who has been suffering for three weeks from blood poisoning, is improving slowly.
Mrs. Roy Stewart and brother, Roy, were in town Saturday to visit her husband, Roy, who is one of the selectives at Camp Taylor.
W. W. Stewart and daughter, Miss Katie, of near Patriot, formerly citizens of this community, were transacting business and calling on old friends here Saturday.
J. W. Ewbanks and family entertained the following guests at their home: Mrs. Etta Clements and two sons, David and Ivan, of Hachaway; Jas. Ryle and family, Mrs. Carrie Ryle and Mrs. Lucy Ryle, of Warsaw.
Al Fennell, one of our soldier boys, who has served in the Marine Corps for six years, was the guest of his uncle, T. J. Miller, and family, Thursday. For some time he has been in Santa Domingo from which place he arrived in the U. S. a few days ago. At the expiration of his tour here he will go to France.

HUME.

Henry Shultz visited relatives at Big Bone, Tuesday.
Miss Susan Noell visited relatives at Big Bone, Tuesday.
Miss Anna Dudgeon has returned home from Fairmont, Ind.
Harry Roberts was guest for the Consolidated Telephone Co. Orba Baker and wife were the guests of Mrs. Eliza Roberts Sunday.
John Binder made a business trip to the city the first of the week.
Mrs. Sallie Moore and Miss Kate Baker made a business trip to Union, Saturday.
Miss Lena Binder returned from a trip to the city, Sunday, after spending several days with her mother.
William Stewart and daughter, Katie, from Patriot, visited this week and family Saturday.
Robert M. Fennell is home from Hume, Ill. He is looking fine. The West certainly agrees with him.
Mrs. Emma Wolf and Mrs. Everett Wolf were guests at J. M. Baker's the latter part of the week.
Mrs. Lizzie Noell made a business trip to the city and her sister, Miss Gertie Baker, came home with her.
Mrs. A. A. Alphin and Mrs. J. J. Alphin, near Ryle, visited relatives in the community the first of the week.

Found Garden Spot of the World
W. F. Moore writes the Recorder from Manatee, Florida, under date of Nov. 9th:
"Send paper to this address until further notice. Among all my pleasure and enjoyment of being at this the most beautiful town I ever saw, the old RECORDER every week will add to my cup that is overflowing. If you ever want to come to Florida, come to Manatee. I have been traveling for two weeks, hunting a place to winter and I have not found anything to beat Manatee. It surely is the garden spot of the world. The South is a great country. I have been through Mississippi, Alabama and Florida."

Personal Mention

Deputy Sheriff L. A. Conner is confined to his room with a cold.
Earl Walton and family, of Petersburg, were Sunday guests at G. G. Hughes.
Mrs. C. E. Stephens, of Bullittsville, was among the Recorder's callers last Monday.
Mrs. C. C. Hughes has been very much indisposed with a severe cold for several days.
Mrs. Nannie McAtee, her daughter and the latter's husband, are visiting relatives in Burlington.
Prof. Carter, of Petersburg, was mingling with Burlington friends, last Saturday for a few hours.
Dolphie Sebree and wife, spent Sunday with Leland Snyder and family, in Flickertown neighborhood.
Chas. Bodie, Jr., and J. E. Hodges, of East Bend, were business visitors to Burlington, last Saturday.
W. C. Rouse and E. C. Farrell, of Limaburg, were among the Saturday business callers at this office.
Mr. A. Yelton, of Bracken county, was the guest of his son, Dr. H. A. Yelton and wife two or three days last week.
E. T. Rice, of Covington, was among the business callers at this office last Monday. Mr. Rice has moved to 23 East 10th Street.
Frank Hammond, of Limaburg neighborhood, who was operated on not long since for appendicitis, has recovered sufficiently to be about again.
B. R. Hume, of Covington, was in Burlington, a few hours last Monday afternoon hunting a purchaser for a "yaller" Humppole he was driving.
J. M. Armstrong, wife and son, Grover, of Covington, and Mrs. W. E. Piper, of Seattle, Washington, were Sunday guests of Mr. Lavinia Kirkpatrick and family.
Messdames Lucy Cloud, Drucilla Cardridge, C. W. Hubert, Carpenter and Messrs. Ed and John Cloud were Sunday guests of Mr. and Mrs. Hubert Rouse.
Mr. and Mrs. Horace Crawford, of Marysville, were the guests of Mr. and Mrs. J. A. Caywood, two or three days last week. Mr. Crawford is a brother of Mrs. Caywood.
Harold Gaines, one of Boone county's selectives at Camp Taylor, Louisville, spent last Sunday at home with his parents, Mr. and Mrs. J. E. Gaines out on the Petersburg pike.
W. O. Marshburn, president of the Cocoa Cola Company, and W. C. Ryerson, member of the Commercial-Tribune staff, spent a few minutes with the Recorder, last Sunday. They were in charge of County Judge Cason.
Dr. L. C. Hafer, of Ludlow, was a business visitor to Burlington, Monday, and while in town made the Recorder a call. Dr. Hafer is enjoying a good practice in Ludlow and stands high with the Kenton county physicians and the people generally.
B. W. Campbell and H. B. Riddell, of Cincinnati, spent a few hours in Burlington last Saturday afternoon. They are both natives of Burlington, but do not meet many of their old friends and associates when they return to their old home.
J. J. Wollard and wife, of Osage, and Evan Taylor, and wife, of Dawson, Minn., were guests of A. L. Nichols and wife last Monday. Mr. and Mrs. Taylor and son, Ray, are going to Florida and have been having some trip. One day while in Wisconsin he made only three miles the most of which distance he had to clear the road of snow.

RABBIT HASH.

Dr. Carlyle and family visited relatives in Indiana last week.
Jesse Harrison wife and son, of Owen county, were guests at Z. T. Kelly's Saturday and Sunday.
Mrs. Mary O'Neal and Mrs. E. L. Stephens, of East Bend, spent last Saturday and Sunday with Mrs. Hester Ryle and Mrs. Henry North near Aurora.
Quite a number of our people attended the Red Cross supper at Bellevue, Saturday night.
I. Rev. Woods began a protracted meeting at East Bend Methodist church Saturday night.
O. J. Hays, aged 77, died at the home of his son, Ben, in Rising Sun, Thursday. Mr. Hays lived for many years in East Bend and owned a very large farm there. He had a very large circle of friends here who will regret the passing of such a noble man.
The Baptist closed their two weeks meeting at East Bend last Thursday night with five additional, Saturday the following were baptized in the river at East Bend: Aylor's landing: Mr. and Mrs. R. L. Hodges, Mrs. John Loudon, Miss Hazel Smith and Raymond Hightower.
Newton Sullivan, who lives out in the Petersburg pike, was in Burlington Monday, and speaking of his corn he said he never saw as large as he is gathering. It is like carrying stove wood when you take up an arm full of it. He said it would be so satisfying immense, about three shocks of it being worth more than an acre of land.
P. H. Rouse is getting together material for building a small barn out on his farm.
Several more names added to the list of posters this week.
The town council is having the streets repaired.

War to Stop War.

What is the fundamental, essential motive of the allies in their titanic effort to win the war? Can anybody tell? Is it conquest, contradictory, simple—what? It would be good to know.

Undoubtedly, it is a hodge-podge; an omnium gatherum, a muddle of individual, national and even racial ambitions looked at in one way. The aims of the British, the French, the Russians, the Roumanians, the Serbians and the Americans are different. Each has a personal interest to conserve; a yearning, a hope, a purpose that is particular and special to itself—the enlargement of the territory, the rescue of lost provinces, the prevention of national aggression, the avenging of injustice, making the world safe for democracy or what not.

None of these nor all together could, however, unite so colossal, and a more comprehensive motive emerges in the vision of the prevention of another military tyranny. By an educated instinct the world has become sensitive to that heavy peril. Lured to sleep by its hopes of a coming millennium, humanity failed to observe a little cloud no bigger than a man's hand, which was slowly above the German horizon until suddenly, it overspread the heavens and stabbed us wide awake with its ingested lightnings. It was their deadly fear of this startling portent that roused so many nations from their sleep and armed them for the fray. It was an appeal more nearly universal than all the others put together. It was far more vivid and more easily comprehended, but we do not consider it the deepest, the most vital and essential motive, the very yeast which has leavened this conglomerate lump of peoples.

What we believe, or, to be more strictly honest, what we want to believe, is that, down at the bottom of the universal heart, is to be found the purpose to make this mighty struggle a war against war itself; to win this war so that another will never have to be won; to demonstrate the essential hideousness of war, its incompatibility with civilization, its utter and frightful futility.

If we could only adopt the slogan, "War to stop war," we should have one greater, even though war "to make the world safe for democracy."

There is deadly peril of the spread and establishment of the belief that war is inevitable; that war is normal; that war is the thunderbolt of the political atmosphere; that is as necessary as other tempests.

It will be so long as we believe it to be. The necessity for war exists in the minds of men, not in the constitution of the universe. There could be no war among men who hated war.

To triumph so gloriously in this war as to destroy forever the insane hope that any single nation can dominate the world by force would be the greatest achievement of the human race.

FISCAL COURT NEWS.

The Boone Fiscal Court met in special session last Friday, all the Justices of the Peace being present, and Eq. N. C. Tanner presided in the absence of County Judge P. E. Cason.

Sheep claims were allocated as follows:

R. O. Hughes, \$35.
E. L. Grant, \$65.
J. T. Roberts, \$50.

Motions to fix salary of J. C. Gordon, County Sup. of Schools were lost. The amounts proposed were \$1,000, \$1,400, \$1,200.

Walton Loose Leaf Warehouse was directed to raise the Lexington pike six inches from the railroad crossing to the end of the spur, and make the road six feet wide where raised.

The Virginia Bridge Company's bids for the building of the bridges on the Burlington and Petersburg pikes were accepted and was as follows: Bridge at Limburg, \$3,400; first bridge on the Petersburg pike, \$2,320; second bridge on the Petersburg pike, \$3,320. The bid will be certified to the State Road Department for acceptance or rejection.

The commissioners, R. L. Haug, C. H. Youell and County Engineer C. W. Goodridge reported against the construction of a bridge across South Fork creek at the point proposed by Galatin county, and recommended a crossing 150 or 200 feet below the present crossing.

County Road Bonds to the amount of \$10,000 was ordered delivered to each of the Boone County Deposit Bank and the Peoples Deposit Bank, and \$5,000 to the Union Deposit Bank. The bonds draw four per cent.

Judge Tomlin of Walton asked the court to have the telephones reinstated in the county and circuit clerk's offices as a matter of convenience to the public, as the people out in the county were saved many trips to Burlington by the presence of the telephones in these offices. The court appeared to think that the public needed telephones in these offices it was the duty of the officials to provide them. The same might be said of the office fixtures which are much more for the benefit of the clerks than the public. Any way a deaf ear was turned to Judge Tomlin's plea.

Hubert Bachelor bought a new Ford last week, and made his initial appearance in it at Hopeful last Sunday.

Many of the farmers are doing gathering corn.

Red Cross Notes.

Petersburg had an all day meeting last Thursday, and will work every afternoon for the next week or so. Miss Eunice Willis, who has taken a course in standard and special dressings, is supervising their work.

The Bullittsville unit had an all day meeting last Wednesday at the home of Mrs. Will Graves. They made 53 fluted dressings.

At last Tuesday night's meeting the Burlington unit made 110 4"x3" compressors.

All the cooling flannel bought last week, except one bolt, has been cut and distributed throughout the county. Someone is certainly working.

A new policy is now being followed as regards inspection of gauze. Instead of all work coming to Burlington, Miss Eunice Hughes is to inspect the work of Walton, Richmond and Union. Miss Eunice Willis, that of Petersburg, Bullittsville and Harborton. The work of the remaining units will come to Burlington. So far the work since last shipment has not come in to the former standard.

It is requested of each chapter that they make a shipment every two weeks from now on. The box sent Monday contained:

74 Hospital kits.
About 90 sweaters—knitted.
50 scarfs—knitted.
60 pairs socks.
30 wristlets.
1 helmet.
60 slings and abdominal bandages.
25 sanitets.
20 bandel bandages.

Within the next two weeks it is desired to make a large gauze shipment.

A nation-wide Christmas membership drive has been planned by the Red Cross War Council. The building up of the Red Cross membership to 15,000,000 in the U. S. is the goal of the campaign. This is to be accomplished by Christmas eve.

P. Pleasant secured more buttons and membership blanks last week. That sounds promising.

Bellevue brought in 21 shirts, 8 mufflers, 5 sweaters, 3 pairs socks, 15 wristlets, 215 four inch compressors, 97 nine inch compressors.

Petersburg sent in 22 sweaters, 8 pairs socks, 180 gauze sponges, 120 folded gauze strips.

An all-day Red Cross meeting will be held at the home of Mrs. R. C. Grady, Bullittsville, on Wednesday, the 21st inst.

Benefits of School Meeting

The Association of Teachers at Walton met Friday, was not so largely attended as the previous one, on account of the confused dates and arrangements, but we found a lot of ladies as busy as a bee—very engaged in Red Cross work in the school chapel. Among these were teachers and patrons, and those who have the idea of responsibility, obligation and duty towards their fellow-men, and especially were they engaged in doing their "bit for the boys," who are to protect our flag and assert our rights at home and abroad.

As soon as it was learned that it was desirable that the program of the teachers was to be put on the president of the Red Cross chapter very quickly suggested we follow the combined work and program as had been practiced in some church congregations. Accordingly the suggestion was accepted, and our combined efforts were put into action.

No more fitting number could have been selected than the song, America, as the first number, for teachers and Red Cross workers felt all were engaged to save and preserve our country from the degradation of war, and the tyranny of ignorance.

The program was then continued in its dual nature, some ladies cutting, others folding, some sewing, others assorting, while Dr. Hollaway lead the teachers part with a talk of the necessity of compulsory educational law, and left the question as the door was open for solution, which is providing quite a menace to our school work and the result to be obtained.

Next, Prof. Ferguson, principal of Walton High School, gave a talk of old school and the modern school, showed many good things of the old school, which would well incorporate into our schools of today.

The superintendent then made an appeal to the Walton people to accept the conditions which belong to them, and reap the full benefits of their rights and privileges that surround them by reason of having the greatest assets of any school district in the county.

A discussion followed in which the successes of the Walton school were presented and appealing to the citizens for general cooperation in the enjoyments of a district so fortunately situated.

Prof. Fry emphasized the fact that all school workers were in perfect accord, not being a syllable of discord in the entire forces of the largest graded and school in the county. This report was very encouraging to those present and especially the county superintendent.

Remember the preliminary contest in High School spelling at Friday, Verona and Petersburg next Friday. At the same time and place the Teachers Associations will be held. May there be a full house of patrons at each place.

J. C. GORDON, Superintendent.

Charles White, who resides out on the East Bend road, was in town last Monday. It will be remembered that he has been in very poor health for several months, but it is a pleasure to announce that there has been a marked improvement in his condition since he was in town the last time before Monday.

A post card from W. T. Davis announces his removal to his new home, Riverview, Florida.

BRING YOUR TOBACCO

TO THE

Public Sale

21 Holstein & Jersey Cows

WILL BE SOLD AT PUBLIC SALE

at my farm in Kenton County, 3 miles from Walton, Ky. on the Walton and Nicholson Turnpike.

—SATURDAY—

Nov. 24th, 1917

At 10 O'Clock A. M.,

One Cow has a record of eight gallons, and one seven gallons of milk per day. The entire herd produced an average of 7250 pounds of milk to the cow last year. High-class stock and the best selection to be found. This herd is in good healthy condition. Milk Cans, Coolers, etc., will also be sold.

Terms—Nine months without interest.

W. H. METCALFE.

To My Friends and Customers.

Owing to the high cost of living I am sorry to say I am compelled to sell for cash, beginning the first day of November, from that day on every article that you buy from me will be strictly CASH.

Under this rule I think that I will be able to sell my goods on less percentage than I did on the credit basis. Give me a call and let me prove this new ruling of my business method to you.

Yours Respectfully,
W. L. KIRKPATRICK.

American Children's Manners.

The North American child is too often merely the by-product of marriage. It serves as an outlet for that passion which its parents cannot also reasonably take in themselves. It is petted, cajoled, pampered, over-dressed, and under-disciplined, till there is evolved a puppy for whom the world soon grows banal, who is destitute of the petitioner's apparel to childhood, and who surveys an already anticipated and thoroughly analyzed future with the cold eyes of unattainable knowledge. The world is its football. It is smart beyond description. But there is in the forced garden of its life no sheltering bed where may bloom the flowers of gracefulness or peace. Of such will be the new aristocrat, and its traditions will be of grandfathers who, by virtue of that native American long-sufferingness, delivered the goods of their period and were promptly and suitably rewarded. But there will be few traditions of courtliness, scant reminders that noblesse oblige, and but scattering memories of inherited responsibilities. The septennial dollar will still dominate. One generation was too busy collecting and the other will be too busy spending. The second generation offers no promise, and the third but little. The fourth will probably open a new and finer cycle.—Harper's.

Blanket Named After Inventor.

The cold winter of 1840 gave us the blanket. So, at least, says tradition, which ascribes its invention to Thomas Blanket, a French merchant, who settled in Bristol, and fell from affluence to want, says the London Chronicle. Blanket and his wife, suffering from the intense cold by reason of scanty bedding and lack of fuel, he searched for something to put on the bed to increase the heat. He found a piece of rough, unfinished cloth that had been thrown to waste. Its success as a warmth giver suggested the manufacture of special bed covers from the same material, and these articles, to which he gave his own name, won the worthy Blanket wealth and immortality.

Wax From the Bayberry.

The recovery of wax from the bayberry was for centuries a New England household industry, and it has lately become a factory industry. The wax of the plant being generally used in the making of bayberry candles, held in high esteem for use and ornament by New Englanders. A bushel of the berries yields as a rule, between four and five pounds of wax. Another plant belonging to the same genus is the "sweetgum" which grows abundantly in the logs and marshes of Scotland. It is a small shrub with leaves somewhat like those of myrtle or willow, having a fragrant odor and bitter taste, and yielding an essential oil by distillation.

Timber Bamboo.

The plantings of the Oriental timber bamboo in northern Florida and Louisiana have grown to a height of 25 feet, and there is no longer any question about their production. The country good canes comparable to those which they produce in China and Japan. A quick method of their propagation has been worked out so that it will be now possible to supply large enough quantities of the young plants to set out many small areas throughout the South, from the Carolinas to California wherever there is sufficient moisture and the land is not too high priced to admit of their cultivation.

A Healthful Drink.

Buttermilk is a most healthful drink. If people would drink buttermilk instead of whisky, it would probably be better for all concerned. Scientists tell us that there are germs in sour milk which fight against the germs causing death to the human body. It is also said that buttermilk has a tendency to lengthen life. People in some parts of Europe die largely of sour milk, and these live to a very great age.—Prof. H. H. Dean.

An Unusual Bird.

A black loon was shot in Washoe Lake, Cal. Such a bird has never been seen there before, and it is supposed to have been driven out of its course by a storm while migrating south from the Arctic regions. The bird was a monster, measuring eight feet from tip to tip of its expanded wings, and nearly six feet from the point of its bill to the end of its tail.

Fur-Trade Our Oldest Industry.

The oldest industry in New York is the fur trade. As early as 1615 a Dutch syndicate colonized Manhattan Island with a few families who devoted their time to procuring for shipment to Holland the furs they received in trade with the Indians.

Carried Flag Around World.

The resolution of the American flag was passed by the Continental Congress June 14, 1777. An American ship, the Columbia, carried the American flag around the world in 1797-1799.

Chase the Ants.

Have you been troubled with little ants around the sugar box? You can get rid of them without having disgusting bug killers sprinkled around your sugar box. Just take a few drops of kerosene and mix with it a little of the sugar box. They won't come back.

Select Kitchen Waste Before Feeding Poultry.

When kitchen and table waste is to be fed to poultry it should be selected and prepared with a view to getting its full value and at the same time making it entirely acceptable to the birds. Not all of the refuse and scraps from the kitchen is suitable for poultry food. Some things, as vegetable peelings, cake and meat when they constitute only a small part of the scraps, but when they are in excessive quantities it is better to dispose of them separately.

The same is true to coffee grounds and tea leaves. Fat meat in large pieces should not be put with scraps for poultry because a hen can swallow a much larger piece of fat than is good for her. By cutting waste fat meat in pieces no larger than one would cut for himself at the table, and by making sure that the fat does not exceed ten percent of the scraps of fat, one time the dangers in feeding fat are avoided.

The best way to keep a kitchen waste for poultry is to keep a one gallon jar, of glazed or galvanized ware, with a cover in a convenient place, putting into this scraps of bread, cake and meat from the table remnants of servings of vegetables, cereals, pies, puddings, etc., and whatever waste from the preparation of meals is suitable to combine with these things in a mash.

Once a day the contents of the jar should be turned into a pail and mixed with as much ground feed stuff stirred with them as can be mixed in with a strong iron spoon or a wooden stirring stick. The amount and kind of ground feed to be used will depend upon the quantity of water with the scraps and whether any particular article is to be fed to the birds.

For thickening a mixture of scraps of ordinary variety a mix of meal of equal parts by weight, of corn meal, rye and middlings is good. If there is an unusual proportion of very rich food in the scraps it may be desirable to use bran alone for thickening. The more meal that can be stirred in and still have all the meal moist the better. Mixing can be done much more easily and thoroughly by mixing a pail having a capacity about three times the amount of the scraps mixed at one time.

When mixed with scraps mixed more than one meal for the flock, the pail should be kept covered until the next feeding. As a rule it is not advisable to feed such a meal thicker than twice a day, but if mixed quite dry it may be fed three times. The occasion for this will exist only where the scraps are abundant and when thickened with meal they may be made the exclusive diet. This is not as good a ration as one containing some hard grain, but it may be used along time without bad results.

The Local Banks Will Assist.

The two banks in Burlington have consented to become members of the Louisville Courier-Journal Commercial Chest Committee, and any package or other article placed in the care of either bank for that purpose will be forwarded to the Burlington-Journal promptly to assist in the big Christmas tree it will erect in front of each regimental headquarters from which gifts sent from the city will be distributed to the boys. Gifts from any citizen will be gladly received, and they can rest assured that their gift will be appreciated by the boys.

Game Warden Chas. Seales and his deputy F. Droste, were in Burlington Monday, putting up the game law "Don't Cards" in violation of the law. They have been very busy this fall, and have handed several violators of the law. So far as Boone county is concerned the game laws are pretty well observed, and the warden and his deputy will find but little to detain them in the county.

Washington, D. C.—An order signed by Secretary of Agriculture I. C. Houson, on Dec. 1, from 65,520 square miles in Southern States the Federal quarantine against movement of Southern livestock is of great importance to cattle raisers and dealers of Northern States as well as those of the South. In regions infested by the cattle tick it has not been safe to import better stock for the improvement of Southern livestock. Because cattle freshly brought from regions where the tick is not prevalent are especially prone to sickness and die from the fever germs carried by the blood sucking ticks. The Federal quarantine against the cattle tick, on the other hand, has prevented the shipment of cattle from infested sections for use as stockers and feeders in free territory, and permits their shipment into free territory only under quarantine restrictions and for immediate slaughter.

The release order for December 1st frees the largest amount of territory ever liberated at one time since the cattle campaign against the tick was started in 1906, and, added to 1,231 square miles freed in March and September, will make 1917 by far the greatest year so far in the annihilation of the tick.

Nine Southern States will benefit by the release order. The largest beneficiaries will be Black-ships, which will be entirely freed from quarantine and will open a broad avenue of tick-free territory from the Northern States to the Gulf of Mexico.

Been some fine weather for gathering corn.

A Sudden Shift of Scenery

None of the other participants in the great drama have been more busy or expectant than the shifters of its scenery, and no act of theirs has been more sudden or surprising than that in which they substituted the mountains of Italy for the level fields of Flanders and Belgium. Have they actually transferred the stage itself? Is the laurel to be settled in sight of the Alps instead of the ocean? It is not possible. It is not even improbable. Many military experts actually believe it. "The German beckon unto the Italian front and with a very hearty good will we shall oblige them," says the great authority of the London Times.

Trench warfare has become too tedious, too expensive and too digging human rats out of their subterranean refuges seems likely to take forever. So far the war is too much like a drawn game. Everybody is anxious to play off the "finals." Soldiers want to get out and fight in the open instead of being cooped up in their holes. Civilians are clamoring for strategic movements—for a battle that shall end in victory or defeat. We are weary of the stale move.

What is the deliberate purpose of the Germans to change their method and seek a conclusion in one way which they could not win in another? Are they pressed for time by hunger, by discouragement, by revolt? Nobody knows. Nobody knows whether the sudden shifting of the center of gravity was an intention or an accident, and nobody knows whether it will be temporary or final. But it brings a change of pressure. The shoe pinches in a new place. The fascinations of another sort. What we are watching now with suspended breath is the impetuous rally of the allies to the support of their imperiled confederate.

From every quarter of the globe, from heaven, earth and ocean, reinforcements are assembling—acrobates, battle ships, tanks, cannon, armies, all the munitions and energies of war. Already there is a million German soldiers in the field. Suppose that an equal number of the allies should gather and that both sides should draw more and more men from their other fields, until four or even six millions should collide in the open fields, as armies have done at Gettysburg and Waterloo, at Austerlitz and Toulon and Marathon. It would be the anticipated Armageddon. The very foundations of the world would be shaken. Civilization itself would be at stake.

We cannot be justly blamed if our imaginations are inflamed, where there is no need to do so, by the possibilities of horror and peril in this conflict.

Nor can we be blamed for wishing that the suspense could be broken. The waiting is too terrible. Our hearts are eager for the end. And yet we do not plead for haste, nor for unrestrained warfare, nor for recklessness on land or sea. Let us be calm, deliberate, patient and utterly prepared. Let us wait until the undisputed emergency of the world is in our arm, for our antagonist is the Colossus of the ages.—Enquirer

Barkley After Ollie's Scalp

Reports from "the Purchase" indicate that United States Senator Ollie M. James may have serious opposition for the Democratic nomination next year.

Congressman Allen W. Barkley, of the First District is being urged by many friends to go after Ollie's scalp in the primary, and it is understood he has taken the proposal under thoughtful consideration. The story goes that Mr. Barkley has been assured by the support of a number of leading Democrats in various parts of the State, if he will consent to make the race. Whether Mr. Barkley will surrender the plum he now enjoys to seek one bigger and more luscious for his renomination for Congress is assured, if he desires it remains to be seen. It is a strong race against James and if he had senatorial ambitions, it will be a number of years before he has another opportunity as tempting.

Reports are being brought to Louisville that the First District is a prohibition stronghold has not been satisfied with the position taken by Mr. James in recent years on the liquor question. Mr. Barkley on the other hand is bone dry and is prominently in the formulation of the existing Federal statute prohibiting the distillation of whisky.

Thus far Mr. Barkley is the only man who has been mentioned as a possible opponent of Senator James for the Democratic nomination. If he should enter the contest, a close fight ought to develop.—Ex

Edgar Berkshire, who resides two miles out on the Burlington and Bellevue pike, had about 3,000 bushels of apples on his orchard and he gathered a very large quantity, has fed several hundred bushels to his hog, and he and his neighbors have about 200 barrels of ginger. He has worked in apples until he is getting tired of looking at them. He has a fine orchard but never did it produce a crop of apples equal to this year's.

Wm. Craddock has been having a serious time with one of his hands, being unable to use it for some weeks.

The past week has furnished a pretty good slice of Indian summer.

WALNUT LOGS WANTED

Veneer Works, Lawrenceburg, Ind.

Public Sale.

As administrator of Jeanette Goodridge, deceased, I will sell at public sale at the late residence of Jeanette Goodridge, Boone county, Ky., on the North Bend pike, on

Saturday, Nov. 24, '17

the following property:

- 5 Milch Cows,
- 12 Ewes,
- 1 Buck,
- Set Double Harness,
- 2 Horse Collars,
- 2 Milk Cans,
- Milk Cooler,
- About 150 bus. Corn,
- 1 ton Hay.

E. J. AYLOR, Admr.

Farms for Sale.

No. 1—Farm of 165 acres, near Union, Boone county, Ky., well improved, plenty of tobacco land. Will sell at a low price and on reasonable terms. A splendid farm, slightly rolling and no waste land. No better value offered in Boone county.

No. 3—Farm of 73 acres, between Union and Beaver Lick, Boone county, Kentucky; 2 good houses and barns, orchard, plenty of hill and ridge land, well located on pike. This is a good chance to get your money's worth.

No. 9—A farm of 160 acres, well improved, first-class farm land, lays almost level, on pike about 2 miles from Union, towards Beaverlick.

No. 15—A farm of 43 acres, one-eighth of a mile from Union, Ky., large dairy farm and silo, plenty of water, near Union cemetery.

These are samples—we have others. Get our prices and you will look at these and other farms and buy a home. Now is the time to pay for one. Call on Union cemetery.

Dr. M. J. CROUCH, Union, Kentucky.

Small Farm for Sale.

Seven acres of land, modern four room house with porch on side of building, stable and corn crib, 50 fine fruit trees all bearing. This property adjoins the Hamilton Grad School property, and is one of the nicest homes in that neighborhood. For particulars call on or address J. E. MARKSBERRY, nov 8 17 Hamilton, Ky.

WANTED

If you have a small farm to sell, I have buyers for it; also buyers for 200 to 300 acres well located, commission reasonable. Send for my list or call on me at Equitable Bank and Trust Company Building. G. B. POWERS, Walton, Ky. sep 13

WANTED

Teams to haul stone. For particulars apply to C. W. GOODRIDGE, Burlington, Ky.

Dense Fogs

The fogs that prevailed two or three mornings last week were the densest that have been experienced here in a long time. They simply transformed day into night for many hours.

A Small Riot

A very striking occurrence some where on the Hill, near the Hamilton pike was reported to this office one day last week. Wednesday was designated as the day upon which the small riot took place.

132 For; 320 Against The proposed constitutional amendment was defeated by votes 132 for and 320 against. It carried in Burlington, Bullittsville, Union and Walton precincts.

Reasons!
Why you should use Cardui, the woman's tonic, for your troubles, have been shown in thousands of letters from actual users of this medicine, who speak from personal experience. If the results obtained by other women for so many years have been so uniformly good, why not give Cardui a trial?

Take CARDUI
The Women's Tonic

Mrs. Mary J. Irwin, of Cullen, Va., writes: "About 11 years ago, I suffered under misery with female trouble, bearing-down pains, headache, numbness... I would go for three weeks almost bent double... My husband went to Dr. Irwin for Cardui... After taking about two bottles I began going around and when I took three bottles I could do all my work." INCREASING KNOWLEDGE.

Lowell in his day said that "they didn't know everything down in Judea," and, in these latter days it seems almost possible that it is true. For in his day, Agur, the son of Jakeh, wrote, "There be three things which are too wonderful for me, yea, four which I know not. The way of an eagle in the air, the way of a serpent upon a rock, the way of a ship in the midst of the sea, and the way of a man with a maid." Two of these the wise Hebraist, if he were living today, would observe have been discovered, says Hartford Courant. The way of the eagle in the air has been followed, over France and England, by some, thing more heartless and cruel than the eagle. The way of the ship in the midst of the sea has been chartered by undersea boats whose captains are as ruthless as those of the aircraft; so these things mysterious in 700 B. C. are now understood of all. Nobody cares now as to the ways of the serpent upon a rock, but as to the fourth mystery the son of Jakeh is still right. For that matter he might reverse it and yet be correct.

Increased use of the national parks by the people is resulting from the course pursued during the administration of the present secretary of the interior. All national parks have been opened to automobiles. New roads have been protected of which many have been built and old roads have been improved. Large private capital has been induced to enter several national parks for the improvement of hotel and transportation service. Prices to the public have been decreased wherever possible. New concessions have been made on a basis destined to make national parks self-supporting under conditions of increased patronage, and several parks already have reached this desirable status. During the present summer thousands of Americans will visit the different national parks, in conformity with a laudable desire to "see America first."

It is all very well to talk about the peculiar psychology of the German people and their unshaken trust in Kaiser and kaiserdom. Their psychology does not prevent them from being human, and when thrones and all that thrones stand for are tottering all around them from the same causes which are vitally affecting their own interests, they are not going to be hypnotized into allowing an oppressive autocracy to stand alone and firmly rooted amid the general ruins of Europe.

It is horrifying to the average man to realize that some of his fellowmen are capable of coming money out of blood. It is this instinctive feeling to which the president has lent a voice in his appeal to coal operators and manufacturers to forego more than normal gain in the sale of their products, and thus to do what lies in their power to back up the men who are to risk their lives in the war.

The Turkish commander in Syria has closed all English, French, American and Russian schools in Syria and Palestine and says they shall not be reopened after the war. But perhaps the unspeakable Turk will have very little to say about anything after the war. What he is saying now is all the more reason why European schools should reopen in the holy land.

American institutions march on steadily around the globe. As soon as the American soldiers were in camp in France, they began playing baseball. Pretty soon baseball teams and slang will be ringing in every allied camp.

In order to save material it is said men's clothes in 1918 will be made without pockets. But by that time, perhaps, the ladies will have appropriated the garments that customarily have them.

Russia has adopted the daylight saving plan. If Russia would get busy and help to knock the daylight out of the kaiser there would be plenty of it go round.

Therefore the silence, now, of those artists who claimed to be able to do the nutcracker of a pound of beef into a tiny couplet?

A court decision that an employer may give his stenographer a father, is also doesn't interest the homely mother much.

The world will be organized as a human family. Meaning, it is in a brick on the vast open prairie.

FALSE RUMORS

Were Made In All Sections of Kentucky During Recent Campaign.

Every lie ever incubated by the hummies was worn threadbare for campaign purposes in the rural sections during the recent county campaign, according to statements made by men coming to the capital from every section of the state. In some places they were brazenly effective, because they were whispered out behind the corner to credulous folk, who do not read, and naturally are suspicious of what they do not understand.

All the stories the Committee on Publicity, the Red Cross officers and the Secretaries of War and Navy have been denying through the press, were passed on by word of mouth and a new crop of false rumors will be sweeping over Kentucky in the next few weeks. It is believed, from the back reaches of the Commonwealth.

Maybe they haven't been knitting much on sweaters, so the foul rumors that the Red Cross sells them instead of turning them in to the army may not have been used; but everyone told of the spread around the county, and the government is preparing to take a census of the canned goods and other provisions in the cabin and seize them.

The draft, they were told, is used for political purposes and is easy to convince parents whose sons are called, that they were discriminated against when the son of somebody else was exempted, for reasons they did not comprehend.

The war was attributed to the greed of Wall Street for investments and steel and powder manufacturers for profit. Credulity, selfishness and cowardice were played upon to such an extent that there has been talk of reporting some small fry politicians to the Secret Service; and approval has been expressed by many who charge that the insidious poison of sedition may produce results that will bring disgrace on the state.

One optimist, however, suggested the cure that he believes the state campaign of 1918 will produce campaign oratory. He said the local slogan was "the duty of every citizen to stand behind them and denouncing the treason of false reports."

He said the campaign will do good in Kentucky far beyond the immediate political results of it, in bringing the truth about the regions where a large number of people are prone to be loyal to everything that is theirs—their country, state and relatives—and to fight for them.

TWO MEN HURT AUTO WAS WRECKED.

Police Judge, M. D. Gray and W. B. Elam, Badly Hurt in Auto Accident.

Police Judge M. D. Gray, and W. B. Elam, both residents of North Main street, were seriously injured when the car in which they were riding turned over on the sharp grade just on the outskirts of Williamstown, on North Main street last Saturday morning. The Gray sustained a broken leg just above the ankle and other minor injuries. Mr. Elam received internal injuries, his back being painfully wrenched. Both men are laid up for repairs and it may be several days before they are able to be out. It is not thought that the injuries sustained will be permanent. The accident occurred shortly before eight o'clock. They had started in Elam's car to do some surveying near Downingville. When they reached the curve the car was running at a high rate of speed and Mr. Elam who was driving gave the steering wheel too quick a turn, whereupon the car was turned over on its side and was lifted off the car which had to be lifted off the wreckage. Gray was shown clear of the wreckage. Grant County News.

At Their New Home Mr. and Mrs. L. C. Yager and daughters, Elaine and Grace, have recently moved from Kentucky to this city and are now nicely located on North Broadway. Another daughter, Mrs. Virginia, is teaching at the old home, but will join her parents here at the close of the school year. Mr. Yager and family are welcomed as residents of our city as they come from old and well known Kentucky families. Mr. Yager will have charge of the bookkeeping department of the Brunswick-Wild Co., Greensburg, Ind., exchange.

A Very Narrow Escape.

Chas. Youell, who lives near Linaburg, had an experience late last Saturday afternoon that came near causing his hair to turn white. He was riding along with a young man, and in some unaccountable way one end of a loose wire became fastened around one of the axles of his car, while the other end became securely wrapped around one of his ankles. The mare began kicking furiously, and using a good deal of pulling himself into an adjoining stall, and while in a prostrate position released himself, but not until the planks between him and the mare had been reduced to splinters by her heels. When Mr. Youell reached safety he was almost exhausted, and it was some time before he discovered that his injuries were only slight.

APPOINTED JAILER

C. A. Fowler Appointed to Fill Out Unexpired Term of J. S. Adams.

Judge Cason entered the following order in the county court, last Thursday:

R. M. Wilson having been appointed jailer to fill the unexpired term of J. S. Adams, resigned, and said R. M. Wilson having resigned said office, it is now ordered by the court that C. A. Fowler be appointed jailer of Boone county, Kentucky, to fill said vacancy, and said C. A. Fowler being present in court, thereupon entered into and acknowledged bond to the Commonwealth of Kentucky in the penal sum of five hundred dollars and qualified as such official with C. Roberts and S. W. Tolin bondsmen.

It will be seen by the above order that Mr. Fowler is appointed to fill out the unexpired term of J. S. Adams, unexpired term, at the conclusion of which an appointment will be made to fill the office until the next regular election for which a jailer will be elected unless Wilson should recover his health in the next few weeks and conclude to take the office for which he held a certificate of election. It is not very often that an office is enveloped in so many unexpected conditions as that which surround the office of jailer in this county.

HOW TO GATHER SEED CORN.

It Should Be a Special Task, Preceding and Not Incidental to Husking.

At corn-ripening time, drop all other farm business, says the U. S. Department of Agriculture, and select twice as much seed corn as you think you will need. The job is too important to be conducted hastily and without husking, demands the entire attention of the farmer when the time is ripe—like-wise the corn. The very best way to ban and preserve seed corn is to husk it. The corn expert's increased yields will return more profit than from any other work that can be done on the farm. The one and only proper way to select seed corn is from the stalks standing where they grow, as soon as ripe and before the first hard freeze.

As soon as the crop ripens the wise farmer will go through the field with seed-picking bags, and husk the ears from the stalks that have produced the most corn without having any special advantages such as space, moisture, or fertility. He will pass by the large ears in stalks, standing alone with an unusual amount of space around them. Strains that do well in competition for light and moisture, and so the fertility are likely to repeat under the same conditions. The most important consideration is to select seed from those plants which have the largest quantity of dry shelled corn.

Early maturity is a desirable quality, and so are such thick, wind-firm stalks; too-heavy ones with ears borne too high are likely to mean losses. Breeding experiments have proved that the tendency to produce suckers is hereditary in corn. Other things being equal, take the seed from suckers stalks.

Traveling Southward.

For the past few weeks hundreds of tourists from the northern states have passed thru Walton enroute to the sunny South where they intend to spend the winter months thus escaping the rigid winters of the northern states. They drive thru in their cars, carrying tents and equipment with them, and coming out on the way down until they reach the point that suits them best. The greater part of the tourists come from Indiana, Illinois and Ohio, with a large sprinkling from the eastern states. Many stop over night here and then leave early in the morning.

Big Day at Union.

Tomorrow will be an educational field day at Union, when spelling contests will be pulled off, an educational meeting will be held and the large crowd along the educational line will be indulged in. A very large crowd of those interested in educational matters is expected. Dinner will be served at the school house.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of November 22nd, 1877

Invitations are put for a Thanks giving party to be given by Morning Star Dancing Club at Florence.

The attendance at the church last Sunday was very large, many could not get into the house.

Three vacant dwellings in Burlington.

Born, Nov. 15th to Joshua Rice and wife a daughter; and on the 16th to William Beasley and wife, a daughter.

A thief entered the home of W. I. Rouse and stole beef and preserves, and John Popham, living in same neighborhood lost a barrel of flour by thief route.

O. G. Woolly has erected a \$141 monument over the graves of his children in Big Bone cemetery.

The bucket of kerosene saved the Sandford House last Thursday afternoon. The fire was in the second story.

The following appeared under the headline "To Whom It May Concern": It appears that the season for making is now slowly encroaching upon our borders, and many youths are succumbing to its beguiling influence; and whereas, Parties wishing to embark on the billows of the matrimonial sea are required by the law of the land to procure a proper license from the High Clerk of the County Court before pushing out their bark from the desolate shores of single cussedness; and

Whereas, The High Clerk and his Deputy are zealous friends to all seeking consolation and assistance in their arduous fits while struggling to apply for their papers, and will supply for their need the soothing of the affrighted widow except the \$1.50; and whereas, Great and unnecessary trouble and above all delay is frequently caused by an improper equipment for the legal encounter with the statutes in the Clerk's office; therefore, to remedy those evils be it

Resolved, That no man need apply for a license to marry a woman of Boone county who is under 21 years of age, unless he call upon Mr. L. H. Dills, or his Deputy, armed and equipped and accoutred as the law requires; and that the man going along the maid's dady or guardian, and have them drilled to say yea and amen—also, bring from them "a bill of exorcising signed and attested by true-hid witnesses, who have been to the High Clerk before, and over whose oath the High Clerk can write the words, "truth, verity and above all delay."

2. That no man shall have a license to marry a woman over 21 unless she come with him to the High Clerk and pray for the papers, or unless she send a duly attested Clerk a bill written-with ink, and attested as before.

Remember the Clerk, and that he will not give a license except the law be complied with, more especially the \$1.50; for of such sums doth his subsistence come.

Remember also, all applicants that marrying is no secret matter, and that it is not prudent to mope about for a week, or hump up a forehead the Clerk's stove like a dromedary or frozen rearing for the longer you wait the more you will shrink and the weaker your stomach gets, and at last you will have to pay the \$1.50 of the party of the law this subject of marrying would be sometimes irksome to the Clerk. I have known him to wonder many a time how a man could argue have made his man dumb.

N. B. Pay divorce fees and funeral expenses, at least, before applying for second license, even if the Clerk loses his second bite at your loaf.

Union—Miss Mattie Talbott is visiting in Bourbon county.—Miss Clements is spending the week in Walton.—Rev. E. W. Bedinger delivered a very interesting discourse here last Sunday.

Springtown.—Prof. O. Snyder's school is well attended.—Rev. Reed will preach at Ashby Fork school house on the fourth Sabbath.

Florence.—John M. Finch, Jerry Plyth, John Carpenter, Henry Ingram, Jerry Carpenter and Harry Chambers won to Grant county to hunt last week and secured 60 quails, 50 rabbits and six pheasants.

Sealtersville.—Mrs. Jno. B. Acra is a very sick.—The apple crop is almost a failure.—Hunters are paying no attention to the signs "posted."

The Breakup Didn't Come

Sunday afternoon the elements indicated a break in the fine weather which had prevailed the past week, but when Monday morning came Indian summer was just as good as over, and much to the liking of the farmers, who had made a successful drive the week before and were anxious for another week of fine weather.

Corn Showing Its Patriotism

A. L. Nichols, a farmer who resides out on the East Bend road, presented the Recorder, a few days since, with an ear of corn that displays the national colors in a very pronounced manner. They are such as to show a thorough American that his patriotism is cropping out in many ways on his farm, and his neighbors will not be surprised at any time to see him start to market with a drove of red, white and blue hogs.

Not Killing so Many Rabbits

No very large killing of rabbits has been reported. Some of the unsuccessful hunters declare that there are no rabbits to speak of this season, hence their returning from the hunt with empty game bags.

SCHOOL NOTES.

"Greek Meets Greek" at Petersburg, While The Spartan Prevails at Verona

In The High School Preliminary Contest For The County.

Bellevue, Burlington, Hebron and Petersburg High schools met at Petersburg last Friday afternoon, and by the "skin" of their teeth Bellevue won the spelling contest in the north end of the county, the margin being the least possible, as each of the others had only one word more, two of which were missed by omitting the mark of abbreviation. We were not present on account of a previous engagement to be at Verona to witness a similar program. It is reported that the trip to Petersburg was pleasant, the day interesting and the spelling profitable, all passing off in harmony, showing the true school spirit, and real feeling of fairness in rivalry and contest, yielding to the decision of the parties in charge.

At Verona the schools of Florence, Landing, Walton and Verona met and after a lengthy and spirited contest, the latter prevailed. The scores were pronounced, the scores being even, not one word having been missed by either of the contestants. Then a general and mighty war went up for the schools represented.

Then five rounds more of the most difficult words were proposed, and the contest was continued, two, consequently no decision was reached.

Then it was agreed to pronounce the more rounds, after which and before the score could be announced bedlam broke loose over the interpretation of the rule adopted just before—the last syllable of a word pronounced—conclusion followed, Florence claiming to have won and Walton and Verona protesting the same and demanding a continuance of the contest but Florence refused, claiming to have already won, and refused to continue.

It is unfortunate that the misadventure of the day, and the matter will be cleared up before next Friday.

The big meet—the all day meet, is a Union excursion, Friday, A Teachers' Association program the contest for the banner in the grades in Eng. Noah Tanner's district, and the High School Banner for the county will be contested for at that time and place.

As "in Union there is strength" we hope there shall be peace and harmony also.

We are expecting to have some entertainment in the way of sport by having basket ball some time in the afternoon.

The schools in the south end of the county are progressing equally as well as those in the north end. All pull together and success is only a matter of time.

J. C. GORDON, Supt.

JASPER BEEMON

Passes Away While Sitting In a Chair—Heart Disease The Cause of His Death.

Jasper Beemon, a bachelor, aged about 67, died suddenly at his home on the East Bend creek, last Friday evening, while resting in his chair, talking to Dr. M. A. Yelton. Heart disease was the cause of his death, he having been afflicted with it for some time. He was a son of the late Able Beemon, and was born in the home where he was buried. His funeral was held last Sunday. Being in delicate health several years ago, he made arrangements with Hubert Bachelor and wife to move into his home, take charge of his farm and care for him the remainder of his life, and at his death they to be his heirs. His property, this was a large tract of land, was well arranged and he was relieved of many of the cares of this life, as Mr. and Mrs. Bachelor looked after his welfare closely.

The services were conducted at the grave by Revs. Church and Rogers. Mr. Beemon was a quiet, industrious man and looked after his affairs only, and never indulged in unmerited criticism of any of his acquaintances. He will be missed in the neighborhood where he spent his entire life.

PROSPECTING FOR OIL.

Dr. L. H. Crysler, of Covington Locating Oil Territory and Taking Lessees in This County.—A Well to be Sunk in Middle Creek Cliffs.

The oil fever is cropping out in this county and a test well will be sunk on the land of Ralph Cason in what is known as the Middle Creek Cliffs, of which he is to receive one-eighth of the output as a royalty. Dr. L. H. Crysler, of Covington, who is president of an oil company, that is interested in that locality, and who is the moving spirit in the Middle Creek field. For many years it has been believed by some that oil existed in the Middle Creek neighborhood, and persons who were familiar with oil fields and who have seen the formation there, declared that there are every surface indication that was seen in fields that were making good. The late S. P. Brady, who was a resident of the neighborhood many years, often declared it his belief that oil could be obtained there, and said he had seen it on the surface in pools of water many years ago. The Middle Creek Cliffs consist of the wildest looking spot in Boone county, and there is no telling what is beneath the surface of the ground in that locality, and it is hoped the section will be thoroughly tested out.

LIFE IN TRENCHES

Under War Conditions To Be Experienced By Men at Camp Taylor.

Louisville, Nov. 22.—"No Man's Land" comes into existence at Camp Taylor next week on an actual warfare scale. A mile of new trenches, begun last Monday, will be completed late Saturday, with permanent walls and floors. The trenches form a scale replica of a European war front, with three lines of trenches, with permanent communications, intercommunicating trenches and full equipment for action.

Some time next week Colonel Hugh D. Wise will order a battalion of men into the trenches. Here they will live night and day and carry on an actual engagement with a hidden "enemy," with a different battalion each hour of the time, with from one to four days and nights.

Heavily loaded grenades, fully equipped field and machine pieces and all paraphernalia of warfare will be brought into the "No Man's Land." The hidden "enemy" will be about two companies of men concealed in the vicinity of a hill to the west of the attacking trenches. Late this week dynamite will be used to throw open shell craters in the enemy territory, and these will be the principal object of attack. Every possible angle of attack, every warfare will be introduced at all hours of the night and day by French officers in charge of the trenches.

Always Expects a Chicken Dinner

Among those who sought this territory last week for a hunt, were Dr. L. H. Crysler, and Capt. and Mrs. Jacob Riel, hands to the Register the following war time recipe which she has tried and values for. Place one pound of butter and one pint of sweet milk slightly warmed into a large bowl which must also be warm. With a Dover egg beater beat until the mixture is absorbed which will be in about twenty minutes. Add salt to taste and put in a cool place. This makes about twice the original amount. Try it—Lawrenceburg Register.

Two Pounds From One.

Mrs. W. J. McCartney, of Chicago, who is visiting her parents, who are visiting her at Capt. and Mrs. Jacob Riel, hands to the Register the following war time recipe which she has tried and values for. Place one pound of butter and one pint of sweet milk slightly warmed into a large bowl which must also be warm. With a Dover egg beater beat until the mixture is absorbed which will be in about twenty minutes. Add salt to taste and put in a cool place. This makes about twice the original amount. Try it—Lawrenceburg Register.

Did Good Work for the Drive

Rev. David Blyth has been doing some excellent work in the interest of the Y. M. C. A. drive in this county, having made several excellent speeches at different points. In every instance he has been given excellent attention and the manner in which he presented his facts and arguments was very pleasing to those who heard him. Rev. Blyth is a strong advocate in behalf of any cause espoused, well equipped to sustain his position at any time and anywhere.

Found Furnace Out of Commission

Julius Fowler had to have the furnace at the court house repaired last Monday morning, before he could raise steam. The grate needed adjusting.

American Children's Manners.

The North American child is too often merely the by-product of marriage. It serves as an outlet for that pent-up energy which its parents cannot always reasonably take in themselves. It is petted, cajoled, pampered, over-dressed, and under-disciplined, till there is evolved a pygmy for whom the world soon grows banal, who is destitute of the pettiest of the attributes of childhood, and who surveys an already antiquated and thoroughly analyzed future with the cold eyes of an unattainable edge. The world is his football. It is smart beyond description. But there is in the forced garden of its life no sheltering bed where may bloom the flowers of graciousness or peace. Or such will be the new aristocracy, and its traditions will be of grandfathers who, by virtue of that native American long-sightedness, delivered the goods of their period and were promptly and suitably rewarded. But there will be few traditions of courtliness, scant reminders that noblesse oblige, and but scattering memories of inherited responsibilities. The sentimental dollar will still dominate. One generation was too busy to be the other will be too busy spending. The second generation offers no promise, and the third but little. The fourth will probably open a new and finer cycle.—Harper's.

Blanket Named After Inventor.

The cold winter of 1910 gave us the blanket. So, at least, says tradition, which ascribes its invention to Thomas Blanket, a Flemish merchant, who settled in Bristol, and fell from affluence to want, says the London Chronicle. Blanket and his wife, suffering from the intense cold by reason of scanty bedding and lack of fuel, he searched for something to put on the bed to increase the warmth, and found in a piece of rough, unfinished cloth that had been thrown to waste. Its success as a warmth giver suggested the manufacture of special bed covers from the same material, and these articles, to which he gave his own name, won the worthy Blanket wealth and immortality.

Wax From the Bayberry.

The recovery of wax from the bayberry was for centuries a New England household industry, and it has lately become a factory industry. The wax of the plant being generally used in the making of bayberry candles, held in high esteem for use and ornament by New Englanders. A bushel of the berries yields as a rule, between four and five pounds of wax. Another plant belonging to the same genus is the "sweetgale," which grows abundantly in the logs and marshes of Scotland. It is a small shrub with leaves somewhat like those of myrtle or willow, having a fragrant odor and bitter taste, and yielding an essential oil by distillation.

Timber Bamboo.

The plantings of the Oriental timber bamboo in northern Florida and Louisiana have grown to a height of 25 feet, and there is no longer any question about their readiness to give us good cane comparable to those which they produce in China and Japan. A quick method of their propagation has been worked out so that it will be now possible to supply large enough quantities of the young plants to set out many small areas throughout the South. From the Carolines to California wherever there is sufficient moisture and the land is not too high priced to admit of their cultivation.

A Healthful Drink.

Buttermilk is a most healthful drink. If people would drink buttermilk instead of whisky, it would probably be better for all concerned. Scientists tell us that there are germs in sour milk which fight against the germs causing death to the human body. It is also said that buttermilk has a tendency to lengthen life. People in some parts of Europe drink largely of sour milk, and these live to a very great old age.—Prof. H. H. Dean.

An Unusual Bird.

A black loon was shot in Washoe Lake, Cal. Such a bird had never been seen before, and it is supposed to have been driven out of its course by a storm while migrating south from the Arctic regions. The bird was a monster, measuring eight feet from tip to tip of its expanded wings, and nearly six feet from the point of its bill to the end of its tail.

Fur Trade Our Oldest Industry.

The oldest industry in New York is the fur trade. As early as 1615 a Dutch syndicate colonized Manhattan Island with a few families who devoted their time to procuring for shipment to Holland the furs they received in trade with the Indians.

Carried Flag Around World.

The resolution for the adoption of the Stars and Stripes as the American emblem was passed by the Continental Congress June 14, 1777. An American ship, the Columbia, carried the American flag around the world in 1797-1799.

Chase the Ants.

Have you been troubled with little ants around the sugar box? You can get rid of them without having disagreeable bug killers around the house. Just draw a heavy cloth line a few feet from the box and the ants will be gone. They won't come back.

Select Kitchen Waste.

Before Feeding Poultry.

When kitchen and table waste is to be fed poultry it should be selected and prepared with a view to getting its full value and at the same time making it entirely acceptable to the birds. Not all of the refuse and scraps from the kitchen is suitable for poultry food. Some things, as vegetable peelings, may be used when they constitute only a small part of the scraps, but when they are in excessive quantities it is better to dispose of them separately.

The same is true to coffee grounds and tea leaves. Fat meat in large pieces should not be put with scraps for poultry because a hen can swallow a much larger piece of fat than is good for her. By cutting waste fat meat into small pieces, the danger in feeding fat is avoided.

The best way to save kitchen waste for poultry is to keep a barrel or a galvanized can in a convenient place, putting into this scraps of bread, cake and meat from the table remnants of servings of vegetables, cereals, pies, puddings, etc., and whatever waste from the preparation of meals is suitable to combine with these things in a mash.

Once a day the contents of the jar should be turned into a pail of warm water, and as much ground feed stuff mixed with them as can be stirred in with a strong iron spoon or a wooden stirring stick. The amount and kind of ground feed to be used will depend upon the quantity of water with the scraps and whether any particular article is prominent.

For thickening a mixture of scraps of ordinary variety a mixed meal of equal parts by weight, of corn meal, bran, and middlings is good. If there is an unusual proportion of very rich food in the scraps it may be desirable to use bran alone for thickening. The more meal the better. Mixing can be done much more easily and thoroughly by mixing in a small barrel having a capacity about three times the amount of the scraps mixed at one time.

If the mash with scraps makes more than one meal for the flock, the mash should be kept covered until the next feeding. As a rule it is not advisable to feed such a mash often more than twice a day, but if mixed quite dry it may be fed three times. The occasion for this will exist only in the case of a very abundant meal when thickened with meal they may be made the exclusive diet. This is not as good a ration as one containing a large amount of grain, but it may be used a long time without bad results.

The Local Banks Will Assist.

The two banks in Burlington have consented to become members of the Louisville Courier-Journal Christmas Cheer Committee, and either bank for that purpose will have the privilege of placing in the big Christmas tree in front of each regimental headquarters from which the gifts sent from the folks back home will be distributed to the boys. Gifts from any citizen will be gladly received, and they can rest assured that they will be appreciated by the boys.

Game Warden Chas. Seales and his deputy P. Broste, were in Burlington, Monday, putting up the game law "Don't Cards" and incidentally looking after violations of the law. They have been very busy this fall, and have issued several citations of violation of the law. So far as Boone county is concerned the game laws are pretty well observed, and the warden will have his deputy find but little to detain them in the county.

Washington, D. C.—An order signed by Secretary of Agriculture D. F. Houston limits on December 1 from 5,520 square miles in Southern States the Federal quarantine against movement of Southern cattle. It is of great importance to cattle raisers and dealers of Northern States as well as those of the South. In regions infested by the cattle tick it has not been held safe to import better stock for the improvement of Southern herds because cattle freshly brought in from regions where the tick is not prevalent are especially prone to sicken and die from the fever germs carried by the blood sucking parasite. The Federal quarantine against the cattle tick, on the other hand, has prevented the shipment of cattle from infested sections for use as stock and feeders in free territory, and permits their shipment into free territory only under quarantine restrictions and for immediate slaughter.

The release order for December 1st frees the largest amount of territory liberated at one time since the Federal campaign against the cattle tick was started in 1906, and added to 4,234 square miles freed in March and September, will make 1917 by far the greatest year so far in the annihilation of the tick.

Nine Southern States will benefit by the release order. The largest beneficiary will be Mississippi, which will be entirely freed from quarantine and will open a broad avenue of tick-free territory from the Northern States to the Gulf of Mexico.

Even some fine weather for gathering corn.

A Sudden Shift of Scenery

None of the other participants in the great drama have been more busy or expectant than the shifters of scenery, and no act of theirs has been more sudden or surprising than that in which they substituted the mountains of Italy for the level fields of Flanders and Belgium. Have they actually transferred the stage itself to the theatre? It is not settled in sight of the Alps instead of the ocean? It is not possible. It is not even improbable. Many military experts actually believe it. "The Germans beckon unto the Italian front and with a very hearty good will we shall oblige them," says the great authority of the London Times.

Trench warfare has become too tedious, too expensive and too digging human rats out of their subterranean refuges seems likely to take forever. So far the war is too much like a drawn game. Every foot is anxious to play off the "finals." Soldiers want to get out and fight in the open instead of like woodchucks in their holes. Civilian are clamoring for great strategic movements or a battle that shall end in victory or defeat. We are weary of the stale

What is the deliberate purpose of the Germans to change their method and seek a conclusion in one way which they could not win in another? Are they pressed for time by hunger, by discouragement, by revolt? Nobody knows. Nobody knows whether the sudden shifting of the corner of gravity was an intention or accident, and nobody knows whether it will be temporary or final. But it brings a change of pressure. The altered focus is a new place. The fascinations of another sort. What we are watching now with suspended breath in the impetuous rush of the allies to the support of their imperiled confederates. From every quarter of the globe, from heaven, earth and ocean, reinforcements are assembling—airplanes, battle ships, tanks, cannon, armies, all the munitions and energies of war. Already there are a million Germans in the field. Suppose that an equal number of the allies should gather and that both sides should draw more and more upon their forces in other fields until four or even six millions should collide in the open fields, as armies have done at Gettysburg, at Waterloo, at Marston and Jena at Tours and Marathon. It would be the anticipated Armageddon. The very foundations of the world would be shaken. Civilization itself would be at stake.

We cannot be justly blamed if our imaginations are inflamed. There is too much to be done, too many possibilities of horror and peril in this conflict. Nor can we be blamed for wishing that the suspense could be over. The strain is too great to be too terrible. Our hearts are eager for the end. And yet we do not plead for haste, nor for recklessness on land or sea. Let us be calm, deliberate, patient and utterly prepared. Let us not attempt to strike the blow until the unbidden energy of the world is in our arm, for our antagonist is the Colossus of the ages.—Enquirer.

Barkley After Ollie's Scalp

Reports from "The Purchase" indicate that United States Senator Ollie M. James may have serious opposition for the Democratic renomination next November. Congressman Allen W. Barkley, of the First District is being urged by many friends to go after Ollie's scalp in the primary, and it is understood he has taken on the proposal under thoughtful consideration. The story goes that Mr. Barkley has been assured of the support of a number of leading Democrats in various parts of the State, if he will consent to make the race.

Whether Mr. Barkley will surrender the plum he now enjoys to seek one bigger and more glorious—for his renomination for Congress is assured, if he doesn't remain to be seen. Unquestionably Mr. Barkley would make a strong race against James and if he had senatorial ambitions, it would be a number of years before he has another opportunity as tempting.

Reports are being brought to Louisville that the First District—which is a prohibition stronghold—has not been satisfied with the position taken by Mr. James in recent years on the liquor question. Mr. Barkley on the other hand is bone dry and figured prominently in the formulation of the existing Federal statute prohibiting the distillation of whisky.

Thus far Mr. Barkley is the only man who has been mentioned as a possible opponent of Senator James for the Democratic nomination. If he should enter the contest, a close fight ought to develop.—Ex.

Edgar Berkshire, who resides two miles out on the Burlington and Bellevue pike, had about 3,000 barrels of apples on his orchard this year. He gathered a very large quantity, has fed several hundred bushels to his hogs, and his neighbors have made about 20 barrels of vinegar. He has worked in apples until he is getting tired of looking at them. He has a fine orchard but never did produce a crop of apples equal to this year's.

Wm. Craddock has been having a seasons time with one of his hands, being unable to use it for some weeks.

The past week has furnished a pretty good slice of Indian summer.

LOGS

WANTED

Veneer Works,

Lawrenceburg, Ind.

Public Sale.

As administrator of Jeanette Goodridge, deceased, I will sell at public sale at the late residence of Jeanette Goodridge, about two miles north of Hebron, Boone county, Ky., on the North Bend pike, on

Saturday, Nov. 24, '17

the following property:

- 5 Milch Cows,
- 12 Ewes,
- 1 Buck,
- Set Double Harness,
- 2 Horse Collars,
- 2 Milk Cans,
- Milk Cooler,
- About 150 bus. Corn,
- 1 ton Hay.

Terms—Sums of \$5.00 and under, cash; on all sums over \$5.00 a credit of three months will be given, purchaser to execute note with good security before removing property. Notes payable at Boone County Deposit Bank, Burlington, Ky.

E. J. AYLLOR, Admr.

Farms for Sale.

No. 1—Farm of 165 acres, near Union, Boone county, Ky., well improved, plenty of tobacco land. Will sell at a low price and on reasonable terms. A splendid farm, slightly rolling and no waste land. No better value offered in Boone county.

No. 2—Farm of 73 acres, between Union and Beaver Lick, Boone county, Kentucky; 2 good houses and barns, etc., plenty of hill and ridge land; well located on pike. This is a good chance to get your money's worth.

No. 3—A farm of 160 acres, well improved, first-class farm land, lays almost level, on pike about 2 miles from Union, towards Beaverlick.

No. 15—A farm of 43 acres, one-eighth of a mile from Union, Ky., large dairy farm and also, plenty of water, near Union creamery.

These are samples—we have others. Get our prices and you will look at these and other farms and buy a home. Now is the time to pay for one. Call on or write

DR. M. J. CROUCH,
Union, Kentucky.

Small Farm for Sale.

Seven acres of land, modern four room house with porch on two sides of building, stable and corn crib, 50 fine fruit trees all bearing. This property is on the Hamilton Graded School property, and is one of the nicest homes in that neighborhood. For particulars call on or address

J. E. MARKSBERLY,
Harrison, Ky.

WANTED

If you have a small farm to sell, I have buyers for it; also buyers for 20 to 300 acres well located, commission reasonable. Send for my list or call on me at Equitable Bank and Trust Company Building.

G. B. POWERS, Walton, Ky.

WANTED

Teams to haul stone. For particulars apply to

C. W. GOODBRIDGE,
Burlington, Ky.

Dense Fogs

The fogs that prevailed two or three mornings last week were the most dense that have been experienced here in a long time. They simply transformed day into night for many hours.

A Small Riot

A very stirring occurrence some where on the Rabbit Hash and Hamilton pike was reported to this office one day last week. Wednesday was designated as the day upon which the small riot took place.

132 For; 320 Against

The proposed constitutional amendment was defeated in votes in the county, there being 22 for and 320 against. It carried in Burlington, Bullittsville, Union and Walton precincts.

Erlanger, Ky.

INCREASING KNOWLEDGE.

Lowell in his day said that "they didn't know everything down in Judea," and, in these latter days it seems almost possible that it is true, for in his day, Agur, the son of Jacob, wrote, "There be three things which are too wonderful for me, yea, four which I know not. The way of an eagle in the air, the way of a serpent upon a rock, the way of a ship in the midst of the sea, and the way of a man with a maid." Two of these the wise Hebrew, if he were living today, would observe have been discovered, says Hartford Courant. The way of the eagle in the air has been followed, over France and England, by something more heartless and cruel than the eagle. The way of the ship in the midst of the sea has been charted by undersea boats whose captains are as ruthless as those of the aircraft; so these things mysterious in 700 B. C. are now understood of all. Nobody cares now as to the ways of the serpent upon a rock, but as to the fourth mystery the son of Jacob is still right. For that matter he might reverse it and yet be correct.

Increased use of the national parks by the people is resulting from the course pursued during the administration of the present secretary of the interior. All national parks have been opened to automobiles. New roads have been protected of which many have been built and old roads have been improved. Large private capital has been induced to enter several national parks for the improvement of hotel and transportation service. Prices to the public have been decreased wherever possible. New concessions have been made on a basis designed to make national parks self-supporting under conditions of increased patronage and several parks already have reached this desirable status. During the present summer thousands of Americans will visit the different national parks, in conformity with a laudable desire to "see America first."

It is all very well to talk about the peculiar psychology of the German people and their unshaken trust in kaiser and kaiserdom. Their psychology does not prevent them from being human, and when thrones and all that thrones stand for are tottering all around them from the same causes which are vitally affecting their own interests, they are not going to be hypnotized into allowing an oppressive autocracy to stand alone and firmly rooted amid the general ruins of Europe.

It is horrifying to the average man to realize that some of his fellowmen are capable of coming money out of blood. It is this instinctive feeling to which the president has lent a voice in his appeal to coal operators and manufacturers to forego more than normal gain in the sale of their products, and thus to do what lies in their power to back up the men who are to risk their lives in the war.

The Turkish commander in Syria has closed all English, French, American and Russian schools in Syria and Palestine and says they shall not be reopened after the war. "But perhaps the unspeakable Turk will have very little to say about anything after the war. What he is saying now is the more reason why European schools should reopen in the holy land."

American institutions "march" on steadily around the globe. As soon as the American soldiers were in camp in France, they began playing baseball. Pretty soon baseball teams and slang will be ringing in every allied camp.

In order to save material it is said men's clothes in 1918 will be made without pockets. But by that time, perhaps, the ladies will have appropriated the garments that customarily have them.

Russia has adopted the daylight saving plan. If Russia would get busy and help to knock the daylight out of the kaiser there would be plenty of it to go round.

Wherefore the silence, now, of those scientists who claimed to be able to put the nutriment of a pound of beef-steak into a tiny capsule?

The court decision that an employer may give his stenographer a fatherly kiss doesn't interest the homely stenographer much.

Eventually the world will be organized as one big human family. Meanwhile the fighting is brisk on the various fronts.

FALSE RUMORS

Were Made In All Sections of Kentucky During Recent Campaign.

Every lie ever incubated by the hummies was worn threadbare for campaign purposes in rural sections during the recent county campaign, according to statements made by men coming to the capital from every section of the state. In some places they were brazenly effective; because they were whispered out behind the corner to credulous folk, who do not read, and naturally are suspicious of what they do not understand.

All the stories the Committee on Publicity, the Red Cross office and the Secretaries of War and Navy have been denying through the press were passed on by word of mouth and a new crop of false rumors will be sweeping over Kentucky in the next few weeks. It is believed, from the back reaches of the Commonwealth.

Maybe they haven't been knitting on the western, so the foul slander that the Red Cross sells them instead of turning them into the army may not have been used; but everyone told of the report was called the county trials that the government is preparing to take a census of the canned goods and other provisions in the cabin and seize them.

The draft, they were told, is used for political purposes and is easy to convince parents whose sons are called that they were discriminated against when the son of somebody else was exempted, for reasons they did not comprehend.

The war was attributed to the greed of Wall Street for investments and steel and powder manufacturers for profits. Credulity, suspicion, selfishness and cowardice were played upon to such an extent that there has been talk of reporting some small fry politicians to the Secret Service; and apprehension has been expressed by many who camp here that the insidious poison of sedition may produce results that will bring disaster on the state.

One optimist, however, suggested the cure that he believes the state campaign of 1918 will produce—campaign oratory. He said in the senatorial and congressional campaigns orators of both parties will stump every corner of Kentucky and everyone of these will be a patriot and a defender of the purest brand.

These people, who do not read and whose minds have been poisoned by the local newspaper falsehoods of the local politicians to the speakings and they will hear Democrats and Republicans blaming this cause of their country's ruin on the glory of the youth who are fighting for the duty of every citizen to stand behind them and denouncing the reason of false reports.

He said this campaign will do good in Kentucky far beyond the immediate political results of it, in bringing the truth about the cause to the people of remote regions whose natural tendency is to be loyal to everything that is theirs—their country, state and relatives—and to fight for them.

TWO MEN HURT AUTO WAS WRECKED.

Police Judge, M. D. Gray and W. B. Elam, Badly Hurt in Auto Accident.

Police Judge M. D. Gray, and W. B. Elam, both residents of North Main street, were seriously injured when the car in which they were riding was wrecked on the sharp grade just on the outskirts of Williamsburg, on North Main street last Saturday morning. The car was driven by W. B. Elam, who had a broken leg just above the ankle and other minor injuries. Mr. Elam received internal injuries, his back being painfully wrenched. Both men are laid up for repairs and it may be several days before they are able to be out. It is not thought that the injuries of either will be permanent. The accident occurred shortly before eight o'clock. They had started in Elam's car to do some surveying near Williamsburg. When they reached the curve they were running at a high rate of speed and Mr. Elam who was driving gave the steering wheel too quick a turn, so that the car was turned over. Elam was pinned under the car which had to be lifted off him. Gray was thrown clear of the wreckage. Grinn County News.

At Their New Home Mr. and Mrs. L. C. Yager and daughters, Eloise and Grace have recently moved from Kentucky to this city and are now nicely located in a North Broadway. Another daughter, Virginia is teaching at the old home but will join her parents here at the close of the school year. Mr. Yager and family are welcomed as residents of our city. They came from old and well known Kentucky families. Mr. Yager will have charge of the book-keeping department of the Ironwell Works Co., Greensburg, Ind., where he has been for some time.

A Very Narrow Escape.

Chas. Youell, who lives near Lima, had an experience late last Saturday afternoon that came within a hair's breadth of turning white. He was using a bale of straw with which to feed a young mare for the night, and in some unaccountable way one end of a loose bale became fastened around one of the animal's hind legs while the other end became securely wrapped around one of his ankles. The mare began kicking furiously, throwing Mr. Youell down, after which he succeeded in pulling himself into an adjoining stall, and while in a prostrate position released Wilson's but not until the planks between him and the mare had been reduced to size by her heels. When Mr. Youell reached safety he was about exhausted and it was some time before he discovered that his injuries were only slight.

APPOINTED JAILER

C. A. Fowler Appointed to Fill Out Unexpired Term of J. S. Adams.

Judge Cason entered the following order in the county court, last Thursday:

R. M. Wilson having been appointed jailer to fill the unexpired term of J. S. Adams, resigned, and said R. M. Wilson having resigned said office, it is ordered that C. A. Fowler be appointed jailer of Boone county, Kentucky, to fill said vacancy, and said C. A. Fowler being present in court, he holds a certificate of acknowledgment bond to the Commonwealth of Kentucky in the penal sum of five hundred dollars and such other such official bond as the court may require, with C. C. Roberts and S. W. Tolin bondmen.

It will be seen by the above order that Mr. Fowler is appointed to fill the unexpired term of J. S. Adams, unexpired term, at the conclusion of which an appointment will be made to fill the office of jailer of Boone county, Kentucky, and the office of jailer will be elected unless Wilson should recover his health in the next few weeks and conclude to take the office for which he holds a certificate of election. It is not very often that an office is enveloped in so many unexpected conditions as this one, and the office of jailer in this county.

HOW TO GATHER SEED CORN.

It Should Be a Special Task, Preceding and Not Incidental to Husking.

At corn-ripening time, drop all other business, and get to work. The Department of Agriculture, and select twice as much seed corn as you think you will need. The job is too important to be conducted in a haphazard manner, and demands the entire attention of the farmer when the time is ripe—like the corn. Preserve it well, because the yield will return more profit than from any other work that can be done on the farm. The one and only proper way to select seed corn is from the stalks standing where they grow, as soon as ripe and before the first hard freeze.

As soon as the crop ripens the farmer will go through the field with seed-picking bags, and husk the ears from the stalks that have produced the most corn without having any special advantages such as space, moisture, or fertility. He will select the large ears, stalks standing alone with an unusual amount of space around them. Strains that do well in competition for light and moisture under the same conditions. The most important consideration is to select the ears from the plants which have the largest quantity of dry shelled corn.

Early maturity is a desirable quality, and so is short, thick wind-firm stalks; too-heavy ones with ears borne too high are likely to mean losses. Breeding experiments have proved that the tendency to produce suckers is hereditary in corn. Other things being equal, take the seed from suckers.

Traveling Southward.

For the past few weeks hundreds of tourists from the northern states have passed thru Walton enroute to the sunny South where they will spend the winter months thus escaping the rigid winters of the northern states. They drive thru in their cars, carrying tents and equipment with them, and camping out on the way down until they reach the point that suits them best. The greater part of the tourists come from Indiana, Illinois and Ohio, with a large sprinkling from the eastern states. Many stop over night here and then leave early in the morning.

Big Day at Union.

Tomorrow will be an educational field day at Union, when spelling contests will be pulled off, an educational meeting will be held and other things along the educational line will be indulged in. A very large crowd of those interested in educational matters is expected. Dinner will be served at the school house.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of November 22nd, 1877.

Invitations are out for a Thanksgiving party to be given by Morning Star Dancing Club at Florence.

The attendance at Hopeful church last Sunday was very large, many could not get into the house.

Three vacant dwellings in Burlington.

Born, Nov. 15th to Joshua Rice and wife, a daughter; and on the 16th to William Beasley and wife, a daughter.

A thief entered the home of W. L. Rouse and stole beer and preserves, and John Popham, living on State street, lost a barrel of flour in a thief route.

O. G. Woolly has erected a \$141 monument over the graves of his children in Big Bone cemetery.

The bucket brigade saved the Sandford House last Thursday afternoon. The fire was in the second story.

The following appeared under the headline "To Whom It May Concern":

Whereas, It appears that the season for mating is now slowly encroaching upon our borders, and many youths are succumbing to its beguiling influence; and Whereas, Parties wishing to embark on the billows of the matrimonial sea are required by the law of the land to procure a proper license from the High Clerk of the County Court before pushing out their bark from the desolate shores of single cussedness; and

Whereas, The High Clerk and his Deputy are zealous friends to all seeking consolation and assistance in their ague fits while struggling with their passions, and will surrender all for the soothing of the affrighted swain except the \$1.50; and Whereas, Good and necessary trouble, and above all delay is frequently caused by an improper equipment for the legal end of the matter, the High Clerk's office, and therefore, to remedy those evils, be it

Resolved, That no man need apply for a license to marry a woman, or a woman for a license to marry a man, under 21 years of age, unless he call upon Mr. L. H. Dilla, or his Deputy, armed and equipped and let that man bring along the maid's dady or guardian, and have them drilled to say yea and amen; else, being from them a rule, writing and attested by a truthful witness, who hath been to the High Clerk before, and over whose oath the High Clerk can write the words, "truth, verily."

2. That no man shall have a license to marry a woman over 21 unless she come with him to the High Clerk and let him sign the papers, or unless she send the attested Clerk a bill written with ink, and attested as before.

Remember, all applicants that marrying is no secret matter, and that it is not prudent to mope about for a week, or hump up before the Clerk's stove like a dromedary or a zebra waiting for the longer you wait the more you will shrink and the baker your stomach gets, and at last you have to say it. Barring the \$1.50 part of the law, this subject of marrying would be sometimes irksome to the Clerk. I have known him to wonder many a time if the law he gave had made him a man dumb.

N. B. Pay divorce fees and funeral expenses, at least, before applying for a second license, even if the Clerk loses his second bite at your loaf.

Union—Miss Mattie Talbot is visiting in Bourbon county. Miss Dora Clements is spending the week in Walton.—Rev. E. W. Bedinger delivered a very interesting discourse here last Sunday.

Springtown.—Prof O. Snyder's school is well attended.—Rev. Redd will preach at Ashby Fork school house on the fourth Sabbath.

Florence.—John M. Finch, Jerry Blyth, John Carpenter, Henry Ingram, Jerry Carpenter and Harry Clark were sign Grant county to hunt last week, and brought home 60 quails, 50 rabbits and six pheasants.

Scatterville.—Jno. B. Acra is very sick. The apple crop is almost a failure.—Hunters are paying no attention to the signs "posted."

The Breakup Didn't Come

Sunday afternoon the elements indicated a break in the falling weather which had prevailed the past week, but when Monday morning came Indian summer was on the job again. Very much to the liking of the farmers, who had made a successful drive the week before and were anxious for another week of fine weather.

Corn Showing its Patriotism

A. L. Nichols, a farmer who resides out on the East Bend road, presented the Recorder, a few days since, with an ear of corn that displays the national colors in a very pronounced manner. They say Mr. Nichols is such a thorough American that his patriotism is cropping out in many ways on his farm, and his neighbors will not be surprised any time to see him start to market with a drove of red, white and blue hogs.

Not Killing so Many Rabbits

No very large killing of rabbits has been reported. Some of the unsuccessful hunters declare that there are no rabbits to speak of this season, hence their returning from the hunt with empty game bags.

SCHOOL NOTES.

"Greek Meets Greek" at Petersburg, While The Spartan Prevails at Verona

In The High School Preliminary Contest For The County.

Bellevue, Burlington, Hebron and Petersburg High schools met at Petersburg last Friday afternoon, to compete in their teeth Bellevue won the spelling contest in the north end of the county, the margin being the score possible, as each of the other schools missed one or two of two of which were missed by omitting the mark of abbreviation. We were not present on account of a previous engagement but at Verona witnessed a similar program. It is reported that the trip to Petersburg was pleasant, the day interesting and the spelling profitable, all passing off in harmony, showing the true school spirit, and real lesson of fairness in rivalry and contest, yielding to the decision of the parties in charge.

At Verona the schools of Florence, Landing, Walton and Verona met, after a lengthy and spirited contest in which fifteen rounds were pronounced, the scores being even, not one word having been missed by either of the contestants. A general and mighty cheer went up for all schools represented.

The five rounds more of the preliminary words were pronounced, of which the first round missed two, consequently no decision was reached.

Then it was agreed to pronounce three more rounds, after which and before the score could be announced bedlam broke loose over the interpretation of a rule adopted years before the last three rounds were pronounced. Florence claiming to have won and Walton and Verona protesting the same, and demand a continuance of the contest, but Florence refused, claiming to have already won, and refused to continue.

It is understood that the misunderstanding arose, and it is hoped the matter will be cleared up before next Friday.

The big meet—the all day meet, is at Union, tomorrow, Friday. A Teachers' Association program for the contest for the banner in the grades in Esq. Noah Tanner's disbursements for the county, will be conducted for at that time and place. As "in Union there is strength" and harmony shall be peace and understanding across the county the matter will be cleared up before next Friday.

JASPER BEEMON

Passes Away While Sitting in a Chair—Heart Disease The Cause of His Death.

Jasper Beemon, a bachelor, aged about 60, died suddenly at his home across Gunpowder creek, last Friday evening, while sitting in his chair, talking to his wife, Dr. M. A. Yelton. Heart disease having been afflicted with him for some time. He was a son of the late Able Beemon, and born and reared here. He was a farmer and had a large family. He had been in delicate health several years ago, he made arrangements to move into his home, take charge of his farm and care for him the remainder of his life, and at his death they were arranged as he thought he had a good home and was relieved of many of the cares of his life, as Mr. and Mrs. Beemon looked after his welfare closely.

The services were conducted at the grave by Revs. Church and Rev. J. C. Gordon, Supt. Mr. Beemon was a quiet, inoffensive man and looked after his affairs only, and never indulged in unbecoming criticisms of any kind. He was a very kind and generous man, and his death was a great loss to the neighborhood where he spent his entire life.

PROSPECTING FOR OIL

Dr. L. H. Crisler, of Covington, Locating Oil Territory and Taking Leases in This County.—A Well to be Sunk in Middle Creek Cliffs.

The oil fever is cropping out in this county and a test well will be sunk on the land of Ralph Clifton in what is known as Middle Creek Cliffs, of which he is to receive one-eighth of the out-put as a royalty. Dr. L. H. Crisler, of Covington, who is president of an oil company, has been prospecting elsewhere in Kentucky is the moving spirit in the Middle Creek field. For many years it has been believed by some that oil existed in the Middle Creek neighborhood, and persons who were familiar with oil fields and who have seen the formation there, declared that there are every surface indication that was seen in fields that were making good. The late S. P. Brady, who was a resident of the neighborhood many years, once declared it his belief that oil could be obtained there, and said he had seen it on the surface in pools of water many times. Middle Creek Cliffs constitute the wildest looking spot in Boone county, and there is no telling what is beneath the surface of the ground in that locality, and it is hoped the section will be thoroughly tested out.

LIFE IN TRENCHES

Under War Conditions To Be Experienced By Men at Camp Taylor.

Louisville, Nov. 15.—"No Man's Land" comes into existence at Camp Taylor next week on an actual warfare scale. A mile of new trenches, begun last Monday, will be completed by late Saturday, with permanent water and floors. The trenches form an exact replica of a European war zone, with three lines of trenches, secret communications, communicating trenches and full equipment for action.

Some time next week Colonel H. W. Wise will order a battalion of men into the trenches. Here they will live night and day and carry on an actual engagement with a hidden "enemy."

Heavily loaded grenades, fully equipped field and machine pieces and all the paraphernalia of warfare will be brought into play. The hidden "enemy" will be about two companies of men concealed in the vicinity of a hill to the west of the attacking trenches. Late this week dynamite will be used to throw open shell casings and these, used to shield the members of the opposing battalions, will be the principal object of attack. Every possible angle of modern warfare will be introduced at all hours of the night and day by French officers in charge of the trenches.

Always Expects a Chicken Dinner

Among those who sought this territory last week for a hunt were Dr. L. H. Crisler and son, Capt. and Mrs. Jacob Rief, hands to the Register the following year recipe which she has tried and vouches for. Place one pound of butter and one pint of sweet milk slightly warmed into large bowl which must also be warm. Bowl a Dover egg beater beat until milk is absorbed and will be in about twenty minutes, and salt to taste and put in a cool place. This makes about twice the quantity of dressing. Try it—Lawrenceburg Register.

Did Good Work for the Drive

Rev. David Blyth has been doing some excellent work in the interest of the Y. M. C. A. drive in this county, having made several excellent speeches at different points. In every instance he has been given excellent attention and the manner in which he presented his facts and arguments was very pleasing to those who heard him. Rev. Blyth is a strong advocate in behalf of any kind of causes, well equipped to sustain his position at any time and anywhere.

Found Furnace Out of Commission

Jailer Fowler had to have the furnace at the court house repaired last Monday morning, as the furnace had become out of commission. The grate needed adjusting.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

R. Lee Huey, of near Landing, spent Saturday here with friends.

W. Harrison Chapman of Gallatin county, spent Tuesday here on business.

Mrs. Chas E. Poor visited relatives and friends in Cincinnati the first of the week.

Legrand Gaines, of Burlington, spent last week here, guest of his son, W. Lee Gaines.

W. Lee Gaines spent Saturday in Owen county, buying some mules for the southern market.

Edward Farrell, a prominent citizen of Verona neighborhood, was here on business Monday.

Miss Alecia Neumister enjoyed a pleasant visit to relatives and friends at Cincinnati Saturday and Sunday.

H. A. Faber of Cincinnati, president of the Formica Insulation Co., was a visitor to friends here Saturday.

Miss Mary Hance left last week for Hardy, Ky., to accept a position in the sales department of a large store.

Wm L. Johnson of Covington, Ky., spent Sunday here, and was the guest of his son, Alford Johnson and family.

Walton Odd-Fellows Lodge entertained with an oyster supper last Saturday night which was a very enjoyable affair.

Mrs. J. E. Bristow spent from Saturday until Monday in Cincinnati the guest of her son Doctor Chas Jones and wife.

Mrs. Sidney Hume returned to her home at Indianapolis last week after a pleasant visit here to relatives and friends.

Geo. W. Murphy, who is at St. Elizabeth's hospital, Covington, undergoing treatment for a cancer on the face, is no better.

Dr. H. W. Hamilton of Chicago, who is enjoying a couple of weeks vacation at his old home, Verona, called on friends here Saturday.

Judge J. G. Tomlin spent Tuesday at Warsaw attending to some cases he had in the Gallatin circuit court in session there this week.

John T. Osborn and family moved from Folsom, Grant county, to Walton last Saturday and occupy the Harry Riley property bought from Judge J. F. Felt.

Amie Dugan of Switzerland county, Ind., was a visitor here last week, and spent part of the week with his brother Carroll Dugan who recently bought the White Haven farm near Union.

Claude Wayland, who is in the army service at Camp Taylor, Louisville, spent last Sunday here with his parents Mr. and Mrs. W. Wayland. He likes the service very well and is pleasantly located.

Dr. Harvey H. Roberts, of Lexington, and his brother-in-law W. H. Graves and Claude Garth of Georgetown, spent Tuesday here, Dr. Roberts coming to make arrangements about his farming lands near town.

Rev. R. H. Carter, of Petersburg, filled the pulpit at Walton Christian church Sunday morning and evening in the absence of the pastor Rev. E. C. Carter, who is engaged in a protracted meeting in Petersburg.

K. B. Norman, of Covington, was visiting his farm near here last Sunday, and is highly interested in his investment. He states that several of his acquaintances contemplate the purchase of property in this locality.

Raymond M. Renaker who is employed in Louisville at the Balkan Hardware Company for the purpose of preparing to go on the road as a traveling salesman, spent Saturday and Sunday here with his family.

Mr. and Mrs. Geo. W. Winters and Mr. and Mrs. C. D. Best of Warsaw, were here Sunday visiting friends. Mr. Best is contemplating the purchase of the property of J. M. Arnold with a view to moving to Walton.

C. L. Young sold his 93-acre farm in Grant county, to Walter O'Connell of Grant county for \$5,000, possession to be given in February. Mr. Young's son, Grover, who has been managing the farm will move to Walton.

The protracted meeting at the Walton Baptist church began last Sunday night with the pastor, Rev. Ous Hamilton conducting the services, and Herbert Davis of Louisiana, in charge of the music. The meeting will continue about two weeks.

Mrs. John E. Williams and two sons, John and Howard, expect to leave this week for Berea, Madison county, to spend the winter where the boys will attend school. Mr. Williams will be on the road most of the time in the interest of his leaf tobacco trade.

H. C. Clifford of Paris, Bourbon county, and Garnett Clifford of Harrison county, and C. T. Elizabeth, the real estate agent at Cynthiana, were here the first of the week looking over some farming lands with a view to making some purchases and moving here.

Walton Masonic Lodge conferred the Master Mason degree on A. Records Johnson at the meeting last Friday night. There was a large attendance and those from a distance were Jas. B. Metcalfe, Richard Gray, T. J. Crowe, J. Robert Coppin and Dr. B. K. Menefee, of Covington.

The Walton Loose Leaf Warehouse has been greatly improved and the facilities for the care and handling of tobacco is first class. Notwithstanding the high price being offered for tobacco by the speculators there is a small per cent sold at the grower's price the loose leaf market

to be his market and his protection. In many instances growers will not let the speculators look at their crops and will not entertain any offer whatever. The opening sale at the Walton warehouse is set for Wednesday, December 10, and it is supposed that sufficient tobacco will be ready for market to have a sale on that date.

Married—Earl C. Frakes and Miss Ida B. Cooke were united in the bonds of holy wedlock at the home of her father Robert B. Cooke in Kenton county last Saturday afternoon. Rev. J. F. DeMoisey of the Baptist church performing the ceremony in a very impressive manner in the presence of a number of relatives and friends. The young couple left for North Vernon, Indiana, to spend a week with relatives and will then return to make their home on the Cooke farm. The groom is an excellent young man, a son of Mr. and Mrs. J. W. Frakes, and the bride is a most lovable young lady, and both have many friends who wish them happiness and prosperity.

GRANGE HALL.

Born, Nov. 18th, to C. W. Craig and wife, girl.

Leo Stephens, of Cincinnati, is spending the week at home.

Miss Lucy Scott, of Arcola, Ill., is visiting her parents Mr. and Mrs. E. R. Scott.

The toll house on the pike near Rabbit Hash was sold last week to Cleve Baker.

Blufe Kirtley, Geo. Ward, Hodge and A. G. Hodge, were in Burlington, Tuesday.

Jas. Wilson, Leo Stephens and Mark Prim are visiting at T. R. Miller's, in Gallatin county.

Mark Prim and wife, of Newport, and Mr. Jones, of Cincinnati, were guests at Chas. Wilson's Sunday. All except Mr. Prim returned home Sunday evening.

Barnes-Stephens.

Dr. Barnes, of St. Petersburg, Florida, and Miss Lizzie Stephens, of Louisville, were married on the 15th inst. The groom is a prominent Florida physician and the bride is one of Northern Kentucky's most estimable ladies. Dr. Barnes and his wife are in Walton during the winter. He has lost in the habit of moving to Walton in the fall to spend the winter and the bride has begun to sing right merrily in the spring he hies himself back to the old home to spend the pleasant weather fishing and entertaining such his friends as chance, to come his way.

Everybody down on Middle creek is taking oil. Arch Acra has a spring that has been an oil producer for a time to which his mind runneth not to the contrary, but he did not recognize the oil until a stranger came along a few days since and told him what it is.

You would be surprised if told of some of the people in the county who refused to contribute anything to the Y. M. C. A. War Work. It is not because they do not believe in the Y. M. C. A. but they do not want to see their country successful in the war in which it is engaged.

In several precincts in the county changes were made in amounts contributed to the Y. M. C. A. War Work just before the paper went to press, two or three precincts increasing their amounts several dollars.

L. A. Conner has taken the fence from around his dwelling which is interpreted as a desire to be annexed to the town so as to enjoy the pleasure of paying city taxes.

This is the first year Burlington High School has failed to be one of the entries in the County High School Spelling Contest. The school held the banner two years

Five U-Boats were reported destroyed a few days ago. If the work of destroying them by flocks can be kept up, the pestiferous things may finally be wiped out.

NOTICE—Beginning the 1st day of next December I will charge 10 cents a quart for milk delivered to my milk customers in Burlington. J. M. EDDINS.

C. A. Fowler, the new jailer, has been hustling ever since he was installed. Some say he is going to annoy himself, but he answers, "no."

The posters column in the Recorder continues to grow. Send 25 cents and we will add your name. It may save a valuable animal for you.

The Burlington basket ball teams will go to Independence tomorrow afternoon to play the strong High School team at that place.

Big doling educationally at Union next Friday. Read the program in another column.

Circuit Clerk Maurer is clearing the decks for the approaching term of the circuit court.

Red Cross Notes.

With six precincts not reported over \$700 of the \$1,000 is turned in. In correction of last week, 180 hospital shirts were sent and 103 knitted sweaters.

Petersburg unit under the supervision of Miss Willis, made last week, in addition to those published, 100 9 inch compresses, 300 sponges, 20 4-inch compresses, 100 bandages. Miss Willis will give the same course in Burlington, beginning Monday afternoon. All should be present equipped with white cloth (head square 27 in.) and apron preferably with sleeves. Word has come from Washington that all workers should wear as nearly as possible this uniform.

Walton has a very interesting program planned for some evening this month. The talent is to be Mr. Tom Hughes and two other musicians from the College of Music, Cincinnati. Watch for the date.

A shipment of outing cloth will arrive within a few days and more wool sometime in the next two weeks—we hope.

For information concerning the Christmas packets, call on Mrs. A. B. Deauker, Burlington.

Walton requests that its members send in old muslin and linen to be used in packing gauze.

Many pairs of bed socks have been made by the Burlington workers, also hot water bottle covers. Try making these articles; the scraps left in cutting shirts are used.

General Manager Gibson says: "About 3,000,000 surgical dressings are now being supplied each month by the American Red Cross. This is not sufficient. We need 5,000,000 a month. At this point let me say that no supplies are sold to soldiers by the Red Cross. I want to make this plain to offset reports to the contrary."

It was decided at the last county meeting to send a pound box of candy to each "sister" town. Boone county, for Burlington each person is going to bring their candy, either bought or home-made, to headquarters and pack it there. The various units may get the number of boys by calling Mrs. Goodridge.

A GOOD MAN GONE

Rev. Geo. N. Buffington Passes Away at His Home in Erlanger, Aged 67.

Rev. Geo. N. Buffington, 67, after an illness of many months died Monday afternoon at his home in Erlanger. The funeral services were conducted at 2:30 Wednesday afternoon at Erlanger Methodist church of which he had long been a member. Rev. Bibble preaching the discourse. The deceased is survived by the widow, four brothers and one sister. Rev. Buffington was very prominent in Northern Kentucky in both religious and business circles, and was president of the Citizens Bank at Erlanger from its organization until his death. He was a most estimable gentleman, correct and upright in every walk of life, and will be sadly missed by his townsmen.

The remains were taken by Undertaker Philip Tallafiero, of Erlanger, to Highland cemetery and interred.

Soldiers and Sailors First.

American soldiers and sailors, soldiers in the trenches of Northern France, sailors upon the high seas in latitudes where even summer nights are cold, soldiers at American cantonments, are in need of sweaters.

It is asserted that more sweaters than can be made are wanted; that there is not enough wool or worsted power in America to provide more sweaters than are needed; that many of the men who have no sweaters are suffering severely because of the lack of them.

Yesterday, in the bright sunshine, but in a keen crisp wind, more than one decidedly woolly, decidedly jolly looking, decidedly attractive dog appeared in a handsome automobile in Fourth Ave., wearing a handsome sweater; wool sweaters apparently.

Ordinarily there can be no reasonable objection to clothing for deserving dogs unless it is that the dogs do not greatly need it while plenty of poor children in the neighborhood do need it, but in such an extraordinary time as this the needlessly clothed woolly dog suggests, even to persons who are fond of dogs, the great need of sweaters for soldiers and sailors, the insufficiency of means of making them as fast as they are needed, and the slogan: Soldiers and Sailors First.—C. J.

B. C. H. S. Honor Roll.

Following is the Boone Co. High School Honor Roll for the month of October:

High School—Alice Walton, Elizabeth Hensley, Owen Acra, Intermediate Room—Arthur Maurer.

Primary Room—Margaret Ryle, Robert Hensley, James Riley, Helen Walton, Zelma Rye, Elizabeth Hensley, Mary Nichols, Kelly.

Kathryn Maurer, Robert Maurer, Edgar Maurer, Leo Arlie Franks.

For Sale—Cow and calf. Apply to Harry M. Barlow, Florence R. D. No. 1.

For Sale—A fine blocky Holstein bull calf 10 months old. A good one. Apply to Ernest Hartman, Walton, Ky. Consolidated phone

A Week's News

BOONE COUNTY GOES
OVER THE TOP

A Very Successful Drive Made in This County in Behalf of Y. M. C. A. War Fund.

Walton Leads in Contributions.

When the people of any community or locality are united and working together harmoniously for the accomplishing of any object they are going to be successful as has been illustrated in the Y. M. C. A. War Council Drive just completed in this county.

When the amount for which the county had been pledged in the drive was announced, many thought it would be impossible to secure it, but the returns show that one and one-half times the amount was contributed.

The county was organized for the work and all went forward with a single object in view—the raising of the amount pledged, and when the day to report results arrived, the canvassers had gone over the top to the extent of a very handsome amount it is said to their credit.

There were only a few persons found in each precinct who turned a deaf ear to the solicitor.

Walton, where the people are always alive to everything that is meritorious, was the banner precinct, while Petersburg came second with Burlington close on her heels. Walton's contribution is \$1,035.45, nearly four times her allotment, so take your hats off to Walton.

Only two or three precincts in the county fell short of the amount for which they were called upon, and the shortage was small.

The returns from the Drive shows that the hearts, and their pocketbooks, too, for that matter, of the people of Boone county are with the boys at the front and those who are to go there shortly.

The following shows the amount each precinct contributed:

Burlington	\$ 387.35
Verona	156.00
Florence	288.25
Walton	1,035.45
Bullittsville	263.00
Petersburg	492.30
Bellevue	295.10
Big Bone	104.00

Tomorrow at School.

The Sixth District School Association will be held at Union, Friday, November 23d, beginning at 9 a. m., with exhibition work by the teachers.

PROGRAM:

Reading—Miss Jessie Lee Clegg, Union.
Sixth Grade Arithmetic—Mrs. Melvin, Union.
Geography—Miss Anna Clegg, Beaver.
Seventh Grade Grammar—Miss Ora Rouse, Hathaway.
Song—The Home of the Brave—Girls of Union School.
Conservation Lesson from Digest—Mrs. McKee, Union.
Recitation—The Conservation Lady—Jennie Clegg, Union.
Recitation—Hoover's Going to Get You—J. D. Moore.
Eighth Grade Arithmetic—Miss Eunice Adams, Hathaway.
History—Miss Maud Beemon, Landlug.

At 1 o'clock the Grade Spelling Tournament will be held.

PROGRAM:

Song—March On—Union School.
Recitation—Your Flag and My Flag—Anna Huey.
Song—Old Glory—Union School.
Grade Spelling Contest—Frogtown, Grange Hall, Beaver, Pleasant Valley, Union.
Song—Kaiser—Senior Girls Union High School.
Song—Tenting To-night—Girls of Union High School.
High School Spelling Contest.

The faculties of all the High Schools in the county, all the friends and patrons of the school are invited and urged to be present.

A Blind Man Saw the Good Move

Henry Fry, colored, of Burlington, who has been totally blind for several years heard the workers in the Y. M. C. A. drive talking the other day, and having listened until he was satisfied of what purpose the money was being raised, remarked: "I want to give a dollar for that," and pulled out the money and handed it to the solicitor, thus showing his recognition of the duty of every loyal citizen in this country. Fry is in humble circumstances, but willing to contribute his mite to defend his country. Can this be said of all who were approached by the solicitors and are in better circumstances than this blind colored man?

An Appeal to Women

An appeal has been made by Cleveland headquarters to our county chapter for Xmas packets for the men in cantonments. Many of our boys now in camp may not be remembered in any other way, and we ask 100 Boone county women to send inexpensive gifts in books, writing paper, pens, ink, etc. Colored handkerchiefs—For particulars call Mrs. A. H. Renaker, Burlington, and send in your name if YOU will be one of the hundred. Rees O. A. Vice Chairman.

PRESS COMMENT

On President Wilson's Speech To American Federation of Labor at Buffalo, N. Y.

The speech was a persuasive appeal for solidarity and for respect for the processes of law, which some citizens, with righteous indignation, have flagrantly ignored in isolated communities recently. The speech made the task of the American Federation of Labor an easy one.—St. Louis Globe Democrat.

The President did not read the delegates a lecture except in a mild way, and then he sometimes spoke with a measure of inferential reference as in his contemptuous remarks about the pacifists. But the essence of the matter was present, and those who heard could easily understand.—Detroit Free Press.

As an exposure of German ambitions, of what the issue to the world is, the necessity for the subordination and even suppression of every selfish interest for the accomplishment of a purpose vital, direct and personal to us all. Mr. Wilson's speech at Buffalo should be pondered by every American.—Pittsburg Dispatch.

Mr. Wilson reviewed the causes of the war and the Teuton crimes against civilization in a spirit that aroused the greatest enthusiasm. His well-considered appeal to all Americans to stand together should bear good fruit when labor disputes arise. If, as he said, Americans have not self-control, then they are not capable of that great thing which we call Democratic government.—New York Commercial.

Clearly and in words whose meaning cannot be misunderstood the President lays bare the menace there is for every free man in the German ambition for aggrandizement and world power. The German people had their place in the past; but the powers that rule Germany, not satisfied with the splendid achievements of peace, must needs force the world into war in order that they might get their grip upon the industry of the world, and that would mean domination by Germany of the labor of free men the world over.—New York Herald.

"The pacifists do not know how to get peace, but I do," said President Wilson in his address to the convention of the American Federation of Labor in Buffalo yesterday. And the President's way is the only way. No peace can be obtained from the German autocracy by bargain or bribe. A cessation of hostilities might come out of a conference, but that would not be peace. It would be a truce, and unless the United States, Great Britain and France remained on a war footing, armed to the teeth, Germany would strike again at the first favorable opportunity.—New York World.

It was a rather unusual President Wilson who addressed the members of the American Federation of Labor at Buffalo yesterday. In his talk, less of felicitous speech, less clever phrasing, less subtlety of thought; than is to be found in most of his addresses, but more forceful, more direct, more to the point, more than compensated for the loss of these qualities. They suggest that the man of action in him is more and more replacing that of the statesman. It is something very desirable in the present crisis of the nation.—Baltimore Sun.

An address of almost unexampled fire and frankness, Mr. Wilson's discussion of the nation's war ends opened up to the members of the Federation of Labor, but more importantly to the world, that the basis of the termination of the United States to fight the war to a finish. The world of enmity will hear and rejoice at the words of Mr. Wilson, and the portion that remains contaminated will tremble. American manhood, American labor of all elements, reverently feel they are fellow-workers with God for humanity, and they cheer the President and revere the nation's cause as set forth by their President in terms of American peace, security and solidarity.—Baltimore American.

The President made an effective appeal to labor yesterday in his address before the American Federation of Labor at Buffalo. Fortunately, his warning applies, for whom his warning applies, for most laboring men have stuck steadily by their jobs, realizing that this is to be won, it must be won in large part by them. But there are some who would do well to heed the President's words, and unhappily they are not. The President's continuous operation of which victory depends. It is for them to decide whether they wish to be considered as enemies of the United States, interested in their country's welfare, or a class by themselves working in the interest of the foe.—Indianapolis News.

The President brought the German economic system clearly to the understanding of everyone in America when he said that Germany has the same business methods which we have used by law to prevent within our own borders. What we have been less willing to do is to regulate the common people, the wage-earners, the farmers, the "little fellows" generally. Germany has been testing and encouraging, even to the point of granting

A prominent credit man recently said that he considers A Merchant who still clings to Horse and Wagon Delivery a Bad Risk.

The profit and loss account of America is being written by machinery. Methods that made men rich yesterday will make them poor today. The nose-bag has no place in a progressive community.

With corn at one dollar a bushel and gasoline at twenty odd cents a gallon the most extravagant truck is a money saver. But the

is the thriftiest truck ever built. A penny counter, a general expense reducer. The greatest single force for better business that the past year has witnessed. At this moment when conservation of energy, time and dollars is so vital to national welfare, when merchants are making so many unexpected outlays—the Maxwell is fighting for economical administration, laboring day and night at a minimum wage and furnishing competent and reliable transportation at the lowest load cost at which goods have been carried in our time.

Maxwell maintenance and repair bills are the lowest of record. It furnishes American Commerce, never so sadly in need of labor, a truck which even a boy can operate and understand.

Just the right size for the average firm. 2400 pounds. But muscled for giant burdens. Worm drive—a feature hitherto associated with the highest priced trucks.

Sold under the same guarantee as \$5000 trucks are. Electric lights and generator. 10-foot loading space. 16 miles to the gallon. The lowest priced one-ton truck in the world and sold on liberal terms. \$985: and it will earn its cost out of the savings it effects.

Pays its way from day to day.

W. L. KIRKPATRICK, Agent
BURLINGTON, KY.

Government subsidies. That surely ought to bring home to every American, and most of all to every workman, a vivid picture of what industrial thralldom to Germany would mean to him and to those who will come after him.—Buffalo Express.

President Wilson went to Buffalo with the definite purpose of talking plainly to the pacifists and pro-Germans who were believed to be intent upon stamping the delegates to the American Federation of Labor and disavowing that great organization from its hearty support of the Government in its war against Prussian autocracy. He fulfilled his purpose, but he did more than that. He made it plain to his auditors, representing the laboring men and women of America, that their own vital interests were inseparable from those of the rest of the American people and that, as he expressed it, "any body of free men that compounds with the present German Government is compounding for its own destruction." The President did not mince matters in his references to the pacifists; he held up their stupidity to contempt, and frankly asserted that while he wanted peace as much as they, he knew how to get it and they do not.—Philadelphia Ledger.

Harzodaburg. The Sewing Unit of the Presbyterian church, and the Literature Department of the Women's Club have ready to ship on Saturday a box of 10 new garments for French orphan children and babies.

Lexington, Nov. 18.—Dressed turkeys from Lexington to the New York and Boston markets are for the first time being shipped by freight in refrigerator cars. It requires six days to make the trip. The slaughter of turkeys here for the Eastern Thanksgiving market aggregates approximately 60,000 pounds, which is about 175,000 pounds less than were shipped from here last year. The birds, however, are better than usual. The retail price in the East will be about 45 cents per pound, locally, and in Cincinnati and Louisville, the price is expected to be from five to ten cents per pound lower.

Owensboro. Judge Farmer, Judge-elect of Henderson county in company with Division Engineer W. S. Canning, made an inspection of the county roads of this county today. Nearly \$500,000 has been spent on the roads in this county during the last two years, most of them being constructed of river and bank gravel.

Mayfield. Fred Foy, who was visiting his parents here on business from Camp Shelby, but has until a short time ago been at Camp Taylor, was accidentally shot while out hunting. He was going over a wire fence and was carrying a gun when he was discharged, the whole charge striking him in the right foot below the instep. Physicians summoned amputated a part of the foot, including two toes.

Pointed Paragraphs.

Duties of other people are always duly clear to us.
Life is one continuous round of unfinished business.
The owner of a smart dog does most of the barking.
The whisky still is responsible for many a loud drinker.
Epitaph for a bartender: "He had a smile for everybody."
Weak is the man who hasn't strength enough to break a good resolution.
A woman likes to have people say that she is young looking and is a member of an old family.
It may be all right for a woman to marry in haste and repent at leisure, but a married man has no leisure.
It's as difficult to convince a stubborn mule as it is to fatten a windmill by running corn through it.

London, Nov. 14.—Telegrams received here today from Atlanta advise that McCalla Fitzgerald, of this city, died suddenly of apoplexy in the Federal prison here today. He was formerly cashier of the First National Bank of this city, and was sentenced to two years on charges of misapplication of the bank funds in connection with its failure, and had served about one year of his sentence. He leaves a widow, two daughters and three sons. One son, Harry Fitzgerald, is now serving in the U. S. army.

State News.

The Greensburg loose leaf market will open November 23d.

Considerable good road work is now under way in the different sections of Letcher county.

Tobacco is selling in Nicholas county at \$35 to \$45 per hundred pounds for the best crops.

The people of Wayne county are responding liberally to everything that helps the soldiers who are fighting for our liberty.
Bowling Green, Nov. 14.—"Stop the sale," the price is already too high," declared John Mooreman on Tuesday afternoon at a sale being conducted at his place by an auctioneer, when some bidders he was offering reached an average of \$135 each. Mr. Mooreman said the price was entirely too high and he did not believe that the bidders should bring any more.

Hopkinsville.—The turkey market for the Thanksgiving trade has opened here, and 20 cents per pound for live turkeys delivered is the price being paid. The dealers are adhering strictly to the government's requirement that no gobblers weighing less than 12 pounds or hens weighing less than eight pounds be brought in. To conserve the most supply by giving the young and underweight four times to mature. In this way the turkey crop will be made to go much further in pounds than it would otherwise.

Local Happenings.

Kill the hog and conserve the corn.

The Bellevue pike is in excellent condition just now.

Judge Gaines began a term of the Carroll county circuit court last Monday.

The Y. M. C. A. War Council workers were reporting—every hour or so last Monday.

Rev. David Blyth will preach at the Bullittsville Baptist church next Sunday at 11 o'clock.

Hunters had fine weather for the sport last week and many of them made good use of it.

Pt. Pleasant Red Cross will give a supper at Pt. Pleasant church Saturday night, December 1st. All are invited.

Burlington postoffice has been short on stamps for several days, the postmaster expecting a supply by every mail.

Wm. Carpenter, of Locust Grove neighborhood, has finished gathering a very fine crop of corn—the best he ever raised.

Hunters generally met with good success the day the lit was lifted, and besides the sport they had, added, in some instances considerably to their bank accounts.

Remember that the question is not whether you personally may feel that you can afford to waste food; the point is that the Nation can not afford to have any food wasted by anybody.

The local trucks and the Bellevue and East-Bend trucks are handling a surprising amount of live stock. Kelly's truck made two trips each day last week to the stock yards in Cincinnati.

Late potatoes in Indiana were materially damaged by frost and the yield will be considerably reduced—over former estimates. Plenty were produced, however, for the needs of the state.—Lawrenceburg Press.

The machinery being used in the construction of the bridge at Leaburg crowds the road but there should be no complaint on that account as the inconvenience of no bridge at that point can hardly be estimated.

Out of 300 cases appealed to the President from the Kentucky District Draft Boards, already passed upon, only nine have been reversed. Out of the 100 cases from Kentucky districts have been reversed in but one case.

Following is the weather forecast for the Ohio Valley this week: Generally fair, also somewhat unsettled Sunday in Tennessee and the Lower Ohio Valley. Some slight possibility, however, of rain by end of week. No decided temperature changes. Great Lakes Region—Generally fair; no decided temperature changes.

Ross Chapman, of Verona, and A. C. Arnold, of Williamstown, were here Tuesday buying dogs. They bought two hounds from S. J. Crutcher for \$15 and four from Chas. K. Lillard for \$50. From here they went to Ghent, having a committee to buy about forty dogs on this trip. Hounds, setters and pointers were the kinds most wanted.—Warsaw Independent.

Elmer Kirkpatrick has taken the following livestock to market this week: Seven 200 pound hogs for Lloyd Weaver, 22 sheep for Clifford Shinkle, 200 pound hogs and a cow for Perry Barlow, eleven 200 pound hogs for Beemon Bros., and a load of rye for John Barnes and is still hauling. This shows that trucking is becoming quite a business in this part of the county.

A plentiful supply of Thanksgiving turkeys at reasonable prices is promised the American people by the food administration. Stocks on hand in cold storage houses are large and the food administration will require their sale under provisions of the food control act, which prevents hoarding. With a larger volume of this product going on the market for sale it is announced consumers may soon look for an abundant supply at reasonable prices.—Lawrenceburg Press.

The railroads are now moving what promises to be the biggest potato crop in the history of the country. This crop which is estimated will total approximately 453 million bushels or half again as much as last year, has begun to move since the middle of September. The movement of it will continue until about April 1st, next year. Reports received by the Commission on Cereals Service indicate that even with extensive loading more than 750,000 cars will be needed to handle the potato crop.

A copy of the questionnaire prepared by the Provost Marshal General's office in Washington, and which will be mailed to all men who registered under the draft law for filling out in accordance with instructions, has been received by the local Exemption Board. Little change from the tentative draft of the questionnaire published some time ago is noted in the document. As soon as the sufficient number of questionnaires have been received they will be mailed to registered men by the board.

GOOD FEEDING ALWAYS PAYS

Poor and Skinny Young Cow Can Be Made to Produce Milk and Butter of Quality.

Often the young cow that is poor and skinny can be made to produce a lot of milk and butterfat. Professor Ert of Ohio State university told of such an instance. A young Jersey cow had been bred in the southern part of

Superior Milk Specimen.

Ohio and fed only the poorest kind of feed. Under these conditions she produced about 2,200 pounds of milk a year. Now, under different management, she is producing 12,000 pounds of 5 per cent milk! Good feed and proper management made the difference.

SUCCESS IN DAIRY BUSINESS

One of Best Breeds Should Be Selected and Followed, That Herd May Become Uniform.

For best success in the dairy business one of the dairy breeds should be selected and followed, that the herd may become uniform, care being taken to get good cows with which to start. There is more difference in the cows of herds than there is in the different breeds, says one writer.

A profit can only be expected from good cows, so better start with five good cows than 20 poor ones. With five you will find satisfaction, less work and more profit. If you expect to raise the better calves for future use be sure they are not only sired by a registered bull, but that his pedigree for great production of milk and butter runs back for five or more generations on both sides.

We cannot all see our way clear to begin with registered cows of high merit. Good grades can usually be bought costing but little more than scrubs and by careful breeding a herd will soon be raised which will be both a pleasure and a profit.

KEEP MILK IN HOT WEATHER

Whether Intended for Table or Creamery It Must Be Sweet to Secure Highest Prices.

It is no trick at all to keep milk sweet in cold weather, but in hot weather it must be handled very carefully. Whether the milk or cream is intended for the table, the creamery, or the milk market, it must be sweet if it is to bring the best price. To keep the milk sweet just two simple things must be very carefully looked after:

1. It must be cooled as completely and as quickly after milking as possible; and,
2. Absolute cleanness of pails, cans, and cows must be secured. Sourcing takes place because little invisible plants called bacteria get into it in dirt or by lurking in the corners and seams of poorly cleaned pails and cans. The remedy is plain. Keep the bacteria out by using seamless pails and cans and seeing that absolutely no dirt or dust gets into the milk in the stable or anywhere else.

WHOLESOME WATER FOR COW

Whether in Barn or Pasture, Animals Should Have Free Access to Fresh Supply Twice Daily.

The average cow under normal conditions will drink about nine or ten gallons of water daily. Whether in the pasture or in the barn, cows should have access to an abundance of fresh water twice daily. Unless there are good flowing springs, the best water comes from wells and may be pumped by windmills or gas engines. It is unwholesome for them to drink from stagnant ponds or streams, but clean, running streams are not objectionable.

REMOVE ALL DISEASED COWS

Animals Not in Healthy Condition Should Be Taken From Herd and Milk Kept Separate.

Cows not in healthy condition should be removed from the herd and their milk kept separate until the animals are restored to normal health. Milk from diseased cows should not be used for human food. Serious order trouble, causing anger or bloody milk, must be cured before the milk is usable.

THE DAIRY

DIFFERENCE IN MILK PRICES

Until Recently Product Has Been Paid for Without Regard to Quality—Farmers Organizing.

Discussing the cost of producing milk by dairymen and the cost of distribution by dealers, Prof. Fred Rasmussen, head of the dairy husbandry department at the Pennsylvania state college, recently asserted that milk has until very recently been paid for without regard to quality, the cheapest and poorest milk determining the price. The farmer, he said, has not made use of collective bargaining in the sale of milk, and as an individual has accepted whatever price was offered.

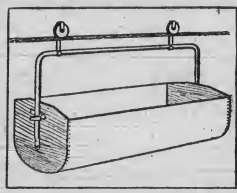

"The fact that milk has always been obtainable farther away from the market at less price than the difference in the cost of transportation," said Professor Rasmussen, "has made it difficult to get a rise in price of milk for the farmer. The farmer as a class is slow to change and slow to organize. It has been the history throughout the world that co-operation among farmers develops only under economic pressure."

"The fact that milk producers in the eastern part of the United States are today organizing to save their industry from financial ruin is the best evidence of the economic pressure the industry is suffering from. In the solving of the crisis in the milk business today many adjustments must be made."

HOMEMADE CARRIER IN BARN

Labor-Saving Device Easily Put Together Greatly Assists With Chores Around Stables.

The daily toll about the barn in doing chores can be lessened if a few labor-saving devices are installed. One of these devices is a manure carrier. I made one as follows: The body of the carrier is made of pine boards for the ends, shaped as in the sketch, and onto these ends I nailed sheet-iron sides and bottoms, as shown, says a South Dakota writer in The Farmer. Then I bent an ordinary one-inch gas pipe into U shape, forming the frame, and bolted it to the body of the carrier, as shown. Then to the top of the gas pipe frame I fastened two pivoted sheave wheels, diameter six

Homemade Litter Carrier.

inches. A little retaining or trip lever was also fastened to the frame and engages in a suitable slot in the end of the carrier body. This lever is shown in the sketch, and it is to keep the carrier body in place when loading, and to release the body so that it will swing on the pivots in unloading.

The first thing was to put up the track. I used round steel cable purchased from the local dealer and fastened this to a post in the barnyard suitably guyed and anchored. The other end of the cable I ran through the barn door to the opposite side. There I fastened it to the wall securely and stretched it tight. Then I harnessed the carrier in place and the job was completed. It works fine and is about as good as a more expensive one.

GOOD SANITATION IN DAIRY

Five Practical Suggestions Made by Clemson College for Best Management of Herd.

1. Have the herd examined at least once a year by a competent veterinarian. Promptly remove animals suspected of being in bad health. Never add an animal to the herd until certain it is free from disease, particularly tuberculosis.
2. Never allow a cow to be excited by fast driving, abuse or unnecessary disturbance.
3. Clean the entire body of the cow daily. Hair in the region of the udder should be kept short by clipping.
4. Do not allow strong-flavored food, like cabbage or turnips, to be eaten except immediately after milking. Changes in feed should be made gradually.
5. Provide fresh, pure drinking water in abundance.

INCREASED DEMAND FOR COW

In Single Year She Produced Enough Protein for Three Steers and Fat for Two.

Dairy products, like everything else, are increasing in price and we find now as never before an increasing demand for the dairy cow. If we stop to consider a few of her performances we will find that in a single year she will produce enough protein for three steers, enough fat for two, and enough to build the skeletons for three, over 840 worth of milk sugar, and manure valued at \$50.

The year's at the spring and day's at the morn. Morning's at seven. The hillside's dew peared.

The lark's on the wing. The snail's on the thorn. God's in his heaven. All's right with the world. —Browning.

SOUR CREAM DISHES.

Sour cream should be held very precious in the minds of our cooks, for only a few tablespoons added to a salad dressing improves the dressing, or it may make the foundation for a salad dressing.

Sour Cream Salad Dressing.—Beat the yolks of two eggs until light, stir in gradually half a cupful of thick sour cream, add a half teaspoonful of salt, a dash of pepper, two tablespoonsful of tarragon vinegar and the well-beaten whites of the eggs.

Drop Cakes.—Beat two eggs, separating the whites from the yolks, to the yolks add one cupful of sugar; when well dissolved, add one cupful of rich sour cream to which has been added a half teaspoonful of soda, stir in 2 1/2 cupfuls of pastry flour (less if bread flour is used) and fold in the whites, beating well to incorporate all the air possible before folding the eggs into the mixture. Bake in well-greased gem pans, sprinkle with a sugar and cinnamon and place a raisin on each as it goes into the oven.

German Crullers.—Beat two eggs without separating, add a half cupful of soda in a tablespoonful of water and add it to a half cupful of thick sour cream; add this to the egg mixture, cut them in three-inch squares and stir them two or three times; when fried they will be well rounded.

Plain Fruit Cake.—Take one cupful each of sour cream and sugar, one-half cupful of molasses, three cupfuls of flour, one cupful each of raisins and nuts, spice to taste, one-half teaspoonful of soda, salt and one beaten egg.

The world is always willing to give a man a boost after he has climbed pretty close to the top.

Some men regard failure as being merely unable to fool all of the people all of the time.

GOOD THINGS FROM SOUR MILK AND CREAM.

There are many dishes which may be made with sour milk which are usually made from sweet, simple substituting half the quantity of soda or

one teaspoonful of two of sour milk, for the usual amount of baking powder required. As the acidity of milk differs, there can be no fast rule for addition of soda, usually a half teaspoonful to a cupful of milk is sufficient. When in doubt add a bit of baking powder to help in the rising. Sour cream may be used in place of butter for cakes and various dough mixtures, the amounts varying according to the richness of the cream.

Cottage Cheese.—There is no more delicious dish than this when well seasoned. Pour two quarts of hot water into two quarts of thick, sour milk, and let stand until the curds begin to form, then drain through a bag and let stand overnight. Season well with cream, salt and a bit of red pepper, mixing it well until smooth and fine.

Cottage Cheese.—Add two tablespoonsful of softened butter to a cupful of cottage cheese, unsensitized, add salt and red pepper, then form into balls the size of a walnut, roll in chopped nuts and set aside to cool and become firm. Serve with a lettuce salad.

Corn Bread.—Separate the yolks and whites of two eggs, beat the yolks, add a cupful of sour milk which has been added a half teaspoonful of soda, stir in one-half cupful of flour, one cupful of cornmeal, a half teaspoonful of salt, beat thoroughly, then add the well-beaten whites of the eggs. Bake in gem pans 30 minutes.

Breakfast Muffins.—Dissolve half a teaspoonful of soda in a cupful of sour milk, add the yolks of two eggs, well beaten, stir in a cupful and a half of flour and a half teaspoonful of salt, beat well, then fold in the whites of two eggs. Bake in greased muffin pans in a quick oven 20 minutes.

A little sour milk added to the buckwheat cakes adds a rich brown color to them and makes them more palatable and more nutritious.

Nellie Maxwell

Wool! Wool!

In an estimate to Mr. Hoover recently, the National Sheep and Wool Bureau predicted that the United States will need 750,000,000 pounds of wool during 1917. We believe that this estimate includes the wool required for blankets, shirts, and underclothing as well as for soldiers' uniforms.

The 1917 American wool clip is 260,000,000 lbs. This will also greatly increase the price of clothes; so you know by this that prices will go soaring, and it will pay those who can to buy now. We are prepared to sell you at the right price and will give you Quality, Style and Workmanship. We have Men's and Young Men's

Suits and Overcoats

Ranging in Price from

What Every American Should Know.

The greatest thing that could happen to the United States today would be for the average American suddenly to realize the danger which the present situation in Europe threatens his own home and his own liberties and his own children right here in America.

It has been said a million times that Americans in the mass are apathetic toward the war. We are apathetic. And we are apathetic, not because we are lacking in courage or patriotism, not because the war seems so far away. It is plain, of course, that German schemes of conquest are a menace to Belgium, France, Serbia and Rumania. But it is hard for some of us to realize that they are as surely a menace to our own country.

It is a good many years now since any man or any nation has undertaken to conquer the world. But many men and many nations have tried it in the past. History is dotted with the stories of individuals and peoples who have been seized with a veritable frenzy for conquest. Is there anything in the character of William II. of Germany to forbid the suspicion that he entertains ambitions which moved Ramezes the Great and Alexander and Caesar and Suleiman the Magnificent?

As a matter of fact we have abundant and direct evidence that a large section of the German people is frankly bent on establishing German world domination.

At least three times between the fifth and the sixteenth centuries our Western civilization had to fight for life against armies supporting ideas no more hostile to its future than those of the German military caste today. The Goths and Romans saved us, as well as themselves, when they defeated the Huns and Chaldeans. Charles Martel made possible the future of America, as well as of France, when the Moslems were thrown back at Tours. And if the Turks had captured Vienna and overrun Europe in the sixteenth century there probably would have been no liberty in America today.

In his noble speech at Buffalo on Monday President Wilson said: "Germany is determined that the political power of the world shall belong to her."

That is a plain statement of a menacing fact. Probably the German Government did not go into the war with so large an ambition. The history of Prussia is a story of gradual growth in power and territory. The German Government, threatened by Socialism at home, hoped that a short war and an easy victory would enable it to take another step upward like that of 1871.

As a matter of fact the war has lasted longer than anyone expected. At times Germany has seemed to be fighting a defensive fight. But now, with the military collapse of Russia, and the Italian defeat, a new horizon opens up to the Hohenzollerns. Complete victory is more nearly within their grasp than it seemed possible it could be a few months ago.

If the present German Government should win such a victory and succeed in establishing its political power over all Europe, militarism and tyranny would be the fate of America as well as of Europe during our lives and the lives of our children and grandchildren.

For America this is no offensive war. It is essentially a war of defense. The American soldiers who are beginning to go into the trenches in France are fighting for their own people as clearly as if the trench lines ran thru New Jersey and Pennsylvania. They are fighting to keep America safe from such horrors as have been brought about in Belgium and Poland and Serbia. They are fighting to keep us free from the danger that threatens Italy today. When this fact finally works into the consciousness of the average American as it will, first or last—there will be no more necessity for talking about apathy among Americans.—Times-Star.

Bellevue Won.
The eliminating spelling contest held at Petersburg last Friday afternoon, participated in by Burlington, Hebron, Petersburg and Bellevue schools, was some contest, being anybody's until the last word was spelled, Bellevue winning the contest, the score being words missed, Bellevue 0, Burlington 1, Petersburg 1, Hebron 1. Burlington went down on don't, Petersburg on engine, and Hebron, on Mrs.

Will Have a Public Sale.
A. P. Dickinson and J. T. Williams will have a sale of livestock on the afternoon of the 24th inst.

American Troops Are Gassed.

With the American Army in France, November 13.—The first German gas attack on American troops to be made on a considerable scale took place early this morning. Though the number of gas shells fired by the Germans was not large, the enemy concentrated his fire on a small portion of one sector, while in his previous "gassings" since the Americans entered the front line the shells spread over a wide area.

The attack was made before daylight. A gas alarm immediately was sounded. Every man in this particular sector quickly donned his gas mask. The attack lasted 30 minutes, after which a light wind carried away the vapors and the men removed their masks. There were no casualties and none of the men complained of feeling the slightest discomfort.

For the first time in this war General Pershing Saturday saw the firing line in France.

The American commander spent several hours visiting his troops, both in the front lines and in the support positions to the rear. He returned to American Field Headquarters well satisfied, not only with the efficiency and discipline, but also with the men's adaptability to the new conditions they are now facing.

General Pershing's trip was almost wholly devoid of extraordinary incidents, the situation at the front being quiet and no enemy shells falling anywhere near Pershing's party. The General motored from the field headquarters directly to the front. He made a brief visit to the quarters of the troops in the support positions in the rear.

Before leaving Pershing asked to be shown the graves of the first American soldiers who died in action. Officers escorted him to the green slope near a little village a short distance behind the front, where the noise of booming guns could be heard distinctly.

There the American commander stood with bowed head, before the newly made graves of the men killed in the German trench mid on November 3. Each grave bore the name of the soldier and the number of his company and regiment.

Around it all was a little inclosure in which had been deposited a large bouquet of native flowers with a card bearing this inscription in French:

"Here lie the first soldiers of the great republic of the United States, killed on the soil of France for justice and for liberty on the third day of November, 1917."

Knives and Forks as Weapons of War.

We ought not to think for a moment that guns and cannons, airships and submarines tanks and bombs are the only weapons of war, nor that those who use them are the only soldiers. Consider your knives, your forks and your spoons as military weapons. Have you ever thought that with a skillful and conscientious use of those peaceful implements you can drive the Huns out of their trenches more easily and more successfully than can the soldiers on the Flanders front? Here is where our imaginations come in as the supreme interpreters of life. Such a statement as that appears absurd until one sets before his representative faculty the situation of the human race as it really is today. He must be able to behold with the eye of his mind the producers of foodstuffs rushing to war, the crops reduced and the human family on the brink of starvation. He must realize that the combination of nations which is the most abundant in food is the crops reduced and the human family on the brink of starvation. He must realize that the combination of nations which is the most abundant in food is the crops reduced and the human family on the brink of starvation. He must realize that the combination of nations which is the most abundant in food is the crops reduced and the human family on the brink of starvation.

Let us raise up the fires of our imagination with this single, simple, indisputable fact: "If every individual in this country would substitute one pound of corn, or other cereal flour, for one pound of wheat flour we could feed our allies until we starved the Germans out of the war." This single thought makes every meal a sacrament. It opens the door of hope. It turns old men and women and little children who cannot handle a gun into soldiers as useful and as honorable as those who are fighting in Belgium or Italy. It lends a new significance and glory to apparently trifling acts of sacrifice. What! To substitute a piece of Johnnycake for a slice of bread, a potato for a biscuit—is this to put one on a level with the Tommies, the Polts and the Sammies. It seems so.

How strange it is that the formula of victory can be so simple! How hard it is to persuade us that our influence is so great and our obligations are so tremendous! How much easier, how hard it makes us seem to realize how hard such little sacrifices are. Cowards, poltroons, traitors—not shall we substitute a copper penny for a slice of bread, a potato for a biscuit, a third, a day?—Cincinnati Enquirer.

There will be a Union Thanksgiving service in the Union Baptist church, at 11 a. m., Nov. 23. The Rev. A. G. Hill, pastor of the Presbyterian church, will preach the sermon. The public is cordially invited to attend this service. Special music.

BRING YOUR TOBACCO

TO THE
Walton Loose Leaf Tobacco Warehouse

CINCINNATI, OHIO.

(Over two million dollars, \$2,000,000.00, paid last year for cream)
Send us your next can or if you need cans same will gladly be sent prepaid for 30 days trial.

Auto Turns Turtle.

The automobile in which John Cloud, Rex Berkshire and William Walton were riding last Sunday afternoon turned turtle on the Burlington and Florence pike just this side of Florence, the result of a tire blowing out on one of the wheels. Mr. Cloud was at the wheel, and while the machine was badly damaged no one was hurt to speak of. The machine belonged to Mr. Berkshire.

Not Much Tobacco Stripped

Very little tobacco has been stripped in this county, and indications are a small per cent of the crop will be ready for the loose leaf market when it opens next month, although the growers are anxious to weigh up their crops, which the longer they are on hand the lighter they will weigh.

Over Two Hundred Qualified.

County Clerk Rogers issued licenses to something over two hundred persons who desired to go afield this fall. Why not take out your hunter's license the first of the year and have them for twelve months instead of only a few weeks. It would cost you just the same.

Already some of Uncle Sam's boys have been consigned to graves in a strange land, yet some do not seem to realize that this country is at war—engaged in the greatest contest known to mankind.

WAR COST \$100,000,000,000

Money Spent Since 1914 Greater Than Cost of All Other Wars. (New York Times.)

The cost of the war to date has exceeded \$100,000,000,000, and the daily expenditures are now in the neighborhood of \$160,000,000 for all the belligerents, compared with \$32,700,000 in the first five months of the conflict. These results have been obtained by a compilation of loans and expenditures made by the Mechanics and Metals National Bank from data obtained from various authoritative sources. In a pamphlet just issued the bank states that an estimate based on current expenditures, including those of the United States, indicate that, if the war goes through the 4th year, to August 1, 1918, the total military cost will be \$155,000,000,000, and the daily outlay will average \$107,000,000.

Pate J. King, of the East End, who is serving on the petit jury at this term of court, showed us the will of his great-grandfather, Anthony Oweley, made in 1735, or 183 years ago. The penmanship is far superior to that of the usual man of today, and while the wording is a little peculiar, the instrument was one that has not only withstood the test of the courts, but the many years it has been held and cherished by the King family.—Standard Interior Journal.

County News Items

Interesting Facts Gathered During the Week by Our
Regular Correspondents.

WATERLOO.

G. W. Kite and family visited at Irvon Hood's, Sunday.
Lucien Stephens and family were Sunday visitors at Will Bagby's.
Ira Ryle and wife, of Commissionary, spent Sunday with Elmore Ryle and wife.
Hunting is the order of the day and a great many rabbits have been killed around here.
John McNeely and wife and Ernest McNeely and family dined with Lee McNeely and wife Sunday.
Mrs. Leland Snyder and son, Edgar, of Woolper, spent several days with her parents, Mr. Wm. Seabrook and wife, last week.
Courtney Popo and Roy Beemon, of near Richwood, who had been visiting and hunting here since the 15th, returned home Sunday.

FLICKE TOWN.

Mrs. Sarah White is sick.
Miss Lenetta Hensley is ill.
Lewis Sullivan has a new automobile.
J. W. White and wife dined at W. T. Ryle's, Sunday.
Perry Bruce and family visited at Jas. Bruce's, Sunday.
Geo. Shinkle and family broke bread at Boone Ryle's, Sunday.
Not many rabbits were killed here the day the law was out.
Lystra Smith and wife were the guests of Grant Williamson and wife, Sunday.
Ira Ryle and family were Sunday guests at Elmore Ryle's of Locust Grove.
Mrs. Len Ruth and children, of Lawrenceburg, visited her sister, Mrs. J. H. Snyder, Sunday.
Robert Patterson entertained a number of his gentleman friends from Aurora, Saturday night and Sunday.
Joe Given and Walter Ryle, of Indiana, visited Ed. Bots several days last week and had several good fox chases.

FRANCESVILLE.

J. S. Eggleston and wife were shopping in Erlanger last Monday.
Mr. Barnes, of Harrison, Ohio, is the guest of his son, Sam Barnes.
Chas. Muntz and wife entertained several of their relatives, Sunday.
Master John Kilgore is visiting his grandparents, Harry Kilgore and wife.
J. L. Riley shipped a bunch of nice cattle to Cincinnati market last week.
Miss Bessie Muntz and brother, Otto, are visiting relatives in Cheviot, Ohio.
Miss Lucille Eggleston is visiting her cousin, Miss Lucy Eggleston, near Woolper.
Mrs. L. C. Scothorn, of Idlewild, was the guest of Mrs. Sarah Scothorn, last Thursday.
Mrs. John York, of Gunpowder, spent one day last week with her daughter, Mrs. Will Kruse.
Mrs. Will Lane came down from Riverside, Sunday, and spent the day with her cousin, Miss Maggie Whitaker.
Mrs. Joe Graves, left last week for Erlanger, where she will make her future home with Harry Roberts and wife.
Hon. and Mrs. W. P. Cropper visited their son, Lacy Cropper and wife, near Petersburg, one day last week.

Florence Christian Bible School will give an entertainment full of pure fun for the benefit of the Home Mission on the evening of Dec. 4th. The place is yet to be decided upon.
An all day meeting will be held at Hopeful church on the 27th inst. Devotional exercises in the forenoon and pie and coffee, and a miscellaneous sale in the basement in the afternoon.
The Red Cross Parcel Post Sale here last Saturday night was a great success in every particular. The hall was appropriately decorated and refreshments were served in a most excellent style and the table being decorated in the national colors looked beautiful. The waitresses were Red Cross uniforms, and the crowd with its ready wit, Messrs. J. G. Tomlin and John L. Vesi, of Walton, each made a talk on our duties toward the Red Cross and the Y. M. C. A. work.

The Rod Cross Parcel Post Sale here last Saturday night was a great success in every particular. The hall was appropriately decorated and refreshments were served in a most excellent style and the table being decorated in the national colors looked beautiful. The waitresses were Red Cross uniforms, and the crowd with its ready wit, Messrs. J. G. Tomlin and John L. Vesi, of Walton, each made a talk on our duties toward the Red Cross and the Y. M. C. A. work.

HEBRON.

Church services next Sunday afternoon at 2:30.
A church from this place attended church at Hopeful, last Sunday.
Henry J. Aylor and family were guests at Jerry Garnett's, Sunday.
Clint Clutterbuck, of Ludlow, moved to the Henry Quick residence here last week.
The W. H. and M. Society will have its annual Thanksgiving services Sunday morning at 10:30.
Anyone having news items for the Recorder please send them in not later than 9 o'clock Monday morning.

GUNPOWDER.

Miss Allene Clements spent several days last week with aunt, Mrs. H. H. Clore.
Jasper Beemon, who died very suddenly at his home near the forks of Gunpowder, was buried in Hopeful cemetery last Sunday.
The ladies of Hopeful church will give their annual Thanksgiving and bazaar in the afternoon and evening of the 27th inst., at the church. Everybody is invited to attend.

UNION.

The Union boy and girl basketball teams defeated the Erlanger team at Erlanger last Friday afternoon after a spirited contest. Score—boys game, 15 to 9; girls game resulted in shut out 8 to 0 by Union team. Union girls featured in close guard and the long doubles by Nannie Senour.
Telephone Lineman Resigned
Vernon Popo, who has been lineman for the Consolidated Telephone Company for several weeks, has resigned the job.

DRAFT AGE LIMITS MAY BE EXTENDED

Kahn Will Ask House to Register Men Between 18 and 41 Years.

Washington, Nov. 22.—Shall the present selective conscription act be amended? Shall the ages of those subject to its operations be revised both upward and downward? These are to be among the questions that will be argued as soon as Congress assembles, in Dec. Congressman Julius Kahn has announced his intention of proposing an amendment to compel registration of all citizens from 18 to 41, inclusive, giving America a reserve of 21,000,000 to draw upon. The present ages are from 21 to 31.
Right after Kahn announced his intention of proposing an amendment in December, it was stated that Secretary of War Baker was opposed to any change. Kahn wired back from California that at least part of his amendment was misunderstood.
He does not mean that boys of 18 to 21 shall be sent into the trenches, but he does want them registered and given preliminary training, so that when they become 21 they will be ready to take their place in the fighting lines.
He also said that no man over 31 would be called for active service until those in the present draft limits had all been called up for examination and possible service.
"We must make preparations," said Kahn, "as if the war were going to last forever. They will be called up to fighting the war to a successful end and to establish a peace that will last."
Major General Crowder, provost marshal of the army, who drew up the practical working arrangements of the draft, said:
"I have no official opinion to voice on the question of raising the age limit above 30 years. As a practical matter, it is not necessary to raise the age limit. We have a great reservoir still untapped between 18 and 31. We examined only a little more than 2,000,000 out of the 10,000,000 registered, in order to secure the army of over 900,000, and all we have to do is to go on and examine the other 8,000,000."
"The statistics of the draft have been very comical, but it is easy to guess that between the ages of 26 and 31 the causes for exemption are more numerous."
"Maritimity is not the most favorable institution for the creation of an army; wives and home ties form an antagonistic interest to army work. The younger men have fewer of these considerations."
"There may be good reasons for discussing an increase in the age limit. I have no doubt Congress will take the matter into consideration for introducing his proposal."

J. J. Stephens and wife were Saturday guests at Pop Smith's.
Wm. Snelling and wife are entertaining a son, born Monday night.
Linnie Love and family, of Union, were Sunday guests at Ralph Cason's.
Basket ball games on Belleview ground on Wednesday afternoon, Nov. 28th.
Mrs. Nannie Maurer spent Saturday and Sunday with Mrs. John Smith, Jr.
John Deck is occupying J. J. Maurer's house recently vacated by Lewis Rector.
J. G. Smith and family and Jos. Maurer, Sunday at Chas. Maurer's, near Burlington.
Miss Carrie Mae Rice united with the Erlanger Christian church, Sunday night.
Mrs. J. J. Maurer and Mrs. E. H. Clore spent several days last week with relatives at Burlington.
Belleview will go to Union Friday, for the final tryout in spelling. Here's wishing the pupils success.
Don't forget the date of the Red Cross Bazaar and oyster supper Nov. 28th. Attorney O. M. Rogers will speak at eight o'clock p. m.
The pie social Saturday night, was a success. A good program was rendered and the auction sale of the 26 pies brought \$15, which will be used for the B. C. A. work.
Rev. David Blyth delivered an excellent address on the Y. M. C. A. War Work at the Baptist church last Wednesday night to an appreciative audience, and the committee was busy the next few days soliciting for that fund, and rejoice to report they more than raised Belleview's allotted sum.
It is a cause that stirs the American and christian spirit to contribute.

CENTERVIEW.

The Y. W. A. of the Big Bone Baptist church, will give a chicken soup at the parsonage, Saturday, Nov. 24th. All are cordially invited to come. Will begin serving at 3:30.
Next Thursday is Thanksgiving day, for which the usual proclamations have been issued.

Personal Mention

Miss Mary Allen, of Rothville, Mo., is visiting Mr. and Mrs. M. L. Riddell.
Deputy Sheriff L. A. Conner has recovered from a severe attack of quinsy.
Mrs. J. G. Furnish and son, Joe, spent Sunday with her mother, Mrs. Monette Revill.
J. J. Stephens, of Rabbit Hash neighborhood, was a business visitor to Burlington, Tuesday.
W. P. Sullivan spent the latter part of last week with his son, Kirby and family in Middale.
Lee Abdon, J. R. Pettit and Elmer Fowler were home from Camp Taylor to spend last Sunday.
C. E. Rector, wife and son, of near Independence, spent Sunday with friends in Burlington neighborhood.
R. C. Gaines and daughter, of Erlanger, spent Monday in Burlington, guests of Mrs. Fannie Cropper.
M. S. Rice, of Covington, spent Monday and Tuesday with his sister, Mrs. R. S. Cowen, and other relatives.
Mrs. Gliza Rouse, who is spending the winter at the "Woodford" in Covington, spent Sunday in Burlington.
A. J. Hodges, C. H. Hodges, Howard Hodges and Wm. Hodges were among the Recorder's visitors last Tuesday.
A. R. Johnson, of Walton, representing the Walton Loose Leaf Tobacco Warehouse, was in Burlington one day last week.
Attorney D. E. Castman, of Erlanger, was in Burlington, Tuesday, taking depositions in a case where he represents the plaintiff.
W. A. Price, President of the Erlanger Deposit Bank, and Alonzo Graves, were among the business visitors to Burlington one afternoon last week.
Dr. M. J. Crouch, President-Manager of the Consolidated Telephone Co., and who calls from Union, was among the business visitors to Burlington Monday.
Mrs. Sallie Hallam and Miss Alice Revill, who had been guests at Mrs. Monett Revill's several days, left for their home in Washington, D. C., Monday evening.
Miss Eva Akin, of Pickertown neighborhood, returned last Saturday after a visit of two weeks with Mrs. Newton Bullivan, Jr. Mrs. Sullivan accompanied her home for a few days' visit.
W. O. Rector, of the Asby Fork neighborhood, was a caller at this office last Tuesday. Mr. Rector is one of the prosperous farmers in that neighborhood and has a fine crop to harvest this fall.
Sidney Fenton, of Ft. Thomas, was the guest of his sister, Mrs. Edgar Berkshire, a few days last week. He was aided on several occasions and begged a nice lot of game. He returned home Sunday.
G. S. Walrath, of Walnut Hills, Ohio, accompanied by his brother from Oklahoma, was in Burlington a short while last Sunday afternoon. Mr. Walrath looked like the world is dealing kindly with him.
Jas. Gaines, of Woolper Heights, was in town last Friday, and remembered some of his friends' most handsomely by a contribution of some very fine apples, such as are always to be found in his orchard at this season of the year, unless the apple crop is a complete failure.
John Klopp, of Petersburg, was a caller at this office last Friday morning. Mr. Klopp is one of the prosperous men in the Petersburg precinct as well as being one of the cleverest men in that part of the county. He has a fine crop of corn to gather this fall.

IDLEWILD.

Miss Virginia Bots, of Rising Sun, is the guest of her many friends here.
Mr. and Mrs. E. O. Norman spent the week-end in Union with Mrs. M. C. Norman.
J. S. Asbury is in Mayville attending the corn and tobacco show, and visiting his relatives in Mason county.
Mrs. Euna Willis has returned from a visit with her daughter, Mrs. Edgar D. Jones, in Bloomington, Illinois.
Mr. and Mrs. Chester Davis came over from Erlanger, Sunday, for a day with her parents Mr. and Mrs. J. T. Gaines.
Mrs. W. Lee Cropper is home from an enjoyable trip to Lexington, where she visited her son, Carroll, who is a student at State University.
Members of the Milk Producers Association in this section held an important business meeting at Bullittsburg school house, Saturday afternoon.
Mr. W. T. Berkshire entertained quite a party of friends from Indiana, at his home last week. It is useless to say no foxes are left in this locality.
Rollie Hart received a milk check from the Tri-State Dairy Company, last week, amounting to six dollars (\$6.00). He paid Charles Morris for sawing lumber with the check, and Mr. Morris turned the check over to Roy Craig. Roy gave the check to Maud Craig and she gave it to Carl Chene, the merchant at Pleasant Hill. Then Rollie Hart sold Carl Chene a load of apples and he gave the check back to Rollie for the apples. Rollie then gave the check to Mr. M. P. Bots and he put it in the bank. Just what one check can do. Falkner Outlook.

Between Right and Wrong.
When you are in doubt whether a thing is good or bad, don't adopt the opinion that it is good. If you cannot see a line of distinction between the two, till you find out better, look upon it as bad, says the Ohio State Journal. Whatever is good is plainly so, and if it happens not to be so plain as to raise a question, regard it as bad, and turn from it. The work of the evil-minded in this world is an effort not to say black is white but that gray is. There is much harm done by straddling a wrong. It is a favorite resort in society and politics and is doing much to destroy the consciences of people. You may depend upon it—if the heart is right it is always easy to choose the right way from the wrong way. The mind cannot do it. If we depended upon the intellect to keep men in the right way they would land in perdition. It is a poor judgment as a greenhorn if he doesn't consult his soul. It is not a truth if a person cannot feel it in his heart. So, trust doubts to the heart, where love and good will live, and one will not go far astray.

Steam Issues Frolic.
In the barren, desolate region in the vicinity of Valtierra, in southwestern Tuscany, are a great many fissures or cracks in the earth's surface from which small clouds of steam arise, evidently of subterranean origin, is a curious report to the department of commerce from Consul Dumont, Florence, Italy. Almost a century ago Francois de Lardere, a Frenchman, visited this region and made an analysis of the steam, and he discovered that it was heavily charged with boracic acid. Beginning at the Poggio Casa la Serra, extending south over the summit and down the valley of the River Corna, he found numerous fissures from which steam arose. Selecting the largest of these, at what is now the town of Lardere, about fifteen miles due south of Valtierra, he established a plant for the extraction of what is now a most successful industry.

Keep a Cheerful Mind.
To be cheerful when the world is going well with you is no great virtue. The thing is to be cheerful under disadvantageous circumstances. If one has lost money, if business prospects fail, if enemies appear triumphant, if there is sickness of self or those dear to one, then it indicates a virtue to be cheerful. When poverty pinches day after day, month after month, or through the years as they pass, and one has ever to deny self of every little longed-for luxury, and the puzzle of how to make one shilling do the work of two has to be solved, then the man who keeps cheerful is a hero. He is a greater hero than the soldier who faces the cannon's mouth. Such cheerfulness is the kind that we need to cultivate.—Exchange.

Importance of Sugar.
Sugar, states a medical authority, is of all the foods the quickest source of energy, and almost the cheapest. Only the cereals in their coarsest form offer more nourishment for the same expenditure. In no other food has nature stored up nourishment in a form so near that which the human body can utilize it. A spoonful of sugar is actually transformed into body energy in half an hour and less. This quick efficiency has been found useful by athletes and by soldiers on forced marches. Pound for pound, sugar gives a higher fuel value or working power to the muscles than do beans or peas or the cereals when sold in the breakfast-food forms.

Credit Claimed for Negro.
It was a wandering negro minstrel who wrote "Listen to the Mocking Bird." That is, this is the claim of negro investigators. The understanding of the white race is that the author of the song, which, because of its long popularity may be said to be established as a great song, was Septimus Winner. The claim of the negro is that the author of the song was George Melburn, and that it was set to music by Septimus Winner, a white man, who, according to the negro year book, "got the credit and the financial profits."

Solid Gold Image Found.
A heavy image of Buddha, judged to be four hundred years old, was found by an eight-year-old girl in the garden of her home at Sakuma-cho, on a hill just west of Ueno Park, Tokyo. When the earth was scraped off, the image was found to be solid gold. It was 20 inches in height. The garden is on the site of a temple which fell into ruin several centuries ago and gold has now entirely disappeared. Many old figures of earthenware and sculpture were found near by excavators several years ago.

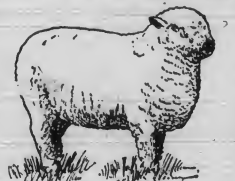

Man on This Planet.
The antiquity of man is still an absorbing topic, and modern scientists and older scientists, and fresh discoveries arise with each new discovery of ancient human remains. In this connection it is interesting to note that Dr. Arthur Keith of Edinburgh, an authority on the subject, believes that the living Australian aborigine is of an older type than any of the fossil remains of modern man found in Europe.

The Oracle.
We presume that oracle at Delphi was a grocery store with a new that local reputation.—Kansas City Journal.

FARM STOCK

SHEEP PROFITABLE ON FARM

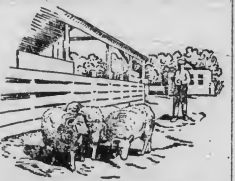

More Can Well Be Maintained In Addition to Live Stock That Are Already Kept Thereon.

Well-Bred Specimen.

In addition to the live stock that are already kept thereon. For a period of 23 years I have been engaged in general farming and stock-raising where I now reside. I have been raising horses, cattle and hogs during this entire period, and for the last 10 years I have kept from 100 to 125 breeding ewes of the mutton type. I have endeavored to produce as good stock of all kinds as I could, and to keep them in the most profitable manner. I have found no other class of live stock more profitable in dollars and cents than the sheep. Aside from this fact, I find that I can now keep as much other stock as formerly in addition to the sheep.

Some of my fields produce twice as much grain as formerly, and my grass lands are much more productive than they were. There is no great mystery connected with the care of the farm flock, but there is more to do than to purchase a flock and turn them out to shift for themselves without proper attention and shelter, if one expects to add to his bank account. Cowly hams are not a necessity, but some sort of a shed that will keep them dry is needed. Let your roofs be constructed of shingles, boards, iron or any material that will keep off cold rains, sleet, etc. I prefer a shed extending east and west, open or partly so on the south side, so arranged that it can be

Prize Mutton and Wool Sheep.

closed if bad storms occur. Give plenty of pure air, a dry place to lie down, and all the sunshine possible, thereby adding to the comfort and thrift of the flock and the profits of the owner.

HARVEST CROPS WITH SWINE

Results Given of Experiment Conducted by Ohio Station—Best Gains Made on Clover.

In tests made by the Ohio station three lots of pigs were fed 30 days as follows: Lot 1, ear corn and clover pasture; Lot 2, allowed to hog down pasture, and lot 3, ear corn and rape pasture. In addition all lots were fed approximately one-fourth pound of tankage daily per pig. The respective lots made average daily gains of 0.82, 0.57 and 0.75 pounds per pig, and consumed, aside from pasture, 2.66, 6.34, and 2.41 pounds of feed per pound of gain. Lot 2 was then put on clover and lot 3 remained on the rape, where the pigs were fed for 28 days. The pigs on clover made an average daily gain per pig of 0.75 pounds, consuming 3.64 pounds of feed aside from pasture per pound of gain, and the lot on clover, 0.87 pounds gain, consuming 3.16 pounds of feed per pound of gain.

PEDIGREE OF DIRECT VALUE

Gives Record of Ancestors of Animals for Five or Six Generations—"Like Produces Like."

The pedigree of an animal is a record of its ancestors, or family. The ordinary pedigree usually shows the ancestors for five or six generations. The value of the pedigree lies in the fundamental law of nature that "like produces like."

DON'T SELL BREEDING STOCK

Fancy Prices Offered for Brood Sow or Cow Should Not Tempt Farmer at This Time.

Don't let the temptation of high prices now being offered for live stock or undue fear of the prices asked for many popular breeds mislead you into selling a breeding sow or a brood sow that will drop the golden calf as letters

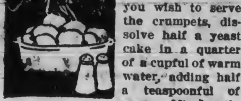

THE KITCHEN CABINET

To be what we are, and to become what we are capable of becoming, is the only end of life.

One cannot always be a hero, but one can always be a man.

GOOD EATING.

Let us have some old-fashioned English crumpets. About an hour (or longer, if the weather is cold) before you wish to serve the crumpets, dissolve half a yeast cake in a quart

of a cupful of warm water, adding half a teaspoonful of sugar. Mix together one cupful of water, one cupful of milk, one tablespoonful of lard, and send it. Cool and add to the yeast. Fill about one-third full with the very soft sponge. Cover the rings and let the crumpets bake slowly until double their height, then increase the heat to make the griddle very hot, and continue baking until the crumpets are brown on the bottom. When done they are white, soft, full of holes on top. Lay away in pairs, the top sides to gether, until cold. Then to spread them with butter and serve piping hot with tea.

Dutch Stuffed Doughnut.—This is the standby in all Holland homes. Take three cupfuls of bread dough, add one-fourth of a cupful of butter, one cupful of sugar, with nutmeg and cinnamon for seasoning. When well worked together add two eggs slightly beaten without separating. Roll this out rather thin, cut in rounds the size of a tennep, put a spoonful of jelly or jam, or a thick blob of custard, in the middle; pinch the edges together as one does apple dumplings, smooth into a round ball and drop into hot fat. When done roll in powdered sugar. Serve with coffee or chocolate or tea. In Holland they are served with the morning coffee.

Chicken au Riz.—Cut chicken breast into thin slices, place in a dish and surround it with cooked rice. Pour over it a rich white sauce, add an egg yolk and sprinkle the whole with paprika.

Nellie Maxwell

The KITCHEN CABINET

Sweet is the phrase that even few words can speak of pleasant thoughts and Remembrance: for there's no separation Twixt friend and friend.

SOUP CREAM DISHES.

Sour cream makes a most delicious shortening for any kind of flour mixture.

Feather Cake.—Take a cupful of thick sour cream, one cupful of sugar, two cupfuls of sifted flour, one egg well beaten, one-half teaspoonful of salt, one teaspoonful of soda, a teaspoonful of vanilla and a teaspoonful of baking powder. Mix the dry ingredients and sift with the flour.

Nut Cake.—Take three-fourths of a cupful of thick sour cream, one cupful of sugar, one and a half cupfuls of flour, one egg, one cupful of raisins, one-half teaspoonful of each of salt and soda. Flavor to taste and bake in a loaf nearly an hour. Sour cream one cupful, brown sugar one cupful, and a half cupful of nuts added after the first two have been baked together until waxy, makes a most delicious filling.

Southern Gingerbread.—Take one cupful of thin sour cream, two-thirds of a cupful of butter, one cupful of molasses, one cupful of brown sugar, two cupfuls of raisins, four eggs, one and a half cups of flour, one tablespoonful of ginger, one teaspoonful each of soda, cinnamon, cloves and nutmeg peel. This makes a large cake.

Black Cake of 1823.—Take a cupful of sour cream, one cupful of molasses, one pound of sugar, one pound of flour, one pound of currants, one pound of raisins, one-half pound of citron, one-half pound of chopped figs, one-half pound of almonds, three-fourths of a pound of butter, ten eggs, leaving out the whites of two, one teaspoonful of soda, two teaspoonfuls of cinnamon, one of cloves, one of allspice, four tablespoonfuls of orange marmalade. Bake in a slow oven.

Cream Cake.—Take a cupful of sour cream, one cupful of sugar, two cupfuls of flour, two teaspoonfuls of baking powder, two eggs, one-half teaspoonful each of salt and soda, a teaspoonful of vanilla. Bake in gem pans and sprinkle with granulated sugar, put a raisin in the top of each.

Take Your County Paper.

TRAINING REGULAR ARMY.

We read much these days of the doings of National Guardsmen and National army conscripts in their environments, but nothing ever appears about the training of the regular army, which is now no small affair. On April 1 it contained 110,000 officers and men. Now they number nearly 350,000. Where are they all? The natural presumption is that most of them are in France, where they are being prepared for trench work, says Milwaukee Wisconsin. Recent events have also brought out the fact that a number of National Guardsmen, possibly two divisions, have crossed the ocean. More may be expected to follow.

It's not so much preachment that we need as wholesome example. Man-kind is looking for the fellows who get joy out of life, not the fellows that take it out. It longs for real happiness that won't need to apologize for bubbling over when there is something to laugh at. It craves the man of strength and culture that can enter into the frolics of childhood and show by enjoyment that he was not just playing a part. It longs for the touch of honest sympathy that comforts without pitying. Such characters change life's perspective and get young people to see that there is joy in life without going to the devil to get it. And if there is anyone who should be happy it is he who has lived well.

Already soldiers and sailors have applied for insurance policies aggregating \$18,000,000 under the new war insurance system. As the benefits of the government's plan come to be fully understood, the men in the national service will not need to be persuaded to take advantage of it. They owe it to themselves and their families to provide for the future with the government's assistance.

The shortage of cents is attributed to the advance in the prices of cigars and cigarettes. It is declared that the humble change maker has not been so scarce at any previous time during the past twenty years. Many people are paying greater attention to the copper than they did when it had more purchasing value than it possesses now. Human beings are so inconsistent!

The Intimation is becoming stronger that the German people are more and more disposed to mind their own business, than a mixture of Junkerism and militarism has been hitherto kindly minding for them. The war is providing in more ways than one the biggest boomcrash of modern times.

The British peers are attacking the practice of buying and selling titles. They ought to adopt the simple practice in this country, where any man who wants a title can assume one to his liking without paying a cent to oblige friends for calling him by it.

The government forecast of a 25 per cent increase in this year's crop of early potatoes will produce a feeling of cheerfulness among people who have not cut those costly vegetables off their list.

The Boston schoolteacher who was amazed to discover that her pupils couldn't put the words to "America" on paper correctly, would be shocked to learn that probably not one college graduate in a hundred could do it either.

If you want to find out the difference between a highbrow and a bonhead, ask the highbrow. He knows. The bonhead knows enough to be unhappy, which is quite some consolation, we claim.

Yellow root, it seems, has also gone up in price, due to war conditions, but all hope need not be abandoned until a report is received on next spring's muskrat crop.

All the world is wondering why Japan does not take a more active part in the war. And Japan allows all the world to keep on wondering.

Even though the lard continue on American dyestuffs, we look for an ample supply of highly-colored American yarns from the front.

Moderate your eating to the point where your mouth will water when you even think of a handful of corned beef and cabbage.

HOG CHOLERA CONTROL.

Organization of Hog Raisers, Sanitary Precaution, and Serum Treatment Material Reduces Losses.

Although hog cholera can not be completely eradicated from the United States under present conditions, losses from the disease can be materially reduced by education and organization of hog raisers in the application of proper sanitary measures and the proper treatment of hogs with an anti-hog cholera serum. This has been shown by the results obtained by the Bureau of Animal Industry, the United States Department of Agriculture, in experimental work in hog cholera control carried on in a number of counties during the past four years. The work and its results are described in Department Bulletin 584, "The Control of Hog Cholera," recently published by the department.

One of the important results, according to the bulletin, is the fact that the work while effective in the control of the disease, was not repressive while in progress on the hog-raising industry. On the contrary the industry thrived in the experimental counties to a greater degree than in adjacent counties in which no control work was under way.

Actual statistics were taken in the experimental counties and careful estimates were made in the adjacent counties. These show that in one group of three counties where the control work had been under way four years the percentage of loss from hog cholera has remained constantly from four-tenths to two-fifths the percentage of loss in the surrounding counties. In another group of experimental counties the average percentage of loss as compared with that in the surrounding counties was reduced from approximately nine-tenths in 1913 to less than one-third in 1915 and to about one-sixteenth in 1916.

Specialists who have supervised the control work of the department reach the conclusion that while the eradication of hog cholera can not be expected for a considerable time, the material reduction by the use of serum of the enormous losses which annually are caused by the disease is entirely practicable. The essentials for success in combating the disease are: (1) the interest on the part of hog raisers and knowledge of the disease; (2) organization which will facilitate exchange of information as to outbreaks and secure assistance; (3) serum at reasonable prices and easy of access; and the available service in the community of persons skilled in administering serum.

If They Will Not Act, Fi e Them!

That which the shortsighted people of the Ohio Valley have refused to admit and adopt—the refusal to build up and improve the water-borne traffic of the Ohio River—is now being seriously entertained by the National Committee of Public Safety. This committee, disturbed by the congestion of the railroads and the dismal outlook for clearance of the lines, is urging that the Central government grant generous loans in order that the now disconnected and disjointed rail and water systems may be brought together in a systematic and secure manner by boats, docks, warehouses, elevators and motor trucks be secured to the end that the transportation may be increased to such an extent that impediments to the flow of traffic be removed. Remarkable conditions the Federal body says.

"In this country scant attention has been given to the capacity and potentialities of inland waterways," Kentucky engineers, but in Europe inland waterways are being used to their utmost and are being constantly improved. At a time when Germany is pressed hard in every sense she has been expending great sums to improve her canal systems."

It will not avail to sit with folded hands and await the coming of national aid for boats, docks and elevators. The Central Government has already expended millions for locks and dams, dikes and channel deepening. In stead of playing the crafty railroad game the representatives of the people of this city—anywhere that matter of this valley—should arouse themselves and set out to procure these advantages on their own account. This is the only way that the dear old folks can sleep into the mouth of the sleeping lion. The cities along the Great Lakes have grown enormously since their wealth has expanded largely because of the development of water traffic, which at once holds down the rate of carrying volume. So, too, will the Ohio Valley develop and with great if only the simple lesson of utilizing the great river is learned.

If the present leaders of business and trade organizations continue to ignore these patent duties in behalf of the few of them and substitute men with even a blurred vision of the mighty problem, it behooves the many—anyone who can find time and the shock and shatter of

war to improve the old and dig new canals, it is certain that prosperous and unwealthy Cincinnati can at least construct dockage and warehouse as an encouragement to commerce.—Enquirer.

School Children's Fortune.

Children under 18 years of age have on deposit in the 130 savings banks connected with the public schools of New York City the immense sum of \$250,000. It is as necessary to teach the children the value of money and the importance of saving for good uses as it is to teach them to read and write and spell, and to subtract, to multiply and divide. The school teacher should simply for the satisfaction of having the child against the danger of getting money for the money's sake, and laying it away for the satisfaction of having it. The class should be taught that money represents brains, labor, behavior, economy, and that it should be used wisely.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of November 29th, 1877

Lots of coal coming down the Ohio.

Last Wednesday a wagon loaded with boys and propelled by a pair of stubborn mules went over the bank at the first bridge across Woolper creek. The wagon was capsized. George Blyth was driving the team.

The Recorder carried the names of 18 persons ranging in age from 15 to 95 years, all in good health.

Boone county public school money amounts to \$5,671.00.

Mason Minor and Robert Sandford were hunting, and took shelter in a blacksmith shop near Mr. Brady's. Minor was wiping off the barrels of his gun with his coat sleeve which hung on a hammer, discharging the gun and killed their dog which was resting its head on Sandford's knee.

Thomas Dempsey is very ill.

The low prices and hog cholera make gloomy times for the farmer.

Seven years ago last Sunday the town of Florence, came near being destroyed by fire. Glassed, the dwelling and carriage shop, Snyder's stable and McNeal's grocery were burned.

The bar, in obedience to the order of Judge McManama, has been moved to the north side of the court house.

Marriage license were issued to the following last past week: John Cornelius and Miss Hattie Warner, Geo. McKee and Miss Elizabeth Thompson, M. J. Corbin and Miss Kate Botts, W. L. Aylor and Miss Elizabeth Smith.

Mrs. Hampton preached to small congregations here last Thursday and Friday nights.

W. L. Aylor and Elizabeth Smith were married at the home of the bride last Thursday. Rev. J. A. Kirtley officiating. Attendants: Miss Pannie Crisler and W. J. Rice and Miss Ida Clure and John Harper.

Normansville, bus gathering corn. Miss Nettie Grigsby is teaching here—Geo. W. Meeks, of Va., and Miss Bettie Thompson were married on the 20th.

Florence—Rev. Rowe, of Akron, Ohio, has been called by the local Christian church to leave Kentucky and go to Florida—Frank Smith has gone to Bellevue to paint the town.

Rabbit Hash—John Platt has gone to Evansville to meet his flat boat—Geo. Ward will be a benedict in a few days—As he was coming from church one night last week Frank Smith was killed by a horse and hurt badly—Cal Riddell is quite sick.

Scatterville—Farmers are about done gathering corn—A literary society has been organized at Locust Grove.

Bellevue—The now arrival of the Recorder last Saturday created quite a disturbance among its subscribers and borrowers—M. J. Corbin and Miss Kate Botts were married at the home of the bride last Thursday. Elder J. T. Bristow officiating—Jonas Clure has raised his house—Dr. Gill Rice's horse fell with him, hurting him considerably—L. P. Arnold is very ill.

Will Work Bellevue Pike. The county road machinery that was out on the Petersburg pike has been moved to the foot of the long hill on the Bellevue pike where a large lot of stone will be crushed and put on the road. There are several stacks of rock awaiting to be crushed and spread.

Y. M. C. A. WAR COUNCIL.

In Boone County Made a Permanent Organization.

The Y. M. C. A. War Council in this county which did such efficient service in the recent drive was composed of the following persons, and the organization has been made permanent in order that it will be ready to go to work immediately if called upon again: Dr. E. W. Duncan, Chairman, Burlington; John C. Bedinger, Vice-Chairman, Walton; Precinct Committee—R. B. Huey, Burlington; W. L. Warner, Vevrona; Winfield Myers, Florence; C. W. Renner, Walton; Dr. S. B. Nunnally, Bullittsville; O. S. Watts, Petersburg; A. L. Rogers, Bellevue; R. Lee Huey, Big Bone; A. F. Milner, Constance; J. H. Hughes, Beaver; J. A. Huey, Union; Geo. Ward, Rabbit Hash.

"No Man's Land."

So far as we have been able to learn this is a phrase which has never before—or generally, at least—been applied to that narrow belt of land which lay between two armies. Perhaps it is because in other wars it was a rapidly shifting territory, or because it was a territory of no distinctly marked terrain. No sooner, however, had trench warfare been developed and armies begun to dig their way to each other's trenches, until they could speak to each other across the narrow dividing space, then this phrase sprang into universal use.

"No Man's Land." The territory in dispute, the little belt of open country which neither army could appropriate until it had been drenched with human blood, the red roads or yards—or feet for the possession of which hundreds of thousands and even millions of men were ready to sacrifice their lives.

Small wonder that this narrow open roadway, running for scores of miles and miles like a famous lane over which the cows came loving home with udders full of milk, between two lines of frowning fortifications (behind which the men were hiding, and ready to rush out to the other's blood), should have clothed itself with mystery and irresistibly appealed to the imagination of the poets. "No Man's Land." The land of the unknown and the accidental. The land of contingency, of chances, of uncertainty, where the wheel of fortune turns calmly and silently upon her axis, waiting of the hand of Destiny to give it the fateful whirl.

What scenes have been witnessed in "No Man's Land." What deeds of derring-do have been done in that narrow lane! Above it shriek the shells of the covering batteries, and the whistling of shrapnel and of machine guns; over it rolls the wave of asphyxiating gas. It is webbed with barbed wire fencing, it is punctured with shell holes. In the silent midnight hours creep upon it belvislike like snakes, stealthily seeking information, or wounded comrades, grappling with foes as invisible as themselves.

In the daytime—heaven help them! by the thousands and hundreds of thousands living men, as sensitive to the joys of life, to light, to love, to beauty, to happiness, as you or I, leap into it over the tops of trenches to shoot, to bayonet, to club each other to the death, fearing and retreating, one moment the creatures of a primordial world.

"No Man's Land." Deeds have been done there at which the sun and the moon and the stars must have shuddered at the midnight must have paled and angels wept. And, there, also, deeds have been done at whose sublimity the gods themselves and yet unborn will shed their tears of wonder and of admiration.

"No Man's Land." In every struggle of ideas and of ideals of opinion and of judgment, there is such an unoccupied and disputed territory. Between denominations, between sects, between parties, between theories, between nations, between races, it stretches itself an object of passionate desire and struggle. There was "No Man's Land" between paganism and nationalism, between feudalism and slaveholding. There is "No Man's Land" between prohibition and the liquor interests, between autocracy and democracy, between Socialism and individualism, between labor and capital.

Gradually, inevitably, interminably the struggle for possession of the disputed territory goes on and on.

And the right is slowly gaining ground!

Woodford county.—The farm continue busy with their corn shucking owing to the scarcity of labor. Farmers have not commenced stripping tobacco, but are trying to secure all the help when the weather will permit so there will not be any waste. The potato crop has yielded far more than was expected. Pumpkins are plentiful this season.

Wit In The Trenches.

Wit is often shown in the notice boards which our soldiers set up in the trenches, says the London Globe. Thus a frequently quoted trench junction bears the legend, "Don't stand about here—there's a war on." A writer in the Cornhill Magazine has collected a number of these, one of the best being a spot which had once been used by the Germans as a dump for stores, now labeled, "Fritz's Dump Under Entirely New Management." A signa battery had the whole side of their mess knocked out—you could drive a gun team into the hole where the door had been. On a bit of remaining wall are the words, "Don't Stand Out There Knocking—Come Right In."

Strong Surface Indications.

There are strong surface indications on his farm that has been attracting his attention for a long time on account of the oil that accumulates on the water. The farmer has not become excited over the matter, but is of the opinion that he has as good prospects for an oil producing well as anybody in the county. It is said that the appearance of oil on water down on the creeks may be the result from seeps under the flat lands in the neighborhood.

CAN HELP SAVE COAL.

Emergency Fuel From The Farm Woodlot To Help The War Situation.

Many churches, including some rural churches, could help the fuel situation by the sowing of woodlots, says the United States Department of Agriculture, which advocates the substitution of wood from the farm woodlot for coal, in these days of shortage, wherever practicable.

For heating churches the Department points out that wood is the most economical fuel, because the heat is required only occasionally and is then wanted in large volumes at short notice. After the period of required warmth is over, it is desirable that the heat should die down as soon as possible. All these qualities are obtainable with wood as with no other fuel.

The same arguments that hold for churches hold in a less measure, perhaps, for rural schools, for small rural churches, for lodge and grange meetings and the like. In many instances the department points out, these buildings are heated by coal just because it has become the custom to use, even wood though might be more economical. The amount of coal required for a school building might not amount to much, but in the aggregate, says the department, the possible savings is considerable.

NEWS FROM INDIANA.

(Rising Sun Recorder.)

The message of better agriculture and the art of home making will be carried to the people of Ohio county Monday, Tuesday and Wednesday, December 3, 4 and 5. It is an established fact that the Farmer's Short Course is the best means of conveying valuable and practical information to the agricultural people of Indiana, and that it is and has been one of the strongest factors in improving rural conditions all over the state.

During the past week J. W. Whitlock & Co. have dug a tunnel across the street which connects the large plant with the new power house almost completed. The tunnel is built from the chimney factory to the five-story finishing room and store-room and across Walnut street to the tool works. It is walled with brick and is a perfect tunnel. The section room running to the tool works is covered with cement so that it is strong enough to hold any weight. It is deep enough for a man to walk through. The electric wires and steam pipes will be run through it connecting each of the plants with the power house and the electric lights, power and steam.

Work Has Been Stopped.

The work of reconstructing the Covington and Lexington turnpike in this county has been shut down because of the inability of Billie's inability to get crushed stone from the quarry at High Bridge. The way in which matters seem to be shaping themselves so telling what the work on that road will be completed. The delay is a hardship on both the county and the contractor and an aggravation to the traveling public.

FULL EXPLANATION.

Of New Ruling With Reference to Parcel Post Mail.

With reference to a new ruling as to parcel post mail, which goes into effect Dec. 1st, Postmaster Charles A. Steele gives the following information: "Upon every parcel post package transported from one point in the United States to another by parcel post on which the postage amounts to 25 cents or more, there shall be paid a tax of one cent for each 25 cents or fractional part thereof charged for such transportation, to be paid by the consignee."

No such parcel or package shall be transported until a stamp or stamps representing the tax due shall have been affixed thereto. "The tax on fourth class matter referred to in the preceding paragraph is not applicable to parcels on which the postage amounts to less than 25 cents. On a parcel amounting to 25 cents postage the tax is one cent; on parcels on which postage amounts to 26 cents to fifty cents the tax is 2 cents each 25-cent increment."

Parcels shall not be accepted for mailing unless both the required postage and the tax are fully prepaid.

Special internal revenue stamps shall be used to pay the tax; postage stamps are not valid for this purpose, nor shall internal revenue stamps be counted in payment of the postage. "The internal revenue stamps affixed to these packages must be canceled by the sender placing thereon his written or stamped initials, together with the date upon which the stamps are attached or used."

A Glimmer of Light.

Gen. Pershing in his interview about transportation for the troops abroad throws a dim light on a question that is presently uppermost in the minds of the people at home, when he says that troops and supplies are arriving in increasing numbers.

Officially, this country has not been permitted to know that any troops except the first expeditionary force are being sent to Europe. Engineers and foresters over de-parted. There has been ground for an impression that the demand for food and munitions had been sufficient to fill all the available tonnage, but that impression was negated by an indiscreet officer, who a week or two ago, in the arrival of a division of New England troops.

Now we know that troops are arriving in increasing numbers and that a man has been in the way over. For such scraps of news let us all be thankful.

From the Show-Me State.

Here is an instance of the usefulness of the Missouri hen. The Home for Aged Baptists, located at Ironton, Mo., asked the members of the Baptist church in Missouri, who had hens, to give to the Home the eggs laid one Sunday in April, or the proceeds from the sale of same. About one fourth of the church members, as a result of four thousand dollars in cash to the Home. Now, the superintendent, Dr. Milford Riggs, is asking that every member of the state give to the Home as a Thanksgiving offering one chicken or the price of one. He says he is not a particular who has a good chicken or money, and whether it comes on Thanksgiving Day, or before or after. The Missouri hen can easily finance the institution.

Won The Victory.

In a business communication to the Recorder W. M. Green, the Rising Sun, Ind., merchant writes: "Three weeks of Y. M. F. A. work has made me almost forget I have a store, but we got the victory and I am happy. Ohio county's quota was \$1,000 and we raised \$2,700; Switzerland county's quota was \$2,000 and we raised \$4,500; Dearborn county's quota was \$3,000 and we raised \$5,500; a total of \$13,800 in the district where I had control—surplus, \$3,800. Loyal support and cooperation of efficient workers made so great a victory possible. Boone county came across as usual and I congratulate you."

Taking Options On Land.

Dr. L. H. Crisler, of Covington, was in Burlington last Thursday, and took oil options on the lands of the following persons in the Middle Creek neighborhood: Chas. Kelly, Thomas Roberts, Ralph and Carl Gibson. Dr. Crisler is very enthusiastic over the prospect of striking oil in the territory in which he is seeking options, and probably those who will be able to take a hand in the try-out work will be given an opportunity to contribute. Arch Acre refused to grant the Crisler an option on the territory which Mr. Acre considers the best prospect in the entire neighborhood.

Trapping Season Opened.

The trapping season has opened up in the hills and the Smith Bros. & Co. have made a large and profitable catch already. Haystack (Knox) was the first first prize, making a debut of a "opium" pill.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

John Lane of Ludlow, spent Sunday here with friends.
E. E. Stockwell of Sanders, spent Monday here on business.
Mr. and Mrs. A. B. Tompkins spent part of the week at Louisville with friends.
Mrs. Ed. Harrier of Covington, spent last week here with friends and relatives at her old home.
L. C. Adams of Latonia, spent Monday here and sold his property near the Southern Railroad depot to C. L. Young.

Walter Dixon of Camp Sherman, Ohio, spent Sunday here guest of his cousin Harry Dixon and wife of the Phoenix Hotel.
Mrs. Juliet Fisher of Lexington, was the guest of Miss Eva Cram this week and selling stock in an oil well in Powell county.

Lost—Fur neck wear, Taupe Fox between Erlanger and Joseph C. Hughes residence near Richmond. Return to Mr. Hughes or leave at Equitable Bank.

Walton Lodge K. of P. will have work in the rank of Pageant regular meeting Thursday night, Nov. 29th, to which all the members are cordially invited.

Mr. and Mrs. J. C. Miller and son Fred spent Saturday and Sunday in Indiana, near Rising Sun, visiting their relatives Mr. and Mrs. Ed. Williams and family.

W. B. Johnson sold his home place of about 36 acres in the edge of Kenton county to Dr. Harvey H. Roberts of Lexington, who has land adjoining for \$1,000.

Mr. and Mrs. James L. Rankins and sons Jack and Newton, left for Mt. Olivet Robertson-Cox, spent Sunday here the guests of his brother Dr. G. C. Rankins and family.

M. L. Kirkpatrick and John A. Downard of Cincinnati, were here Tuesday on business pertaining to the Walton Loose Leaf Tobacco Warehouse of which they are officers.

Robert P. Coffman who has been at Camp Lee, Virginia, has been transferred to Camp Taylor at Louisville and spent most of the week here with his mother Mrs. Alice Booth.

The many friends of Mr. and Mrs. Wm. Grimley welcome them back to Walton this winter, having moved from their farm at Hamilton to the property of Mrs. Hattie Metcalfe.

Harry and Will Gillan of Covington, and L. C. Yelton of Newport, were the guests of Mr. and Mrs. E. M. Yelton last week and enjoyed a hunt in the country but found game very scarce.

Robert W. Jones spent part of the week at Flint, Michigan, going after a couple of Buick automobiles he sold and which he is shipping by railroad.

Mr. J. W. Thomas who has been suffering with a broken hip sustained by a fall some time ago, is improving. Miss Nell Dils, a nurse of Charleston, West Va., is taking care of her.

Rev. C. C. Lacy returned home from Petersburg Monday where he conducted a very successful revival at the Petersburg Christian church, his efforts being rewarded by twenty-five additions to the church.

Mr. and Mrs. Oswald E. Peterson who have been located in Utah where Mr. Peterson had a contract in the irrigation district, arrived here the first of the week on a visit to her father Chas. L. Griffith.

Jno. L. Vest spent part of the week at Owenton attending the Owen circuit court and having the Equitable Bank and Trust Company qualify as the guardian of some minor children and taking charge of an estate.

Mr. and Mrs. Harry Reardon and Mr. and Mrs. Samuel Reardon of Newport, were the guests of their cousins Mr. and Mrs. Edward Reardon a part of last week. Sam Reardon is the Chief of the Newport Fire Department.

Miss Eula Cram who has been employed at Lexington in the interest of the Powell Oil Co. here, is spending the week here with her parents Mr. and Mrs. W. H. Fisher and assist this territory.

Wm. Lee who recently sold his farm of forty acres near Mt. Zion, Grant county, to David Franks at \$100 per acre, bought a farm near Aurora, Indiana, and moved there this week, stopping at Walton to bid his friends good-bye.

The sale of Wm. H. Metcalfe's his farm in Kenton county last Saturday was well attended. The sale was to dispose of his milk herd of twenty-one cows, and prices ranged from \$5 to \$12.50 and made an average of \$8.33. Considering the high price of feed the sale was looked upon as very satisfactory to the lot.

The revival meeting being conducted at the Walton Baptist church by the pastor Rev. Olin Hamilton is being well attended and he is preaching some of the most interesting and entertaining but genuine of theological thought. The singing conducted by Harriet Davis of Louisiana is a very pleasant feature and is being greatly enjoyed by the large congregation.

J. M. Arnold sold his property near the toll gate north of Walton to T. D. Best of Warsaw for \$10,000. This property in the past has been used as a traveling place for most of the traveling.

elors from Central Kentucky to and from Cincinnati, and has a very interesting history of exciting happenings. Mr. Arnold purchased it from Joseph C. Hughes for \$2,500 about a year ago. It is a large two-story brick structure and the grounds contains between six and seven acres. Mr. Best will move to the property as soon as Mr. Arnold arranges to move to quarters.

Married—Rev. Geo. W. Hoffman and Miss Alma Jessie Gough at the residence of the bride's cousins, Mr. and Mrs. J. L. Gaughat Wilmore, Jessamine county, Nov. 14. Rev. W. S. Vandervoort of the M. E. church tying the nuptial knot. The groom is the pastor of the Walden Methodist church and a graduate of Andover college, and is a young gentleman of most attractive qualities. His charming bride is the daughter of Mr. and Mrs. C. M. Gough of Lexington, and is very popular with a large circle of friends because of her charming manners and lovable nature. The young couple arrived here Thursday evening and were given a royal reception at the parsonage of the M. E. church where they will make their home.

Married—Thos. Powers and Miss Cynthia Hudson, both of near Crittenden, at Warsaw, Nov. 21st, at the Catholic church by Rev. Father Herman Smith, the groom being a communicant of that church. The couple were taken to Warsaw in an automobile by Alan Gaines, and after the ceremony the newly married couple went to Cincinnati to spend several days returning to Mr. Powers' farm near Bracht where they will make their home. The bride is a sister of the late W. M. Hudson, deputy sheriff of Kenton county, and is a most estimable lady, and has been making her home with her mother Mrs. Fannie Hudson on the farm. Mr. Powers is highly esteemed by a large circle of friends, and is one of the progressive and successful farmers of Northern Kentucky. They many friends wish them happiness and prosperity.

The Northern Kentucky Medical Society of which Dr. G. C. Rankins is the president, had a most enjoyable meeting at the Odd Fellows Hall Thursday evening. A very interesting program was discussed. A fine fish supper was served at the hotel of Mrs. B. M. Johnson, after which the main part of the program was rendered at the hall consisting chiefly of an illustrated lecture by Dr. C. S. Rockhill of Cincinnati on tuberculosis and the remedies for this disease. It was a very learned discussion and much good was obtained from the suggestion given by Dr. Rockhill. Those who attended were Drs. F. D. Phinney, Carlton Crisler, Alfred Bell, G. F. McKinnis, H. S. Rockhill of Cincinnati; O. E. Semon of London; L. C. Hafer, and Dr. McChord of Ludlow; Dr. Carlisle of Rabbit Hash; Dr. E. Ryis of Beaver; Dr. H. H. Hays of Lexington; Dr. J. N. Nunnally of Bullittsville; Dr. B. J. Yelton of Burlington; Dr. J. P. Walton and G. C. Rankins of Newport, and the guests were R. C. Green, Judge G. E. Tomlinson, L. Vest, Dr. W. E. Fister, D. Wallace and Roy D. Stangler.

John E. Williams, the purchasing agent for the R. J. Reynolds Tobacco Company of Winston-Salem, North Carolina, spent Sunday at home on the farm after two weeks on the tobacco markets of Tennessee and Southern Ky., and left Sunday to resume his work. Mr. Williams states that the never saw tobacco sold so high and the market is remarkably active at the present time. He says the Walton Loose Leaf market ought to be better than last year though it was then very satisfactory to all parties in handling their tobacco and have it in proper condition when placed on the floor while tobacco the best of prices and while tobacco the best of prices and while tobacco the best of prices.

Judge Gaines went to Carrollton Monday, when he convened the November term of Circuit Court. He presided over the grand and petit juries and adjourned court until tomorrow, Friday, when he will begin a murder trial.

J. B. Heizer and son, Raymond, of Covington, were in Bowling Green, Ky., on business pertaining to this county.

FOR SALE OR TRADE—Will sell or trade for cattle, nice coming three-year old mare, Jas. Goodridge, Burlington, Ky.

A gentleman named Riddell purchased the Lloyd Norris farm in the Hawthorn neighborhood, and will move to it in a short time.

L. P. Rice, of Louisville, was transacting business in Burlington, Wednesday.

Our Polar Resources.

Christian Leden, an explorer, who has spent a good deal of time among the Eskimos, suggests, in an article for the Outlook, that the Arctic regions be mobilized that their manpower and meat resources may be utilized for the supply of the civilian and military consumers during the war.

According to Mr. Leden the Eskimo is a mighty hunter, despite his primitive weapons. He hunts the game as plentiful as it is in Central Africa. He always has about him walrus, walrus, seal, bear and other animals, land-livestock, and in prodigious quantities. His religious beliefs include the idea that he must kill all of the animals he can kill, by the spirit world, lest his attention to the gifts of the spirits affront them and cause them to send him no more game. Tons of edible meat are left to sink into the sea or rot on land or to bait the wolves and foxes which the Eskimos later hunt for their food.

The Eskimos are great fishermen as well as hunters. They fool the roving ten-pound salmon with an imitation of a minnow swarmed from walrus ivory and impale him upon a fish spear, while he is hovering about the camouflage. They build stone pens in rivers into which schools of salmon swim. The gaps in the walls are at the leeward and the salmon speared at leisure.

From the 500 hunters of ten tribes of Eskimos of his acquaintance Mr. Leden estimates that the Eskimos of Canada and Alaska could buy 3,000,000 lbs. of caribou meat, the best of all venison, 300,000 of caribou fat, 9,000,000 pounds of walrus meat, 12,000,000 pounds of white whale meat, 1,800,000 pounds of seal meat, the products of the hunt would include 13,800,000 pounds of seal, walrus and whale oil, 3,000,000 lbs. of first-class walrus leather, 4,000,000 of whale leather—suitable for shoes for Chicagoans—150,000 lbs. of seal skins and 40,000 pounds of walrus and narwhal ivory.

The Indians know how to dry the meat and dried meat is a concentrated food which requires little space, no tin and keeps indefinitely. "It is our man-organizer," says Mr. Leden, "to accept the traditional methods of the Eskimos and Eskimos in preparing this food thus increasing materially our supply of meat and fats."

The suggestion, made in all seriousness, seems practical. Might we not also establish an organization of raiding the big rooks of the Arctic and Antarctic regions and supplying ourselves with eggs?

One penguin egg should make an omelet large enough to satisfy a hungry man's appetite, and there are millions of penguins in the approachable environs of the South Pole. Bird life is rich in varieties and staggering in numbers. The eggs of many varieties are as wholesome and palatable as if they could be gotten in the consumer without being held in cold storage; they would be a welcome addition to the bill of fare in the trenches and in America.

Christian Leden has in a timely article, invited attention to important resources just about to be overlooked, but it will be well to continue carrying out Mr. Hoover's suggestions for conservation of fats and meats, until the tapping of our Arctic and Antarctic sources has begun.—C. J.

Geo. Tupman, of Covington, has bought the farm known as the Ben Norman place on Gunpowder creek above Gunpowder store. Mr. Tupman has been in California for some time previous to Kentucky and it was not long until he concluded he wanted to remain for a farm, finding the above mentioned place that suited him and lost no time in making the purchase. Mr. Tupman will be welcomed to this county. He is a guest of his kinsman, Mr. W. F. Grant, this week, trying out the Gunpowder atmosphere.

A NEW LAW.
Any person or firm dealing in explosives, powder, etc., is now required to secure a license from the county clerk of his county, and the application has to be made in person. This is a new government law.

For Sale—Seven pigs six weeks old. Allen Goodridge, Burlington, Ky. R. D. 3.
For Sale—Fresh cow and heifer calf. W. A. Smith, Petersburg, Ky. R. D. 1.

The Best on Earth

Can Be Found Here.

- New Orleans Molasses, 5 gallon keg.....\$4.00

All kinds of Winter Gloves, Jackets, Overalls, Boots and Shoes at a low price.

Very fine Ohio Valley Salt—the kind that keeps the meat, per barrel.....\$2.50

Let me call your attention to one article that has not advanced—Nobetter Coffee at the same old price, lb.....25c

If you have any kind of livestock for the market give me a chance and let me haul them for you. Price reasonable.

On my way home the other day from demonstrating my new Maxwell touring car to a friend, I met a car among the oldest cars in the country. It was a Maxwell which was used several years as a touring car driven by many different ones, and then used as a truck, which gave good service for several months; about a year ago it was put back on the road as a touring car. I want to tell you my friends, if you are thinking of buying a car absolutely for service and up-beck and pleasure, you can not afford to buy until you look the Maxwell over, and let me demonstrate the car to you. Then you'll be the owner of a Maxwell Touring Car.

Yours Respectfully,
W. L. KIRKPATRICK.

Lead-Others Follow.

- A Nice line of new Can Goods and Fresh Groceries.
- New crop of Grain and Flake Hominy at a reasonable price.
- New make of Mince Meat.
- Home dressed beef on hand at all times at a price from 12 to 25c per pound.
- Moore's high grade Oils and Gasoline for your lamps and automobiles. One trial will convince you.
- A High Grade of Mixed Feed, Per 100 Pounds.....\$2.00
- All lights of Farm Fencing, 26 to 40 in. high, at a price that can not be equaled.
- Gun Shells at a price from 70 to 85c a box.
- All kinds of Winter Gloves, Jackets, Overalls, Boots and Shoes at a low price.
- Very fine Ohio Valley Salt—the kind that keeps the meat, per barrel.....\$2.50
- Let me call your attention to one article that has not advanced—Nobetter Coffee at the same old price, lb.....25c
- If you have any kind of livestock for the market give me a chance and let me haul them for you. Price reasonable.

On my way home the other day from demonstrating my new Maxwell touring car to a friend, I met a car among the oldest cars in the country. It was a Maxwell which was used several years as a touring car driven by many different ones, and then used as a truck, which gave good service for several months; about a year ago it was put back on the road as a touring car. I want to tell you my friends, if you are thinking of buying a car absolutely for service and up-beck and pleasure, you can not afford to buy until you look the Maxwell over, and let me demonstrate the car to you. Then you'll be the owner of a Maxwell Touring Car.

Yours Respectfully,
W. L. KIRKPATRICK.

RAW FURS WANTED

Get my price and grade before you sell.

H. KIRK, Burlington, Ky.

WANTED

Trains to haul stone. For particulars apply to

C. W. GOODRIDGE, Burlington, Ky.

GEO. B. POWERS

A Week's News

Saturday was a beautiful winter day—clear and crisp.

For Sale—Lot baled straw. John Cloud, Burlington R. D. 1.

For Sale—Pure bred Duroc Jersey boar hog. Owen Smith, Burlington, Ky.

Be careful to leave no water in your auto engine these nights. An ounce of preventive is worth a pound of cure in this case.

Miss Iva Baker, of Campbell county, and Miss Adelia Seothorn, of Sand Run, are guests of Miss Annie Henry, of Bullittsville.

Clarence LeBus bought a crop of fine tobacco at Cynthia at 40 cents, and made the fabulous offer of 50 cents for a small crop.

Kirkpatrick's and Gully's trucks moved five hundred sacks of cement to Limburg last Saturday for use in the construction of the bridge at that place.

Claud Conner, of Ft. Pleasant neighborhood, and one of the Recorder's stand-bys was among those transacting business in Burlington last Monday.

The milk producers will hold a meeting at Florence next Saturday at 1 p. m. and at Hebron that evening at 7 o'clock. All who are interested are invited to be present.

Mrs. J. B. Rouse, who was operated on in a Cincinnati hospital several days ago for appendicitis, has returned home in good condition very much to the gratification of her friends and relatives.

Seaboats are going into winter quarters in the mouth of the Kentucky river, which makes the citizens of Carrollton realize that winter is here again, and then to think of the short supply of coal.

Charles Moore, of the Limburg neighborhood, requests the Recorder to announce for him that he is not the Charles Moore, whose name appears among those who give notice in another column that their lands are posted.

Bullittsville Red Cross met at Mrs. Ida Balaly's last Wednesday and made 100 surgical bandages and a number of cloth bandages besides doing considerable knitting. The next meeting will be held at Mrs. H. G. Cropper's on Wednesday of next week.

All members of Gunpowder Baptist church are earnestly requested to be present at next Saturday's business meeting at 7 o'clock. Officers of church to be elected for next year, and other important business.

A. G. McMULLEN, Clerk.

Card of Thanks.—We desire to express our heartfelt thanks to those who were so kind to Mrs. Busby during her illness and to the family before and after her death. They will always be remembered as the truest of friends in the dark hours of affliction.

L. H. Busby and Children.

William Nixon, about 11 years of age, and who makes his home with his uncle, Glen Crisler, across Gunpowder creek, has proven himself the most successful rabbit trapper in this part of the county so far this season, his sales having amounted to 150 nice, fat rabbits in the last two weeks.

The Burlington boys' basketball team went to Independence, last Friday afternoon, and defeated the strong team at that place. The Independence team grabbed off a lead of eight points before Burlington scored, but when she did get into the game she made a drive that put her in front before the first half closed. It was a fast game on the part of each team, and they were neck and neck several times during the contest, and the final score was 31 to 19 in favor of Burlington. The Bullittville team is the only one between Burlington and the county championship.

Personal Mention

County Judge Casner made a business trip to the city last Friday.

C. E. Tanner, of Kidville, was a business visitor to the hub, last Monday.

G. G. Hughes is visiting his daughter, Mrs. Earl Walton, of Petersburg.

Joshua Beemon, of the Hopeful neighborhood, was a caller at the Recorder's office, Saturday.

David Williamson, of Waterloo, was among those transacting business in Burlington, Monday.

W. R. Morris, of Erlanger neighborhood, was transacting business in Burlington, last Friday.

J. W. Tallaferro and son, Philip, of Erlanger, were transacting business in Burlington, last Monday.

Albert Drinkenberg and two of his little brothers were callers at this office last Saturday afternoon.

Mrs. F. A. Hall spent from Friday until Monday with her daughter, Mrs. H. W. Shaver and Miss Besse Hall in Newport.

William Gross, of Constance, was among the business visitors to Burlington, last Monday, and while in town enlisted in the service of the Recorder.

Miss Laura Frances Riddell, who is attending school at Dayton, O., arrived at home Wednesday evening for the Thanksgiving holidays.

W. B. Cotton and Nathan Northcutt, of Verona, were among the Recorder's callers last Saturday afternoon. When asked the news at Verona Mr. Cotton said, "Geo. Roberts is going to kill hogs Monday if he scrape off all the necessary articles to have the work done in the most approved style, and I am doing my best to have him succeed."

Use of Turpentine.

A few drops added to the water in which clothes are boiled will whiten them.

It will exterminate cockroaches if sprinkled in their haunts. Moths will leave if it is sprinkled about as they dislike it. A few drops of turpentine on a woolen cloth will clean tan shoes very nicely.

Clean gilt frames with a sponge moistened with turpentine.

Pitch, wheel grease and tar stains can be quickly removed if the spot is first covered with turpentine and then soaked with turpentine. If he scrape off all the loose dirt, sponge clean with turpentine and rub gently to dry.

Varnish and paint stains in coarse fabric can be removed by first saturating with turpentine and then washing.

Ivory knife handles that have become yellow can be restored to their former whiteness by rubbing with turpentine. Carpets can be cleaned and the color restored by going over occasionally with a broom dipped into warm water to which has been added a little turpentine.

An equal mixture of turpentine and linseed oil will remove white oil furniture caused by water. For cramps and pains apply cloths wrung out of hot turpentine water.

Big Fire at Lakeland.

Twenty-nine inmates of the Central State Hospital for the Insane, who were rescued after their night clothes from a fire in the tuberculosis hospital building at five o'clock Monday morning. Guards of the institution acted heroically in the work of rescue. The building, a one-story frame structure, was burned to the ground, despite great efforts of the fire department in its destruction. The work of rescue took up sufficient time for the blaze to make great headway. Fifteen men and fourteen women were carried out of the burning building. A number of these were seriously ill and many suffered from external hemorrhages.

A negro attendant, in a building directly opposite, discovered the blaze and sounded the alarm. A spark from the furnace is believed to have caused the blaze. Attorneys at the institution estimate the loss at \$18,000.

PENDLETON CO. ITEMS.

(Falmouth Outlook)

Whether to sell the tobacco crop in the barn or wait and take the market price over the loose leaf floor, is a purely speculative matter, to be decided by the grower and the tobacco market is always too uncertain for any one to give advice. There is one thing certain, and that is, many growers in Pendleton county who earlier in the season avowed their intention not to sell on the market are finding it hard to turn down the enormous prices being offered, and many are weakly coming in. Buyers are not expected to be in business for their health, and it is now absolutely certain that tobacco will bring the highest price ever known. We will have to admit that if a buyer comes along and offers a grower from 25 to 30 cents for his tobacco, it is rather hard to turn it down.

Matters are shaping up admirably in Falmouth for the young people. Everybody is short of coal, and the electric lights are "blowed out" at nine o'clock.

The City Council received a car of coal of fifty-four tons, November 6th, and it was used up by November 15th. It cost delivered at the Falmouth depot, two hundred and ten dollars. It takes over twenty-three dollars per day for coal alone to run the light plant and water-works.

The Outlook has tipped it off to the tobacco grower all along that the sky will be the limit on the weed this season, and they should sit steady and watch the balloon callers. We see some of our growers have placed a high price on their tobacco, and have sold at what seems to be good prices, but they have sold too cheap.

A. N. Edwards, of near Boston Station, was in town Tuesday and was wearing a broad grin on his face. He had just sold his tobacco to Baskett & Fryer at \$32 per hundred. He dropped into our office and gave us three points out of this fine crop for more Outlook. Mr. Edwards is a tobacco raiser from a way back in the tall and uncut, and has topped all the growers in this county so far.

The City of Falmouth is again out of coal with gloomy prospects ahead of us. J. L. Rogers received a car of coal one day last week, and farmers from the country came with wagons and took it home. The power house ran out of coal Saturday and was forced to shut down for the day. However, the city received a car of coal Sunday which will last only a week.

Our roads are in a deplorable condition, and growing worse day by day. We are satisfied that the present system of repairing the roads is a farce. What we need is a patrol system, like the railroads have, to keep the pikes in repair. In this way, more good can be accomplished for half the money than is now being done. One thing is certain, the present system is not satisfactory. Let's try something else.

The beautifully perfumed new tax law has robbed the City of Falmouth of a good deal of money at a time when wages of the city employees have increased 40 cent and coal 250 per cent. What has been the consequence? The City Council has been forced to raise the price of electric current and water rent, and more likely next year taxes will be raised to secure sufficient revenue to run the city.

A Complete Stock of United States Tires Carried by EDDINS & BAKER, Burlington, Ky.

CARROLL COUNTY ITEMS.

(Carrollton News.)

The five Carrollton loose leaf sales houses announce the opening sales day on Monday, Dec. 10.

++++ Farmers complain about the great amount of soft corn in this year's crop, caused by the early frosts.

No. 2, Barney Taylor brought 21 lbs. of cream to Carrollton Saturday that tested 63 and brought him \$6.87, which is a record-breaker.

++++ Very little tobacco has been sold to speculators in Carroll county, growers preferring to try the open market.

++++ Two lots of new corn, one of 500 bushels and another of 300 bushels sold near Carrollton the past week at \$1.30 per bushel. A big corn grower of the Kentucky river bottoms informs the News that he received \$1.27 for his extra crop.

Stripping Tobacco.

A few of the growers are thru stripping tobacco, but the majority of them, have just started. The crop cured well, the color, length and body perfect, and is the prettiest stuff the buyers ever laid their eyes upon and just the kind of tobacco the manufacturers desire. The crop this year is the finest ever and can't be beat. The price is good, but is not as good as the tobacco sold near Carrollton the past week at \$1.30 per bushel. A big corn grower of the Kentucky river bottoms informs the News that he received \$1.27 for his extra crop.

THE TRI-STATE REWARDS LOYALTY

Appreciation of regular patronage has always been one of the cardinal principals of TRI-STATE dealings. A Bond is enclosed with each check.

Thousands of TRI-STATE Patrons will do their Christmas Shopping with Tri-State Bonds. Write for free catalog illustrating the great value of TRI-STATE Bonds. Ship your next can to

The Tri-State Butter Co.

(The home of 25,000 cream producers) CINCINNATI, O.

The Tri-State has paid 50 CENTS per pound for Butter Fat since October 29th.

Price this week November 26th to December 2nd, **50c** PER POUND —for— BUTTER FAT

Laurelton. — Benj. Moberly, 26 years old, who has been confined in the county jail here for the past three months on a charge of horse stealing, made a daring escape Tuesday afternoon. Moberly, who had been locked in his cell, filed through the steel bars into the corridor and dug his way out through a brick wall several inches thick. His only implement was a saw fashioned from a bed spring. Ten other prisoners were in the jail at the time. All of them remained in their cells. Sheriff Ballard left on a hunt for the fugitive as soon as his escape was discovered.

Harrodsburg. — A suit of unique nature has been filed in the Mercer Circuit Court and attorneys say they cannot recall a similar suit filed in the U. S. Last May Elizabeth Hester Corn, 32 years old, died from measles. Her father, John Corn, has filed suit as the administrator of —his daughter— against Edgar Robinson for damages alleging that "while knowingly himself afflicted with measles, a contagious disease, he negligently and carelessly mingled with people, or whom the state was one, and scattered the disease, which she contracted and from which she died."

Identifying Us.

We travel but seldom. When we do adventure out of our beaten path we love to go in style. Just before we made a recent trip we discovered that our faithful gripssack presented an appearance of precarious security. An old, grizzled relative, who is a retired farmer, volunteered to refurbish it with an embrocation which he had evolved for use as a harness dressing or hair restorer. We have forgotten which. When applied the preparation smelled somewhat atrocious, but our kinsman assured us that the odor would soon pass away. With our reticule grossly bedaubed we took our seat in the train. By this time we had become used to the scent, and ceased to notice it. Presently a venerable citizen of "Yowopply" seated himself beside us. We gave him our views of the weather, the war and sundry other subjects. "It wouldn't surprise me if you was a mighty smart man," our seatmate eventually observed. "You're a horse doctor, ain't ye? You shure smell like one!"—Kansas City Star.

Tapestry Weaving Almost Lost Art.

Today the sole repository of the art of tapestry weaving is the workshop of the Gobelinists, established by Louis XIV in 1662 with 250 workmen, who are now reduced to 60. Only a century ago there were a number of such repositories. The pope, the king of Spain, and the king of Bavaria maintained workshops in Rome, Madrid and Munich. William F. Paris tells us in "Decorative Elements in Architecture," that others existed in Turin and Naples. But more than a half century ago all of these went out of existence. Not until 1906 did the Gobelinists court any publicity by giving an open exhibition of their work, a display then being made at the annual exposition of French artists in Paris, New York Evening Post.

Individualism Destroying Family.

Mr. Tokutomi, one of Japan's foremost writers, in discussing the question of the family, lamented the fact that the advancing individualism of the nation is undermining the power of the family council, so long the social backbone of Japan. A strong family system, he says, will relieve the police and law courts of many cases and simplify internal administration, thus leaving the state free to devote its energy to world politics. "It must not be forgotten that the Japanese family system is the heart of the Japanese empire where the spirit patriotism is first cultivated, and that it is essential to make this family system perfect and to support its growth."

Cockroach Older Than Man.

The despised and malodorous cockroach is one of the most remarkable of living things. It has existed on the present form ever since the Archæozoic age, billions of years ago. During that time whole families have lived and died. Man is a newcomer on the face of the earth compared to the cockroach. This shows that this insect is a type specially fitted to survive, in fact, are most insects. They are the only form of life which man has not conquered and are for that reason his most dangerous enemies in the animal world.

Sheep's Tail Weighs 20 Pounds.

The best variety of Syrian sheep has a broad, flat tail which, when fattened, attains a weight of 20 or more pounds. When skinned and boned, the fat which composes nearly all of the tail is cut into small pieces and cooked down slowly, like our own lard. When it is all melted, the choicest portions of the animal are cut into small pieces and cooked until done in the fat; seasoning is added, and the mixture is turned into jars, where it becomes a solid mass when cold.

Something to Practice On.

Anna knocked at a neighbor's door and asked for the loan of her baby. "What do you want it for?" the neighbor asked. "Well, we are learning to wash and dress babies at school, and we only have a doll. I thought you would not mind loaning your baby until tomorrow so we could have the real thing to practice on."

Electric Screwdriver.

An electric screwdriver is said to be a great time saver where any considerable part of the workman's time is taken up in driving screws. In the construction of the tool a friction clutch with a spring release is provided, so that when the pressure is released the driving bit does not revolve, but the motor continues in operation.

"Tortillas" Mexican Bread.

"Tortillas" are the Mexican substitute for bread. They are made of bulled corn which has been ground and pounded into a paste, but is cooked without leavening of any kind. These, Doctor Spilodon says, are delicious when made thin, but they are usually thick and soggy.

First Paper Brown in Color.

When paper was first made in England, in 1588, it was only of a brown color, and it was not until about 1690 that white paper was produced, and even then it was of inferior quality.

Getting a Rest.

Some of us are slaves to society; others routinely refuse to answer the door bell on Sundays.—Kansas City Journal.

FARM POULTRY

ECONOMICAL FEED FOR HENS

Simple Ration, Consisting of Corn and Protein Supplement Favored by Ohio Station.

That a simple ration consisting of corn and a protein supplement is more economical under usual market conditions than a mixture of several different feeds for laying hens is shown by feeding tests at the Ohio experiment station.

Corn and meat scrap have given practically as good returns as a ration of corn, wheat, oats, bran, middlings, oilmeal and meat scrap. The hens fed the simple ration had access to dry mash feeding hoppers containing a dry mash made of eight parts of ground corn and five parts of meat scrap analyzing 50 per cent protein. They received twice as much corn, fed in equal portions in the litter twice daily, as they consumed of the mash, and also had grit and oyster shells.

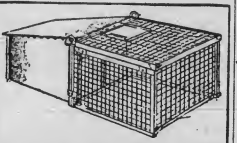

The hens fed the variety ration laid more eggs, but not enough more to pay for the extra cost of their feed. Tankage and skinn milk, as well as meat scrap, are recommended to be fed with corn for laying hens.

YARD FOR LITTLE CHICKENS

Wire Covered Device, Attached to Brooding Coop, Will Be Found Quite Convenient.

For the person who hatches and broods little chickens in the good old-fashioned way, with Biddy to furnish the heat, this little covered wire yard to be attached to a brooding coop should prove a mighty handy arrangement. It will keep the little fellows from wandering far away from mother until they are large enough to know enough to come in out of the rain when one of those frequent showers blows up; and this wandering, while still young and foolish, is cause for the death of a goodly percentage of early hatched chicks, and is incidentally cause for a whole heap of trouble running about the good housewife who looks after most of the chickens on our farms.

This pen consists of four rectangular frames, or woven wire walls. The two side and end frames are hinged to the top frame so that they can be folded

Collapsible Chicken Yard.

under or into it when not in use, or when being shipped to the buyer; thus they can be folded into a small space for shipment or for storing from one brooding season to the next. When placed in front of a brooder coop, this contrivance gives the chicks a little grassy range, and yet keeps them within the sound of the cooing call of the hen. Also, the coop can be opened so as to allow the hen to have the same range as the chicks, and a little exercise is a slight good thing for her as well as for the chicks. Incidentally, this little pen keeps rats and other prowling, murdering varmints away from the chicks.

PACKING EGGS FOR HATCHING

Good Plan to Use Strong Basket Lined With Excelsior—Aim to Prevent Any Jarring.

A good way to pack eggs for hatching is in a strong basket. The basket should be lined with excelsior or other spring material which will hold its position about as thick; then each egg should be wrapped with excelsior, half an inch thick, and carefully nestled in the basket until all the eggs are in; then they should be covered over with an inch of excelsior and a cloth cover held on by tacks pushed into the rim of the basket, or sewed down by passing heavy string through the cloth and through the basket beneath the rim.

Such a package is strong and does not jar the eggs enough to hurt them, even when quite roughly handled. A basket with a strong, upright handle should be used, so that other things cannot be piled on the basket and crush it.

COCKERELS TO HEAD FLOCKS

Wide Field for Farmer Who Wishes to Specialize in This Business—Eggs Are in Demand.

Each year many farms start in the purchased poultry business, and in time are wanting to purchase eggs to raise cockerels to head their flocks for another year.

So there is a wide field open for the farmer who wishes to specialize in this kind of business.

Copsa for Young Poultry. Early hatched poult (little turkeys) should have more roomy coops where, with their mother, they can exercise indoors when the weather is bad, and take advantage of good weather to get out on the ground.

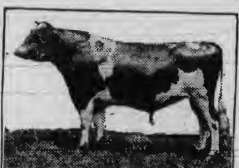

DAIRY FACTS

RECORDS WILL AID BREEDER

Dairyman Must Answer Various Questions Asked by Prospective Buyer of Herd Sire.

(By L. W. WING, JR., Missouri Agricultural College.)

The present sharp competition in the dairy business and the increased price of feed force the successful dairyman to secure the greatest return possible from his outlay. If he has registered cows he expects more for his progeny than if he had only grades. But to obtain more and enough more to pay to keep purebred stock, the dairyman must be able to answer the following

Superior Purebred Bull.

questions from the prospective buyer of a herd sire. Is the sire registered? What is the record of his dam? How many advance registry daughters and proved sons has his sire? And what are the records of his granddaughters and grandsons? If the breeder is selling a registered cow he must answer: What is her record? the record of her dam and granddam and the ability of her sire and grandsons to produce advance registry daughters and proved sons?

VALUABLE HINTS FOR DAIRY

Overfeeding Causes More Trouble Than Underfeeding—Make Change to Skim Milk Gradual.

(By H. H. KILDEE, University Farm, St. Paul.)

In rearing and developing dairy heifers:

- Don't overfeed. Twice as many calves are stunted by overfeeding as by underfeeding.
- Don't change suddenly from whole to skim milk.
- Don't keep calves in damp, dark, crowded, poorly ventilated barns.
- Don't feed milk in dairy pails.
- Don't be irregular as to time of feeding, temperature or amount of milk.
- Don't feed too much alfalfa hay before the calf is three months old.
- Don't let calves suck each other after drinking milk. They should be placed in stanchions and fed grain.
- Don't make calves go without water because it has had milk.
- Don't let calf drink foaming milk just from the separator.

MILKROOM IS A NECESSITY

Particularly Desirable in Warm Weather and Should Be Screened and Kept Clean.

A milkroom is a necessity in dairy-lux, according to W. E. Tomson, instructor in dairy husbandry in the Kansas State Agricultural college.

A milkroom is needed at all times, but is particularly important in warm weather, pointed out Mr. Tomson. Milk must be kept away from flies. The room should be tightly screened and kept in a sanitary condition.

The milkroom affords good facilities for keeping the milk cool. This is essential because when the temperature of the milk is higher than 5 degrees Fahrenheit bacteria that cause the milk to spoil in a short time are likely to develop.

GOOD TREATMENT FOR COLIC

Disorder Is Result of Feeding Materials Not Adapted to Stomach of Young Animals.

Colic is calves is the result of feeding materials not adapted to the undeveloped stomach of the young animal, or the feeding of the regular ration at unusual hours or in unusual amounts. The calf usually suffers violent abdominal pain, indicated by an unusual activity of the animal, frequent and convulsive kicking and, finally, complete prostration. Unless relieved within a short time, death usually follows. A standard treatment is to drench the calf at intervals of two hours with a mixture containing a teaspoonful of turpentine and a tablespoonful of raw linseed oil.

GIVE RIGHT AMOUNT OF FEED

Careful Feeders Study Individual Animals and Keep Them at Their Maximum Production.

Many careful feeders have their cows giving the most milk four or five weeks after the freshening begins. They study the individual animals and endeavor to keep them at their maximum production by giving just the right amount of feed and no more.

POULTRY FACTS

NEW WHITE DIARRHEA TEST

Fowls Are Vaccinated by Injecting Preparation into Skin of Wattle—Test Not Difficult.

Trial of a new test to determine whether chickens intended for breeding stock are free from white diarrhea infection is giving promise of deciding this important matter with little trouble at small expense.

The new test is made by vaccinating the birds by injecting a vaccine preparation into the skin of the wattle. If the chicken is a carrier of white diarrhea germs, the wattle vaccinated will develop a doughy swelling in about 24 hours after the vaccination.

The test now being made use of by some experiment stations is to take a few drops of blood from the wing of the bird being tested and decide the matter of infection by a complicated laboratory test. The vaccination test, if it proves to be what it now promises, will be inexpensive and easily accomplished even by the average poultryman.

ROOSTER TO IMPROVE FLOCK

Difficult Matter to Select Cockerels as They Are So Much Alike When Quite Young.

The kind of cockerel used is far more important than most poultry raisers believe. The fact that one bird looks well and is healthy and active is a good indication of a good bird. But this is not enough. The male bird should be of such good breeding that he will improve the flock. If he is not capable of doing this he is not worthy of his place as head of the flock.

When you are selecting the male birds from the young cockerels of your own flock you should use your best judgment and find the best individuals. In this case you must be influenced by the appearance of the birds, as for the most part the cockerels will be about the same in breeding unless you have trap-nested and kept records on the hens.

It is rather hard to select young cockerels, as they may often deceive one when they are quite young. Like

Excellent for Head of Flock.

a calf, a colt or a pig, there is much speculation in selecting for breeding purposes. Nevertheless, there are certain characteristics that may be noted. From these a careful breeder will determine the male birds for his flock.

ONIONS FOR LITTLE CHICKS

Make Fine Healthful Green Food for Young Fowls—Keeps Them Busy Scratching.

Onions chopped fine and scattered in the litter make fine healthful green food for chicks. They scramble and fight for the juicy bits and it seems to wake them up and keep them scratching when it is too stony for outdoor exercise.

With chick feed high there is an increased risk to feeding inferior grains.

SUNSHINE IS OF MUCH VALUE

Stimulates Fowls to Greater Activity and Is Nature's Disease Destroyer—Avoid Excess.

Sunshine is one of nature's greatest gifts but "the same sun which melts wax will harden clay." Although sunshine is of great value, for it stimulates the fowls to greater activity and is nature's disease destroyer, yet if it is used to excess, it may do great injury.

Hen's Digestion.

A hen's digestive capacity is limited, the number of eggs produced is determined by the difference between body maintenance and digestive capacity. Maintenance is governed largely by conditions which the poultry man can control.

Reliable Food for Fowls.

Bones that have marrow in them, when ground, make an exceedingly reliable food for fowls.

Brooders Needed.

For every 250 eggs incubator you need at least three brooders.

Local Happenings.

The good weather resigned last Thursday.

Big loads of tobacco will soon begin to arrive at the Yelton warehouse in Burlington.

Many of the farmers in this part of the county have killed their hogs and spareband back bones grace many tables.

Here in hoping you will have a nice fat turkey for dinner today, together with all the good things it takes to constitute a modern turkey dinner.

Considerable metal has been put on the streets in the center of the town the past week, and when it gets smoothed down the streets will be in pretty good condition once more.

Peter Hager, of East Bend, sent a truck load of hogs to the city one day the past week, and among them were several of the "Mule Foot" breed, and they were fine specimens of the hog family.

What's the use to keep talking about the coal shortage? Chop wood! If you can't get coal and wood a good substitute? No use to keep harping on the one thing when you can harp on two things on the same harp.—News-Herald

A soldier in one of the camps, writing to thank some good woman for sending him a quantity of tobacco, to be used in his work, his old, odorous pipe, said that "a soldier without his smoke is like a baby without its bottle."

The new Indiana State Highway that will run thru Lawrenceburg, Aurora, Dillsboro, North Vernon, Versailles, Seymour, and other points to Evansville, will be 24 feet wide. The new road will be free from steep grades and will be built of brick, concrete or some other lasting material. The length of the road thru Dearborn county will be 18.2 miles and the appropriation for its construction is \$15,000. The road will be kept in repair by the state.

The Grant County News is publishing the names of the contributors and the amount given by each in the Y. M. C. A. drive in Grant County. It shows who is who in the matter of standing by the country, and a list in this county would be of interest to the patriotic public, besides being a rebuke to some who are worth their thousands and who turned a deaf ear to an appeal for funds for the comfort of the boys at the front.

Are We "Slackers"?

(Aurora Bulletin.)

To the persons who have still to be aroused to the fact that the United States is really at War, a few pertinent facts with regard to the cost of the great struggle we are at present engaged in might not come amiss. It has been estimated by those in the line of government activities, that to carry on the war we must spend at least twelve billion dollars per year, or thirty-three million dollars per day. Great Britain is already expending this huge sum while Germany is spending but half that amount in her efforts for the control of Europe. Europe is already so deeply in debt that she may never be able to pay and if the U. S. must keep up war expenditures at the present rate over a period of 18 months, she will be in the same fix. The result of the war will be to impoverish the nations participating to an extent never before experienced in history.

The normal savings of the U. S. in times of peace is about four billion dollars. Not only will the war absorb this, but we must find eight billion dollars in addition. Our allies during the past three years have secured much assistance from us, but in their present impoverished financial condition, they can be of no assistance to us and there is no one to whom we can turn for the help we are sure to need.

The danger of a food famine has at last been brought home to us so forcibly that we are making an effort to reduce consumption, although we are handicapped to a great extent by the present high price of labor. We are reaching a point where the increasing demand reduces the supply and we are facing the possible further rise of the price of commodities to exceed present conditions in England where the prices are now up one hundred and twenty per cent. The most effective remedy for this condition is to reduce consumption, and in this effort every man, woman and child in the nation can help. We must make a drastic cut in personal expenditures—it must become a personal matter with individuals to determine just how much they can do without for the sake of their country's welfare in the future.

"Slacker" has become the ignominious term applied to the young men who "to avoid military duty, but the person who will not do his or her best to economize and help our country win the war is truly a "slacker" as the young man of military age who deliberately plans to avoid serving in the ranks. It is not a question of whether or not your income justifies an expenditure, but whether your country can afford to get you spend. There are many ways in which we can help and the particular way in which this individual may help most will become apparent to him upon thoughtful consideration of the subject.

WAR TALKS

By UNCLE DAN

Number Three

How War Methods Have Changed Everybody Must Help.

"Hello, Uncle Dan, Jimmie and I have been waiting for you."

"Sorry if I have kept you long," said Uncle Dan. "Your mother has been telling me how bushful I used to be. She said if a girl spoke to me I would blush to my hair roots. Well, I reminded her of the time your father first came to see her and the joke we played on them, so I guess that will hold her for a while."

Continuing, Uncle Dan said: "You want to talk more about the war, do you? Well, war methods have undergone many changes and they are still changing. In early times, the weapons were stones, clubs, spears, bows and arrows, swords, etc. In this kind of warfare, victory was with the strong right arm. Men of enormous size and strength were the great warriors. The invention of gunpowder, however, has changed this. It has enabled men to kill one another at a considerable distance, and do it wholesale. The war, as we know it now, is a combination of chemicals, machinery, mathematical calculations and highly trained men. Just think of it! Airplanes, submarines, armored tanks, or caterpillars, poison gases, and curtains of fire are all used for the first time in this war; and they are destructive beyond anything heretofore known."

"The methods followed by the Kaiser and his allies are simply devilish. He must answer in history to the killing of thousands of innocent women and children. He has broken every international law and every rule of warfare; he has humiliated heads of state and undressed titles, sunk Red Cross ships on errands of mercy; he has destroyed cathedrals and priceless treasures of art that can never be replaced; he has made slaves of his prisoners; he has tried to get us into war with Japan; his chemistries have blown up our ships, burned our factories and fired our forests. He knows no mercy or honor. The most charitable view to take of this blood-thirsty tyrant is that he is crazy."

"One thing is certain," continued Uncle Dan, with great emphasis, "Our liberty and the safety of our homes and our country, and the security of the world demand the speedy and absolute overthrow of the Kaiser and crushing out once and forever the reign of Prussian brutality."

"How about the German people," said Billie.

Uncle Dan replied: "The splendid German people were happy, thrifty, prosperous and contented. They have been tricked into war and made to suffer the tortures of the damned; they have been cruelly and systematically deceived. God grant that the real facts may get to them, and if they do, Lord help the Kaiser!"

"Of course the allies will win," said Mrs. Graham.

"Probably so," said Uncle Dan. "But if we are to win, we must go the limit. We must check the awful destruction of shipping by the German submarines, or we may not be able to get food and supplies to our own men and to our allies; we must also put hundreds of thousands, and perhaps millions, of first-class soldiers in the battle line."

"Good is the first consideration," Uncle Dan continued. "So many can build out against hunger. It has been said that food will win the war, and this is largely true. Hence the importance of the farm in the war plans of our country."

Mrs. Graham interrupted by saying: "In view of the importance of farming, don't you think, Daniel, that the farmers ought to be exempted from war service?"

"No, a thousand times no," said Uncle Dan, striking the table so hard to emphasize his protest that he tipped over a vase of flowers. "We must have no class legislation. The duty to serve is the common duty of all, and no class must be relieved of this obligation. The question of exemption must be a personal one and decided by the facts surrounding each case. In no other way can we have a square deal, and to insure this, it is the duty of congress to pass immediately the Chamberlain bill, or some such measure, which is fair to all classes. It would settle all these questions and do it fairly. Safety now and safety hereafter—demands such legislation, and let me suggest that you and your friends get busy with your congressmen and senators and urge them to prompt action."

"It is time for us to realize that we are now living in a fool's paradise; that this great country of ours, cost oceans of blood and treasure and it is only due to the loyalty, sacrifice and service of our forefathers that we have a country, and it is our highest duty to preserve it unimpaired and pass it on to posterity, no matter what the cost may be. Our citizenship and their ancestors came from all parts of the world to make this country a home and enjoy its blessings and opportunities; hence, in the crisis before us, it is the duty of everyone to stand squarely back of our country and be prepared to defend the flag. Every citizen must be either pro-American or pro-German. Great as the country is, there is not room enough for two flags."

100 BETTER ROADS

PUT CONVICTS ON HIGHWAYS

More Prisoners to Be Worked on Public Roads This Year Than Ever Done Before.

More prisoners will be worked on the road this year than ever before. Impetus has been given to the movement for convict road work through the publication by the United States department of agriculture of a bulletin, "Convict Labor for Road Work."

The national committee on prisons and prison labor has been interested

Good Road in North Carolina.

In this report as essential to the success of convict road work are the same as those the committee has considered imperative. These principles are that when county convicts are to be employed on the roads they should be turned over to the state convict road force, all convict road work being under state control.

The second principle is that there should be co-ordination between the state prison and the state highway departments in regard to convict road work. The prison department should select the prisoners for this work, and make all rules regarding their care and discipline. This department should also supervise the carrying out of these rules. The highway department should have full charge of all road operations, and be responsible for carrying out the rules and regulations made by the prison department.

The report takes up in detail the selection of camp officers, and the keeping of records and accounts, including suggestions for order slips and vouchers.

Other features of the report which will be specially valuable to authorities carrying on convict road work deal with the location of a camp site, water supply, camp sanitation, quarters and structures, health conditions and care of the sick and injured, clothing and rations. All are discussed scientifically and practical suggestions are made which can be followed out in any part of the country.

The department of agriculture has rendered service to prison and road authorities, while private citizens have now available standards by which to judge the convict camps in their vicinity. The year 1917 should be a record one for convict road work if local authorities use to good advantage the assistance afforded them by the department of agriculture through the office of public roads and rural engineering.

IMMENSE COST OF BAD ROADS

Farmers Allow \$300,000,000 to Escape Each Year Because of Poor and Unimproved Highways.

The farmers of the United States have been allowed \$300,000,000 in real money to escape from their pockets each year because of poor roads, according to the testimony of experts who made a survey of the effect of bad roads upon markets for the department of agriculture. Just when the farmer has the opportunity to market his crops at top prices, bad weather closes the roads to heavy hauling and he must wait until another season. To the loss of the farmers must be added an economic loss equally large suffered by the nation. If the rural roads could be used for traffic the year round, Uncle Sam would save more than half a billion dollars. This is a typical bad-road blockade exists for weeks and often months in rural districts.—Scientific American.

Duty of Every Farmer.

Every farmer should feel his dependence upon good roads. Whether or not one lives on a public highway he should take an interest in the nearest one to his farm or to his home. He must use to market his farm, orchard and garden products.

California's Highways. The state of California has voted \$15,000,000 to be spent in perfecting the state highway system and not a single county failed to give the empowering measure a majority.

THE KITCHEN CABINET

Habit is habit and not to be flung out of the window by any man, but coaxed downstairs a step at a time.

An ounce of prevention is a good antidote for remorse.

TEMPTING DISHES FOR THE INVALID.

As the invalid who is convalescing needs food to rebuild waste tissues and usually has no desire for food, the problem for the home nurse is a real one. The fickle appetite of an invalid must be tempted by dainty, attractive looking food to create an interest great enough to cause him to taste of it. The tray should be arranged in the most pleasing way with the best of linen and prettiest china that the house affords. If a flower or two is placed on the tray it adds greatly to the invalid's pleasure.

In case of contagious diseases it is an excellent plan to use paper dishes and paper napkins that can be burned immediately. There are many shapes and sizes of paper dishes also available if one cares to buy, saving the washing and disinfecting of dishes.

When serving a hot dish of any kind it should reach the patient piping hot and if the dish is an ice or a cold one it should be cold.

There is nothing more distasteful even to a well person than a hot dish served lukewarm or a frozen dish half melted.

All fruits and cereals served to an invalid should be long and well cooked. Dried fruits should be soaked overnight and cooked until soft. Prune juice, orange juice and many lightly sweetened juices are all suitable to give to the sick. Water, when given in digestion is weak, is very helpful in inducing an appetite for more nourishing foods, as is beef extract. Fresh buttermilk, junket, koumiss and clabbered milk are all most valuable to give variety in a milk diet.

A rosy apple cooked in its skin and carefully skinned leaving the pink on its cheeks, then served with a sirup of records and jelly, peeling in the stewed juice of the fruit. Add cream and the dish will look so pretty that the patient will want to try it.

Nellie Maxwell
The KITCHEN CABINET

Happiness is the only good. The place to be happy is here. The time to be happy is now. The way to be happy is to help make others so.

GOOD THINGS FOR THE TABLE.

Cut a slice of ham an inch thick, place it in a baking pan covered with butter.

Put a little brown sugar mixed with a quarter of a teaspoonful of mustard, salt and pepper if needed and bake slowly until the milk is absorbed, then brown. Another way to cook ham is to add a cupful of sweet cider with a bit of sugar and mustard and bake as above. Vinegar and water may be used in place of the cider or just vinegar, using the two tablespoons, and sprinkling the top of the slice of ham with brown sugar and mustard.

Sour Cream Cake Without Eggs—Dissolve a teaspoonful of soda in a tablespoonful of water in a mixing bowl, add a cupful of thick sour cream, a half cupful of New Orleans molasses and a cupful of brown sugar. Stir until the sugar is well dissolved, then add three cupfuls of flour, a teaspoonful of cinnamon, half a nutmeg, a saltspoonful of ginger, beat until smooth, then add a pound of raisins that have been floured with two tablespoons of flour. Turn into a square pan and bake slowly for one hour. Keep in a well covered tin box four days before serving.

Sugar Cookies—Cream two cupfuls of sugar with one cupful of butter, or any shortening preferred, add two well-beaten eggs and beat until light. Add alternately one-half cupful of milk with one cupful of flour sifted with a half teaspoonful of salt and one and a half teaspoonfuls of baking powder. Then add more flour to make a mixture to handle and roll out. Beat with a cookie cutter and sprinkle with white sugar just before putting into the oven.

Chopped Steak en Casserole—Put two cupfuls of finely chopped steak in a well-buttered casserole, season with celery, salt, pepper, onion and a little mushroom ketchup or Worcestershire. Surround the steak with rice, add over two cupfuls of boiling water and bake for an hour and a half in a moderate oven. Keep covered while cooking. Serve with tomato or brown gravy sauce.

Nellie Maxwell

Wool! Wool!

In an estimate to Mr. Hoover recently, the National Sheep and Wool Bureau predicted that the United States will need 750,000,000 pounds of wool during 1917. We believe that this estimate includes the wool required for blankets, shirts, and underclothing as well as for soldiers' uniforms.

The 1917 American wool clip is 260,000,000 lbs. This will also greatly increase the price of clothes; so you know by this that prices will go soaring, and it will pay those who can to buy now. We are prepared to sell you at the right price and will give you Quality, Style and Workmanship. We have Men's and Young Men's

Suits and Overcoats

Ranging in Price from

\$10.00 to \$22.50

Boys' Suits Ranging in Prices

Regular Correspondents.

HEBRON.

Mrs. Joseph Bullock is ill.
Sunday school next Sunday at 1:30; preaching at 2:30 p. m.
At last report Frank Bosman, Sr., had not improved very much.
Hebron Red Cross has turned in to headquarters:
63 hospital shirts,
243 bandages,
68 slings,
8 sweaters,
11 scarfs,
9 pair socks.
Everyone is doing their best.

BIG BONE.

S. K. Rust and J. P. Hamilton killed hogs Saturday.
J. L. Rich and Johnnie Hamilton shipped some nice cattle to market Sunday night.
Mr. and Mrs. J. M. Baker entertained the young folks with a social Saturday night.
Mrs. Ollie Carroll and children, of near Walton, were visiting. Mrs. F. M. Howlett recently.
There will be regular services at the M. E. church here Sunday by the pastor, Rev. Hall.
Omer Black and family spent last Sunday at Walton, visiting his wife's father Enoch Snow.
The Ladies Aid Society of the M. E. church will meet with Mrs. H. F. Jones, Thursday. All members are requested to attend.
Reconstruction work is progressing nicely on the old Willis pike, which extends from Big Bone to Union, Harris & Meyers being the contractors.

The public sale of A. P. Dickerson and J. T. Williams which was advertised for Tuesday of this week was postponed on account of the weather until next Saturday, Dec. 1st, and will begin promptly at 10 o'clock a. m. Bear this in mind.

Another spell of foggy weather has struck this part of the country.

Wanted—Good 2-year old Draft Mare, John Walton, Burlington, Ky., R. D. 1.

GUNPOWDER.

Lloyd Tanner is now a resident of Union precinct.
Ernest Horten finished gathering corn last week.
R. E. Tanner was laid up for repairs a few days last week.
Mrs. Grace Clore spent the week's end with her mother, Mrs. P. P. Neal, near Grange Hall.
Several members of the Hopeful church met at the parsonage last Saturday and celebrated the Pastor's birth anniversary by giving him a generous poultice.
The meetings at Hopeful closed with last Sunday's services. There were 13 accessions and much interest was manifested throughout the entire service.

Mrs. Emma V. Rouse has a silver fork which was placed on her basket at the dedicatory services at Hopeful that don't belong to her, and which the owner can have by calling at her home in Florence.
The Death Angel has visited this community again and taken from our midst Mrs. Annie Busby, nee Sanders, wife of L. H. Busby, whose death occurred last Saturday, the 24th inst., at her home at Gunpowder. Mrs. Busby was born October 16, 1862, and was 55 years, 1 month and seven days old at the time of her death. She and L. H. Busby were united in marriage Nov. 2, 1882. To them five children were born, 4 sons—William, who is now serving in the army, Lillian and Edward, who are at home and another, who died in infancy; and one daughter, Mrs. Little Tanner, of Covington. Mrs. Busby and her husband united with Hopeful church several years ago and was an active and consistent member of that body until called to her reward. She had been in rather poor health for several years but there was no cause for alarm until a few days ago, when she got worse very suddenly. Though everything possible was done to restore her to health it was the Master's will to take her to himself. In her death the husband loses a lovely and dutiful companion, the children a kind and affectionate mother, and the community a good friend and neighbor, who was

PETERSBURG.

Ira Lee Thompson spent Sunday at his home here.
Rev. Robt. McNeely filled his regular appointment here Sunday.
Miss Christine Rice was the guest of friends here Sunday.
Mr. and Mrs. Wickliff Jones are guests of Rev. and Mrs. William Wood.
Miss Sallie McWoody has been visiting her sisters here during the past week.
Miss Olive Witham returned to Philadelphia Sunday, where she will make her future home.
Mr. and Mrs. Bernard Berkshire and children spent the week-end with Mr. and Mrs. Harry Fisher.

Boxes of candy were sent from this Red Cross Auxiliary to soldiers in camps from this precinct, for Thanksgiving.
The Red Cross Auxiliary had an all day meeting here Wednesday, serving dinner at the hall. The day was spent very profitably as a great deal of gauze work was done.

Mrs. Stanley Palmer is the guest of her parents, Mr. and Mrs. B. H. Berkshire, Her husband, who was here two or three days last week is serving in the ordnance department in Washington, D. C.
Miss Agnes Thompson entertained Saturday night for Mr. and Mrs. Wickliff Jones. The guests were Mr. and Mrs. Jones, Miss Ruth Snyder, Allen Thompson, Lee Thompson, Karl Botts, Albert Stephens and Henry Mathews.
The meeting being held at the Christian church is attended by splendid congregations and Rev. Lacy's fine sermons are enjoyed by all. There have been 24 additional baptisms by the church since the meeting was held Sunday afternoon, when 18 were immersed. The services closed Sunday night.

Cland Stephenson will have a sale of personal property at his home on the Nannie Criger place next Saturday, beginning at 12:30 p. m. He is going in the store with his brother Leslie at Hebron, and from now on the firm will be Stephenson Bros. See the advertisement in another column.

GASBURG.

Some corn has been sold at the field for \$1.35 per bushel.
A. M. Edwards killed 5 hogs that made over 60 gallons of lard.
Lacy Cropper had a good mule to get killed by jumping a wire fence.

But few rabbits were killed after the 15th of Nov. The crop was about exhausted before the open season commenced.
Mr. and Mrs. Elijah Parker passed the fiftieth anniversary of their anniversary November 21. Rev. James A. Kirtley was the officiating minister.

The protracted meeting at the Christian church, at Petersburg, closed Sunday night with 25 additions. It was a great meeting in every respect and will result in much good.

GRANGE HALL.

Mrs. P. P. Neal is very sick.
Several in this community have butchered their hogs.

Mrs. J. T. Stamper entertained with a pie social last Wednesday night.

Grange Hall school won a banner in the spelling contest at Union last Friday.
Allan Utz and wife, Chas. Craven and wife, Miss Mary Utz and Joseph Surace, spent Friday with Miss Jessie Utz.
The many friends of Lee Norris are glad to see him at home again. He is spending his vacation here, it being the first he has had since he joined the Marines about one year ago. Last week he asked for a few days extension of time, and was allowed 10 days longer, making his stay about one month and giving him the pleasure of spending Thanksgiving at home. He will return to duty the 1st of December.

PT. PLEASANT.

J. K. Tanner and wife visited her parents, in Florence, Sunday.
Wm. Tupper and wife spent Sunday at Thos. Kenyon's of Constance.

Luther Rouse and family were guests at Claude Stephenson's, last Sunday.

Rev. Simmons and Miss Ruby Walton dined at H. V. Tanner's, last Sunday.

A pretty good sample of winter was on last Saturday morning. 15 degrees above.

A. Tanner has moved the toll house from the Anderson ferry pike to his farm.

Henry Souther and family, of Bullittsville, were visitors at her parents here Sunday.

Ross Conrad took a truck load of wheat to market for C. E. Tanner one day last week.

Misses Una Tanner and Mae Farrell spent Saturday night with Mrs. Clifford Tanner, of Bromley.

Don't forget the supper and bazaar to be given at Pt. Pleasant next Saturday night for the benefit of the Red Cross.

Mrs. Howard Tanner entertained with a quilting last Saturday in honor of her daughter, Miss Sarah Elizabeth's twelfth birthday.

Hal Elhouse and wife, Ed. Osborn and wife, R. H. Tanner and wife, Mesdames Bettie Clore, Frances Clutterbuck, Lizzie Day and children, Mr. Edward Swint and Misses Genie, Geneva and Mabel Tanner, dined at Ira Walton's, last Sunday.

HUMB.

Wilford Jones is home from the city.

Mrs. Flora Ross is in a critical condition.

The party at J. M. Baker's was well attended.

J. G. Fennell made a business trip to Verona Saturday.

Orba Baker wife and daughter, were visitors here Tuesday.

Miss Susie Noell was the guest of Mrs. Kathryn Sparkes Thursday.

J. G. Fennell is building a sheep barn for Burton Bros., at Leesburg.

Mrs. Lizzie Noell and mother were in Verona the first of the week.

John Binder shipped to the city several crops of turkey, last Monday.

Will Sparkes, of Verona, was the guest at Russell Sparkes, the first of the week.

Mrs. Sara E. Roberts and grand children visited relatives near Rye, Friday and Saturday.

Mrs. J. M. Jackson and Miss Mary Maxwell visited at Charles Sisson's, last Sunday near Jackson Landing.

FLORENCE.

Albert Lucas and family are visiting Dr. Foster, at Fiskburg.

Mrs. Warren Senour was the guest of Mrs. J. R. Whitson, Wednesday.

Mrs. Owen Bradford entertained Mr. and Mrs. Lute Bradford, Sunday.

Hog killings are the order of the day and the weather is fine for that work.

Mrs. Mattie Rouse and children visited her parents, E. H. Snyder and wife, Sunday.

Mrs. D. H. Brown spent last Tuesday with Mrs. William Sutherland, in Erlanger.

Mr. and Mrs. Jas. Kelly, of Burlington, were guests at Harry Brown's, Wednesday.

Don't fail to attend the Christian church next Sunday and hear Rev. Geo. P. Simmons.

T. Z. Roberts, of near Burlington spent several days with his brother, J. O. Roberts, last week.

Mrs. Mike Cahill had as guests, Sunday, her daughter, Irene, and Mrs. Elmer Cahill and daughter.

Mrs. C. C. Carpenter's house when the chimney burnt out. The fire was soon subdued.

J. R. Whitson says he thinks he will come to Burlington for the winter and for Jailer Fowler to send him word what his office hours are.

Miss Minnie Baxter entertained Miss Pearl Long, Carl Anderson, of Camp Taylor, Chas. Beall, of Hebron, and Edith Carpenter, last Sunday.

Mr. and Mrs. G. W. Ellis entertained Mrs. Arthur Nicholson, of Michigan; Mrs. A. M. House, of Hopeful, and Mrs. Nora Tippet, of Cincinnati, Wednesday.

Recent investigations in the use of cotton in war show:

A 12-inch gun disposes of a half bale of cotton with every shot fired; a machine gun in operation will use up a bale in three minutes; in a naval battle like the one off Jutland over 5000 lbs. of cotton were consumed; more than 20,000 bales a year are needed to provide absent cotton for the wounds of the injured; one change of apparel for all the troops now engaged in the war represents more than a million bales.

DECEMBER 17th to 25th

Red Cross National Membership Campaign Week.

The War Council of the American Red Cross has conceived that a great national purpose will be served by having membership in the Red Cross almost as universal as citizenship.

Fifteen million members in the United States are wanted by December 25th, 1917.

Christmas time has been set to attain this goal, because Christmas and the Red Cross spring from the same spirit—the two great symbols of mercy, sacrifice and cheer.

On this, our first Christmas in this war, we will have the opportunity to show our loyalty to our Government by displaying the Red Cross service flag in our windows.

School Notes.

The last but not least spelling contest was held at Union last Friday, when the last Magisterial District contest, the North Tanner District for Grade Spelling and the contest for High School Banners were tried out by Florence, Bellview and Union.

The contest for Grades was between Union, Pleasant Valley, Beaver and Grange Hall. The Grangers proved too strong for their competitors and won out by a handsome majority much to the delight of their teacher, Miss Eunice Adams, as well as the following this school has, which was present to do the "shouting," and which was expected and of right ought to be indulged in to give vent to the enthusiasm that swells every heart for its respective community.

The real test came for Hi School honors when the Eastern and Western attacks were marshaled against the center of the Union line. Union withstood the assaults with firmness and tenacity. Only one time did this center falter and that proved to be a misdirected attack of the common foe in chief of all the forces, who was pronouncing, So Union held her own and won out for the second year of being entitled to the County honor for High School Spelling, an honor to be envied by the other High Schools.

However, we have commenced at the wrong end of the day for there was a very interesting program in the forenoon, presented by the pupils and teachers of the district, as the Teachers' Association had prepared a delicious lunch for all present, and a day of feasting, exchange of greetings, song, recitation by the entire community. These meetings are very profitable to our schools and beneficial to the communities at large.

The school spirit is rife in our county and interest is growing. We are to have one more meeting, Dec. 7th, at Bellview, and we predict it just as good or better meeting in the "Sandy Bottom" as has been held on the "Alluvial Uplands." May we not be disappointed.

Lawrenceburg—The trial of J. C. Head for the killing of James W. Phillips, which had been in progress here for two days, resulted in a verdict of not guilty. When the jury reported their verdict the court-room was crowded with spectators, who gave vent to their approval with applause.

Edgar Berkshire sent to the RECORDER last Friday a jug of very fine cider which the force enjoyed and thought of him every time they took a nip.

REMOVAL

Economic pressure wholly exhausted may end the war, and sentiment should not be allowed to stand in the way of its application.

Let weak Sollie Gooding, 27, with a wife and two children, living in Goodard vicinity, suffering from an ulcerated throat and in order to relieve the agonizing pain, apply a quart of spirits of turpentine. He seemed to craze him his wife as wild as a buck. His throat finally brought him to St. Louis, where he was admitted to the hospital on a writ of lunacy. Some Sunday the ulcer burst and he was discharged a lot of pus and he was brought into court on a writ of lunacy. He was adjudged "him sane" and returned him to his family. Spirits of turpentine is said to often produce that result when used in a case of Flemishburg Time a case.

in the chicken business.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Mr. and Mrs. Andrew Hopperton of Ludlow, spent Sunday here with relatives.

Judge J. G. Tomlin spent Friday at Carrollton attending the Carroll circuit court.

Linn Percival and wife, of Covington, spent last Sunday here with relatives and friends.

J. W. Waterfield of Cincinnati, spent Sunday here the guest of Judge J. G. Tomlin and family.

Mrs. W. S. Wayland has been quite ill the past week, confined to her bed most of the time.

Mr. and Mrs. Arthur Dean spent Thanksgiving with her sister, Mrs. John Rice, of Richmond neighborhood.

Dr. E. A. Cram of Peach Grove, Pendleton county, spent Tuesday here with his parents Mr. and Mrs. Wm. H. Cram.

Joe H. Sleet of the Beaver Lick neighborhood, spent Tuesday here enroute to Cincinnati to visit relatives and friends.

J. Perry Johnson of Frant, and J. Merle Allen of Switzerland, Indiana, spent Tuesday here with relatives and friends.

W. R. Rogers and sisters Misses Sallie and Lizzie of Burlington, spent part of last week here with relatives and friends.

Misses Ruth Mann and Carrie Vallandigham of Piner, Kenton county, were the week's end guests of Miss Grace Powers.

Mr. and Mrs. Thos. F. Curley spent several days of the past week at Columbus, Ohio, visiting their daughter Mrs. Joseph Baker and husband.

Wm. E. Dixon purchased three Real Estate Agent Geo. B. Powers on Tuesday, six acres with house at Kennington, belonging to Chas. G. Wilson for \$1,200.

Miss Elizabeth Dickey who is attending the State University at Lexington, spent the Thanksgiving holidays here with her mother, Mrs. Boile W. Dickey.

Miss Hester Bedinger who is attending school at Millersburg, Bourbon county, spent the past week here with her parents, Rev. D. B. Bedinger and wife.

Miss Leticia Williams who attends school at Georgetown spent the Thanksgiving holiday with her parents Mr. and Mrs. John E. Williams on the Rosaline Farm near town.

Kenneth Johnson who was recently appointed a page in Congress by our Congressman A. B. Rouse left Sunday for Washington, D. C., to enter upon the discharge of his duties.

Leslie Powers and son Nixon of Covington, and Isaac and William Reynolds of Augusta, Bracken county, spent Tuesday here looking over some farming land that the Ryngaels Brothers contemplate purchasing.

Thieves broke into the Phoenix Hotel last Thursday night and stole several suit cases and sample cases of commercial men. The thieves came in an automobile and a lot of clothing taken from the suit cases was found strewn about the highway leading toward Crittenden.

Judge J. G. Tomlin, Jno. L. Vest and W. T. Loomis spent Wednesday at Dry Ridge attending the sale of the Carlebad Hotel property of which Mr. Loomis is the receiver under the bankruptcy proceedings to close up the claimant's various creditors. The property is valuable and is expected to bring a big price.

Mrs. Hattie Metcalfe and two daughters Fay and Lucile, and sister Miss Louvena Edwards, left this week for St. Petersburg, Fla., where the two ladies have good clerical positions in road offices. They desired to spend the winter in Florida on account of their health and were tendered these positions through friends.

Mr. and Mrs. J. W. Waite of Cross of Sparta, spent Sunday here with his parents Mr. and Mrs. J. W. Waite. He sold his farm of 120 acres near Union at week to J. R. Upton, of Lexington, who also bought the farm of J. H. Stephenson adjoining containing 75 acres, for \$12,750, and Mr. Upton will take possession of both farms about March 1st.

The opening sale of the Walton Loose Leaf Tobacco Warehouse will be held Wednesday, Dec. 12th, for a very successful season as the big concerns will all be represented by buyers on this market, and prices promises to range high as all of the markets indicate fancy prices for all of the different types of tobacco, some ranging from 16 to 20 cents per pound for burley tobacco. The Walton market will be in a position to get as good prices as any of the other markets according to the quality of the tobacco, and A. Ricketts Johnson, who has charge of the office will see that every patron gets the best of treatment.

J. T. Marrow, connected with the Planters loose leaf warehouse, arrived from his home at Henderson, N. C., Tuesday night to be ready for the opening of the market here. Mr. Marrow says the Southern market was higher than he had ever known, averaging 35¢ per hundred, and says one cause for the high prices was the fact that the Japanese government had large orders for all grades—Bracken Chronicle.

Monticello—Geo. Adair, a white man, is lodged in the Wayne county jail for the murder of Eben Jones, slain at Mt. Vernon, last Sunday. Jones was a school teacher and farmer.

There will be a concert for the benefit of the Red Cross at the Walton School Auditorium, Friday evening, December 7th, at 8 o'clock by Miss Zada Rosenthal, vocalist; Mr. Joseph Groff, violinist, and Mr. Thomas Hughes, pianist accompanist. Miss Rosenthal is one of the most talented pupils of Sig Lino Mastoli of College of Music and made a fine debut in the "Post" contest for the best woman singer in Ohio. She has a fine dramatic soprano voice and never fails to win the admiration of her audience. Mr. Groff is a pupil of Emil Herndley, Concertmaster of the Cincinnati Symphony Orchestra and is a young violinist of rare artistic ability, possessing a personality that endears him to his audience. Our own Tom Hughes is a graduate of the College of Music, has a Professor's degree and was a winner of a gold medal given by the college for proficiency. His presence alone insured the audience a delightful evening. The entire proceeds of the concert will be turned over to the Red Cross, so you will not only fit yourself, but your country as well. Admission 15 and 25 cents.

The announcement was received here last week of the nuptials of John H. Herndon, Jr., of Orenton, and Miss Mary Elizabeth Hicks of Union, the ceremony being performed by the bride's uncle, Rev. Oscar Huey, at his home, Crescent Hill, Louisville, November 22nd. The bride is the eldest daughter of Mr. and Mrs. S. C. Hicks of Union, former residents of Walton. The young couple will make their home in Orenton. Their many friends extend their best wishes for a long, happy and prosperous life together.

E. L. Barnes, of Falmouth, was here last week and closed a deal with M. C. Brock whereby he is to take charge of the 250 acre farm of Brock in to purchase one-half of the livestock on the farm, consisting of 25 cattle, 10 horses and a lot of hogs, and a dairy will be started in the spring. Mr. Barnes sold \$2,000 worth of Alfalfa off this farm the past year.

Harry R. Taylor and Miss Julia E. Spanton, both of Kenton county, were married on the 28th ult. Rev. R. F. DeMoisey officiating. They spent their honeymoon in Ohio. The groom is a son of Geo. W. Taylor, a former resident of Walton. The bride and groom are prominent members of Hickory Grove Baptist church of which Rev. DeMoisey is the pastor.

Chas. G. Abernathy, of Dry Ridge and Fred Harrison, of Williamstown were here Monday. Mr. Harrison is associated with Capt. A. G. DeJarnette in the practice of law. He was a candidate for county attorney at last August primary election, but the plum went to Ed O'Hara.

Claude W. Land, Robert Coffman and Clifford Melroy of Camp Taylor, spent Thanksgiving day with homefolks. They like their location well, and are rapidly acquiring the knowledge to fit them for the battle front.

Wm. Rider died of pneumonia at his home near Atwood, Kenton county, last Sunday of a short illness. He left a wife and two small children. Funeral at Independence last Friday, Edwards Bros. in charge.

The postoffice and the Walton Advertiser have moved to their new quarters in the Vallandigham building, and Harry Powers has moved his tailshop to the building vacated by the postoffice.

Mrs. J. E. Winton, 58 died of Crittenden, died of Bright's disease last Sunday. She leaves a husband and five children. She was a daughter of Mrs. Elliott, a prominent Kenton county farmer.

John Sleet and family have moved from Crittenden to the recently property in South Walton, Kentucky moved to Mrs. Eva Hudson's property.

Fred Calendar spent last week at Sparta subbing in the railroad office, at another point as he is now fully qualified to take charge of an office.

Lost—Umbrella with bone handle, torn, tipped with gold and marked on end 180 and L. J. on handle. Leave at Equitable Bank, Walton, L. J. Hudson.

J. Morgan Arnold bought the property of J. B. and Bessie Johnson, the school house for \$3,000. It consists of 5 acres of ground, house and barn.

Jos. C. Hughes, of Richmond, W. Lee Gaines and A. Ricketts Johnson, attended the opening of the loose leaf market in Lexington, Monday.

W. B. Johnson has bought of Jerry Dempsey, Jr., his store building at Beaver. Consideration, \$1,000.

H. C. Diers and wife are visiting their daughter, Mrs. Chas. T. Best, of Paris, Kentucky.

Lambert Brown has gone to Bell county to accept a clerical position in the Southern Mining Co.

For Sale—2 fine Bronze Gobblers, price \$5 each. Mrs. Robt. Chambers, Walton, Ky., Phone 606.

As Russell Smith was returning from the city, Tuesday, his car refused to come any further than G. G. Hughes, and it had to be towed to the local garage.

When the penalty went on last year, the sheriff had collected 2,325 times he had collected 2,937, two less than last year.

Mrs. Newton Sullivan, Sr. and daughter, Mrs. Andrew Kyle, is visiting her son, Prof. Ed. Kyle and family, of McLean county.

The supply of coal in Burlington is very short for this season of the year.

The Fiscal Court was in session Tuesday making arrangements for closing up the year's business to enable them to see where the county "is at" financially.

WALNUT LOGS WANTED

Veneer Works, Lawrenceburg, Ind.

SILLY NEWS FROM FRONT.

The public over here does not know just where our troops are stationed in France, nor where they are fighting; and in this respect we are unlike any other belligerents in the world. What news the correspondents are permitted to send from abroad is fragmentary, and in most cases, incredibly silly. From the Army and Navy Journal.

These words from such a publication as the Army and Navy Journal ought to be weighed by the department that is responsible for suppressing information needed to arouse enthusiasm over the war.

The Star repeatedly has called attention to the absurdities of the censorship. It is getting so that one is fairly ashamed to read what the Army and Navy Journal calls the "Incredibly silly" news that seems to be all that is permitted to come through from France.

We read that the enemy sent a shell at headquarters, and so our artillery retaliated by sending five at the enemy headquarters; that patrols shot at German patrols at night; that a dog came into the trenches. This is not the sort of stuff the trained correspondents in France would send if they were given a chance.

Democracy can not fight a war in the dark. It must be kept informed. And yet the American people have not yet been told all that seaport their men are landing, where they are training in France, or what part of the line they are holding—facts that are known in every detail to the General Staff.—Kansas City Star.

New York, Dec. 2.—Henry Morgenthau, former Ambassador to Turkey, addressing the Free Synagogue here today, said that between 3,000,000 and 4,000,000 American soldiers would be needed on the war fronts of Europe to bring victory to the allies.

In view of the stupendous task facing the Administration, the speaker compared the war to a fearful disease which had been born 50 years ago under the unhealthy political intrigues that infested Europe.

He said that all peoples are to blame for the conditions, but they culminated thru the actions of the German Empire, he said. Just as soon as Germany began to make itself the greatest military power in the world, he pointed out, the moment for the calamity was at hand.

Speaking of the evidences of the political unhealthiness in Southeastern Europe, Mr. Morgenthau said: "When I was in Turkey there was a decided unrest throughout the Balkans and all the surrounding territories, showing a long-ago agrarianism. Bulgaria, Serbia, Roumania and Turkey each wanted to extend territory."

Speaking of conditions in America he said: "There are less than 100 men in America who are capable of thinking internationally. This is due largely to our own history and development, but the leaders will appear as they always have, and we will develop Generals capable of handling 500,000 men, when fifth unto we have only maneuvered 5,000 at one time."

Classified Advertisements.

FOR SALE—No. 1 Jersey cow, Frank Hammon, Lima, Ohio.

For Sale—Large Good Will heating stove, E. C. Riley, Petersburg, Ky., R. D. 1.

A Week's News

Neither side in the war has made much progress the past week.

William Craddock had a valuable milk cow to die one day last week.

The December term of the Boone circuit court will convene next Monday morning.

The Sheriff has got everything in readiness for circuit court which will convene next Monday.

E. E. Kelly advertised for five hundred rabbits Thanksgiving day and late that afternoon five were delivered to him.

The 1917 pictures of Santa Claus do not indicate the war has cut any ice so far as he and his business are concerned.

Mr. and Mrs. Newton Sullivan, Jr., gave the young folks a victrola dance Thanksgiving night. All had a delightful time.

Walter T. Dove, who married Miss Carrie Graves, passed the examination at Fort Benjamin Harrison, and was commissioned a Lieutenant.

Lou Crutcher, the Hebron merchant, was transacting business in Burlington last Friday. Mr. Crutcher is enjoying a very fine trade it is reported.

The Baptist church congregation has secured asbestos shingles with which to put a new roof on the church building. Good weather for the work is awaited.

Senour & Hicks, of Union, delivered to Bert Gaines and Joseph Walton, each, last week, a Ford touring car. The firm is placing a great many 4rd's now.

A man and his family passed thru Burlington one day last week enroute to a home he had purchased in Dearborn county, Ind. He was a Grant county man.

M. F. Wingate, of Petersburg, and "Pepper" Smith, of Bellevue, went to Lexington last Sunday to take part in the opening of the loose leaf tobacco market in that city this week.

The last day on which to pay taxes made a rush at the Florence Deposit Bank, and cashed J. J. Renaker report to the Sheriff, 45 lists that were paid that day at that bank.

It now begins to look as though there will be considerable tobacco ready to put on the market when the loose leaf houses begin their sales. Tobacco will be pulled off the stalk rapidly when the work is once begun.

Many of the growers who saw their crops sell on the loose leaf market last year at a handsome profit over what they got, and declared the speculator would never catch them again, are caught worse than ever this year.

Geo. W. Sandford reports seeing several nights ago a moving light in the heavens which he took to be that of a flying machine. It was proceeding in a southwesterly direction and at a very great height. So far as heard Mr. Sandford is the only person who saw the light.

The final summing up of the Y. M. C. A. Drive made this county show that the county contributed \$3,548.28 in cash and made pledges to the amount of \$275.50, making a grand total of \$3,823.78. The committee has the name of every contributor as well as the names of those who refused.

Mr. Geo. V. N. Davis and Miss Lenora A. Royer were licensed to marry Thanksgiving day. Mr. Davis is the owner of a 1,200 acre ranch in Montana, and Miss Royer is a teacher in the High School at Burlington and a daughter of Rev. Royer, pastor of Hopeful Lutheran church.

Very Much Appreciated.
Editor Boone County Recorder, Burlington, Ky.

Dear Sir,—I am writing to express my appreciation of a very splendid bit of patriotic service rendered by one of the citizens of your county on a recent occasion.

The official secretarial staff of the Army Y. M. C. A. of Fort Thomas, Ky., met for a day's conference on the farm of Mr. Robert Moore to which we journeyed in our machine from Ft. Thomas. Mrs. Moore prepared a bounteous repast for which ability she has a well-known reputation, after which we adjourned for several hours of discussion of the intricate problems which come up in our work. Those present were "Parson" Justice, N. Green, Religious Work Director, Jesse P. Hunt, Associate Director, Frank N. Disbrow, Educational Director, LeRoy Petty, Social Secretary, J. Boster Petty, Social Director, Clinton Wunder, General Secretary.

Mrs. Clinton Wunder acted as secretary of the conference. I want to take this opportunity to express our thanks and to indicate through the columns of your paper that this service was appreciated.

Indirectly the two thousand recruits at Ft. Thomas benefitted by this day of both recreation and discussion of business and of course through the work of the Army Y. M. C. A., we feel that our fighting force is benefitted. Therefore the day's work was really a contribution to the general winning of the war.

Very Respectfully Yours,
CLINTON WUNDER,
General Secretary.

Personal Mention

Harold Gaines and Elmer Fowler came home from Camp Taylor last Saturday night.

Richard Stephens, of Rabbit Hash precinct, came up and spent Thanksgiving with his wife and son.

Miss Kathryn Kelly entertained most handsomely last Saturday night a large number of her young friends.

Mr. and Mrs. Elbert Clore spent from Thursday until Sunday with their uncle, Frank Rowe and wife, at Mechanicsburg, Ohio.

Miss Louise Walton, of Saylor Park, was the guest of her grandmother, Mrs. Fannie Cropper, several days the past week.

Robt. Aylor, of Hebron neighborhood, was a caller at this office one day the past week. He is one of the Recorder's stand-bys.

H. W. Ely, of Erlanger, came over last Friday to stock up on some needed household supplies handled by W. L. Kirkpatrick.

Misses Margaret Hughes, Laura Ryans, Burlington, and his brother, Thomas, who left off of a step ladder several weeks ago he reported as not able to get around much yet.

Mrs. Archibald McGlasson, of Washington, D. C., is visiting in the city. Mr. McGlasson now has command of squadron 4, U. S. Patrol Force at sea.

Mrs. B. F. Akin, of Flickertown neighborhood, and son, Professor Paris B. Akin, of Bedford, Trimble county, were guests of Mr. and Mrs. Newton Sullivan, Jr., Saturday.

J. F. Gross and little daughter, of Point Pleasant neighborhood, were callers at this office last Friday. Mrs. Gross is coming to Burlington but once a year and that is to pay his taxes.

Mike Corcoran, of Bullittsville, was a business visitor to Burlington last Friday. His brother, Thomas, who left off of a step ladder several weeks ago he reported as not able to get around much yet.

Jonnie Hogan was in Burlington Friday afternoon. He and his family have moved to Ludlow for the winter in order that his two children may get the entire benefit of the school in that city during the winter months.

C. C. Pigg, of the Flickertown neighborhood, was in Burlington last Sunday, and mentioned having been offered thirty cents a pound for his tobacco, and a bystander asked why he did not take it when he answered, "What is the use of raising tobacco and giving it away?"

Mrs. Robert Lassing and Mrs. John Lassing, two popular women among the Kentucky colony here have issued invitations to bridge party for next week in honor of Mrs. Warren Lassing, of Covington, who is visiting them.

The hostesses are now permanent residents of St. Petersburg and their guest is spending her second winter with them.

Prof. Paris B. Akin came up from Bedford, Trimble county, and spent the Thanksgiving holiday vacation with his parents, Mr. and Mrs. B. F. Akin, who live down on Woolper creek. The Prof. will never lose his taste for the Woolper Thanksgiving turkey, and if within a reasonable distance, may be expected to be here every Thanksgiving. He is principal of Trimble county High School, where he is making an excellent record as a teacher, and is liked by both pupils and patrons.

Ernest Arnold, who was in the employ of Boone county for some time engineering the public roads, and who entered the officer training camp at Ft. Benjamin Harrison, last summer, was in Burlington last Saturday and Sunday, having completed his course of training and being discharged. Mr. Arnold failed to receive a commission and is a private citizen for the time being. He says he will accept of a very good salary, much surprised at not receiving commissions, and considerable satisfaction resulted.

T. B. Dixon and H. F. Utz, of Devon, were business visitors to Burlington last Sunday. Mr. Dixon is one of those persons whose home stands in two counties, partly in Boone and partly in Kenton, and Mr. Dixon is wholly in Boone county, and he makes his presence recognized every year at taxpaying time when he is informed that there has been a slight increase over the previous year's. Like the balance of mankind Mr. Dixon is of the opinion that too much tax is paid for the returns the taxpayers get.

A False Report.
For some unexplained reason a report is being circulated that I am a partner in the purchase of tobacco made by L. A. Conner and M. A. Yelton.

I desire to state that I have no interest whatever in this or any other tobacco purchase.

Neither have I ever been interested in previous years in the purchase of any tobacco nor do I ever in the future expect to become interested in any tobacco purchase. A. B. RENAKER.

W. L. Kirkpatrick delivered to J. M. Craven, of Erlanger, Tuesday afternoon, a five passenger Maxwell car, a fine piece of machinery. Mr. Craven daily instruction how to handle his machine.

The long Walton hill on the Bellevue pike is receiving a coat of crushed stone and will be pretty rough until it is rolled. Six teams put 72 loads of rock on the hill Tuesday.

Jailor Fowler is working hard to have the Temple of Justice and every department thereof in Ft. Thomas ordered for circuit court, and he will succeed, sure.

Burlington tobacco handlers have opened up business at the warehouse and will have a parcel for sale at an early date.

Baseball, the Great Leveler.

From back of the slaughter line in Flanders come cheering utterances from influential men into whose hands is committed in great part the peace of the world.

They say that they have made the discoveries concerning their American cousins, the first being that the United States army officer is a quiet, highly educated and strongly efficient.

whose social instincts are promptly revealed by his gentility of conduct. The second discovery concerns the private soldiers, whose accomplishments, physique and intelligence have caused both the English and the French civil and war leaders to marvel. Already they are making high estimates of the international fraternity now being manufactured thru contact.

The vision is most pleasing, and one can sincerely pray that it will be realized.

As a mark of appreciation it is said that the English sailors have fallen profoundly in love with the American national game, and are seeking to be instructed in it by the baseball experts of varying degrees of skill who are sweeping the khaki or the navy blue over there. The British jacksies have been fascinated by the dash and impetuosity of the sport, which they vote as being far better than the game of cricket, from time immemorial England's national exercise. (The cricket is a game that appeals more to the leisure class than to the rest of the community, which baseball is thoroughly democratic.)

It is to be hoped that this instruction will be given, even if some of the official class in Great Britain hold that the semi-instruction of the ball cannot be acquired by the mature.

At least the younger sailors can be taught and brought to some degree of proficiency. In the day when the champion teams of France, England, Italy and the United States shall meet to decide the international supremacy of the base ball there will be no place for rumors of wars.—Enquirer.

Preparing for Long War.
Washington, Nov. 30.—Premier Lloyd George the other day asked in one of his speeches would have 1,000,000 men in France, and the following day a New York newspaper, hostile to War Secretary Baker, belabored him because it claimed people thought we already had 700,000 men over the seas.

The truth is, Lloyd George was not fast and the New York news paper not honest.

It has been known to British authorities from the start that we could not put 1,000,000 men into France in a hurry, and this has been thoroughly understood in this country, too.

The reason is too fold—lack of trained men and lack of ships to carry them.

Right after our entry into war missions came from France, England and Italy to see what we were going to do and to tell our government what they would like to have done.

England wanted food, munitions and, above all, money credits.

Italy asked for food, steel and coal.

France asked for food, munitions money credits and men, with the accent decidedly on the men.

There was a shortage of ships and the vessels could not carry supplies for our allies and men and supplies for an army, too.

We fixed money credits and sent food, some munitions and some coal. Also we sent by spending.

And as fast as we could sent them and had ships to carry them, we have been despatching more troops.

But we are also limited by the number of trained men we have.

We will have a very respectable size army by spring, but it will be a large one by summer.

And it will keep growing as fast as a hard-working War Department can manage.

Plans have been made for a long war—a war in which the talk is of millions and not of hundreds of thousands.

Army officers are not 'proclaiming what they are doing.

FIRST TRAINING PERIOD.
At Camp Zachary Taylor Ends—Rumors Disturb Troops.

Camp Taylor, Dec. 1.—The first 12 weeks training period for members of the national army as signed to Camp Taylor ended today. The second period of training begins next Monday, and this also will run 12 weeks, at the end of which time, it is believed the men will be ready for service "over there."

One rumor going the rounds today was to the effect that a goodly number of the troops stationed here would leave for Europe during the first training period, and thus release regulars stationed there for European service.

According to commanding officers, the first training period has been a thorough success. Those men who were somewhat resentful at first have been brought around to a new point of view, and almost without exception now are eager to finish up the big work the country has in hand.

An officers' training school will be established here beginning January 5, and will be made up largely of those young men showing the most promising qualities as soldiers. It is expected that graduates of this school will be called upon to break in the "rookies" assigned here through the operation of future draft calls.

Burlington tobacco handlers have opened up business at the warehouse and will have a parcel for sale at an early date.

It Sounds Crazy, BUT IS IT?

It sounds crazy to say Buy Now for next Spring, next Summer, next Fall and next Winter. Buy Underwear, Hosiery, Cloaks, Skirts, Dress Goods, Ginghams, Rugs, Carpets, Linoleums and Notions for a year ahead. It sounds crazy, but I am green enough to think it is good advice.

Think of the prices of farm products, Shoes, Clothing, Groceries, Hardware, etc., and you will admit our prices are lower in proportion than any of them. Raw Cotton was 4 1-2 cents a pound—it's now 30 and will be 50. Raw wool was 18 cents a pound—it's now 80 and will be \$1.00. Think of tons and tons and tons of cotton being sent away every day in the World's War; think the sheep of Europe have been used for food for the starving millions over there; think of mill after mill working only on government supplies; think of the advanced wages being paid; think of Europe looking to us for more food and clothing than ever before. Think these facts over carefully, consider what is coming, then consider the values and prices in our store today, and you'll say: "Green is not as green as he looks," and you'll get busy as suggested. Our present stock will last at least until December 25th, and you can buy as quoted:

<p>Dresses, Ginghams, Etc.</p> <p>We have Children's Dresses at 98c, \$1.19 and \$1.25 and up.</p> <p>Muslin and Outing Gowns 50c to \$1.98.</p> <p>Knit Underwear....19c, 25c, 50c and up.</p> <p>Dress Ginghams worth 20 to 25c at 18 to 20c.</p> <p>36-inch Cotton Serge worth 35c at 22c up.</p> <p>40 to 50 inch Wool Serge worth \$2 to \$2.25 at \$1.25 to \$1.50 yard.</p> <p>36-inch Wool Serge worth \$1 up at 75c up.</p> <p>Silks, Linens and White Goods at saving prices.</p> <p>Boys' Fleece Shirts & Drawers 25c ea. up.</p> <p>Children's Union Suits 25c each and up.</p> <p>Ladies' Union Suits 69c each and up.</p> <p>Men's Union Suits 98c each and up.</p>	<p>Our Ready-to-Wear Department.</p> <p>Cloaks for Children.....\$1.50 to \$10.00</p> <p>Cloaks for Juniors.....\$4.50 to \$37.50</p> <p>Skirts at 98c to \$12.50 each. On every Coat or Skirt sold for \$10 or less we give 50c rebate; and on everyone sold for over \$10 we give \$1.00 rebate.</p> <p>Ladies', Children's and Men's Hose 10c a pair and up.</p> <p>Men's Heavy Canvas Gloves 10c a pr. up.</p> <p>Fancy Wool Supplies at old prices, yet.</p> <p>Towels, Table Linens and Napkins at away under today's values.</p> <p>Big Table of Special Bargains, cut lengths, etc.</p> <p>Ask for your Patriotic Calendar.</p>

Come as soon as you can—the sooner the more you save. Remember also that 5 per cent of all sales until Saturday night, Dec. 8, goes to the Red Cross.

We are doing our part by you, our loyal customers for many years, and trust you will avail yourselves of this opportunity.

Yours for Service,
Green's Cash Store
Rising Sun, Indiana.

Local Happenings.

The weather chart has more than half the day in this month tabbed for bad weather.

The Francisville communication got misplaced last week directly it was received, hence its non-appearance.

If the first three days of December rule the month it will be a gloomy period, furnishing considerable rain.

Few people from the country attended court last Monday. Only those who had special business took time to come to town.

Having spent five months here with her mother and sister, Miss Lucy Vaughn left Monday for her home in Los Angeles, California.

People who use religion as a cloak in this world will doubtless manage to keep warm in the next without a cloak.—Cynthia Democrat.

David Sanders, colored, shot and killed a large male fox out on G. W. Sandford's farm one day last week. The fox did not discover Sanders until it was too late to make his escape.

Ransom Kyle, of Beech Grove neighborhood, was in town Monday, carrying in his pocket a package which some declared was a rabbit he had bought to trade for his dinner.

Town Marshal Henry Myers, of Erlanger, arrested a negro Monday morning on suspicion of being the one who was engaged in shooting scrape in the city last Saturday night.

Pendleton county has 15 men in France at this time, with about 200 in training to go later. There is not another county in the state with like population that has a better record.—Outlook.

The Aurora Loose Leaf Tobacco Warehouse will begin receiving tobacco on Monday the 10th inst. and will have its first sale on Thursday the 14th inst., which will be a big day in Aurora.

Burlington was very quiet Thanksgiving day. A few of the Nimrods had courage enough to go hunting in the afternoon, and found the hunting good enough but the killing was very poor.

Miss Elizabeth Kelly, a student at the local high school, was taken to a surgeon in Cincinnati last Friday, and had her tonsils removed. She was in the city only a few days, having stood the operation nicely.

B. B. Hume, who has resided in Covington for some time, is looking for a location in Boone county, a 75 acre farm with good improvements is about what he wants. He has tried to buy one or two pieces of property in Burlington, but, as yet, has been unable to close a trade.

W. L. Kirkpatrick began the butchering act for the public last Monday morning. Fred Morris was the first for whom he did work. The boys were killed in the country and their carcasses hauled in to the abattoir in Mr. Kirk's truck, which beats driving very much.

Chas. Clorg, the Hebron turkey merchant, handled only about 10 Thanksgiving turkeys this year, while in the past he has required annually about 700 of the birds to fill his orders for that day's trade. He says the price was too high this year and the usual turkey dinner was cut out in most instances.

Thos. J. Stephenson, of Erlanger, has been chosen as Rev. Gen. N. Buftinton's successor as president of the Citizens Deposit Bank of that city. Mr. Stephenson is a son of the late Dr. Stephenson who owned a considerable portion of land now occupied by the town of Erlanger, and is a very popular gentleman of the old school.

The following articles have been loaned to patrons and as I have forgotten who has them, I take this method of telling you that I am right now badly in need of them and would greatly appreciate their prompt return:

One Porcelain Bed Pan.
One Glass Urinal.
Several Clinical Thermometers.
Dr. E. W. Duncan.

Last Thursday was not a very nice day for Thanksgiving exercises, the day being dark and very gloomy, rain falling at intervals although the sun did manage to show itself for a few minutes on one or two occasions in the afternoon. The weather was so unfavorable that there was not the usual rush to the country on the part of city hunters, and as to hunting it was a very quiet day.

Pigs some time organize as a band of robbers as R. B. Huey and son, Howard, will testify from experience. They keep a considerable number of dairy cows, and flow of milk from which had diminished, and for which Messrs. Huey could assign no cause until one day last week, when it was discovered that a bunch of pigs that was in the pasture with the cows was taking the milk. The discovery developed that the pigs would a cow lie down then three or four of the pigs would commence taking her milk, while the others would lounge about and some times creep for the privilege of satisfying their appetite. Recently the pigs are now kept away from the cows.

AN INSTRUCTIVE INCIDENT.

There is an interesting story—interesting from two different standpoints, behind the recent destruction of a German submarine on the Atlantic trade routes by a destroyer of the United States navy.

Full particulars of the incident with the names of the vessels engaged only omitted, have been given out by the Navy Department. The submarine commander underestimated the speed of the American warship and submerged too late. Depth bombs were showered over the spot where the undersized vessel had just gone down and injured it in such a way that the German commander brought his vessel to the surface and signalled a surrender.

Under these circumstances it was obligatory by all rules of war for the American ship to aid the crew of the disabled submarine and for the submarine commander, having signalled a surrender, to deliver up his ship exactly as it was when he agreed to surrender. The Americans behaved with great energy in their part of the agreement. The destroyer dashed up and a line was thrown out to the submarine to secure it, but it became apparent that the vessel was sinking. The unwounded Germans were able to care for themselves until they were drawn aboard the American craft and a score of American sailors plunged from the ship into the water to risk their lives to save the wounded German sailors. All were saved, although two of the Germans died from wounds suffered in the explosion.

The submarine sank, and it was easily discovered by the American commander that after the surrender, the submarine had signalled the crew to open the sea cocks so that the ship could not be taken. The German captain, it may be stated, did not elect to go down with his ship, but is now a prisoner of war. The incident may seem a small one, but the destroyer succeeded in capturing the crew and destroying the submarine, but as an illustration of how seriously war has worn system of making a ship into the water, it is most significant. There was a time when it would have been considered that a commissioned officer of a great nation would destroy his vessel after having promised to surrender it, whereas today the German Kaiser determined to treat his solemn agreement with Belgium as "a scrap of paper" which has been a warning of the whole moral fibre of the Kaiser's subjects. The damage was done at the top, and not until there has been a change at the top will the German nation be able to command the respect of the world.

CAVALRY IN WAR.

One of the latest dispatches from Gen. Haig's army mentions the fact that the British cavalry, who were suddenly brought into action after the successful stroke at Cambria, have been dismounted and are fighting with rifles and machine guns by the side of the infantrymen.

This is a lesson in warfare that was first taught the world by Gen. Phillip Sheridan in our own Civil war of 1861-5. Cavalry, of course, figured in this contest from the beginning until the end, but it was General Sheridan who first saw the possibilities in moving men around to fight on horseback. Sheridan's "mounts" were known and respected all over Virginia, and played an important part in all the campaigns toward the end of the great struggle.

Sheridan's invasion seems to have been but little cavalry abroad, and it is said that General Sheridan himself, as an observer of the staff of Gen. von Moltke, commented upon the failure of the German staff to properly utilize its cavalry in the late war. In 1870, at any rate, it was the cavalry of the South African war of 1900 that the European nation was fully taught the possibilities of mounted infantry. The Boers in the gallant fight they put up in that war were mounted infantry almost exclusively. The horses were kept in the rear, and the men fought on foot, but when it became necessary to move troops, the men traveled on horseback, and Lord Roberts said that in this war one Boer soldier often saw as many engagements as three British infantrymen.

The beginning of the present war saw cavalry used both on the Eastern and Western fronts in more than had been anticipated. In fact the fighting during the "open" showed that the value of the cavalry branch had declined but little. The moment the troops went into trenches, however, the cavalry regiments, as cavalry, were almost useless. Cavalry were used during the pursuit of von Hindenburg after his retreat from the Marne in the spring, and again around Cambria in the recent drive. That the British are beginning to appreciate the sound of infantry plan is a good thing, although it is somewhat of a pity that the thing was not tried before.

Highway Improvement

NATIONAL SYSTEM OF ROADS

Expert on National Capital Illustrates How Scheme is to Be Brought to Successful End.

The establishment of a national system of highways is greatly facilitated by the federal aid road law, which compels all the states that would share in its benefits—and that means all of the states—to equip themselves with state highway departments. With these state highway departments devoting their attention to the building of state systems of main, through-line highways, every condition is favorable for the next and crowning act—the establishment of a national system of highways.

By way of illustrating how a national system of highways is about to be evolved by easy and logical stages, an expert at the national capital made the following statement:

"Gradually the state has made itself a compelling factor in the handling of local road problems and, as a logical sequence, the federal government, first through educational activity and later by the financial aid provided by the federal aid law, has made itself a powerful factor in the working out of the state highway problems. The next logical step follows the same course which has been pursued by the state governments, namely, the broadening of federal participation to provide for the establishment of a system of national highways.

"This policy can be put into effect without disturbance of existing organizations, without providing new means of finance and with but little change in existing laws. The process would logically take a course somewhat as follows:

"1. The state highway departments and the federal office of public roads would make an initial selection from existing state highway systems of those highways which are of interstate importance.

"2. A system thus selected would be approved by congress, with the requirement that federal funds be applied only to such system on and after a specified date.

"3. The federal aid should be extended to maintenance as well as construction, as the national system of highways should have for all time a close relationship with the federal government.

"Some of the states already have made plans for utilizing the aid granted by the federal aid road act on roads which could not properly be included in a national system. But this need

not cause extreme conflict, as the federal funds for the first three or four years' operation of the present act could continue to be applied as now planned. The appropriations for the first two years are already available and considerable time necessary must elapse before the national system could be laid out and made ready for the application of federal funds.

"In all probability the new scheme would come into effect as an extension of the present federal aid road act."

WHY FAMILY MOVED TO TOWN

Compelled to Make Change Because of Poor Schools and Bad Roads. Remedy for Poverty.

"Why don't they go on to a farm?" is the question with which many men dismiss from their minds the story of some poverty-stricken family. The chances are five to one that that same family was induced to move to town because of poor schools and poor roads in the country. The remedy for much of the poverty now in our towns is good roads and good schools in the country. Why should not country schools be given the same attention given city and town schools? Why should not the children be permitted to go to them over good roads with dry feet, instead of wading through mud and water? Good roads will make the country a better place in which to live.

Cull Growing Flock.

Cull the growing flock of chicks as much as possible, market all that are in any way inferior but in good health, and kill and bury all which seem weak or sickly. It will not pay to keep any but the strongest and best chicks.

Prevent Tuberculosis.

To prevent tuberculosis, all milk and milk products should be cooked before being fed to pigs. To control hog cholera use sanitary precautions and anti-hog cholera serum treatment.

ROAD BUILDING

GRAVELED ROADS ARE CHEAP

Can Be Built and Satisfactorily Maintained at a Less Cost Than Other Types.

(By E. B. HOUSE, State Agricultural College, Fort Collins, Colo.)

I have heard considerable discussion lately concerning the policy of our state highway commission in constructing the kind of roads it has decided upon, and it is often argued that the only type of road is the so-called permanent road, the one that needs no maintenance.

If one will take a pencil and do a little figuring, he can easily convince himself that the policy of the state highway commission is the correct one. Let us consider first of all the expensive type of road construction, such as concrete, or the best grade of macadam. This type of road will cost approximately \$10,000 per mile, and let us suppose that the cost of construction is met by issuing 20-year 4 1/2 per cent bonds. The annual expense on account of this first cost would be about \$780 per mile. And these roads will need some maintenance, possibly not much over \$50 per mile per year. This brings the total cost up to about \$830 annually per mile for the expensive or so-called permanent type of road.

Now take a well-constructed gravel road and the cost for this road will run about \$4,000 per mile for construction, figuring again on a basis of 20-year 4 1/2 per cent bonds and the annual account for first cost will be about \$310 per mile. The cost for maintaining these roads, if properly done, runs up pretty high, and it can be well done with an expenditure of about \$240 per mile per year.

This makes a total annual cost then for the surfaced road of approximately \$550 annually per mile. A comparison of these two annual costs shows \$280 per mile per year in favor of the cheaper roads.

Good Road in West.

himselves that the policy of the state highway commission is the correct one. Let us consider first of all the expensive type of road construction, such as concrete, or the best grade of macadam. HELP SOW SAVE PIGS

Farrowing Pen Should Be Equipped With Wooden Rails.

Prevents Mother From Crowding Little Pigs to Death—Provides Good Shelter From Cold and Rain—Have Solid Floor.

We are asked by the president to increase the production of our farms. In the face of the fact that the plea came almost too late for some farmers to radically change their plans, the acreage for cultivated crops has been wonderfully increased. The five and ten-acre corners of stump, or hillside, land which had previously been considered not worth the trouble have been broke for cultivation.

A few farmers who have every available acre under cultivation must content themselves in trying to raise more to the acre and in conserving all they can.

In this connection an effort to save the little pigs at farrowing time is undoubtedly a profitable and a patriotic method conserving the food supply.

Contrary to some of the older farmers' ideas, do not let the brood sow, which is to farrow, lie on her bed around an old straw or hay stack. Provide a good shelter, well protected from cold and rain, and, preferably, having a solid floor.

Do not let the sow root a deep hole for a bed. She can be given a generous amount of straw for bedding at first, just to satisfy her animal in-

Rails Save Little Pigs.

stinct. Later when she starts to farrow it is wise to remove much of the bedding.

The farrowing pen should be equipped with rails, as shown in the drawing. These rails may be made of 2 by 4 pieces nailed so that they are parallel with the floor, with six inches clearance underneath and with four inches or more between the rail and the wall.

The purpose of this rail as well as the removal of superfluous bedding is to prevent the sow from crowding the little pigs to death. The rail permits the little fellows to crawl behind and get out.

Personally I find that "watchful waiting" is the best policy with farrowing brood sows. They usually start to farrow a few hours after they commence to make their bed. Then an hour or so spent in caring for the animals frequently saves several of the offspring. After two or three pigs are farrowed the mother usually gets up, renames her bed and turns over. At this time she pays little attention to the pigs that have come and it is best to watch them. After the sow is through farrowing there is little danger of her lying on the pigs.

GOOD SYSTEM IS DESIRABLE

Few Farmers Make Plans to Dispose of Unprofitable Fowls—Cull Out Undesirables.

Very few farmers practice a systematic plan of disposing of their fowls after they have ceased to be productive, although it is well known that fowls of the heavier breeds, such as the Plymouth Rocks, cease to produce a profitable number of eggs at the end of their second laying year. This holds true of the lighter breeds, such as the Leghorns, at the end of their third laying year. Consequently, if efforts were made to dispose of all females when their best laying days were over, a large quantity of poultry meat would be placed on the market. All poorly developed chickens should likewise be culled out and used as meat. This way of disposing of unprofitable fowls would allow the farmer to feed his grain to younger and more productive fowls.

FAIRS ARE GOOD EDUCATORS

Fruit Grower Learns How to Produce Fine Specimens and to Improve His Own Methods.

At a fair are exhibited the best products that had been grown in a state or county. Fruit growers can easily learn from the exhibitors how to produce such fine specimens of fruit and he also sees the best and learns the circumstances under which it has been produced. One cannot afford to let such opportunities as the fair pass unheeded. The fruit grower can inspect the work of others and compare with his own, and if it is better than he has been able to accomplish he learns how to improve his methods.

DEMAND FOR SELECTED EGGS

When People Are Convinced That Product Is Choice They Will Advise the Fact.

It should be remembered that it will take time to work up a demand for selected eggs, but when people are once convinced that the eggs can be depended on, they will not only call for such eggs, but will tell their friends about them.

GOOD ROADS

PIKE'S PEAK HIGHWAY OPEN

Alignment Definitely Completed From Atlantic to Pacific—Last Link Has Been Forged.

The Pike's peak ocean to ocean highway has definitely completed an independent alignment from the Atlantic to the Pacific coast, says the New York Tribune. The last link in the chain was forged at San Francisco on July 30, when the national officers, in conference with representatives of various California routes, selected the Penther-River Sacramento Causeway routes and established the Pacific coast terminus at Oakland and San Francisco.

With terminal on the Atlantic—on board both at New York city and Philadelphia, the first prong passes through Newark and Morristown, N. J.; Easton and Allentown, Pa., joining with the Philadelphia prong at Reading, Pa., thence continuing westward along the William Penn highway through Harrisburg, Tyrone, Altoona, to Pittsburgh; crossing Ohio through Steubenville, Coshocton, Newark, Columbus, Springfield and Dayton; Indiana through Richmond, Indianapolis, Rockville; Illinois through Decatur, Springfield, Jacksonville, Griggsville; Missouri through Hannibal, Macon, Chillicothe, St. Joseph; Kansas through Hallowell, Belleville, Norton, Colby, Goodland; Colorado through Burlington, Limon, Colorado Springs, Manitou, Hartsel, Buena Vista, Leadville, Glenwood Springs, Rifle, Meeker; Utah through Vernal, Duchesne, Heber City, Park City, Salt Lake City, Ogden, Brigham, Lucin; Nevada via the Overland trail route through Elko, Winnemucca, Lovelock, California through Portola, Quincy, Oroville, Marysville, Sacramento, Davis, Benicia, Martinez, Berkeley, Oakland and San Francisco.

The completion of the western extension of this highway followed an official inspection of the trip made by President C. F. Adams, in accordance with the decision of the midsummer meeting held on top of Pike's peak, July 10-11, following a sociability tour from Chillicothe and St. Joseph. The reports made on the inspection trip indicate that less than 10 per cent of the 1,900 miles between Colorado Springs and San Francisco is in poor condition. The road follows streams, is through

Road Through Williams Canon, Near Manitou, Colo.

Inhabited territory with less desert or desolate country to cross than any other transcontinental route, and traverses some of the most wonderful scenic sections of the United States. Visits to the road at each town on route, to create new enthusiasm for the route, confer regarding highway development and arrange for a more complete marking system. The average running time was 19 miles per hour.

An emphatic campaign is now being conducted to complete the marking of the Pike's Peak trail from coast to coast. The national specifications require red and white bands, each 10 inches in width, at cross-roads, forks, and frequent intervals between, these to be painted on telephone poles, fence posts, trees or rocks. In addition, a striking marker design in red and white has been adopted. Long enameled steel signs, 14 by 20 inches in size, are to be placed on individual posts at intervals of not more than five miles between New York and San Francisco.

Highways in Connecticut.

The construction of concrete highways is going on in 23 cities and towns in Connecticut, and when these contracts have been completed there will be about 70 miles of concrete surfaced highway at that state. The highways are 18 feet wide and cost \$15,000 a mile.

Good Roads Indispensable.

The time has come when we must consider the roads an asset, indispensable to the well-being of the farmer and his family. This being true, is it not every man's duty to do all he can to keep the roads in good condition?

Good Roads.

More than \$300,000,000 was spent on highway construction and maintenance in the United States in 1916. Of this amount 10 Southern states spent approximately \$63,000,000.

WAR TALKS

By UNCLE DAN

Number Five

Jimmie and a German Boy Clash—Must Do Three Things to Save Country.

It was a warm evening, so Uncle Dan went out to a lawn seat under the spreading branches of the great tree that suggested the farm's name of Oak Hill. Billie and Jimmie had been laying for him, so Uncle Dan was captured by the boys on short order.

"Say, Uncle Dan," Billie began, "we had a red-hot argument at school yesterday with Carl Newman. Carl said that German schools were miles ahead of our schools and that no one could come up to the educated German, Well, Jimmie got hot under the collar and handed it back to him good and plenty. Jimmie said if it were his education taught them to torpedo Lusitanias, sink hospital ships, murder hundreds of women and children, make slaves of the Belgians, poison wells, destroy fruit trees and commit all sorts of crimes, then we did not want that kind of education here. What do you think about it, Uncle Dan? I told Jimmie you spent a lot of time in Europe and knew all about schools, so give us your opinion."

"Well," replied Uncle Dan, deliberately, "the German schools are very thorough; they furnish exceedingly valuable and practical instruction. The industrial training given there is probably the best to be found. The schools as a whole, however, in my opinion, appeal to the head only, and never to the heart. The aim and trend is to make the individual blindly submissive to the Prussian plan of world domination; they teach that it is the destiny of Germany to rule the world, and that to the glory and advance of Germany, in this plan, all things must give way; that the Kaiser as head of the state, can do no wrong if he carries out the plan of world control. Some of the greatest teachers and preachers even defend and justify their heartless crushing of Belgians and the many other atrocious crimes she has committed in this war. Thank God, our American education reaches both the head and the heart. It is an education with a soul, and we must maintain the high ideals we have fixed. In a word, in Germany, the people are taught that they exist for the government, while here the government exists to serve the people."

"Just wait a minute," interrupted Billie. "She has never again solved, so I can write it down."

Uncle Dan, smilingly, complied. Billie exclaimed: "Now, we will hand that out for Carl to crack. Carl, you know," continued Billie, "has a very smart father who keeps him posted on the German arguments. Carl said our government was only an experiment anyway; that it would not last twenty years, and that it might burst up any old time. Jimmie asked him if Germany was so mighty good, why they did not go back there to live."

"Our government will go on forever, won't it, Uncle Dan?"

"Now," said Uncle Dan, "you are raising a big question, and one that has troubled me for years. Our government is still in the experimental stage; in fact, it is the greatest experiment ever undertaken, and if popular government is to be successful, a few things must be done, otherwise, to paraphrase the great Lincoln, the government of the people, by the people and for the people, will perish. It is my firm conviction," said Uncle Dan, in a very impressive manner, "that if our country is to go on, as we hope and pray, we must very quickly do at least three things, and I will name them in the order of importance as it appears to me:

"First, adopt compulsory universal military training of all young men physically fit before they reach the age of twenty years.

"Next, require that every foreigner who comes here to live must, within a reasonable time, say a year, declare his intention of becoming an American citizen and take the necessary steps to do so, thereby, from that moment, assuming all the obligations of citizenship of our country, and that means he must defend our flag upon equal terms with our native born, and if he is not willing to do this, he should be sent back from whence he came."

"That's the stuff," exclaimed Billie, "and finally, enact such legislation as will make voter compulsory. Popular government is based upon the participation of all and the rule of the majority, and democracy cannot continue and be successful unless we live up to the spirit of the institution."

"The first step, however, is the passing of the Chamberlain bill for universal military training. If you will get the leading citizen, and especially the editor of your paper, to write personal letters to your congressman and both senators, urging their support, it will help enormously.

"I see by the morning papers," said Uncle Dan, "that the Rotary clubs of the entire country, the finest, most efficient organization to be found, have unanimously decided to get back of the Chamberlain bill and give it loyal and enthusiastic support. They will work with the Universal Military Training League to accomplish this important piece of legislation, which will do more than anything else to make us a real nation with a common viewpoint, bring us back to sane living, and teach us the patriotism of service."

The KITCHEN CABINET

Everyone has a chance to stand a hunk, but many are content to stand just high enough to pass.

Far off water will not quench near fire.

MUTTON OUR GOOD MEAT.

Mutton is not served as often as it should be because many do not like the flavor. Before our butchers learned that the carcass of a sheep should not be handled after the wool had covered the hands with its oil, much of the mutton was ruined as to flavor.

If care is used in the preparation of the meat before it reaches the cook and she removes all of the skin, there will be no woolly flavor left to disturb the most fastidious. Mutton being a short-fibered meat, is more easily digested than beef or pork.

Mutton in Casserole.—Cut mutton into serving-sized pieces, roll in seasoned flour with a bit of chopped onion and fry brown in a small amount of hot fat. Then add a pint or more of finely shredded carrots, with enough water to cook them, leaving just enough for the gravy. The flour will furnish the thickening. Cook slowly well covered for two or three hours, or until the meat and vegetables are tender. A small serving of meat with plenty of the carrots which are well flavored with the meat juices will make a good meal. This dish may be prepared in an ordinary iron frying pan, cooking the meat and vegetables on the back part of the stove at the simmering temperature.

Take a shoulder of mutton, remove the bone and fill with stuffing, using any desired forcemeat; baste frequently with white roasting.

Mutton With Dumplings.—Take three pounds of the breast, simmer until tender, then set aside to cool; skim off all the fat, return the mutton to the liquid, add one or two onions finely chopped, salt, pepper and a little curry powder if liked. Just before ready to serve, drop dumplings into the boiling hot kettle; small ones cook in eight minutes. Serve with the dumplings surrounding the platter of meat. Mutton chops are delicious when well cooked and seasoned. Mutton may be served rare, lamb neck and a few peas to a mutton stew adds to the flavor and gives variety.

Of what shall a man be proud if he is not proud of his friends?—Stevenson.

Go to it and do it. Beautiful plans will never put sugar on your bread.

MORE SOUR CREAM DISHES.

The number of ways of serving sour cream as food has not yet been written. The following are a few:

Quick Cream Cookies.—Take a cupful of sour cream, one cupful of sugar, one egg, two and a half cupfuls of flour, one teaspoonful of soda, and salt, flavoring to taste. Drop by spoonfuls on well-greased pans; pat out and sprinkle with sugar; add a half a nut meat and bake in a quick oven.

Hermits.—Take a cupful of thick sour cream, two cupfuls of brown sugar, one cupful of chopped raisins, two-thirds of a cupful of butter, two well-beaten eggs, one teaspoonful each of soda, cinnamon, cloves and nutmeg with flour to make as stiff a dough as can be stirred. Drop by teaspoonfuls on a well-greased pan, leaving plenty of room for them to spread. A raisin or nut may be added to each to improve its appearance.

Deviled Eggs.—Cook six eggs hard, cut in halves lengthwise, remove the yolks and mash with a fork, adding enough thick sour cream to moisten; add mustard, salt and a little red pepper. If cream is too sweet add dash of lemon juice and put back into the whites.

Sour Cream Pie.—One cupful of sour cream, two-thirds of a cupful of sweet milk, one-half cupful of chopped raisins, one and a half tablespoonfuls of vinegar, one tablespoonful of flour, one teaspoonful of cinnamon, the yolks of two eggs and a little salt. Bake in one crust and use the whites of the eggs for a meringue.

Graham Biscuits.—Take a tablespoonful of sweet and one cupful of sour milk, one cupful of salt, all well mixed together. Bake in one crust and spread with strained honey while hot. Or a meringue may be placed over the top if preferred.

Sweet Potato Pie.—Take a cupful of sour cream, one cupful sugar, one pint of mashed sweet potato, the yolk of four eggs, one teaspoonful of cinnamon, one-half a nutmeg, salt, all well mixed together. Bake in one crust and spread with strained honey while hot. Or a meringue may be placed over the top if preferred.

Sweet Potato Pie.—Take a cupful of sour cream, one cupful sugar, one pint of mashed sweet potato, the yolk of four eggs, one teaspoonful of cinnamon, one-half a nutmeg, salt, all well mixed together. Bake in one crust and spread with strained honey while hot. Or a meringue may be placed over the top if preferred.

Sweet Potato Pie.—Take a cupful of sour cream, one cupful sugar, one pint of mashed sweet potato, the yolk of four eggs, one teaspoonful of cinnamon, one-half a nutmeg, salt, all well mixed together. Bake in one crust and spread with strained honey while hot. Or a meringue may be placed over the top if preferred.

Sweet Potato Pie.—Take a cupful of sour cream, one cupful sugar, one pint of mashed sweet potato, the yolk of four eggs, one teaspoonful of cinnamon, one-half a nutmeg, salt, all well mixed together. Bake in one crust and spread with strained honey while hot. Or a meringue may be placed over the top if preferred.

Bake in one crust and spread with strained honey while hot. Or a meringue may be placed over the top if preferred.

Wool! Wool!

In an estimate to Mr. Hoover recently, the National Sheep and Wool Bureau predicted that the United States will need 750,000,000 pounds of wool during 1917. We believe that this estimate includes the wool required for blankets, shirts, and underclothing as well as for soldiers' uniforms.

The 1917 American wool clip is 260,000,000 lbs. This will also greatly increase the price of Clothes; so you know by this that prices will go soaring, and it will pay those who can to buy now. We are prepared to sell you at the right price and will give you Quality, Style and Workmanship. We have Men's and Young Men's

FADS AND PHILANTHROPY.

The war has enormously increased the already large crop of philanthropic societies. Every such organization calls for a long list of officers, a paid secretary and paid assistants, a large amount of expensive literature, and in some instances a magazine. To meet the expenses of this publicity there is a steady solicitation of the public for funds, says Leslie's Weekly. On our desk are more than a dozen appeals that have come in during a few days. If one joined all these societies, or gave to them all, there would be nothing left for the church or the hospital. Indeed the churches complain that these outside appeals for money have cut down their incomes. Ministers say if they preached on all the special causes to which they are asked to devote a sermon and service, there would be no Sundays left for the preaching of the plain gospel. Many a busy person, appealed to by the commendable causes represented in these new societies and unable to give personal attention to such work, eases his conscience by a generous contribution and the permission to use his name on the list of vice presidents. All societies have an imposing list of vice presidents of prominence, which gives weight to their appeals. Our criticism is not that the causes represented are always unworthy of support, but that the thing has been overdone, that the middleman is too big an item of expense in philanthropy just as he is in business.

With thousands of pilots and thousands of airplanes in military service today, Great Britain has already begun to look forward to the advent of peace. Announcement was made in the house of commons recently by Maj. John L. Baird, representative in the house of aerial advisory board, that the government had decided to appoint a committee, under the chairmanship of Lord Northcliffe, to investigate civil aerial transport after the war. Thus it would be possible to employ a large number of skilled pilots and the airplanes now in the hands of the British army and navy and those in the course of construction. This is a timely consideration, and one which will have to be solved in the reconstruction period following the close of the war.

That the new taxation already has begun to work is shown by the fact that the government's internal revenue receipts during May were \$118,000,000 in excess of those for the corresponding month last year. Two million dollars of the gain came from tobacco, and more than three millions from spirits, but the bulk of the increase was due to the heavier taxation of individual and corporation incomes.

It is said to have been given out officially that hereafter only 10 per cent of Germany's shoes can be manufactured of leather. There are peasants in Germany as well as France accustomed to wooden shoes, but undoubtedly most of those forced to adopt them in the present emergency will regard them as listable among the horrors of war.

The prediction that silk will soon replace cotton if the price of cotton continues to advance is more ingenious than likely to be realized. In the first place, there is the question of limited supply, aside from all other considerations. Where will the silk come from, or the cotton to make material that sells for silk?

If the reported decree of fashion-makers is correct that pockets must disappear from men's clothes while they are getting on women's, the last vestige of masculine superiority will be swept from the face of the earth.

A Minneapolis doctor calls the flame of affection for a soldier "brass-button love." But there are no brass buttons on the khaki uniform, and "khaki love" doesn't sound at all romantic.

It would be a flash of the good old times if the Winsted correspondent could discover a secret wireless in the Maine woods operated by an educated pro-German hen.

The suburbanite gardener whose rutabaga crop promises to turn out something else is encouraged to think that he may fool the food sharks yet.

Yarn is reported scarce, but this does not apply to the plural, which are threatening to become a nuisance in the European markets.

So far as gathering the dope is concerned, the German spies in this country can't complain that their task is a hard one.

Sweden complains that the embargo deprives her of sulphur. Is the match about to follow the cook into oblivion?

It takes all kinds of people to make a world, including those who like to be killed.

Underwork starves a hundred people where overwork kills one.

WAR TALKS

By UNCLE DAN

Number Four

Military Training Necessary for Safety and Defense.

"Say, Uncle Dan," said Billie, "Jim and I have been looking up about war in the encyclopedia at school. We found that in the war between Germany and France in 1870-71, Germany lost in killed and wounded 28,000 soldiers while France lost about six times as many, and besides that, she lost every battle. We asked Professor Slovicum why this was. He said that the German army was highly trained and ably commanded, while the French soldiers were poorly trained; and that the war department was honey-combed with jealousy and politics, so that the officers were not much good, and that's why France lost the war and so many men. What do you think about it, Uncle Dan?"

"Well," said Uncle Dan, "Professor Slovicum is right. By inefficiency France lost that war, together with two of her best provinces—Alsace and Lorraine—and had to pay a billion dollars indemnity money. France today learned her lesson by that sad experience, so she put in universal military training, and as a result, her soldiers now know how to fight and how to protect themselves. They are losing less men in the war than the Germans. France also put politics out of her war department, so that expert authority instead of bureaucratic stupidity, now directs the army. The result is, France has one of the best and most efficient armies ever assembled, and this shows what thorough training and good leadership means in warfare. This saved France in this crisis, as well as the liberties of the world."

"As war is now conducted, there is no place for an untrained man. A body of 10,000 well trained soldiers properly handled could defeat five times their number of raw recruits and do it every time with comparatively small loss to themselves. Proper training alone will reduce the death and casualty rate one-third of what it otherwise would be, and right here is an unanswerable argument for universal military training."

"Our government has no moral right to force her men into war service without properly training them for it. To do so is simply murder, hence the frantic effort that is now being made to give her soldiers some training before they are sent to the front. If we are to win this war, it will take trained men to do it, and it will take trained men to win any other war that may come upon us in the future. If we must fight, let us fight with win and not to lose."

"That's the stuff," said Billie. Continuing, Uncle Dan said: "Our government has expended about \$300,000,000 to put up cantinments and training stations in order to train the men called by the selective draft. When these men are trained the training camps should be immediately filled with younger men, say those in their nineteenth year, to receive six months of intensive military training along the lines of the Chamberlain bill. This will be of immeasurable benefit to them individually. It will do them more good than any other two years of their whole life; it will make them strong, manly, self-reliant, quick to see and quick to act; it will equip them for a successful life. In short, it will rebuild American manhood and will also give the government a body of trained men to draw from in case it is necessary to defend our flag and country. We must settle this question of universal military training immediately, otherwise these training camps may be demolished. The adoption of universal military training will be notice to the world that from then on we will be prepared to defend ourselves promptly and efficiently, and this will do more to keep us out of war in the future than anything else we could do."

"Do you think, brother," said Mrs. Graham, "that there will ever be another war?"

"I have no doubt about it," said Uncle Dan. "So long as men are selfish, so long as nations are ambitious to acquire territory, so long as population presses and demands more room, so long as there remains a scramble for world trade—so long wars will be. When the time comes that we reach the high plateau for which we long and dream, when all will recognize the fatherhood of God and the brotherhood of man; then, and then only, will wars cease. When that day comes doors will need no locks, banks will need no vaults to protect their treasures, but that day is a long way off."

"The only safe and sane plan is to be able to defend ourselves at all times. Therefore, every citizen should insist that senators and congressmen should provide for universal military training, so that never again shall the country be caught so completely unready as this war found us. Fortunately, in this case, our enemy has been held back, so we have had a few months in which to prepare. This advantage probably will never come again. It is however our salvation today."

"Because she was ready, Switzerland is an island of peace in a sea of war. But first is good, but safety always is better. In strength there is safety. You never saw a tin can tied to the tail of a bulldog. There is a reason."

STANDARD BRED CHICKENS EXCEL

Uniformity Secured and Grades Established as Basis.

COLOR IS SECONDARY POINT

In Process of Production Principal Points Are Size, Shape and Color—Each Breed Has Its Place.

(Prepared by the United States Department of Agriculture.)

Standard poultry, as the phrase is commonly used in America, is poultry bred to the standard established by the American Poultry Association.

The object of making standards for poultry is the same as the object of making standards of weight, volume or quality for any product or commodity—to secure uniformity and establish a series of grades as a basis of trading in the articles.

In making standards for poultry which apply in the process of production the principal points considered are size, shape and color.

Size and shape are breed characters and largely determine the practical values of poultry. Many standard breeds are divided into varieties differing in color, but identical in every other respect.

Color is not a primary utility point but as a secondary point often comes in for special consideration. For example, a white variety and a black variety of the same breed are actually identical in table quality, but because black birds do not dress for the market as clean and nice looking as white ones, it often happens that they are not so salable.

When a flock of fowls is kept for egg production only, uniformity in color is much less important than approximate uniformity of size and type, yet the more attractive appearance of a flock of birds of the same color justifies the selection for color as far as it can be followed without sacrificing any material point.

When a poultry keeper grows his own stock year after year, he ought by all means use stock of a well-established popular standard breed.

By doing so and by selecting as breeders only as many of the best specimens of the flock as are needed to produce the chickens reared each year a poultry keeper maintains in his flock a highly desirable uniformity of excellence in every practical quality, and with little extra care and no extra cost can have a pleasing uniformity in color.

STANDARD BRED PAIR OF ROSE COMB WHITE LEGHORNS.

Each Breed Has Its Place.

To the novice in poultry keeping it often appears that there is no real necessity for so many breeds and varieties as have been standardized in America. Further acquaintance with them, however, shows that although color differences are in most cases made merely to please the eye of the fancier, the differences in shape and size which make breed character have been developed with a view to adapting each to particular uses or particular conditions.

Leaving out of consideration the breeds kept as novelties, most of which originated before industrial progress created a large demand for poultry products, all the standard American

breeds of fowls have been made and developed on the general principle of practical quality the foundation of breed character and value.

Classification of Useful Breeds.

In harmony with this principle the common classification of breeds according to their place in the general scheme of poultry production, divides them into three principal classes, namely: Laying breeds, meat breeds, and general purpose breeds—that is, breeds that are not as ready and persistent egg producers as the laying breeds, and not as meaty and as easy to fatten as the meat breeds, yet combine in one individual fowl very good laying capacity with very good table quality.

The Leghorn, Minorca, Andalusian, Ancona and Chante are well-known breeds of the laying class; the Brahma, Dorking and Cornish of the meat class; the Plymouth Rock, Wyandotte, Rhode Island Red and Orpington of the general purpose class.

Characteristics of Egg Breeds.

The breeds mentioned as the laying class, with the exception of the Minorca, are relatively small, very energetic and lively, mature early and are easily kept in good laying condition. The Minorca is of larger size and modified somewhat in the other particulars mentioned, yet has more the character of the laying class than any other.

Characteristics of Meat Breeds.

In the meat breeds there is not the same uniformity of type that is found in the laying breeds. The three mentioned are quite different. The Brahma is more popular because it is at the same time the largest and the

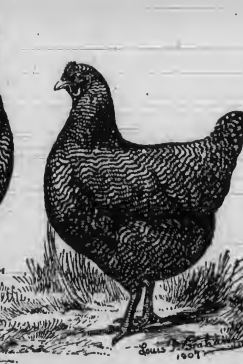

STANDARD BRED PAIR OF ROSE COMB WHITE LEGHORNS.

most rugged in constitution. The Dorking excels in quality of meat but is generally considered somewhat lacking in hardiness. The Cornish is rather hard-meat but being very short-feathered, has its special place as a large meat producing fowl in southerly sections where the more heavily feathered Brahma does not stand the summers well.

Characteristics of General Purpose

Among the popular breeds of the general purpose class there are also differences in type adapting breeds to different uses. The Plymouth Rock is generally regarded as the type meeting the widest range of requirements in the general purpose class.

The Wyandotte is a little smaller and earlier maturing, but still very well-mated and easy to fatten. The Rhode Island Red has nearly the same standard of weight as the Wyandotte, but is a more active bird, not putting on fat so readily; consequent-

STANDARD BRED PAIR OF BARRED PLYMOUTH ROCKS.

ly it approaches the laying type and is popular with those who want eggs and meat, but want eggs most.

The Orpington is at the other extreme in the general purpose class, being a heavier, meatier fowl than the Plymouth Rock.

Breed for Every Purpose.

Such a list of breeds affords so wide a range of choice that poultry keepers can always select a standard breed better adapted to their locality and their purpose than any non-standard stock they can procure, and having the further advantage of reproducing true to type.

FRESH WATER FOR CHICKENS

During Cold Weather Vessels Should Be Looked After Twice Daily to Insure Supply.

Cold weather does not diminish a hen's need of clean, fresh water. As every egg laid is near 90 per cent water, the hen must have a supply, or eggs will be lacking. Ice will not take the place of water. See to it on cold days that water vessels are looked after twice daily, to insure there being an available supply at all hours.

RAW FURS WANTED

Get my price and grade before you sell. H. KIRK, Burlington, Ky. Take Your County Paper.

Keep Well

Do not allow the poisons of undigested food to accumulate in your bowels, where they are absorbed into your system. Indigestion, constipation, headache, bad blood, and numerous other troubles are bound to follow. Keep your system clean, as thousands of others do, by taking an occasional dose of the old reliable, vegetable, family liver medicine.

Thedford's

Black-Draught

Mrs. W. F. Pickle, of Rising Fawn, Ga., writes: "We have used Thedford's Black-Draught as a family medicine. My mother-in-law could not take calomel as it seemed too strong for her, so she used Black-Draught as a mild laxative and liver regulator. We use it in the family and believe it is the best medicine for the liver made." Try it. Insist on the genuine Thedford's. 25c a package. 5-75

Sunday morning a young horse belonging to Owen Beemon, Jewell, on Woolper creek broke through the ice on a hole in which the water was about 8 feet deep. Beemon lagged the animal and held its head above the water until his father cut the ice and the horse could swim out.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Mrs. B. B. Alphin who has been ill the past week is much improved.

Mrs. Allie Moxley spent part of last week in Covington with friends.

Mrs. Katie B. Rice of Georgetown, spent the past week here with relatives and friends.

The moving picture show has discontinued its Thursday night performance until the winter months are over.

Sidney Poor and sister Mrs. E. L. Ault of Indianapolis, spent last week here with their parents Mr. and Mrs. Chas. H. Poor.

B. F. Wright of Georgetown was here the past week looking for a good farm to purchase and has several under consideration.

L. C. McElroy has been transferred from Camp Taylor to Fort Sam Houston Texas, where he has been assigned to the aviation corp in the mechanical department.

Hubert Maines of Aurora, Ind. who was here quite a while in the lumber business, was united in marriage to Miss Catherine Beusbach of Lawrenceburg, Indiana, last Saturday.

At the sale of personal property of Mrs. L. S. Wolfe last Thursday, corn sold at \$1.61 per bushel, fodder 30 cents per shock, and the cows sold low, ranging in price from \$13 to \$70.

E. M. Johnson who has a position as guard at the state prison at Frankfort, is coming for a vacation and will put in his time at the loose leaf warehouse being offered a position there.

J. Morgan Arnold bought from J. B. Johnson the house and acre of ground near the school house for \$3,000 and will move to the place shortly, and Mr. Johnson expects to purchase a farm.

John Allen Smith, the little son of Arthur Smith of the telephone company, was badly burned about the face in trying to light a fire in a stove at his home, but no serious results are anticipated.

J. Stone Walker, of Richmond, Madison county, bank examiner for the State Banking Department, was here Saturday morning examining the two banks and found their condition satisfactory in every way.

J. D. Mayhugh, D. B. Wallace, Dewey Benson and Hugh Arnold spent last Wednesday at Sanders arranging some of the details of the opening of the loose leaf tobacco market. Mr. Arnold is the auctioneer and Mr. Benson one of the extenders, and both went on duty Monday.

Mr. and Mrs. John Ratcliff, Mr. and Mrs. Thos. Ratcliff, Horace Barbee, Daniel Westfall and W. T. Parker, sheriffs of Nicholas county, all of Carlisle, were here the past week, guests of B. F. Powers, the real estate agent, looking over some farming lands, and two of the parties bought farms near Crittenden, and will move here in the spring.

Judge J. G. Tomlin, Jno. L. Vest and W. T. Loomis attended the sale of the Carlisle Hotel at Dry Ridge last Wednesday, being interested in the property. Mr. Loomis being the receiver under the bankruptcy proceedings. The property cost the stockholders \$50,000 when bought from J. B. Sanders a couple of years ago, and it was sold to J. W. Glover who held a mortgage on the property for \$24,500 at the sale Wednesday.

Raymond M. Renaker who has taken the position of bookkeeper at the Sanders loose leaf warehouse, spent Sunday here with home folks. The warehouse opened Monday with about 30,000 lbs. of tobacco on the floor, the heavy snow and cold weather keeping a large quantity of tobacco from being delivered, as it was estimated that there would be about one hundred thousand pounds on the market as arranged for by the growers.

The Walton loose leaf market opened Wednesday with about 50,000 pounds of tobacco on the floor, about one-half of what there would have been but for the weather conditions, the snow being so high in drifts on the highways that it was impossible to haul the tobacco to the warehouse. The market promises to be good in every way as there is over a million pounds of tobacco arranged for to go over the week and the prices will be the highest ever known in the leaf tobacco trade.

Married.—Chas. E. Campbell and Miss Anna James were married at Newport, Oct. 11th, and kept the matter a secret until last week when it leaked out. There were no objections on the part of the parents, but as Mr. Campbell had enlisted in the U. S. Army to serve his country in the present struggle, he obtained a permit from the government to marry and took the pretty young lady to his heart as his bride. The groom is the son of Mr. and Mrs. Wm. Campbell, and the bride the daughter of Mr. and Mrs. G. J. James. They are very popular with a large circle of friends, who wish the young couple happiness and prosperity. The bride will make her home with her parents until her husband returns from the service.

A prospective coal farmer is causing people to think "where can I get some wood?"

There will be more water in your stream when the snow melts.

STATE REVENUE

The next Legislature will be confronted with a large deficit—larger deficit than any of its predecessors. It is announced from Frankfort that there are now outstanding over five million dollars of State warrants to be reduced largely as the tax collections come in from the Sheriffs.

But the Legislature will be faced by demands from every quarter for increased appropriations for the maintenance of public institutions. It is difficult to see how they can resist these demands. The high cost of living affects the asylums, the prisons, the schools, as well as the individual citizen.

Next year's income will be based upon a new assessment made under a new law. It is the belief of the gentlemen who have given thought to this subject that the new law will result in a larger assessment, but an assessment more equitable, more evenly distributed throughout the community, and then the State will receive a 40-cent tax will receive a larger revenue than it received from a 50-cent tax last year.

If these anticipations are realized, many of the difficulties that are anticipated may disappear. The new tax law must be given a trial in operation. The first test is in this first assessment. While the schedule seems to be unnecessarily complex, this belief is largely due to unfamiliarity with the new provisions. The questions are somewhat more searching; but they are designed to do what the old law sought to do; make each citizen return to the State the full value of the property upon which the State must impose a revenue to meet public expenses.

Every period of readjustment is a period of disturbance and dissatisfaction; but the people of Kentucky can bend their shoulders to the new system in a short time, and they will willingly bear any burden necessary to maintain the State's credit and to fulfill the obligations the State has assumed to the establishment of various charitable and educational institutions. — Louisville Evening Post.

INVESTIGATION URGED.

Frankfort, Dec. 6 — An investigation of the expenses of the State Board of Equalization by the Franklin county Grand Jury for the last six years, is recommended by State Inspector and Examiner Sewell in his report today to Acting Governor Black. Sewell says the members collected fees for working on Sundays and holidays during the time the board was in session. He says they collected \$5 a Sunday for as many as 84 Sundays.

If they worked on Sunday, Sewell says, they should be indicted and fined for violating the Sunday law. The state will receive, he adds, \$50,000 in fines. If they did not work on Sundays and holidays then, he says, the state ought to recover the money which was unjustly paid out.

The average expenses of the board annually for the time covered by the report are \$5,000.

Good Samaritans.

Tuesday Esq. R. H. Tanner, Jno. D. Mitchell, Chas. Tanner and Jno. Conrad of Florence neighborhood, organized a relief posse and cleared the Burlington and Florence pike of snow drifts. Mitchell, Conrad and Chas. Tanner furnished six horses for the work and Esq. R. H. Tanner was at the wheel and manipulated the road grader. These gentlemen deserve great credit for the work, and there are not four other men to be found in the county who clear six miles of road of snow drifts.

NOTICE.

The edition of the RECORDER for Christmas week will be printed on Monday the 18th, and no copy for Christmas, and no copy for that edition can be used that reaches the office later than Wednesday morning, DECEMBER 20th. PLEASE REMEMBER THIS.

Walton Dempsey played a great game in the foot ball contest at Lexington between the University team and the Alligators from Florida. It was his last appearance as a member of the University team.

The fourteen year old daughter of Ollie Wren, died at her home in Loveland, Ohio, last Saturday. Her parents have several relatives in and about Burlington.

Hurrah! The Cincinnati Enquirer and the Commercial Tribune arrived at the Burlington postoffice on time Wednesday morning.

State Bank Examiner, Walker, inspected the two local banks last Wednesday and Thursday.

Atty. W. W. Dickerson, of Cincinnati, made his appearance in court Wednesday morning.

The weather "forecast" for Cincinnati predicts snow for Wednesday and Thursday.

Has anybody found anything for which the weather the past week is good?

A Week's News

Cold weather causes fuel to melt

In some places snow drifts reach to the top of the fences.

The blizzards drive covered this entire country from Florida to Canada

Several old fashioned farm sleds have been seen on the streets this week

If the Kaiser does not capture Santa Claus he will be here in two weeks and two days

It was so cold Monday morning that several of the rural pupils did not show up at school

Fred Morris, who lives near town got his fingers frosted while milking his cows Monday morning.

Norman Bros. will have a big sale on the 17th inst. See the list of property elsewhere in this paper.

Deputy Assessor Lloyd Weaver has been looking up taxable property in this locality for several days

Virgil Gaines, son of Mr and Mrs J. E. Gaines is recovering from an attack of double pneumonia

It does not take many days' weather like that which broke here last Friday night to make a winter.

No services at the Baptist church last Sunday, Rev. DeMoloney, pastor, being snow bound at home

Ernest M. Arnold, has gone to Ft. Mead, Maryland, at which place he was ordered by telegram to report for service.

Two good cows belonging to James Ryle down on Gunpowder creek, died last Sunday night. Mr. Ryle thinks they were choked to death.

It is seldom that such cold weather is experienced here this early in the winter, and it is hoped it will not repeat often this winter.

Miss Anna Huey, of Big Bone church neighborhood, was the guest of her cousins, Misses Pauline, Alberta and Kathryn Kelly, from last Friday until Sunday.

The two Brasher boys, who, for several years have been employed as pilots on the White Collar Line of boats plying the Ohio river between Cincinnati and Louisville, have resigned.

Sunday was a very disagreeable day and people stayed close by the fire. At dark the mercury had begun falling and Monday morning it registered from 10 to 12 degrees below zero in Burlington, while Big Bone and other points in the county reported it below.

William Hughes, carrier on Burlington R. D. 1, hung up in snow drift near W. T. Ryle's, on the Woolper and Petersburg pike, on Monday, and had hard work getting his horse and sleigh out of the drift. He came back home, his clothing being frozen, he having got wet while working in the snow.

Stanley and Oakley Easton, two boys under 13 years of age, sons of Clarence Easton, say that Raymond Goodridge is not the only trapper in this part of the county, neither are Smith & Rue. This declaration was prompted by the delivery of furs they made at the local fur depot last Monday morning.

President Wilson's recent message to Congress electrified the nation.

Mrs. N. J. Maybery, of Devon, has sold her farm of 114 acres to Mrs. Mary E. McNeal, of Owen county, for \$14,500.

Judge Gaines arrived home last Friday night from Carrollton, where he held court last week. A man who was tried for murder was sentenced to the penitentiary for life.

The remains of Mrs. Clara Bradford, who died at Greensburg, Indiana, Friday, were placed in the vault at Hebron, last Saturday. She was the widow of the late Albert Bradford.

Thomas Huron, who had been living with W. F. Bradford, the past year, has returned to Lodi, Cal., where his brother, William, lives. He started in time to make the trip before the blizzard that swept the entire country the past week.

The Government will provide the local draft board with some very necessary office equipment to install in its office in Burlington. The work of the local draft board has developed a considerable quantity of labor not anticipated at first.

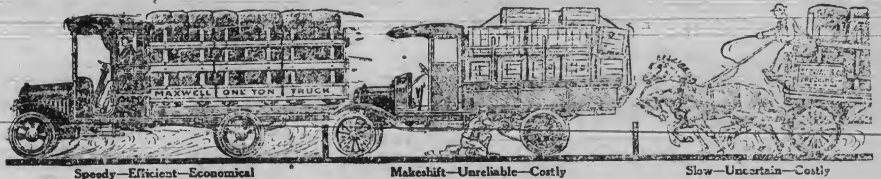

Robt. Carver, with his two-horse snow plow, and George Blyth with his one-horse snow remover, came to the relief of the snow-bound citizens of Burlington, last Saturday morning, and cleared the sidewalks and street crossings, and on behalf of the citizens of the town the Recorder extends each of them a vote of thanks

A healthy drafted man was discharged from military service at Camp Taylor in place of a man recommended to be sent home as physically unfit, because of an error through the similarity of names. Camp authorities are anxious to get the healthy man returned, but lawyers advise that this is impossible as he is now exempt and immune to the draft.

Married men without dependents will be accepted for the regular army, this being the first time the Government has set aside the rule since the days of the Spanish-American War. Formerly a married man was required to obtain an affidavit from his wife giving her permission for his enlistment, and it was also customary to obtain the consent of the officer under whom the soldier was to serve. The applicant's word that his wife is not dependent upon him for support is sufficient for him to gain admission into the army.

While the present snow is a source of great inconvenience to the people generally, it appears at most providential, as it will be of the greatest possible benefit to the growing winter wheat crop. Throughout practically all of the great winter wheat growing states the blanket of snow is heavy enough to afford excellent covering for the wheat and will protect it from excessive cold. At the same time it will afford much needed moisture. The crop was already in excellent condition and the snow greatly increases the prospects for a bumper yield.

Dr. O. S. Crisler, who has been located at Lexington for several years, being attached to the State Agricultural Experiment Station, has been transferred to the Agricultural School in Columbia, Boone county, Missouri, to which place he started last Monday, after spending a couple of days here with his parents, Mr. and Mrs. R. S. Crisler. Dr. Crisler will be superintendent of the Hog Cholera serum department in the University of Missouri. Dr. Crisler has quite a reputation as a well posted person in the serum treatment, having had an extensive experience. Here's to you Doctor, may your shadow never grow less

Speedy—Efficient—Economical

Makeshift—Unreliable—Costly

Slow—Uncertain—Costly

Today,—8 out of 10 merchants need motor trucks and don't realize it;—that's why their business 8 times out of 10 is falling behind their competitors,—for want of motor trucks.

When you realize what a motor truck will do for your business, don't make the mistake of taking on the burden of too big a truck; don't buy a makeshift, and don't wait too long to buy.

To-day you can get a Maxwell One-Ton, Worm-Drive Truck for several hundred dollars less than you can buy any other one-ton truck of equal specifications. How long this low price will last, no one can tell. We expect to sell Maxwell trucks at a premium in a few months.

Maxwell Truck Costs Less To Operate

Besides this lowest first cost, a Maxwell Truck has the lowest upkeep cost of any real truck, even lower than horses.

- it uses very much less gasoline per mile, with or without load,
- it weighs hundreds of pounds less than any other one-ton truck,
- is therefore easier on tires than any other one-ton truck,

—is just as strong and enduring as the heaviest one-ton truck made.

Maxwell Truck Immediately Lowers Delivery Costs

The Maxwell One-Ton, Worm-Drive Truck has power enough and the chassis strength enough for a bigger, heavier truck.

Its rugged, sturdy chassis, from its reserve-powered motor to its unbreakable rear axle, is built for endurance and dependability.

It has the speed and ability to get there and back, that is not possible in a heavier truck, or with horses.

Its spare parts cost very little.

—and it will increase your delivery efficiency and immediately lower your delivery costs at least fifty per cent.

The MAXWELL ONE-TON, WORM-DRIVE TRUCK is the only truck for you to buy—its efficiency, endurance, low first-cost, and low operating cost break all previous truck records.

Come in quick and see for yourself the figures on Maxwell trucking and operating costs that are the wonder of the transportation world. Cash or easy terms while our allotment lasts.

One Ton Chassis, \$985; Chassis with Cab and Windshield, \$1025; Combination Box Body, \$1035; Combination Box Stake Body with Cab and Windshield, \$1075; Stake Gate Body with Cab and Windshield, \$1080; Express Canopy Body, \$1095. F. O. B. Detroit

MOST MILES PER GALLON - MOST MILES ON TIRES

Circuit Court.

When Judge Gaines convened court last Monday morning at 10 o'clock only five of the grand jurors summoned had reached town. These were excused until 1 p. m. which time four more had put in their appearance, when the Judge had the e by-standers summoned and proceeded to organize the grand jury which was composed of the following:

R. S. Cowen, foreman, Burlington.
W. L. Crigler, Lebanon.
W. F. Bradford, Florence.
C. E. McNeely, Bellevue.
Len Stewart, Grant.
J. J. Tanner, Burlington.
Bluford Kirkley, Rabbit Hash.
Albert Pettit, Burlington.
E. H. Clure, Bellevue.
Bernard Rogers, Bellevue.
Hubert White, Burlington.
Bert Berkshire, Burlington.
Commonwealth's Attorney J. J. Howe, arrived on the mail auto shortly before noon having been on the road several hours not enjoying his trip.

Judge R. F. Menefee, of Crittenden, Attorneys S. W. Adams, D. E. Castleman and O. M. Rogers have been in court and are attending court.

Some of the grand jurors walked from Bellevue to Burlington, Monday morning.

The petit jurors who succeeded in appearing in court were discharged Tuesday at noon.

The grand jury was in session about two hours, indicted John Smith, colored, for horse stealing and was then finally discharged. John Smith, colored, who about the first of last September, broke into the residence of Albert Dolwick at Covington, and stole money, and afterwards escaped from the Burlington jail, stealing Edward Rieco's horse on his way to make his escape, was tried for horse stealing last Tuesday and given seven years in the penitentiary. Smith was brought from the Covington jail Tuesday morning.

The cold weather came very near knocking out the December term of the Boone circuit court.

Friday, Dec. 21, the pupils of B. H. S. will give a Christmas entertainment in the afternoon at 2 o'clock. The grade pupils will present a program. This will consist of songs, recitations, plays, Santa Claus will be present to add to the occasion.

In the evening at 7 the High School pupils will present the Caratula. The Shepherd's Story. This cantata consists of a beautiful Christmas story illustrated by beautiful songs.

These programs will be well worth attending. Come and catch the Christmas spirit from the children. Admission to each program 10 cents.

Joseph Brady joined the Navy

Jo Brady, son of H. D. Brady, of Bellevue, has enlisted in the Navy. He is under the regulation age, but that deficit was waived and the young man sent to the Great Lakes Naval Station, where he reported a few days since.

(Saturday Commercial-Tribune)

One of the first cases on record where a man under 17 years was permitted to enlist in the service of military or naval service occurred Friday when Joe Walton of Grant, Ky., was enlisted in the navy at the local recruiting station. Young Brady made the statement that he had to get into the fight right away, as he was afraid the war would be over before he had reached the regular navy enlistment age.

Brady's enlistment was secured only after his father had carried on a lengthy and continuous correspondence with the Navy Department at Washington. The permission of father and son was finally rewarded with the coveted permission Friday. Young Brady was sent to the Great Lakes Training Station for a course of two months' training after which he will be sent to a ship and given his chance to get the Kaiser.

Howard Reed, nephew of Mr. and Mrs. F. A. Hays, joined the Navy at the age of 14. He is now in.

Jo Revill furnish has enlisted

Jo Revill, only son of Dr. and Mrs. J. G. Furnish, of Covington, has enlisted in the army and expects to be ordered to Camp Taylor about the 15th of January. He has been engaged as a traveling salesman for the firm of Early & Daniel, Cincinnati, for some time and will continue to work for them until he is sent to the front. Having attended the Kentucky Military Institute for two years he has a good knowledge of camp life and also of discipline.

Public Sale!

I will sell at the residence of the late B. F. Norman, one mile South of Gunpowder Store and one-fourth mile North of Union and Mt. Zion Road, to the highest bidders, on

Norman Bros.

Sale to begin at 12:30 p. m. GEO. BURKITT, Auctioneer.

Should it be raining sale will be held next day, Dec. 18.

The Tobacco Crop.

Perry Simpson, of Harrison county, sold his crop of tobacco at 12,000 pounds at \$32.50 per hundred pounds.

R. H. Marrs and J. W. Wilson, of Anderson county, Kentucky, sold their crop of about 22,000 pounds of tobacco at 30 cents per pound.

At Paris, Ky., several crops have been sold at 30 cents, O. M. Cleveland sold 30,000 pounds at 28 cents, loaded on wagon at the barn.

It is said 1,250,000 pounds of tobacco have been packed in Montgomery and Bath counties at an average of 24 cents, to be shipped directly to Louisville.

At the second tobacco sale at Hodgenville, 69,333 pounds of tobacco were sold. The highest average received for Burley at the sale was \$34, and a fancy basket sold for \$47.

J. H. Posey, of Lancaster, one of the best known farmers of this county, sold his entire tobacco crop for 50 cents per pound. This is probably the highest price ever paid here for tobacco.

The upward trend of Burley prices is indicated by the statement that 17 cents a pound was considered a fair price in 1916 and that the five-year average prior to 1914 was in the neighborhood of eight cents.

In the vicinity of Carlisle speculators are purchasing crops at figures heretofore regarded as beyond all hope. Some crops have sold as high as 35 cents one crop, consisting of 1,200 pounds, has been purchased at \$15 per hundred.

Tobacco exports are forecasting record breaking prices throughout the Kentucky markets this year as a result of the opening day's sales on the Burley market at Horse Cave, Kentucky, when 42,800 pounds of tobacco were sold at a general average of \$28.40 a hundred. The lowest price of the entire day was 20 cents, while some of the better classes brought as high as sixty cents.

The loose leaf tobacco market opened at Greensburg with a sale of over 200,000 pounds. One hundred and twenty thousand pounds of Burley and 80,000 lbs. of dark tobacco were sold. Prices were higher than the most optimistic anticipated and a good deal beyond all expectations. Dark ranged from \$13.50 to \$24 the hundred. Burley ranged from \$18 to \$70 the floor average for dark was \$17.75 and for burley \$21.

Montgomery County. The rains were excellent on wheat and rye and both cereals are looking well and have secured an excellent start and have grown out rapidly and will furnish a great deal of winter grazing everywhere. Bluegrass pastures are short and there is little grazing for stock.

SENATOR JAMES.

Washington. — Senator Ollie M. James, one of the Administration's floor leaders in the Senate, made the following comment on the President's message to the Congress:

"President Wilson's message was his greatest utterance to the American Congress. His was not only the accredited voice as spokesman for America, but today was more than all this—it was the voice of liberty, justice and humanity of the world around. It makes his place secure as the leader of the thought of freemen everywhere. It had the real fighting spirit in it, the spirit which fights, as he happily termed it, for 'conquest of peace by terms'."

"He served notice upon our enemy abroad that there was no half-way house along the road. America has determined to travel. That we are seeking 'permanent' not temporary, foundation for the peace of the world—that our object is to win the war, and we shall not slacken or suffer ourselves to be diverted until it is won."

"I have no doubt that the people of this republic are unitedly back of the President and the Government in this and the most crisis than at any other time in our history, and while we are fighting the enemy abroad we must see to it that the treasonable voice of the cowardly traitor, at home, enjoying the blessings of our liberty and the prosperity of our country and opportunity of our country, shall not fire upon our soldiers from the rear. With me, I utterly ridicule the President pointed out that these were 'impossibly disloyal'."

"There was one deeply gratifying thing about the reception of the President's message by Congress—it would have been impossible to have told upon which side the political parties sat, so unanimous and enthusiastic was the applause given him and his wonderful message throughout its length that it shows plainly a splendidly united America, with politics, for the time forgotten in the hour of a national peril."

Representative J. Campbell Cantrill had the following to say about the President's message: "President Wilson has the faculty of hitting the bulls-eye whenever he has anything to say. And he addressed the Congress today. It is the duty of every member of Congress and every patriotic citizen to back up the President to the fullest extent."

Woodford County. — The rainy days of the past week have been most favorable and the wheat and other small grain needing rain. Farm labor is still scarce. The farmers have about finished husking corn, so with the tobacco stripping and husking season they will have quite enough to keep them busy for several weeks.

The Blizzard.

The worst of the season, and it is hoped it will be the last of the season, was the blizzard that began blizzing last Friday night. Saturday morning dawned with 10 inches of snow on the ground and the beautiful falling at a lively rate and drifting some. About noon the wind began blowing, carrying great volumes of snow skurrying across the country, making travel impossible on many of the highways, and the rural mail carriers who left the Burlington office about nine o'clock were unable to go many miles before they were able to make their trips around and they retraced their steps homeward as fast as they could.

Shortly after noon Saturday the temperature began falling, bound for zero, at which point it was standing Sunday morning. The sudden change in the weather was severe on livestock that was not well protected. Charles Kelly, who lives out on the East Bend road, had to cut out a bunch of shoats that were imprisoned under a straw stack by drifted snow.

Tuesday morning some thought the weather had moderated during the night and were surprised when the winter returns began coming in. Points heard from each reported the mercury below zero as follows:

Below Zero
Idelwild
Clinton Weaver's
Burlington
Bellevue
Petersburg
Beaver
Linsburg
Florence

Livestock has suffered severely from the cold, and fuel has vanished rapidly.

State News.

Harrison County. — The interests of all the farmers are now centered in the tobacco market. The wheat is not looking as good as desired. This has been a good season for hog killing.

Hopkinsville. — Richard Leavell, a South Christian farmer, sold his tobacco crop for \$31,250, the largest individual sale in several seasons in the Black Patch. Mr. Leavell had 110 acres in tobacco producing 125,000 pounds.

Mt. Sterling. — County Assessor James Barnes is ill at his home with smallpox. He was stricken while engaged in his assessment of property. Several cases of smallpox have been reported in the county. The cases that have been reported have been of light form.

The American Society of Mechanical Engineers is expected to bear the brunt of training crippled soldiers in profitable occupations and solving industrial problems in America, brought about by the introduction of women workers.

Dibowski's Cafe

Neat Little Place

For Farmer, Workman, Merchant, Clerk and Professional Man.

Commercial Luncheon from 11 a. m. to 1:30 p. m. Supper 5 to 7 p. m.

WAR TIME PROVERBS.

Here are Some Worth Taking to Heart at the Present Time.
(Chicago News.)

Racial wisdom as embodied in popular proverbs is well worth heeding for help in the conduct of life at all times. There are many proverbs specially worth taking to heart in time of war.

Here are some of these war-time proverbs, which I commend to the attention of all the world free from the menace of despotic autocracy, lust maddened Hunism:

Even war is better than a wretched peace.

He that makes a good war makes a good peace.

A good citizen owes his life to his country.

Wars must be waged by waking men.

He that shows a passion tells his enemy where to hit.

He that can be patient finds his foe at his feet.

To die or to conquer are the terms of war.

War gives no opportunity for repentance.

A brave and generous mind will shun no danger to serve his country.

The path of duty is the path of safety.

A deceitful peace is more hurtful than open war.

Precaution is better than repentance.

A promise is a debt.

It is a fair degree of plenty to have what is necessary.

A poor spirit is poorer than a poor purse.

Rashness is not valor.

The remedy of to-morrow is too late for the evil of to-day.

Where remedies are needed, sighing avails not.

In things that must be, it is good to be resolute.

Rest is won only by work.

He that would have the fruit must climb the tree.

Selfishness in council brings misfortune to the state.

For that thou canst do thyself, rely not on another.

Shame comes to no man unless he helps it on the way.

Unwilling service earns no thanks.

Be silent, or say something better than silence.

Sleep not in time of peril.

A soldier ought to fear nothing but God and dishonor.

Provide for thy soul by doing good works.

Judge Gaines did the proper thing when he decided to excuse jurors who failed to report Monday, and to discharge the others at the soonest possible moment.

Miss Mary Thompson returned a few days since from a visit of several weeks with Mrs. John W. Early, of Petersburg.

Attorney Jno. J. Howe returned home last Tuesday afternoon. He had a distressing light picking at the present term of circuit court.

Potatoes, apples, pumpkins and many other vegetables are frozen Sunday and Monday nights.

Several of the citizens about town are desirous that one of the best home grounds be secured.

One of the members of John Brown's army have passed.

OUR SCHOOLS.

"Once Again." As Milton put it in the beginning of one of his master poems, did we attend the last Teachers' Association at Bellevue on the 7th inst?

"All things were ready" and the program consisted of two parts, viz: the first part by the pupils of the school, which consisted largely of original work of the pupils, a poem, a story and prophecy. Then musical numbers, solo, duet, and a female quartet, rather a unique number since all parts were carried by girls.

Each pupil responded promptly and efficiently when announced and the efforts of each was appreciated as was shown by the generous applause given each number.

All the teachers in the district reached the place of meeting save two, who, no doubt, had legitimate excuses for absence, because Prof. Smith reported all had signed their willingness to be present and take part in the program. He said that all who had been assigned subjects responded "to the hilt."

Prof. Smith gave an opening talk on The Moral Life of the School, a subject which needs to be placed before the young at this time of war and strife throughout the world. The children who are now in our schools shall be the ones "to bind up the nations' wounds" and, in fact, to relieve the world of the distress and sorrow which shall be laid upon civilization as a crushing burden.

Next, Mrs. Maurer presented discipline in its new phase, that is a positive discipline instead of a negative discipline, a discipline of action instead of a discipline of "don'ts." A phase which should be emphasized more and more upon the young. A discipline of development instead of a discipline of inactivity and nothingness.

The next subject was sanitation, this was left to Miss Ruth Griffin. She confined herself to school sanitation presenting the danger to children in permitting them to be insatiable at the school, equipment and premises to be uncared for. She showed the danger of deadly diseases that are brought about by neglect, which sometimes spread to entire communities. The thought was directed toward parents, patrons and citizens rather than to teacher and pupil.

Mrs. Gaines gave an interesting talk, rather vocational and didactic, on teaching smaller children to read, presenting the three common methods now in use, laying stress upon the phonic method, which was made interesting to all.

After this the Supt. made some remarks on "How to boost the School," which closed the teachers' program.

A goodly number of patrons and interested citizens were present, mostly ladies, and they are always equal to the emergency; these ladies had disobeyed "Hoover's conservation" notice, and prepared an elegant and bountiful lunch, which all enjoyed at the noon hour, the only pay they received was a vote of thanks from the assembly.

The time was pleasantly and profitably spent and all present seemed to think it was worth while to spend the day in community interest. Harmony and advancement seem to be the watchwords of the school at Bellevue.

This closes a successful series of meetings of teachers in the county. Schools of the county and we feel that these meetings have not been without fruitage.

A word to the district teachers. I ask that they see to it that their respective schools shall not have to stop on account of fuel. Let's keep the good work moving upward.

Mason county lead the State in subscriptions to the \$10,000 fund for instructing illiterate soldiers, calculated on a basis of population and R. P. Browning, in charge of the campaign in that county will receive a big flag from the Kentucky Literacy Commission.

Thermometers have been doing a low down business this week.

U. S. Government Thrift Stamps AND War-Savings Certificate Stamps

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

UNION.

Mrs. G. E. Senour, who has been quite sick, is improving.
Mrs. Lloyd Norris was very ill one day the past week.
Nann D. Bristow spent the week with Miss Marietta Love and father.
Walter Huey, of Burlington, who left a few days ago with his aunt and uncle for a warmer climate, has been heard from by relatives and says that they made the trip from Bellevue, Ky., to Lakewood, Florida in 12 days with comparatively no trouble and he acted chaffeur.

GUNPOWDER.

Several in this neighborhood butchered their hogs last week.
Robt. Snyder sent a load of hogs to market a few days since and the prices were satisfactory. One brought \$74.

The grading on the Florence and Union pike was completed last week and the road is now ready for the finishing touch.
After a stay of two weeks with home folks, Sergeant Wm. Buaby left last Sunday for Camp Sheridan, Ala., to report for duty.
On account of the inclement weather last Sunday the communion services at Hopeful were postponed until some time in the future.

About ten inches of snow fell here Friday night and Saturday, and the temperature ran down to about zero. The snow drifted so badly traffic will be interrupted until it is removed.

BEAVER

Hunters report game of all kinds very scarce around here.
Snow 20 inches deep and 14 degrees below zero, Sunday morning.
W. C. Johnson shipped a truck load of 28 pound hogs to the city, last Tuesday.

Tobacco buyers were looking at tobacco in this neighborhood last week. Geo. Baker refused 30 cents a pound for his.
John L. Jones, Jr., of near Hamilton, and Miss Kelley, passed thru here Friday afternoon, on their way to the city to get married.
Leo Huey took three loads and H. F. Jones one load of tobacco to the Walton loose leaf market last Friday to have ready for the opening.

C. C. Sleest was operated on at Christ Hospital, Cincinnati, Saturday morning, for gall stone, and the latest report is he is doing as well as could be expected.
Masters Chas. and Cloyd Johnson arrived at Walton, last Friday morning, from Memphis, Tenn., and will spend the winter with their grandparents, Mr. and Mrs. W. C. Johnson.

Misses Annie Cleek and Jane Hance, our efficient teachers, went over to Burlington, Friday afternoon, in their machine, and the snow storm caught them away from home and there will be no school until they get home.

FLORENCE.

W. H. Goodridge is sick.
Don't forget the oyster supper the 27th.

Several of the commutator boys laid off Monday.
J. P. Tanner used his sleigh on his route, Monday.

W. H. Goodridge and Joe Baxter killed hogs, Thursday.
Mrs. J. J. Mayberry, of Devon, has sold her farm and expects to move to Elranger.

The Tom Thumb Wedding was a great success. A large crowd and the children did their parts well.
Mrs. Albert Roberts and son, Melvin, are guests of her father a few days last week.

That R. E. Rume has Mrs. Emma V. Rouse's Burlington pike, to which is to move soon.

Abby Corbin had as her Sunday night at supper, Chas. Bradford, John and Winfield Myers.

Joe and Cliff Norman will have a sale next Monday, after which they will move to Edward Carpenter's house on Union pike.

Thanks are due Lloyd Aylor for cleaning our streets. Hook his horse and snow scraper, Saturday morning, and removed the snow from the sidewalks.

How is this for an introduction to winter? The thermometer stood 11 below here Sunday, and the snow was 11 inches deep on the level, and drifted to the depth of three or four feet in a great many places.

They'll Do to Depend On
Howard and Owen Acers, who are attending Burlington High School and operate the heating plant in the building, walked from their home four miles down to Middle creek, last Saturday afternoon, to look after the furnace and keep the water pipes from freezing. They are about the only two boys in the county who would have pulled that stunt.

which is an evidence that they can be depended upon to look after duties they undertake to perform.

DEVON.

The entertainment and canteen social at Beech Grove school house Dec. 7th, for benefit of the Red Cross was quite a success both socially and financially. \$46.05 was the amount made. The school children, under the management of their teacher, Miss Louise Sanders, did their part well and the wish to thank very much the teacher and pupils, also those who brought boxes and those who gave their money so liberally for the aid of our boys. Several donations were made by Mr. Myers, of Florence, for which we are very grateful. Ten members of our Auxiliary, since being organized Nov. 3rd, has increased from 17 to 25 members. Let us all spend every possible spare moment in this good work and in this way hasten the time when our boys will come home.

A PATRIOTIC CALL.

Word has been received by Boone Co. Chapter of Red Cross from Cleveland headquarters, that the apportionment for this county for the Christmas Drive for \$15,000,000 membership is \$2,100.

The apportionment of the various branches is as follows:
Walton \$300
Florence \$200
Union \$240
Seaver Lick \$200
Big Bone and South Fork \$100
Verona \$100
Rabbit Hash \$100
Bellevue \$200
Eullitsville and Hebron \$225
Constance and Pt. Pleasant \$250
Petersburg \$300
Burlington \$300

Total \$2,550.
The precinct chairman are requested to appoint a committee large enough to canvass their county headquarters by Dec. 20th. Membership fee for the year is \$1.00. Each branch is urged to meet its apportionment to Boone county help overcome the deficits that are sure to be made by sections of less ability. Let everybody help.

Signed
E. C. RILEY, Chairman.
DAVID BLYTH, Captain.
Boone County Christmas Drive for Red Cross Membership.

Red Cross Notes.

The county meeting of last Tuesday, was devoted altogether to the coming Christmas Membership Drive. The purpose is to enable every family, if possible, every member in every family in the Red Cross. David Blyth was appointed County Captain and he will have entire charge of the Drive in Boone county, whose aim is to raise \$15,000.

The Bullittville Unit will meet with Mrs. B. C. Graddy, December 19th. At the last meeting they completed 73 gauze dressings received a rush order, last Friday night of 100 five yard rolls, to be in Cleveland in a week. This is a small portion of the million special dressings that were previously distributed among the larger chapters. By Sunday evening the Burlington Unit had one-half of the entire quota finished, and with a few workers of necessity detained by the storm.

Fifty pounds of sock yarn came last week. For Petersburg not at all counted by the nonarrival of sweater yarn, most nearly every one old knitters and new, began knitting socks. If they positively cannot manage a heel, someone who can do it.

Work brought in last week:
Walton—40 shirts, 14 pairs socks, 2 pairs wristlets, 2 sweaters.
Bellevue—7 pairs socks, 5 pairs wristlets, 2 sweaters, 22 muslin shirts, 9 outing shirts, 27 nine-inch compresses, 82 4-inch compresses.
Pt. Pleasant—3 sweaters.

Hebron—1 pair wristlets, 4 pairs socks, 2 sweaters, 1 scarf, 2 slings, 14 abdominal bandages.
B. H. S.—31 4-inch compresses, 80 sponges.

Bullittville—5 pairs socks, one scarf, 2 sweaters, 8 outing shirts.
Burlington—44 fluffed dressings, 183 four-inch compresses, 7 three yard rolls, 2 gauze stacks, 50 five yard rolls, three muslin shirts.

last week, 1 pair socks, 1 sweater. All units are requested to send their work marked with the name of the place sending, or, better still, send a list of articles.

Miss Julia Dinmore purchased yarn of excellent quality, made and gave to Bellevue unit one of the sweaters brought in by them last week.

Headquarters, while the grand jury is in session, is through the kindness of the County Clerk, in the Record room of that office.

To reach Burlington to attend circuit court Atty. Edgar C. Riley had to come via Aurora, Lawrenceburg and Cincinnati.

Reuben Hager, of East Bend, has been a guest of the Cowen House for several days.

Public Sale.

I will offer for sale at my residence, 2 miles south of Florence, at Devon Station, on the Lexington pike, on

Friday, Dec. 21st, 1917

the following property:
9 milch cows 3 with calves, 2-yr. old Holstein bull, 2 1/2 year old heifer, 3 coming 2 year old heifers, 7-yr. old farm mare, family mare, farm wagon, spring wagon, Buggy, 2-horse sled, 2 sets spring wagon harness, 2 sets buggy harness, hayrake, disc harrow, cider mill, swinging churn, hog scalding box, 5 or 6 tons hay in barn, log chains, posthole digger and other small tools.

Terms:—Sums of \$5.00 and under, cash; on sums over that amount a credit of six months without interest, purchaser to give note with approved security, payable at Florence Deposit Bank, Florence, Ky.

Sale to begin at 10 a. m.
Mas. N. J. MAYBERRY.

Public Sale.

I will offer for sale at my place 2 1/2 miles west of Union, Boone County, Ky., on Long Branch creek, on

Wednesday, Dec. 19, 1917

the following property:
1 Holstein Cow, 1 Shorthorn Cow, 1 black Mare 12-yr. old, 1 Horse 8-yr. old, Saddle Mare 8-yr. old, Duroc Sow, 9 Shota, Road Wagon, Spring Wagon, Sled, Harrow, Feed Shopper, Breaking Plow, Double Shovel Plow, Steel Tire Buggy and pole, Rubber Tire Buggy, 2 sets Buggy Harness, set Work Harness, Sleigh, Single and Double trees, Shovels, Hoes, Rake, Posthole Digger, Crosscut Saw, Scythe, Shot Gun, about 800 lbs. ILLITERATES IN U. S.

In various ways there were gathered into this country in 1910, 5,000,000 illiterates. Were these aggregated they would make a nation larger than Switzerland, or as large as Denmark and Norway combined. It would be a nation without Bibles, without song-books, without magazines or newspapers, without banks, without railways, without pens, pencils or writing paper, and one supplied with only the coarsest of commodities of trade. I heard an illiterate woman say that she couldn't recognize a \$2 bill until she was twenty-five years of age, says a writer in Christian Herald. "Square money," with its printing, is not as popular with them as "round money." When the census takers were taking the list of illiterates in 1910 the "moonlight school" as a remedy for adult illiteracy was being evolved. In 1911 the experiment was tried first in all of the schools in Iowa, one of the mountain counties of Kentucky. None is better prepared to witness the result of that experiment than the United States bureau of education, which heralded to the world its success in a bulletin entitled "Illiteracy in the United States and an Experiment for Its Elimination."

Doctor Colmore, the Protestant Episcopal bishop of Porto Rico and Hayti, has some interesting things to say of the condition of Hayti, after two months' tour through that island. The government income has increased under the care of General Cole of the United States marine corps, and the gendarmes organized by Colonel Butler of the same corps are doing fine work in policing the country districts. Railroad building has begun again. New industries have been started, like the growing of potatoes. But the odd fact of all is that there are big shipments of castor oil beans nowadays—the beans being used for making oil desired for airplanes. Even Hayti, therefore, feels the effect of the great war.

The long standing tradition is that boys raised in the country are ever so much more healthy and rugged and capable of standing hardship than are boys raised in the city with what are presumed to be its unhygienic surroundings. This tradition has been rather rudely disturbed by a series of experiences in the allied armies, where under the stress of war the city boy has almost as a rule proved a harder and braver soldier than his fellow from the country.

Surgeon General Braisted informs Secretary Daniels that despite the enormous increase in the number of men serving in the navy, fewer than ten cases of typhoid fever have been reported since the war began. Evidently the precaution of anti-typhoid inoculation is completely successful.

The ex-czar of Russia has had his abode of exile changed, because of the curious crowds that stood around to stare at him and his family. Such a request from the man whose mere word was once law in the vast country is oddly significant of how the world has been moving of late.

"Generally speaking," says the Chicago News, "women's fashions are more beautiful and more sensible now than at any other time within living memory." Surely they are more sensible, a fact that gives rise to the fear that a change must come soon.

A proposition is made by a scientific expert to store up summer heat for the winter. If this would entail the withdrawing of a certain proportion of caloric from the atmosphere it would be hailed with delicious joy from the sizzling contingent.

We may feel that it is tough to have cold weather coming on and the supply of coal high and short, but think of Wilhelm facing a long winter and the Canadians closing in on his bin at Lens.

Ten Belgians pleaded guilty in Brooklyn of trying to smuggle for Germany's benefit. When it comes to bribing Belgians, Germany's system must be admitted to be complete.

Our men may not be able to understand their French comrades on the west front, but the Teuton will be able to understand what both mean when the time comes.

It is reported by a writer that Germany is imbeciles and units at the front. Some of the German outrages were certainly the work of madmen.

Somebody is suggesting the return of the old paper collar. No, sir. Paper is too expensive; the men couldn't afford paper collars.

For the first time in their lives the millions in our armies do not have to be bothered with the high cost of living.

Trading in sugar collars is now so hot that a sugar collar is worth...

WAR TALKS

By UNCLE DAN

Number Six

Billie and Jimmie Will Take Military Training.

"I am mighty sorry, Uncle Dan, that this is your last night with us. Can't you stay longer? We boys are having a peach of a time," said Billie.

"Well, if you get more out of it in the way of pleasure than I," said Uncle Dan, "you are going some."

"Billie, I have been talking seriously with your father and mother about sending you to a military academy and they asked me to talk with you about it."

"Whoopie!" Billie screamed, like a wild Indian.

"Now, hold your horses," said Uncle Dan, "and listen to me. You know I sent my boy, Howard, to one of these schools for a year when he was about your age. He was narrow chested, stoop shouldered, rather loose jointed; he had the big head and needed discipline and physical development. He was growing fast and I wanted him to be strong physically."

"Say, Uncle Dan," said Billie, "I believe your description of Howard fits me pretty well, eh?"

"Well," said Uncle Dan, "to be frank I think it does; you need the same thing. Howard did not like it at first. I am told for a few weeks he had 'rough schooling,' but after he found that the only way was to obey orders, he caught the spirit of the institution and found it. We did not see him for about six months, then he came home for a few days. We were astounded at his appearance. He had gained about 20 pounds in weight, his muscles were as hard as nails, he stood as straight as an arrow, he was courteous, consider-

Note the result of six months of military training. Compare lines A-A and B-B in cut.

ate and manly. His awkwardness had disappeared. The change was wonderful and it was all to the good. Here is a photograph showing 'before and after' training, and I am sure no patent medicine advertisement could beat it. "Well, mother and I were delighted. That was ten years ago, and Howard says the year he spent at the military academy was the best year of his life. "Now," said Uncle Dan, with great earnestness, "when such training does so much good, makes better citizens and at the same time fits a man to defend his country, why should not Uncle Sam furnish this training at the government's expense? The government has the right to call anyone to serve in case of war, and without training, a man is worth nothing as a soldier. Uncle Sam has splendid training camps that will soon be available for the purpose, therefore, here is double reason why the Chamberlain bill for compulsory military training should be passed at once, so that every boy physically fit may have this training and not leave it for his parents to pay for. On account of the expense, not one boy in 50 can take the training now. I am glad that you can do so. These big crops and big prices, I find, make the farmers rather 'cocky,' and that the best is demanded by them."

Billie was up with the lark the next morning, more excited and enthusiastic than ever. He had a plan. He knew Jimmie owned a colt worth \$100; that he would make almost another \$100 on his potatoes if they turned out well, and that he had from his previous savings, bought a \$100 Liberty bond. Billie's plan was to have Jimmie cash in and go with him. He was disappointed to find that Jimmie would still lack about \$200 of having enough to see him through. His lip quivering, he said: "I'm mighty sorry to leave Jimmie."

Uncle Dan was silent a moment or two, then he asked Billie to go down to the orchard and get him some apples to eat on the train. While he was gone, it was arranged that Uncle Dan and Mrs. Graham would advance the money necessary so that Jimmie could go. When Billie returned he was told about it. He ran to the phone and called Jimmie, saying: "Come on over, run just as fast as you can. I've got the greatest news you ever heard of."

FAVOR MARKETING EGGS BY PARCEL POST

FIBER-BOARD BOX WITH CORRUGATED LINING.

(Prepared by the United States Department of Agriculture.)

The practicability of shipping eggs by parcel post is demonstrated by the fact that more parcels of eggs than of any other one product pass through the mails. In order to test various methods of packing and handling eggs the bureau of markets has shipped more than seven hundred dozen eggs through the mails from various points under various conditions, and in different types of containers, without undue loss, either in the expense of shipment or the condition of the eggs on reaching the consumer's kitchen.

While the great bulk of eggs which come from distant producing territory will continue to be shipped by other methods, it is no doubt true that many cities can be supplied with a considerable portion of their fresh eggs from within the first and second zones by parcel post to the advantage of both producer and consumer. By such direct contact the producer should secure somewhat better prices for his eggs than are realized by present methods of marketing, and the consumer should obtain a fresher quality at no increased cost, or, frequently, even at a reduction in price. The producer who does not have satisfactory marketing facilities may find in the parcel post a means of solving his egg-marketing problems. This applies especially to the man whose flock is so small that he cannot make case shipments, i. e., shipments in the regular 30-dozen-size egg case.

Summary of Results of Experimental Shipments.

Four hundred and sixty-six shipments were made in the experiment. They comprised a total of 700 11-12 dozen, or 9,121 eggs, in lots of from one dozen to ten dozen each. The number of eggs broken was 327, or slightly less than 3.6 per cent of the whole number. Of these, 209 eggs, or slightly less than 2.3 per cent, were broken too badly to use; the remaining 118 were usable. If 91 eggs broken in parcels known to have received violent usage be eliminated, the breakage resulting in loss is less than 1.3 per cent.

The instructions issued by the post office department for the handling of fragile mail matter (which includes eggs) are carefully drawn and quite ample. If the proper preparations were made for mailing, and if all employees of the postal service could be educated to observe the instructions faithfully, the breakage could be reduced to a negligible minimum.

These experimental shipments were made over various routes and distances, including not only local shipments over short routes but points as far away from Washington as Minneapolis, Minn., and the Rocky Mountains. They began in October, 1913, and extended to February, 1914, thus including the holiday rush. The shipments were sufficiently numerous to justify the conclusion that eggs can be shipped by mail satisfactorily under the existing postal provisions, provided these are rigorously observed.

Chance for Better Prices.

Under the present method the general farmer, or in most cases the farmer's wife, sells the surplus eggs to the local storekeeper, taking their value out in trade. The parcel post offers an opportunity for a cash outlet at better prices. It should prove a valuable help, especially to those farmers that are located unfavorably in regard to a consuming market. It is not too much to say that shipping by parcel post has been demonstrated as a practical proposition when properly conducted.

To send a two-dozen-size parcel would cost about as follows: For container and wrapping, 8 cents; for postage, 9 cents, or a total of 17 cents, which would be 8 1/2 cents a dozen marketing cost. Marketing a five-dozen parcel would cost about 13 cents for container and wrapping and 14 cents postage, or a total of 27 cents; a twelve-dozen lot would cost about 22 cents for container and wrapping and 25 cents postage, or a total of 47 cents.

Postage Rates.

The postage rates here used are those within the first and second zones. The rates for the third and farther zones are higher, and the advantage of marketing by parcel post consequently less.

These figures include the cost of a new container each time. The experiments show that containers from the first dozen size up will stand on

an average two to four trips very satisfactorily. Containers for smaller lots will stand on an average from three to five trips. As the postage cost of returning containers is considerably less than the price of new ones, the average expense for containers can be materially reduced from the figures quoted.

It is quite possible that once having secured a parcel-post market for eggs many farmers having other commodities not readily salable at home may open up markets for them in the same way. Methods of arriving at prices would be the same, the producer advising the consumer as to the commodities, quantity and price. By this means a market may be found for many products which are not now being marketed mainly for the reason that they are in the nature of by-products of small surpluses over the family's need which do not justify a special trip to market.

There is also a field of opportunity open for development in making a special effort to produce such things as town or city residents are anxious to obtain, and by proper attention a supplemental income could be built up by developing such business.

WORMS IN CHICKENS

Good Remedy Suggested by Department of Agriculture.

Finely Chopped Tobacco Stems Soaked in Water Mixed With Ground Feed Is Recommended—Thoroughly Clean Hen House.

(Prepared by the United States Department of Agriculture.)

"Very successful" is the way a Massachusetts poultry raiser describes a remedy for worms in chickens, suggested to him by a United States department of agriculture official after recommendation by investigators in the California agricultural experiment station.

The poultry raiser added, in his letter of thanks, that thorough trials of other remedies had failed. That which he praised follows:

"Give the chickens no food or water for 24 hours before treating; then feed them half the usual amount of ground feed in which has been mixed finely chopped tobacco stems soaked for two hours in all the water they will absorb. One pound of tobacco stems (weighed before soaking) is sufficient for 100 birds. Two hours after the chickens have eaten the medicated mash, give them one-fourth of the usual ration of ground feed mixed with water in which epsom salt has been dissolved, using 11 ounces of epsom salt for 100 birds.

"To reduce the chances of further infestation all manure and loose dirt should be removed from the chicken yard and the pens and roosts thoroughly scalded and cleaned with hot water."

SAVE FEW CHOICE ROOSTERS

Disappointment Awaits Farmers Who Have Been Accustomed to Buy Cockerels in Winter.

"People who have been accustomed to buying roosters in January and February to make up their breeding pens," says a poultry expert of the United States food administration, "are likely to be disappointed next year."

To be sure of an early start in poultry operations during the coming season, farmers and city flock owners are advised to retain at least a few choice well-matured cockerels. Carrying them through the winter, even at a considerable cost for feed, is a wiser course than depending on the uncertain commercial supply.

ROOSTS ON THE SAME LEVEL

Where One Is Higher Than Other Fowls and Chickens Struggle to Get on Highest One.

If more than one roost is used in the henhouse, be sure that all are on the same level, because if one is higher than another the fowls and chickens will all try to roost on the highest pole.

Local Happenings.

The war has apparently been resolved into an endurance test.

A conservative length of the street skirt is from four to six inches from the floor.

The loose leaf sales were postponed at Aurora, last Thursday, on account of the bad weather.

The weather the past week has been good for feeding and burning fuel is all that can be said for it.

Earl Smith has been administering to a nice covey of quails during the cold weather, otherwise they would have perished.

A drought at this time of year with a ten inch snow on the ground is a new weather wrinkle in this part of the country.

A letter from C. M. Baldon, who is at Davenport, Iowa, says the Mississippi river is frozen over, the ice being eight inches thick.

Numerous laws that will be proposed for enactment by the coming session of the Kentucky legislature are in process of incubation.

It looks like the proposition to submit a constitutional amendment permitting a vote on State wide prohibition will have smooth sailing at Frankfort this winter.

John Smith, colored, convicted in the circuit court, last week, was sentenced to seven years confinement in the penitentiary last Friday. He had given the officers considerable trouble and they were glad to have him off of their hands.

A horse belonging to Asa Cason out on the East Bond road, died one night last week. Cause of death is unknown.

Herbert Kirkpatrick called on his farmers in the Waterloo neighborhood, one day last week, and found them pretty well stocked up with pelts.

Five farm sleds lined up at the hitching rack in Burlington at the same time last Saturday, had very much the appearance of the "good old times" you read about.

A period of care for livestock under weather conditions like those of the past week causes the farmers a great deal of labor for which they had not made any calculations.

Richard Underhill, pioneer resident of the Gunpowder neighborhood, and his wife have been in delicate health for some time, and very cold weather has been very severe on them, but they have kind neighbors, who administer to their necessities.

The cold weather this month reduced the crop of tobacco in the county many hundred pounds from what it would have been had it been delivered previously to its arrival, but one advantage is the growers will never know what their hands. Sheriff Cropper took Smith to the penitentiary, last Monday.

One morning last week, when trying to open a window blind at the bank, Glen Kelly dealt himself a heavy blow over one of his eyes with a large iron bar he was using. The punch was delivered so artistically he can explain the how thereof, but his forehead showed plainly it had been up against a hard substance in a careless sort of way.

Mrs. Anna Lassing.

Mrs. Anna E. Lassing, 33, wife of the late Dr. H. C. Lassing, of Union, died at the home of her daughter, Mrs. J. M. Collins, Crittenden, Grant county, last Friday night. Burial at Richmond cemetery Sunday at 11:30 a. m.

She is survived by six children, Judge J. M. Lassing of Newport, Kentucky; Lieutenant Commander Walter H. Lassing of the United States Navy; Coleman H. Lassing, Base Hospital Unit No. 40; Mrs. Mary L. Collins of Crittenden and Mrs. Martha Huey of Union.

Mrs. Lassing was a member of the Richmond Presbyterian church from which her funeral was conducted.

Statistics show that 30 or 35 years ago approximately two thirds of the population of the United States was in small towns and rural communities and one-third in the cities, and that now only one-third of the population is in the country and two-thirds in the cities. Then two-thirds of the people were engaged in the primary production of what they themselves and the remaining one-third consumed; now there is only one-third of the people producing for themselves and the remaining two-thirds. Of course, modern and better methods of production may account for this change in part, but not wholly.

This movement of population has been going to extremes; it has been an important factor, aside from the effects of the war, in the increasing cost of living; and it has social and economic features that are not desirable.

Carrollton, Dec. 15.-The towboat R. B. Smith brought two partly loaded barges of coal, con signed to a dealer at Vevay, Indiana, into the Kentucky river Thursday. Today it was commandeered by Mayor O'Hillon and will be sold in small lots to Carrollton people.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of December 20th, 1877

This is the shortest day of the year.

Grass in courthouse yard retains its spring verdure.

English Sparrows are making their appearance in this locality.

Burlington and Petersburg pike is receiving its annual dress of new stone.

One birth, two deaths and one wedding make up Burlington's record for the past ten days.

It is frequently asked, "What are hogs bringing?" Well, just at present they are bringing destruction to the purses of those who invested in them at 4c and 5 cents a pound.

It is said rats are devouring the farming utensils in East Bend.

Mr. Frank Smith, 37, died on the 14th inst., at his home in Burlington.

Joseph C. Hughes died at his home near Beaver on the 14th inst.

Joseph Clock, of Beaver, sold 40 hogs that averaged 430 pounds.

Ben Records, of Walton, went to Washington, last week to secure patents on a corn planter and a circular saw invented by Wes Dixon.

Belleview, Dec. 12, 1877. To the Editor of the Recorder: The public mind has been aroused

ed to the highest pitch by a shooting affray which occurred on Monday morning about daybreak on Laughery Island, half a mile above this place. From an interview with an eye-witness, we gathered the following facts: John Smith, a resident of this place, and mail carrier between here and Rising Sun, accompanied by his son, went to the above named island duck hunting, when, upon landing their skiff, they discovered another skiff a few yards from them. Upon looking from the shore they discovered, about 40 yards from them, two men who afterward proved to be David and Eb. McNight, residents of Indiana, who were gathering coal drifted there by the current. Smith ordered them to leave and let the coal be Dave replied: "Go to hell. I am going to have the coal, and I have as much right here as you." Smith then fired on him with a shotgun, 18 shot taking effect in the side of the face, neck and scalp, but not seriously injuring him. Eb then rushed toward Smith with a derrick and received the contents of the other barrel, but having on a thick coat, and a hat, took effect. Eb still pursued Smith into the water, until Smith began to reload, when they both fled. The island is owned by Smith, and another gentleman of this place, and they have warned the McNights, as well as many others, to keep off John Smith is an honorable, inoffensive and peaceful citizen, to which the fact of his being recommended by a number of the best citizens of this community will certify.

Job and Joseph Lowe had an average yield of ninety-five bushels of corn to the acre from their land in the Miami bottoms. This is the largest yield on a large acreage of which the Lows have information for this year's crop. Lawrenceburg Press.

YOU HAVE BEEN CALLED

(Milwaukee Journal.)

Say, do you have any acquaintances or friends who seem to think you are a verb in the imperative mood? And say, when they greet you as a verb-second person singular, imperative-are you profusely silent, or do you unceremoniously wave your wrist and tell them in unmeasured terms how unbecomingly how shabby, how ordinary, how common, it is for a person to call some one else Say?

The Lord Chesterfields of the Twentieth century have commented on manners among the supposedly elite of America. But one subject about which they have not yet risen in just indignation is the despicable habit many persons have of addressing others as Say. Sometimes one hears it so often that one wants to lean up against a lamp post and cry. It is as bad as trying to take a nap beside a board-paving sleep or having to listen to a gormandizer inhale his soup. It is more painful than a would-be funny man in a cheap show. It is a fat fly in the honey sweetness of life. It is a moderate foretaste of what we shall get in the next world if we are not good in this. It is.

You know. You have been called Say. How do you like it?

His Business is Growing

About a year ago Clifford Rodges bought a small gasoline engine and a wood sawing outfit. Having discovered what possibilities there are in a proper outfit for the purpose he disposed of his and replaced it with a horse power engine and a 3-hp saw. Besides as yet would he expect to furnish power to operate a threshing machine and for filling silos. He is out for work and plenty of it.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co. building. He is also authorized to receive subscriptions and collect other accounts.

Jno. L. Vest was confined to his home last week with a severe case of lagrippe.

Harley Baker and family moved to Covington last week where he has a position on the street cars as motorman.

For Sale—Poland China bowl; 10 months old; pedigree; Powers stock; guaranteed perfect. Must sacrifice. C. S. Boles, Richmond, Ky.

The remains of William Sasher, who died at Owensboro, Dec. 6th, passed through this city on Thursday morning for interment at the Williamstown for interment. Mr. Sasher was 84 years old and died from a blood clot on the brain.

The protracted meeting at the Baptist church closed last week with 29 additions, which is a fine tribute to the efforts of Rev. Ous Hamilton the pastor, who conducted the meeting.

John W. Sleet who recently moved here from Crittenden, has taken a position with the Equitable Bank and Trust Co. to master the intricacies of the banking business and is doing excellent work.

Fred Miller and Lambert Rouse who joined the Aviation Corps Signal Section at Cincinnati, last week, and are now at Ft. Thomas, were visitors to home folks Saturday, and are well pleased with their work.

Jos. C. Hughes of the Richmond neighborhood, shipped some fine cattle to the Cincinnati market last week that sold for \$12.50 per cwt. and in the aggregate brought him nearly \$6,000. He made a handsome profit on them.

Miss Jennie Lee Gaines, daughter of Mr. and Mrs. W. Lee Gaines was taken to Bethesda Hospital, Cincinnati, last Wednesday by Dr. G. C. Rankins where she underwent a successful operation for appendicitis and is now on the road to recovery.

Contractor David Wolfe of Georgetown, expected to have the Walton Christian church edifice completed for dedication by Christmas, but owing to the weather conditions will not be able to have it completed for perhaps a month later.

J. D. VanLandingham who recently sold his farm in Kenton county has bought the residence property of J. J. Edwards in Walton and expects to move here in a short time. The sale was made through G. B. Powers, real estate agent.

The train on the L. & N. Railroad that passes here for the second time about noon every day, will receive and deliver mail for Walton, this order taking effect last Monday. It will be of great advantage to the business interests of this quarter.

Wallace Shinkle who has been here with his parents Mr. and Mrs. Chas. Shinkle the past year on account of impaired health, returned to Montgomery, Ala., to resume career of his life plant there. His father who has business investments at Huntsville, Ala., left Saturday for a short visit there.

Dr. W. K. Chambers of Los Angeles, California, arrived here last week on a visit to his brother C. Scott Chambers and will spend a couple of weeks at his old home at Petersburg, after an absence of twenty years. Dr. Chambers is a leading dentist at Los Angeles and is prospering in his adopted home.

Jno. L. Jones, H. F. Jones and Mr. and Mrs. Melvin Moore and Landing, were here Saturday en route to Kling Sun, Ind., to attend the funeral of Mrs. Louis Acra who died here Friday from blood poisoning. She was the daughter of Mr. and Mrs. C. E. Williams and was 31 years old and leaves a husband and three sons.

In the publication of the visit of Lynn C. Percival last week he was given the benefit of having a wife, an error in the publication to which he objects as he is still "heart whole and fancy free" and he asks us to make correction, adding "as I am not married and think I am about as far from it as Skip Stammer."

Raymond M. Renaker, bookkeeper at the Sanders loose leaf warehouse, spent Sunday here with his family. He says that owing to the weather conditions and the state of the highways that the house will not have a sale until next Thursday, though there is a fair offering on the floor at this time.

Roy E. McCubbin who is a member of Co. H, 34th Infantry, stationed at Fort Bliss, Texas, was remembered by the Walton Red Cross with a nice box of candy, as they remembered all the soldier boys from this quarter, and he writes expressing his great appreciation of the kindness, and reached him while he was on duty and greatly lightened his duties. He says the Red Cross and its ally the Y. M. C. A. are doing fine work among the soldiers.

In the suit of the Walton Bank and Trust Co. against C. Mosley alias as trustee of the estate of Glenn, the Court of Appeals affirmed the decision of the Boone

Coal in the Country.

Everyone is talking these days about the shortage of coal. Every one is wondering what has caused this shortage and practically everyone has some pet idea as to what is the cause of it.

At least one of the many causes of this shortage is the fact that the coal is being used in the wrong way. It is being used in the kitchen, and a great many of them used several of the rooms in the house, while some few even burned wood in big, old fashioned fire places.

The burning of wood for heating purposes has its decided advantages while also it is very decided disadvantages. One very great disadvantage is the time it takes to feed the fires either in stoves or open fire places, and the second great disadvantage is that it must be cut by the farmer or his hired hand.

In the past, when the farmer was selling wheat at a very low price, when his hogs brought him a very low price, when his tobacco was so low in price that he frequently came out in debt to the merchant in his neighboring place, he, of course, burned wood.

At first glance it appears rather queer to the city man that the farmers would rather use coal than wood. The city man wonders why the farmer would not be glad of the opportunity to sell an ax or pull a crooked saw and see his blood to tingling these cold days. The city man, however, forgets that the farmer usually has more exercises than he wishes. The farmer has always hated the wood pile and so has his man of work. They have both thought of it as the added work, which, if possible, should be eliminated.

Public Sale.

I will sell at the Dickerson farm on the Rice pike between Union and Richmond, on

Friday, December 21st, 1917

A Week's News

Porkers Brought 17 1/2 cts. a Pound
Bert Sullivan, Kirt Tanner and J. E. Smith sent hogs to market last Thursday and received 17 1/2 cents per pound for them.

The Worst Ever
Farmers never experienced a worse time in which to care for their livestock. It has required extra attention which was hard to give.

Installed a Heating Plant
Conrad has installed a heating plant in his passenger coach, a small coal oil heater, which adds very materially to the comfort of his patrons.

He Knows a Good Place
Richard Stephens landed in Burlington last Wednesday to remain over the bad weather. He knows a good place to be when old Boone is on a rampage.

Too Much Snow for the Attorney
Atty. Tomlin, of Walton, started to Burlington to attend court last Tuesday, but he did not go far until he realized it would be a hazardous trip and went back home.

Cleaned up on the Blockade
In many localities in this county the snow drifts had to be removed by the citizens of the neighborhood before the roads could be used even for neighborhood traffic.

County Inventory About Completed
Assessor W. P. Beemon is probably through assessing the county by this time, as he was making his final drive in Burlington precinct last week. He says there will be over 500 lists in Burlington precinct.

The Snow Wouldn't Burn
Suppose those who made a practice of emptying ashes and cinders in the snow had set the snow on fire the past week. The town would have been at the mercy of the flames as nearly all the cisterns were in a manner dry. People should be careful how they handle fire, especially at a time when the supply of water is so limited.

Will be Citizens of Burlington Again
B. B. Hume and wife, who have resided in Covington for some time have secured boarding at the Boone House and will be citizens of Burlington once more. The hope is Mr. Hume will be deputy under Sheriff L. A. Conner. If this is true Mr. Conner will know that he had a very efficient assistant in his official work.

Nearly Completed
Had the contractors had two days more for work the concrete abutments for the bridge at Linnburg would have been completed, and in a few days thereafter they would have been ready for the steel it may be some time now before the bridge will be completed, as all kinds of work has been delayed the country over by the bad weather.

Visiting their Old Home
Bluford Aylor and wife, of Grandin, North Dakota, arrived last week for a visit to their parents and many relations in this county. Mr. Aylor is a son of Mr. and Mrs. James H. Aylor, and went to Dakota many years ago and is now one of the largest farmers in his section. The usefulness done by farmers here at his old home appears to him to be on a very small scale. Twenty acres of wheat to several hundred acres is a comparison.

It was a Double Header, Sure
The Boone County RECORDER reached the newsstand last week "bigger and better" than ever. The first section was dated "Thursday, Nov. 29, 1917," and the second section "Thursday, Oct. 11, 1917." It was without saying that Editor Riddell spent a most delightful Thanksgiving. It is possible that he is a charter member of the Club of Louisville. —Owenton News-Herald.

Owenton Bottled Up for Several Days
Owenton, Owen county, was hit hard by the blizzard. Unfortunately for Owenton, the town has but one connection with the outside world, the pike from Owenton to Sparta, and to this the storm paid particular attention, piling the snow many feet in depth the entire length of the highway. To prepare the road for travel took many days and a large force of men. For a time the people of Owenton thought they were face to face with a fuel and provision famine.

Life-Long Invalid Dead.
Marcia, the invalid daughter of Mrs. Rebecca Berkshire deceased, died at her home on Poplar street between Williams and Plum, Tuesday afternoon, the 11th, aged 38 years, 6 months, 19 days. Since her mother's death Oscar Jones had been her guardian and had the care of her. She had been a helpless invalid since birth. The funeral will be at the residence of Philip at 11 o'clock. Rev. J. E. Baker conducting the service. The remains will be placed in the vault until river conditions permit the removal to the family burying ground in Boone county. —Rising Sun Recorder.

OTHER FAMOUS SCRAPS

Recalled by the Recent Encounter Between Angry Law-makers.

The recent clash in the House between Heflin and Norton serves to remind us that the lives of great men are not always sublime, says the Washington Post. In the annals of Congress are recorded many instances of the people's representatives turning words into deeds and mixing it up a la barroom.

A summary of some of the most notable cases has been made.

In 1850 at the conclusion of a violent debate, Senator Benton, of Missouri, bared his breast to Senator Foot, of Mississippi, and had been attacking the motives of Northern Senators in their policy toward the South. Benton said that a newspaper editor had been supervising and approved by Foot attacking Northern Senators.

While Foot was talking Benton walked excitedly toward him. Benton was unarmed. Foot started to retreat rapidly and Benton followed him. Foot ran drawing a five chamber revolver from his pocket.

Benton was stopped by Senator Dodge, of Wisconsin, who begged him "for God's sake to do nothing that would compromise him with the Senate."

Benton started back to his desk, but looked over his shoulder and for the first time apparently caught sight of the revolver held by Foot. He broke away from Dodge and rushed back at Foot.

Stopping within a few feet of Foot Benton tore open his waist coat and shirt and stood before Foot with his bare breast.

Foot was against the wall and could retreat no farther. He cocked the revolver and brandished it. Benton cried: "I have no pistol. I disown the threat. Stand out of the way and let the assassin fire."

Foot covered at the foot of the President's desk, thoroughly frightened, with the giant Benton towering over him.

Slowly Foot sank into a chair. Finally Dickinson, New York, took the revolver away from him. The Senate passed a resolution recommending that the carrying of concealed weapons be stopped.

In 1860 a threatened duel between Roger A. Pryor, of Va., and John F. Potter, of Wisconsin, arose in the House. The altercation followed a speech of Owen Lovejoy, denouncing slavery. Potter struck Barksdale, of Mississippi, knocking him down. Potter challenged Pryor to a duel. Potter chose Bowie knives as weapons, and just before the duel was to be held Pryor called out Spooner.

They would not have him fight with such weapons.

Preston S. Brooks, a Representative ass Senator Chas. Sumner, of Massachusetts, with a cane after the Senate had adjourned in 1856.

This followed Sumner's speech, entitled "The Crime Against Kansas." Brooks came up behind Sumner while seated and struck him repeatedly on the head with a cane. Several Southerners, including Barksdale, of Mississippi, stood near by, and with drawn revolvers prevented interference.

A resolution to expel Brooks from the House was defeated, 121 yeas to 93 nays, a two-thirds vote being required. Later Representative Bulwacker, of Massachusetts, challenged Brooks to a duel. Brooks chose rifles as weapons, and the duel was to be fought in Canada, but Brooks failed to appear.

On February 22, 1902, Senator Ben Tillman, of South Carolina, and John L. McLaurin, his colleague, came to blows in the Senate, and were held to be in contempt of the body.

Tillman said that the votes for the ratification of the treaty of peace with Spain had been obtained by improper influence. He was speaking on the Philippine tariff bill. Senator Spooner declared that Tillman gave names, and when pressed Tillman said he could not prove it, but that he could prove "that the patron of the bill had been given to a Democrat who voted for the treaty." Asked by Senator Spooner, "What States?" Senator Tillman replied, "South Carolina. Spooner suggested that Tillman fight it out with his colleague, and Tillman said: "I am ready." McLaurin was attending a committee meeting and friends sent for him. He returned some twenty minutes before Tillman concluded, listening quietly.

That he was to a question of personal privilege, he reviewed the statements of Tillman. "I now say," said McLaurin, "that your statement is a deliberate, willful, and malicious lie."

Tillman, with the agility of a cat, leaped almost over Mr. Teller and rushed at McLaurin. He aimed a wild blow with his left fist, which landed on McLaurin's forehead, just over the right eye. McLaurin reeled under the blow. The Senators clinched and attempted to hit each other.

Senator Warren, of Wyoming, intervened, and with Sergeant-at-Arms Layton, forced Tillman to his seat, while Senator Patterson seated McLaurin.

In a secret session of the Senate, by a vote of 41 yeas to no nays, both Senators were judged in contempt. As a result of the encounter, President Roosevelt withdrew invitations to Senator Tillman as ranking Democrat on the Naval Affairs Committee, to dinner at the White House and to the office of Prince Henry of the German navy.

On June 30, 1892, Bailey of Texas, and Beveridge of Indiana, engaged in a hot debate. The Senate was in executive session, and the controversy continued in an open session in the course of which Bailey walked to Beveridge, took him by the collar and shook him vigorously.

Senator Lamar, of Mississippi, once told Roscoe Conkling that he had uttered an unmitigated falsehood. On April 15, 1888, Senator Mooney, of Mississippi, shouted at Senator Wellington, of Maryland, "Then you lie!" There was no fight. Wellington insisted that Mooney be caled to order.

In 1906 Bartlett and Southwick had an altercation which led to reports that Bartlett had drawn a knife.

It was across over Southwick's resolution to increase the pay of three tally clerks, Southwick said to Bartlett that there had been too much lying on the resolution. Bartlett, who had been trimming his finger nails with a small pocket knife, jumped toward Southwick with his hand drawn back. Later he denied the knife was open. No blows were struck.

A short time before Bartlett, in a controversy with Brumm, of Pennsylvania, threw a copy of the constitution and rules at Brumm's head.

SHELL SEED CORN BY HAND.

Examine Kernels from Each Ear and Reject Defective Grains.

Seed corn should always be shelled by hand, says the U. S. Department of Agriculture, which advises care in every step connected with seed selection.

Seed corn has been selected from the most productive stalks as they stand in the field in competition with other surrounding stalks, and stored in a dry place free from insects and rodents, the job is only half done. Shelling is one of the most important of the tasks.

Seed ears should first be nubbed and the kernels from tip and butt should be discarded from the seed supply. The small ears from the tips are less productive than the other kernels on the ear; the blunt, thick, rounded kernels from the butts are just too much like any of the rest, but because of their shape and size they do not plant uniformly when used in a corn planter with other kernels.

Shelling by hand takes more time and labor but is profitable. The mechanical corn sheller is likely to injure the germ tips of the individual grains, and to thus destroy or impair their power to germinate. No matter how large the required supply, says the department, it is better to shell it painstakingly by manual labor, because the greater the acreage to be planted, the greater the ultimate profit.

Each ear should be shelled separately into a shallow pan or box, and every blemished, mishapen or worm-eaten kernel should be rejected. As the seed from each ear is found satisfactory and sound and free from poor kernels, it is poured into the general supply, and another ear is shelled in the same way. It is much easier to pick out defective grains from a single layer in a small receptacle than from a large mingled quantity in a bushel measure or a bag.

Questionnaires from 1 to 211 inclusive, Mailed by Local Draft Board. Questionnaires from 1 to 211 have been sent out by the local draft board except to those who are in the service or have been accepted. The remainder will be sent out in a few days.

Notice—All persons owing Waterloo, Middle Creek and Burlington Telephone Co., for switch dues, repairs, rent, etc., will please pay Leslie Sullivan, Secretary, or B. T. Kelly, President.

Miss Isabelle Duncan, daughter of Dr. E. W. Duncan, was taken to a Cincinnati specialist, Tuesday, to have her ears treated, they having been giving her considerable trouble of late.

Ripley county Indiana, commissioners refused to authorize the issuance of \$4,000 worth of bonds for the construction of the proposed market highway thru that county.

Atty. J. C. Tomlin, of Walton, came over Wednesday to look after some business in the circuit court.

W. L. Rouse, a native of this county and a citizen of Covington, was apoplectic at his home in that city one night last week.

Two merchants from Bellevue and one from Rabbit Hash, met trucks in Burlington, Tuesday, to receive goods.

The judgment of the Boone circuit court in the case of J. H. Huey will be affirmed Tuesday by the Court of Appeals.

Mrs. Newton Sullivan, Jr., and Miss Sara Ryle, spent Tuesday in the city, shopping.

WANTED—Man to tend tobacco in River bottom land. Some room and furnished house and garden free and cow pasture. Address M. B. Rice, Lansing, Ky.

The Store of Beautiful Gifts

Never before have we had as large, as well assorted assortment of Gifts as this season, and well that we have prepared in this manner, for the people of the county realize that this should be a big, unselfish Xmas and spend the money which is so plentiful in this year; but spend it for practical gifts.

FURS The Gift Supreme.....

A Most Wonderful Collection At Most Moderate Prices

Muffs- -Scarfs

\$32.50--MOLE--\$52.50

\$18.75--TAUPE FOX--\$29.75

The editor of this paper thinks he is as patriotic as anyone, and as willing to serve his country in this time of need as anyone, but he feels that there are limitations to the ability of a country newspaper man in the way of giving his space free to the Government in aid of all the business enterprises incident to financing the war in which we are now engaged. The men who are directing those enterprises are being paid good salaries for their services, and we notice that a man has been called to Washington to take charge of a campaign to enlist the country press in the promotion of a national campaign for Thrift. No doubt this man will get a good round salary, which is all right. But should the country newspapers bear this burden alone? If others are to be paid for their services to the country, why not the newspaper? If everybody was serving the country on a basis of pure patriotism, then we would go as far and as freely as anyone. But we don't feel that the burdens and benefits should be distributed so unequally.—Flemingsburg Times-Democrat.

Frankfort—Adj. Gen. J. Tandy Ellis has ordered 400 drafted men to be taken from Local Board Districts 1 and 2, in Covington and from the city of Newport, and from Campbell, Fleming, Lewis and Johnson counties to entrain during the week of December 19 for Fort Monmouth, N. J. He is assigned to the artillery arm of the service. The men to be drawn will, upon completion of a training course, be sent overseas.

Men Wanted FOR Motormen—Conductors

WIDENING WOMEN'S SPHERE.

Those women who have demanded an enlargement of their sphere in order that they might be placed upon an equality with men may realize their ambition. Reports continue to come in telling of the employment of women to take the place of men who have answered the call to the colors. The latest to do this is a big express company, which until recently never had a woman in its employ, says Washington Post. Three years ago, owing to the demand for men, this company began employing women stenographers, and but a few days since the bars were further let down and women bill clerks were given employment. In the munitions works thousands of women are doing men's work at men's wages. In some of the large buildings girls are operating elevators in place of boys. One of the large railroad systems is considering the possibility of employing women as conductors on passenger trains and as ticket and baggage agents in the event that the shortage of labor reaches an acute stage. The war has resulted in very materially widening women's sphere and in opening up new lines of employment to them, and after they have demonstrated their ability to do the work men will have to make up their minds to compete with them when times are again normal.

There is fine flavor of the past about the story of the young British aviator who, when his German opponent's machine gun jammed, abandoned his own and drew his pistol to finish the duel in the air. The German flyer had no other weapon than his automatic, and thereby forbade the Britisher to take unfair advantage. So Chandois might have done, or Bayard, or Maximilian in the days before the burdens of empire blighted his proud spirit. There is true sportsmanship, for sportsmanship is only a latter day word for chivalry, says Cleveland Plain Dealer. It is deeds like this which mitigate the curse of war, and which, indeed, still lend to war that glamour which has always stirred the hearts of men. Feudalism was sordid enough in principle and practice, and the ages in which it thrived were dark.

The air-riding activity continues; the spirals venetian activity continues. If horribleness could win a world war the Germans by this time would have secured the award of victory. But while the Germans are throwing bombs on civilians and dealing destruction to merchant vessels in defiance of the laws of war General Haig is forcing back their line in the protracted battle of Flanders. The conquest of fighting forces by fighting forces is one of the things that count in war.

One prolific cause of accidents in the streets and highways is that care is not exercised to preserve a margin for such accidents. Automobiles and other vehicles maintain speed under the assumption that pedestrians are going to get out of the way, and pedestrians keep on under the assumption that the vehicles will not run them down. With this margin observed on either side accidents would decrease to a notable minimum.

Germany is now reported to be getting uneasy over the entrance of America into the war. But it is Germany's own work. She decided America's attitude a bluff, called it, and now finds that the United States held the cards. She should play her own better if she wants to win.

As far as gardens are concerned, preparation made in war for times of peace will show effects when the peace is over, for by that time everything will know how to plant and care for a garden and by that much the agricultural knowledge of the nation will be increased.

One of the German generals says that a peace cannot be signed until they have the Flanders coast, a colonial empire and a maritime basis. But the way things are going now it looks as if the central powers, instead of getting what they want, will have to take what they can get.

China's earnest appreciation of the value of American learning and methods is illustrated by the fact that seventy-five Chinese students, sent over by their government to acquire education and culture in American colleges and universities, arrived in this country lately.

The society girl is having a hard time. Accused at one time of being an unproductive idler, she is now berated for knitting comforts for the soldiers in and out of season—of being too industrious to suit the public taste. What is the poor thing to do?

The allies along the west front do not go far at a time, but they go, which the main thing.

The Great cigar at 6 cents, however, is probably much sweeter.

Now is the time for the Daughters to come to the aid of the family hearth.

Horticultural Advice

APPLE POMACE FOR FEEDING

Has Value Almost Equal to Corn Silage—Dairy Farmers Will Do Well to Get Supply.

Apple pomace has a feeding value about equal to good corn silage. It contains a little less fiber, but a larger amount of extract matter and fat. It also has about the same digestibility. Dairy farmers who live near cider mills would do well to secure and save all the apple pomace possible. The best way to keep it is to put it in a silo, but it will keep for one or two months in a pile out of doors. After the silo has been filled with corn and has settled, there is generally room to put in several tons of apple pomace.

Feeding tests in Massachusetts and Vermont have given quite satisfactory results. In the latter state the pomace was shoveled into the silo, leveled off and kept in good condition without further care. The quantity fed varied from 10 pounds per day at the start to 35 pounds daily after the cows became accustomed to it.

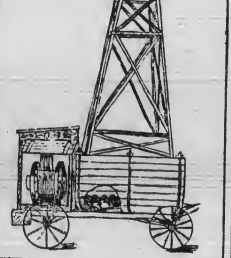

Possibly the best way to feed it is to give about 15 pounds daily with as much corn silage and what hay the cows will eat, which will usually be from 10 to 16 pounds. In addition, dairy cows in milk should have five to ten pounds of a suitable grain mixture.

POWER SPRAYERS ARE HANDY

Outfit Needed for Each Thirty Acres—Lightness is Important on Rough Ground.

A large orchard should be provided with a power sprayer. If the orchard is considered worth giving good care. In a large orchard, generally speaking, it would be best if there were a power sprayer for each 30 acres at most, and many of the best orchardists who are spraying carefully, maintain that 20 or 25 acres is enough for one power sprayer.

In buying a power sprayer, several features should be considered. In rough land one of the most important would be lightness. The sprayer should be short and light so that it would be convenient in turning and running over the rough land.

Gasoline Power Outfit With Tower for Spraying Tops of Trees

over the rough land. The same would be just as true of muddy land. Generally speaking, it is very important that a sprayer be light.

Then the engine should be one that will run all day at a pressure as high as 200 pounds. Of course, a pressure lower than this will do the work, but if an engine will get hot and stop at a pressure of 200 pounds when it is new, when it gets old it may get hot and stop at a much lower pressure. In fact, 200 pounds is a good pressure to run at.

PROBLEM OF FRUIT GROWING

Possibilities of Country Are Great and Yet Slightly Tested—Plant Some Trees.

The fruit-growing possibilities of this country are so great and as yet so slightly tested that it is a big question that should be taken up as seriously as the country from the Pacific to the Atlantic showed, when the call from the government came, what it could do in the line of vegetables and wheat. Do not neglect to plant fruit, make as serious a study of it as you have of this year's planting and the results will be a delightful surprise.

FIX MULCH FOR STRAWBERRY

Covering of Straw Stable Manure Enriches Soil and Protects Plants During Winter.

It is the habit of many strawberry growers to cover the plants in winter with straw stable manure, which answers the double purpose of enriching the soil and protecting the plants from heaving, which danger of heaving occurs most seriously in the spring months. For home supply plenty of strawberries can be grown on ordinary soil without the application of any fertilizers.

DAIRY FACTS

FEED COWS WHILE MILKING?

Much Depends on Temperament of Animal and Person Who Milks and Attends to Her.

There has been some little discussion recently in the various farm papers on the matter of whether it is advisable to feed cows while milking. It would seem to me that little advantage can be gained from such a practice and there are several noteworthy objections to it, says a writer in an exchange. Of course, much depends on the temperament of the cow, and the person who milks and cares for her. There are cows with a quiet disposition and not of a hoggish nature that will stand quietly while being milked. In fact few cows will not stand more quietly during the milking process if they have nothing else to attract their attention. If the cow is standing quietly she sees the milker when he approaches and steps in beside her. She also gives down her milk more freely than when she is attempting to eat at the same time.

On the other hand, if a cow has her head down in the manger she will probably not see the milker when he approaches, and the first intimation she has of his presence is when he speaks to, or touches her, and if she is of a nervous disposition she will probably jump back and then continue to annoy him during the entire process of milking.

PROPER QUARTERS FOR COWS

Suitable Place Must Be Furnished in Order to Get Best Results—Provide Ventilation.

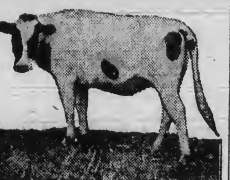

To give best results milk cows should be provided with suitable quarters for feeding and milking. Stalls should be provided for each cow and feed boxes and manger racks should be so arranged that they will be of easy access for cleaning at least once every day. Twenty-five dollars, plus the labor, should fit any ordinary barn with stalls for five cows and the necessary feed boxes, mangers and gutters.

Plenty of ventilation is necessary, because the cow is somewhat like the human being, she thrives best where there is plenty of fresh air available. Provision should be made to take care of the manure. This can be done by providing plenty of bedding in box stalls, or, if stanchions are used, by having water-tight gutters about 14 inches wide and 10 inches deep running full length of the stable.

RATION FOR HOLSTEIN COWS

In Addition to Hay and Silage Each Animal Should Have Certain Amount of Grain.

Feed the cows all the clover hay and silage they will clean up well without waste. Holstein cows will, on the average, eat daily from 10 to 12 pounds of clover hay and 30 to 40 pounds of corn silage. In addition feed each cow one pound daily of the

Fine Young Holstein.

following grain mixture for each 4 to 4½ pounds of milk she yields: Oats, 50 pounds; barley, 15 pounds; corn, 15 pounds; and oil meal, 20 pounds. If the barley and corn cannot be obtained conveniently a grain mixture consisting of 70 pounds oats and 30 pounds oil meal may be used and fed at the rate of one pound daily for each 4 to 4½ pounds of milk each cow produces.

CREAM OF HIGH PERCENTAGE

Keeps in Good Condition Longer Than Thinner Article—Easier Cooled and Handled.

Cream that tests from 35 to 40 per cent will keep in good condition longer, is more easily cooled, handled, costs less to transport, leaves more skim-milk on the farm than a thinner cream. On the other hand, with a heavier cream there is a mechanical loss by sticking to the sides of utensils when handling, and a quantity may get into the milk while separating.

COWS FRESHENED IN WINTER

Nothing Better Than Legume Hay and Silage Mixed With Few Pounds of Concentrate.

For cows that freshen during the winter months nothing is better than legume hay and silage mixed with three or four pounds of concentrate. The successful dairymen feed their cows when dry, with as great or greater care than when fresh, and this prepares them for safe calving, and a maximum milking period.

"One of the Famous Five"

Dependable, Fast, Sure Transportation—Today's Need

Just as there exists today the absolute need for more—more—more train service for the transportation of man and merchandise,

—so also there exists, more than ever before, the need for supremely dependable tires to help the automobile relieve the terrific pressure on the railroad country.

The tire that has stood, and is still standing, the test, —that, all over the country, is giving unheard-of mileage and low mileage cost,

—that is giving service—fast, sure, dependable, —is the United States 'Usco' Tread Tire.

Put United States 'Usco' Tread Tires on your car. Measure the economy, the dependability—make comparisons.

United States Tires Are Good Tires

Nobby 'Chain' 'Usco' 'Royal Cord' 'Plain'

This Place Is The Winner For You

Especially these last few days of the prospering year 1917. Come in and see me this week, and I'll prove to you that I have got just what you want to enjoy the good old year to the end. I have added a great many things to my stock of goods trying to accommodate every customer in my trade. Give me your orders at an early date so I can fill it out for you, for there are some things that I do not carry in stock that I can get for you. I expect to make one or two trips daily to the city until Xmas eve. To accommodate my customers I will open my place of business at 6 a. m. and close at 8 p. m. until Christmas Eve.

Fresh Oysters—I will have for you those big fat Baltimore Oysters, straight from the coast at a less price than you ever bought these good at before—quality considered.

Candy—All kinds of Candy, the freshest of stock, at a very reasonable price.

NUTS—Cocoanuts, Peanuts, English Walnuts, Pecans, also Mixed Nuts. Selected Jumbo Celery, Cranberries, Brick and Cream Cheese, California Figs, Camel Dates Oranges, and Mince Meat in bulk and package.

You can't enjoy a dinner made up of these goods without a pound of **Nobetter Coffee**.

Rubber Goods—A full line of winter goods, such as Felt Boots, Over Shoes, Rubbers, and Men's and Children's Leggings.

Hardware—Nice line of Hardware, such as Butcher Knives, Pocket Knives, Razors, Razor Straps, Search Lights, Scissors, Search Lanterns, Oil Lanterns, etc. A full stock of Flour and Salt, and all kinds of Feed.

Be sure and don't forget what I told you last week about Wire Fencing, it is advancing every day.

If you want to give yourself an Christmas Present buy a Maxwell Touring Car—its the winner.

Have a Good Time—Get your jug filled and enjoy a gallon of good molasses at Christmas.

I have everything in stock for your home-made mince meat such as fresh Beef, Suet, Raisins, Currants, Citron, and all kinds of spices.

All kinds of fancy Cakes, right from the oven to you.

Canned Goods—Corn, Tomatoes, Peaches, Soups, Kraut, Salmon, Raisins, Sandines, Cocoanut.

Delicious—Dried Peaches, Prunels and Apricots.

Meats, Etc.—All kinds of Fresh Meats, home-made Lard and Country Sausage on hand. Prices right.

I have one more Maxwell Truck, 1917 model to sell to some good wide-awake man. Take hold of this bargain. I can sell you this one at a less price than I can sell my next delivery. This truck is equipped and ready for work. Boys here is a bargain.

FINAL BUGLE CALL

Answered By One of Boone County's Drafted Men.

A. Stanley Cason Dies of Pneumonia at Camp Taylor—One of the First Increment.

Alfred Stanley Cason, son of Mrs. Belle Cason, of Bellevue, died at Camp Taylor, Louisville, last Thursday of bronchial pneumonia following measles. He was 27 years old and was one of Boone county's three selectees who answered the first call to the service at Camp Taylor early last September. Luther Green Surface, of Petersburg, and Daniel Slayback, of Beaver, being the other two. The remains were brought home last Sunday, and Tuesday his funeral was preached at Bellevue Baptist church by the pastor, Rev. C. E. Baker, after which the remains, in charge of undertaker, C. Scott Chambers, of Walton, were brought to Burlington and interred in the family lot in the Odd-Fellows cemetery, the national colors about the grave testifying that the one being consigned to the eternal camping ground had passed away in the service of his country.

On the Job Again

T. H. Baker, of Louisville, writes: I just want to advise you that Boone county has an unencumbered mortgage on the Health Department of this city. I took the first mortgage in 1908, then released it temporarily to Ed. Grant, and now am back again, as I think it is safe to say that, as long as this department exists, Boone county will be at the head of it.

With cordial good wishes to you personally, I remain.

Dr. T. H. Baker has been appointed City Health Officer. Dr. Baker has not only had the experience of an active practitioner for many years, but also brings an experience of health office work, as he was Health Officer during the Grin administration. He resigned when Mr. Head became Mayor in 1915, and Dr. Grant was appointed. Dr. Head and reappointed by Dr. Burckmyer in 1911. Dr. Grant is now resigned and Dr. Baker is reappointed. Health and City.

Dr. Baker is short on Coal. He is in need of coal for his home.

TELLS OF HUNS ATROCITIES.

Retreating Germans Attack Nuns and Despoil Graves for Jewelry.

(New York Times)

Members of the Eleventh United States Engineers Regiment, who enlisted in this city and who have taken a prominent part in the recent action at Cantigny, have found the atrocities perpetrated by the Germans in retreat to be far worse than reported in the newspaper dispatches. Letters received from them since they have been at the front were read yesterday at a meeting of their parents, relatives and friends at the Engineers' Society, 29 W. Thirty-ninth street. In almost every case the writer was a man who had not been inclined to place any faith in the reports of atrocities received in this country before he left France.

On arriving on the scene of action, however, they found a state of affairs which, according to their letters, inspired them with the deepest resentment against the Hun, and made them regret that their country had waited so long before taking a hand in the war against Germany. Whole villages laid waste; thousands of women and children subjected to outrageous violence, graves pillaged, homes dynamited and which had been touched by shell fire, were some of the acts disclosed to their eyes. With out reason or sense, for no military purpose whatever, the Germans according to the letters of the American engineers, make a systematic practice of devastating every bit of French soil that they leave in the course of a retreat. One of the officers of the regiment, in a letter to Robt. Ridge way, of the Public Service Commission, under:

"The devastated country and villages destroyed by shell fire, I suppose, must be expected. But the thing that makes one boil is the absolutely unnecessary and wanton destruction wrought by the retreating Hun. His usual wonderful and systematic methods have been applied to this destruction. Whole towns that have hardly been touched by shell fire have been completely destroyed by dynamite. We find niches cut in the few standing walls and marked with the size of the charges used. Evidently every building has been systematically prepared in that way, long in advance, for blowing up upon retreat."

"So homes, beautiful chateaus, garden walls, little summer houses are all blown up. Shade trees, flowering shrubs are cut down to the roots. Cemeteries have been ransacked; graves and vaults opened; bones thrown about or in heaps on the ground. I have seen one body dragged half way out of the casket, coffin broken open and the bones from several dumped into one. Evidently the boche was looking for jewelry—was simply malicious or both."

Those things could not be done without knowledge and permission of the officers, and the thing is so complete that it looks as though it was all a part of an official program. I never did believe the stories we got in America of the outrages I have to believe them now, and they are many times worse than the stories that I heard at home. Canadian and Scottish battalions take no prisoners. They and ask no quarter. The reason is that the Boche has several times crucified the Canadian and Scotch prisoners and held them above the trenches in view of their battalions. In one such case a Canadian battalion went right over the top after the trenches without orders. Very few of them have come back. A British Chaplain told me that he knows personally of a Belgian convent where they found that 57 out of 82 nuns had been violated when the Boche fell back.

The Tri-State is right in line with the Food Administration desire to give the producer the greatest possible returns for his product.

55 Cents

per pound for Butter Fat week beginning Dec. 17, 1917

We deal direct with our 25,000 patrons, no station man or buyer takes a profit off the cream, when he should be doing something useful for his country.

The station buyer don't do anything for the producer that the producer can't do himself only the station buyer exacts a toll around 2c per pound for his commission.

STATE NEWS.

Harrodsburg.—Many farmers here report the freezing to death of pigs and chickens during the blizzard.

Frankfort, December 13.—The State Tax Commission today assessed whisky in bonded warehouses at \$21 a barrel. The assessment last year was \$12 the barrel.

Whitesburg.—Garfield Wright, a peace officer of Beaver creek, is reported to be sinking rapidly. Wright was shot by Dick Salmons ten days ago while trying to make an arrest. As Wright fell, mortally wounded, he shot Salmons, who has died of his wounds.

Mayfield.—Jeff Riley, who lived near Salem, in Hickman county, died from injuries sustained when he severed his tongue with his teeth. The accident happened when Bailey, who was riding, received a jolt when his horse tripped and fell. Bailey never regained consciousness.

Bowling Green, Dec. 12.—The State Game and Fish Commission has taken decisive action to protect the birds of this section against starvation during the time the present snow lies on the ground, and has sent here seed and feed to be fed. The supply has been received by County Representative of the Commission Claude J. Meredith. This feed is being given to anyone who will obligate him to scatter it about his farm so that quail and other native birds can obtain proper nourishment during the present spell of weather.

Washington, D. C.—Large increases in the wholesale prices of many important commodities in the United States during the year have been reflected in the cost of living to the consumer. Figures issued by the department of labor show The rise was most pronounced from March to May. Farm products increased 25.3 per cent in price during the last nine months of the year, food advanced 18.5 per cent, clothing 17.3 per cent, fuel and lighting 1.1 per cent, metals and metal products 24.3 per cent, lumber and building materials 8.7, drugs and chemicals 11.6, and house furnishings 19.1.

demand youth and the impetuosity of energy, enterprise and sagacity. The young man, however, is not to go only with youth. In the war these qualities, indispensible in the moral makeup of any citizen, have been found to be equally essential in the business year line. And yet there are employers who think that at a certain age a man begins to lose his "punch," and they are not aware of his capacity for aggressive action. The young man is not a part of human machinery of a business enterprise. Never was a more unbusinesslike economic mistake made, than to suppose that the man of 50 who has been a member of the firm for 20 years is out of the sprit of the time is able to do less than the young man. To bodily vigor he joins experience and experience means judgment. To judgment responds responsibility. The young man has the habit of estimating the value of inestimable value in business.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your new items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

W. O. Rouse is taking the assessment of the taxable value of Walton for the ensuing year.

Verne James has been on the sick list the past week, confined to his home, but is better.

FOR SALE—O. I. C. box hog, weight 300 pounds, year old; price \$50. Larry Darrell, Verona, Ky.

Miss Martha Rouse left Friday for St. Petersburg, Fla., where she has a position in a millinery store for the winter season.

Mrs. Earl Robinson has been quite ill this week, suffering from blood poisoning caused by an injury to one of her hands.

A. W. Smith, of the Jones drug store, after enjoying a two weeks vacation with friends in Cincinnati, returned home Wednesday.

Mrs. Parthenia Menefee left last Wednesday for Covington, to spend a couple of weeks with her son J. Sherman Menefee and wife.

The Walton Social Club will entertain with a musical performance at the opera house Wednesday evening, Dec. 28th, and a large attendance is expected.

Mr. and Mrs. Theo. F. Chambers are spending the holidays in Covington the guests of their son Prof. C. Spencer Chambers and wife.

Thos. F. Curvey has qualified as police judge of Walton, being recently re-elected to that office. He is an efficient officer and gives good public service.

Dr. J. F. Dugherly has arranged to move his office to the residence in South Walton after Jan. 10th, and will give up his office in the Brittenheim building.

Mr. and Mrs. Logan Campbell and daughter Pauline, of Hazard, Perry county, arrived here the first of the week on a visit to her mother Mrs. Edward Taylor.

Prof. J. C. Gordon, of Burlington, spent Thursday here with friends, coming to meet his daughter Miss Mary who attends Hamilton College at Lexington, and came home to spend the holidays.

Mr. and Mrs. Geo. L. Miller of Landis, who have been visiting relatives at Ludlow, the guests of Dr. J. G. Slater and wife, arrived here Thursday on their way to their son Jno. C. Miller and family.

Walton is having the finest train service of any town in the State. Through trains are not delayed by weather conditions the general service is excellent and we receive more mails than the average city.

The Walton Loose Leaf Tobacco Warehouse market - had about 125,000 pounds of tobacco on sale last Wednesday, and from now on there will be a large market every sale until the full capacity is reached, and the sales will be held on Wednesday and Saturday.

Wilford Rice has been appointed deputy postmaster of Walton, assisting Postmaster W. T. Patton in the work of the office which has increased to such an extent as to require an additional clerk hire. Mr. Dugherly's daughter Miss Grace, is also assisting in the work of the office.

Thos. C. Fornash who was born and reared here and now resides in Covington, will give a minstrel entertainment here Thursday night, Dec. 27th, with his band known as "The Alabama Minstrels" and is said to give a good show.

Dr. W. W. Evans writes from Oakland, California, that he had long and tiresome trip to the slopes, but is now enjoying the beautiful flowers and the pleasant climate of the Golden State. He says the thermometer ranged about sixty-five degrees daily. He is enjoying excellent health and wishes to be remembered to his many friends in this quarter.

The Walton Loose Leaf Tobacco Warehouse had a good sale Wednesday of last week when about 107,000 pounds of tobacco was sold at prices ranging from 23 to 33 cents, the entire sale averaging \$2,416. The condition of most of the tobacco was very bad, it being in a wet condition, and the buyers are complaining of the offerings, and say they will be obliged to not buy any more tobacco in that condition and if they have no means of caring for it and if put up in the hoghead spoil. The buyers request that this tobacco be hung up so as to get it in proper condition and then they will pay liberal prices. One crop that was brought at 23 cents by a speculator averaged 25 cents on the floor because of the wet condition. Most of the speculators are going to refuse tobacco delivered in this condition as it means a loss to them. They say they have paid high prices for tobacco and are entitled to its delivery in a proper condition.

Holman Hayes, son of Dr. H. H. Hayes, of Bullittsville, and Miss Mary Newby, daughter of Leesburg, Fayette county, were married at Georgetown, last Saturday. They will make their home with the groom's father near Bullittsville. The Recorder extends best wishes.

There was unusual activity about Burlington last Monday, being in the morning, everybody seemed to be going to the city to get money to spend for the holidays.

Many from the country passed through town enroute to the city to invest in Christmas goods of all kind.

HUMAN NEED OF RECREATION.

There are many good souls, who in this hour of the nation's trial, would have the people eschew lighter things of life and give undivided attention to the serious business of hand. This is all very well in the main, and we would for the world attempt to discourage any in such a course. Still there are limits within which the human mind as well as the human body must work. There is a healthy old saying that "all work and no play makes Jack a dull boy." This is true from the cradle to the grave.

The human mind is closely akin to the human stomach. Each, to do its best work must have a groundwork of solid diet. The strength and vitality of each would not come from the heavier foods, and frothy viands. Yet there is a need of the latter, and they are as necessary in their place as the heavier.

It is a physiological and philosophical fact that there is no rest to compare with the rest of the body tissue exhausted by labor, with fatigue, requires absolute inaction to recuperate his force.

Confinement within the chair or bench, finds greatest rest in the physical exertion, ranging from the way from mild to strenuous. The mind, however, requires philosophy will not give a steady diet of these things, and is only relieved by a liberal dose of the opposite.

Close observers of men and events have noted that during the first few months of the war the people of France were absorbed by the more active business of repulsing the invaders and amusements were given but little attention. Later on, however, when the tension began to tell on the nerves of the people, there was a gradual revival of the lighter phase, until now all over the country the comedy of life is as much in evidence as the tragedy.

The joke and the quip, the song and the cabaret and the jazz tunes are popular in the trenches as in the amusement centers of Paris.

That this demand for change is universal in humanity, is evidenced by the famous humorist in the life of his own wit, always found relaxation in a study of the heavy philosophies, while another was an accomplished student of Eastern mythology.

We are told that the lower animals have no sense of humor, and yet from the greatest of these the desire for recreation and play is prominent. To even their limited intelligence it is accepted as one of the necessities of life.

There is no escaping the fact that the bore, the pedant, and the cynic are the same old "roundnoses" in the person who has gotten in a groove and has lost the ability or the inclination for change. Such a person must be a burden to himself.—BET NEWA

Does it not seem a little strange that before the advent of the automobile you could buy a good horse for \$75 or less while today, with good draft geldings weighing 1,500 pounds or over easily bring \$1,275 to \$300? Even with the usual number of mares bred each year for the next few years, the price of a horse is sure to bring at least \$400 within the next three years, and should the farmers of the for the next few years, the price will soar beyond the wildest expectations. Where will Europe get her horses after the war if not from the United States? Our South American neighbors will be sure to be a good customer for our horses. The Western range, where ranchers could at one time run thousands of horses of charge and sell them on credit, have now been reduced to small farms and ranches. There is going to be a shortage of horses before 1920 and the wise good team of mares and brood mares to the best stallion in the country has to go either for the mares or for the service fees.

Another year is drawing to a close. Another milestone of life is in view and we shall in all human probability, pass and struggle on to the next. We are after happiness, in one way or another, the recluse, even the martyr of old, would have the joy of heaven rather than upon the earth. The goal fixed upon in the year, the one who sacrificed the present for the future. Eternal happiness was their desire. Unselfish happiness is always waiting right around the corner if we will only change our eyes off the far distance and look nearer home. The happy year for the next year is a happy year for the next year as well, bringing a good deal of satisfaction to the maker and the resolution if he holds out well.

Franklin County Assessor Tom Gibson has practically completed the assessment of Simpson county. A partial report of the assessed valuation of the property in Simpson county, by omitting the L. & N. Railroad (which is to be added, shows a little short.) The assessed value before the valuation was exceeded \$5,000,000 with all franchises included.

NEW WHEAT CROP

SHORT OF MARK

Washington, Dec. 26.—Government plans for a billion-bushel wheat crop next year to help the United States feed its allies received a setback. It was disclosed today by the December wheat crop report of the Department of Agriculture that while winter wheat was planted on the largest acreage ever sown to that cereal its condition December 15 was the lowest on record for that date.

A winter crop of 540,000,000 bushels of wheat, the Bureau of Crop Estimates. The actual production will be greater or less than that quantity, according as conditions hereafter are better or worse than average. Through a good spring crop it still is hoped to bring the year's total to somewhere near the billion mark.

An area of more than 47,000,000 acres was the mark set by the government for the farmers to plant to winter wheat this fall, but the December survey shows that 47,070,000 acres were sown. The farmers did their best, Department of Agriculture officials say, but conditions were against them.

The very dry weather in most of the winter wheat belt was a setback, while late harvesting put some areas to work of farm help were contributing causes for the failure.

Should the winter wheat crop mature to 510,000,000 bushels as forecast today, it would be the third largest of record, being exceeded only by the crops of 1914 and 1915. Government officials have figured that the nation's wheat production reached 673,000,000 bushels, but today's forecast indicates that it will fall 137,000,000 bushels below that mark.

Close observers of men and events have noted that during the first few months of the war the people of France were absorbed by the more active business of repulsing the invaders and amusements were given but little attention. Later on, however, when the tension began to tell on the nerves of the people, there was a gradual revival of the lighter phase, until now all over the country the comedy of life is as much in evidence as the tragedy.

The joke and the quip, the song and the cabaret and the jazz tunes are popular in the trenches as in the amusement centers of Paris.

That this demand for change is universal in humanity, is evidenced by the famous humorist in the life of his own wit, always found relaxation in a study of the heavy philosophies, while another was an accomplished student of Eastern mythology.

There are times when purse strings are tightened when there is a proposed public measure calling for contributions. Men will talk of their past contributions, of the failure of this or that project, and will refuse to pay for the project or other plans which they say will not bring money to their pockets.

There are some of these men to be found in every assembly, just as there are small potatoes in every field. But when this condition becomes general, when men are called upon to contribute to the benefit and the prosperity of the community, they refuse to contribute, and they charge one of their plain duties and responsibilities as a citizen to the community.

There are some of these men to be found in every assembly, just as there are small potatoes in every field. But when this condition becomes general, when men are called upon to contribute to the benefit and the prosperity of the community, they refuse to contribute, and they charge one of their plain duties and responsibilities as a citizen to the community.

There are times when purse strings are tightened when there is a proposed public measure calling for contributions. Men will talk of their past contributions, of the failure of this or that project, and will refuse to pay for the project or other plans which they say will not bring money to their pockets.

Extracts From Letter

Written By Dan Bedinger

Somehow in France. Walton, Ky., Dec. 22, 1917. Boone County Recorder, Burlington, Ky.

I have gathered together some extracts from my dear Dan's letters, which I thought some of his friends might enjoy reading. If you will publish them in your weekly paper.

MRS. D. E. BEDINGER.

This country reminds me of "Old Kentucky," but I have heard of "Old France," but I seem to me it would be nearer the mark to call it "rainy France," for it rains most of the time.

The fog stays until about 9 a. m., each day, and the ground is a huge mud hole. We are housed in huts with straw and have to sleep on, there being dugouts to use if needed.

I am working and in normal flesh. I am working hard—so in every one else. I work mostly at night, from 12 to 24 hours at a time, sometimes, which means day and night, but I would rather work hard than not at all.

I am driver on a motor right up to the trenches, and altho I have not been hit, some of the times I have been shot by machine gun fire. When the machine gun bullets begin to thud against the ground and to snap the twigs, you hear the sound of the machine gun fire. When the machine gun bullets begin to thud against the ground and to snap the twigs, you hear the sound of the machine gun fire.

I saw them "go over the top" one night. It was a beautiful night (no moon), and we were lying on a slight eminence, when suddenly, it was as light as day for an instant, and a dozen crash as if the earth had split, followed by a sound like the ripping of heavy up shot in the sound of the gun that the sound of the shell passing over our heads.

This drive continued for possibly all night, then our trench mortars began to fire. This was a beautiful, reminding sky-rocket, which would burst and spread molten metal over Fritz, and he didn't like it, either.

After this had continued for a time, short, but sufficient to drive the enemy into their dugouts, the trench mortar over with bombs and blew them into their holes in the ground, and brought back some prisoners. Then all was quiet for awhile except for the rat, and machine gun fire on both sides.

I have not seen a civilian for over two months and the only "Scots" I have seen were on our side.

When you send anything address it on all sides and wrap it in a cloth sack, or a tin box, or a can. Some of the boys got packages of clothing in them, owing to the fact that the censor is out, or they are crushed open.

Sergeant D. W. Bedinger, Co. A, 12th U. S. Engineers, American Expeditionary Forces in France.

Atty. Benj. Riley spent Christmas with relatives in Covington.

Prof. Paris B. Akin is spending the holidays with his parents, Mr. and Mrs. F. Akin.

Jno. M. Bots, wife and son, Carl, spent Christmas with their daughter Mrs. Dudley Blyth.

Miss Isabelle Duncan is at home from the hospital, and her hearing is very much improved.

County Attorney N. E. Riddell has been appointed a member of the Judiciary Committee of the Kentucky State Bankers' Association.

Albert Stephens, who is attending the Agricultural College at Lexington, arrived home Monday evening to spend the holidays with his relatives.

At a late hour Monday night the country was to have a green Christmas, but some time in the night there was a shift of gear, and a four inch snow covered the ground Christmas morning.

OVER THE TOP AGAIN

Boone County's Christmas Red Cross Drive a Big Success.

About 1,500 New Members Secured.

County Membership Over 2,500

Report of Christmas Membership Drive in Boone County, by Auxiliaries:

Bullittsville 30; Hebron 103; Union 141; Bellview 103; Beaver 28; Walton 100; Verona 43; Florence 23; Pleasant 30; Conestoga 3; Richmond 3; Burlington 30; Petersburg 110; Big Bone, South Fork, Rabbit Hash not reported. Total, 1064.

Some of the auxiliaries that have not reported are working, but do not report in time for the paper.

All of the local secretaries are requested to send these reports to Mrs. Goodridge, County Secretary, not later than Saturday, as this report has to be sent to Washington Monday.

Most credit should be given the colored people of the Burlington precinct for the work they did in this campaign. Wm. Utz and Leslie Kennedy were appointed locally, and they worked hard, turning in \$1,000 for the membership fund. The colored troops received the same benefit from the Red Cross as the whites, but even they do not always say they respond as heartily as they have in this precinct.

The apportionment of this chapter of the membership drive was \$2,100 old and new, and at present we have reported 2,

A Week's News

The schools are all on a vacation drive this week.

Have you discovered that the days are getting longer?

A great deal of tobacco was prepared for market the past week.

Kentucky will have the legislature on its hands again in a few days.

Supt. J. C. Gordon is spending his holiday vacation with his sisters in Eminence.

George Barlow, of Union, was transacting business in Burlington, last Saturday.

Harold Gaines came home from Camp Taylor to spend a few days holiday furlough.

There was a general rush cityward last Saturday morning to spend Christmas money.

A green Christmas is what the recorder weather prognosticator has been predicting for sometime.

A great many of the ladies in the country lost their flowers because of their freezing during the recent very cold weather.

What has become of the old time man who always had a big bowl of eggnog made to assist him to celebrate Christmas day?

The holiday parcel post mail was voluminous at the Burlington postoffice this year. It began to move several days before Christmas.

Don't forget that there will not be another issue of the Recorder before the ninth of next month. Just take notice of how you will miss it next week.

The old time farm said that was so much in evidence the past week has ceased its very great activity, having been assigned to the back lot indefinitely.

From the way Charles Fowler has been working it looks very ed by the questionnaires say they office of labor is little less than a sentence to hard labor.

Someone has suggested that since the advance in the price of whisky abandoned empty flasks are not so numerous in Burlington, only occasionally one can be found.

Russell Smith captured a fine specimen of the Reynard tribe one day last week. He invaded Mr. Fox's dogout to make the capture, using a pick and shovel freely in the attack.

Last Saturday was the first day of winter, and it was a very satisfactory one from a weather standpoint. It is hoped that a great majority of the days during the winter will be like it.

Born on the 6th inst., to L. W. Adams and wife, San Antonio, Texas, a daughter, Charlotte Catherine. Mr. Adams is employed at the postoffice, Camp Travis, and likes the Alamo city very much.

The town of Burlington is just about unanimous in its Red Cross membership. The Red Cross is enlisted in a cause that no individual can afford to turn down for the paucity sum of one dollar.

J. H. Graves and wife, of Erlanger, have gone to Seftner, Fla., to spend the remainder of the winter, and Mr. Graves ordered his Recorder forwarded to that office until further notice, beginning with this issue.

Some of the boys who have answered the questions contained by the questionnaires say they do not see much chance to avoid military service, and that they might about as well arrange to go to the front.

The abutments for the new bridge at Limaburg are ready to receive the iron structure, but the party to whom that part of the contract was awarded is asking several months more time in which to comply.

It is about time for the Boone county colony to begin assembling at St. Petersburg, Florida. It seems, though, that some of those who have contracted the habit of going south every winter have not fully decided to make the trip this winter.

If you want one of the 64 jobs for which the army is advertising for men call at 18 Pike St., Covington, where you will be furnished a list and given all information in regard thereto. About anybody can secure one of the positions if he is physically qualified.

The ground beneath the snow was so dry that it absorbed the water as fast as the snow melted, consequently the water courses did not run out as rapidly as they otherwise would have done, and the disappearance of the deep snow was attended by no rush of waters.

Mrs. F. A. Hall received a letter from her niece, Mrs. Roy Clutterbuck, of Los Angeles, Cal., a few days since in which Mrs. Clutterbuck said her half brother, William Ryle, who is the son of the late O. J. Ryle, had joined the army, enlisting in the Signal Corps. It has been in the service about one month, but Mr. Ryle had not heard from him since he left home.

Prohibition takes a great deal of a certain kind of vim out of Christmas festivities.

Prof. and Mrs. Caywood are spending the holidays with her relatives in Mason county.

Mrs. F. A. Hall spent the Xmas holidays with her daughter, Mrs. H. W. Shearer and Miss Bess Hall, in Newport.

While playing at school one day the past week, Kathryn, little daughter of Mr. and Mrs. L. T. Clore fell and broke her collar bone.

Prof. Garrett Huey, of Middleburg, spent last Saturday night and Sunday with his parents, Mr. and Mrs. R. B. Huey, of Commissioners neighborhood.

The holiday atmosphere was noticeable at an early hour last Monday, not that anyone had been worshipping at the shrine of Bacchus, but because of a kindly feeling that was apparent.

Miss Laura Frances Riddell, who is attending school at Dayton, Ohio, Misses Kathryn Brown and Margaret Hughes, who are attending business school in Cincinnati, are spending the holidays at home.

Dr. R. E. Cropper, of LaGrange, Georgia, spent a few days the past week with his parents Mr. and Mrs. H. G. Cropper, of Bullittsville. Dr. Cropper has made good in his location, and is well pleased with the South.

Crowds of people are now crossing the river here, using the free bridge formed by the solid ice, and all are hurrying to do their Christmas shopping before the ice breaks up and makes the crossing impossible.—Milton Neva

Petersburg was shut off from the outside world last week in so far as receiving mail was concerned, the ice in the river cutting off all communication between that town and Lawrenceburg, from which place its mail comes.

The Food Administrator of Dearborn county, Indiana, has notified the farmers of that county that no more coal will be sold there, owing to scarcity of that fuel, and it being understood that the farmers are in a position to secure wood, which the administrator says must be done under present conditions.

Walton people and those along the Lexington pike north of there are predicting that the uncompleted part of that road in this county will be if not quite impassable before next spring. The work of reconstructing that road would have been completed had contractor Billiter been able to secure all the stone he was prepared to handle last fall.

Walter Rice arrived home last Friday night to spend the holidays with his parents, Mr. and Mrs. Edgar Rice. He appears to be standing his own two feet, although he has been held pretty close to it ever since he went on duty. His trip thru the mountains of Kentucky was a worth much to him as regards a better knowledge of the State. He is highly pleased with his principal, Mr. Chensault.

Cable Beemon replenished his Christmas funds in a very satisfactory manner to him. He is one of the numerous successful persons in this part of the county and numerous skunks have yielded their pelts to him, but one night last week was the first time they came into his trap in pairs, one trap taking the lives of two first grade animals at one fall. One of the cats had gone into the trap and the other pulled the trigger and each was a victim.

Frank Klasmann, of Constance, was in Burlington, last Friday, arranging to make another trial at this office last Friday. It had been made two trials to get into the army, being turned down both times, and he has now decided to try the Marines. He is very much taken with the military service and says it there is any way by which he can get into the service he is going to find it before he quits trying.

Here is the recipe for making two loaves of Hoover bread: Two cupsful lukewarm milk, water or a mixture of the two, and one cake compressed yeast, or one and one-half cupsful lukewarm milk, water or a mixture of the two, and one and one-half cupsful light yeast, two teaspoonful salt, one tablespoonful vegetable oil, six spoonfuls flour, one teaspoonful sugar.

Messrs. Claborn Campbell and Wood Hoffman, of Latonia, and Cyrus and Harry Passons, from Northwestern Iowa, were callers at this office last Friday. It had been many years since the Passon boys had been in Burlington, and it did them good to behold the old burg once again. All four of the above named are natives of this county, having spent much of their boyhood in and about Burlington, but sought their fortune elsewhere and it is a pleasure to say each one is making a success of life and providing a competency for old age. The Passon boys are always glad to have a call from old time acquaintances, and on this occasion one pleasing feature was the very pronounced look of each of the callers, each being the architect of his own prosperity.

WE extend our Heartiest Wishes to our many friends for a Merry Christmas and a Happy and Prosperous New Year, and also wish to thank our customers for helping to make the year of 1917 the Biggest of our five years in business in Erlanger.

A MERRY CHRISTMAS
and
A HAPPY AND PROSPEROUS NEW YEAR
To Every One.

Peoples Deposit Bank
Burlington, Kentucky.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of December 27th, 1877

Very little tobacco has been put on the market.
Weather very spring like.
Nicholas and Cornelius Carpenter sent a large drove of fat hogs to market last week.
Very few sales of land are being made in this county—hard times.
Samuel Weldon, 70, died at his home on Gunpowder creek.
Next Monday night the Merry Boys of Burlington will give a select hop in Morgan Academy.

Proper Distribution is All That Is Needed to Care for All.

Washington, Dec. 20. — A plentiful supply of sugar for the American people during the coming year was predicted today by Earl D. Babst, President of the American Sugar Refining Company, testifying before the Senate investigating Committee. He opposed placing a limit on domestic consumption, contending that any such plan would result in a larger surplus than the tonnage shortage would permit to be shipped abroad.

Half of the world's sugar crop outside of the central powers, Mr. Babst said, is produced in the United States, its territories and Cuba and if properly distributed this production is more than enough to meet domestic demands as well as supply all that can be shipped to the allies.

Of this year's shortage, Mr. Babst said it had its inception in unwarranted famine stories broadcast early in the year which resulted in hoarding, and has been aggravated by a series of unavoidable conditions ever since.

When people began to hoard the refineries held large stocks, but soon these were materially reduced because of strikes fomented by the Industrial Workers of the World. Then came an unprecedented demand, he said, because of the food administration's canning campaign.

The pinch came a little earlier than might be expected because England took 200,000 tons of the Cuban crop which normally comes to this country, and when the late beet crop came on the railroads were unable to transport it east.

Texas' Tips.

Do not judge by appearance. The man with gray on his vest may not be anti-Hoover.

The old-fashioned woman who wielded a rolling pin has a daughter that buys baker's bread and carries a swagger stick.

One of the pillars of it is that if the present war is ever portable realistically it will have to be done by blood-and-thunder his torians.

Furthermore, it is our deliberate opinion that a girl who knows how to hang a peep on her on the end of a long, drooping eyelash can get anything she wants.

Trench warfare has done one good thing—it has made the average man at home realize that he doesn't know what hardship is.

Geo. Burris, of the vicinity of Walton, took a Christmas look at the Recorder furest last Monday, and was so favorably impressed that he enlisted for another year as one of its readers.

State Corn Show.

A splendid premium list has been prepared for the State Corn Show this year, and classes have been so arranged that any corn grower has a chance to compete successfully in one or more classes. Many of the prizes are of exceptional value, and well worth the best efforts of anyone to win. For instance, the Sweepstakes prize for 10 ears of corn is worth about \$65. This special prize for ears shelling the largest percentage of grain is worth \$5. In the other classes proportionately as good premiums are provided.

The show will be judged by Mr. L. E. Clore, of LaPorte, Indiana. Mr. Clore is known the country over as a successful grower of show corn. He has been a successful competitor at a great majority of the National Corn Shows that have been held in this country. Mr. Clore is now Treasurer of the Federal Land Bank located at Louisville.

In addition to judging the corn, Mr. Clore will give an address before the farmers on Corn Growers' Day. His subject will be "Corn Improvement Work." He will also discuss the advantages of the farm loan act. Remember the dates January 29 to February 1st inclusive.

Somebody's machine killed a fine specimen of Shepherd dog one night the past week, the carcass occupying a conspicuous place on the street the next morning.

To My Friends
and Patrons

A Merry Christmas

May the New Year bring
Health, Happiness
and Prosperity.

Doctors Adopt New Fees.
At the Boone County Medical Society meeting, held at Walton, Ky., November 21st, 1917, the Doctors of Boone county, owing to the increase in the cost of Drugs and other supplies, adopted the following schedule of prices:
\$1.00 for office visits.
\$1.50 to \$2.00 for visits in town.
\$2.00 for visit not over one mile and 50 cents for each additional mile.
\$15.00 for normal confinement lasting not over six hours, and 50 cents to 75 cents for each additional hour detained over six.
Ministers of the Gospel and their families 50 per cent. of the above rates.

C. G. RANKIN, M. D., Pres.
IVAN E. CARLYLE, M. D., Sec'y.

Corn for Sale
I will sell at public auction at 1 o'clock p. m., on
Saturday, Dec. 29, 1917
140 bushels of Corn in the C. T. Rice barn near Union, Ky.
J. W. CONNER, Admr.
of B. L. Rice.

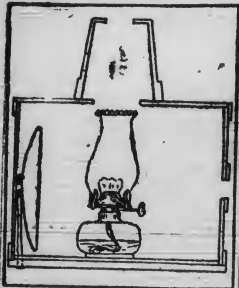

MAKE SURE OF EGGS

Laws Governing Marketing of Food Products Demand It.

Behooves Up-to-Date Farmer to Test Quality of Products Before Shipping—Practical Candler Is Easily Made.

Every year the state laws governing the marketing of food products are made more stringent. It is becoming more and more unsafe for the farmer to market, unknowingly or otherwise, eggs of a doubtful quality. It behooves the up-to-date farmer to make sure of the quality of his eggs before marketing them, writes F. W. Crumb in Wisconsin Agriculturist.

The following description is of a practical egg candler, or tester, which may be easily made at home and which will show up any defects in an egg. Aside from the light used, which may be either oil or electricity, no cost is completely needed not exceed 30 cents. Procure an ordinary cheese box and reinforce the bottom with three-quarter inch boards nailed on the outside.

Homemade Egg Tester.

These may be left square or sewed around to conform with the box. This is necessary to make the bottom solid enough to hold the 20d. spike which is driven up through the bottom one inch from the side of the box. On the point of the spike fasten the reflector, which is of the ordinary kind used on oil bracket lamps. Directly opposite the center of the reflector and at the same height, cut a smooth round hole one and one-half inches in diameter. Around this on the outside tack a piece of thick leather cut to fit the hole. This wears smooth very shortly and admits in all the light when an egg is applied to the hole. If an oil lamp is used, a hole about three inches in diameter must be cut in the top of the box, and over this an inverted flower pot with a two-inch hole brooked out of the bottom should be put to serve as a sort of chimney. If two holes are desired so that a large number of eggs may be handled with more facility, it is a simple matter to cut another hole.

WINTER GARDEN IN CELLARS

Many Vegetables Can Be Grown That Will Furnish Fresh Supplies for Family Table.

During the winter several garden vegetables can be successfully grown in the cellar that will furnish fresh supplies for the winter table when such things would otherwise be a luxury.

Rhubarb and asparagus roots can be forced into growth. If vigorous roots are taken up before freezing, then allow them to freeze and remain in that condition two weeks.

Put them in boxes of earth in a cool cellar, and they almost immediately begin to furnish a supply of beautifully blanched stalks. A temperature of about 50 degrees is desirable.

Rhubarb will do well at even a lower heat and darkness is desirable.

If your cellar windows face the east and south they will be good places to grow lettuce that has been previously started outside. Roots of parsley taken from the garden will thrive and furnish garnish for the whole winter's dishes. Chives will thrive and so will sprouting plants. It is well worth trying this fall.

SUGGESTIONS ON BEST FEED

Mighty Expensive Form of Lazine to Throw Corn on Ground—Open Shed Is Favored.

It saves a lot of work to dump the corn for cattle on the ground and let them dig it out of the dirt for their convenience, but it is a mighty expensive form of laziness.

An open shed with a well-drained floor, provided with troughs should always be a part of every stock-feeder's equipment.

As the hard work eases up on the horses, cut down their feed accordingly.

KEEP OUT INJURIOUS WEEDS

Give Milk Unpleasant Flavor and Should Not Be Permitted to Grow in the Pastures.

During rainy seasons the weeds often grow very rank in our pastures. The use of the mower once in a while will be a great help in keeping down the weeds, and giving the grass a chance to grow. Weeds give the milk a bitter flavor, and should not be allowed to grow in the pastures.

POULTRY

RAISING TURKEYS ON RANCH

Now Found Only in Unsettled Foothill Regions of California and Some Western States.

Turkey ranching is a new industry born of the decreasing production of turkeys on farms, according to an article in the recently published 1916 Yearbook of the United States Department of Agriculture.

Exclusive turkey ranching is now found practically only in the unsettled foothill regions of California and

Fine Type of Bronze Turkey.

In certain sections of Arizona and other Western states. In these regions a few persons are engaged in raising a thousand or more turkeys a season. The establishments are located where the range is the most common kind of food of the turkey, such as grasshopper and other insects, green vegetation, and the seeds of various weeds and grasses, is abundant. Advantage also is taken on these ranches of the turkey's relish for acorns, and where these are plentiful but little grain need be used for fattening in the fall.

The large flocks of turkeys are managed much like herds of sheep, being taken out to the range early in the morning, and brought home to roost at night. They are herded during the day by men either on foot or on horseback, and by dogs especially trained for the work.

BOTHER WITH EARLY CHICKS

Leg Weakness and Bowel Troubles Are Most Common Complaints—Two Ordinary Causes.

Many have had trouble with their early chicks. Leg weakness and bowel troubles are the most common complaints. The general causes for these troubles are overfeeding and too close confinement and the two usually go together. That which would be regarded as overfeeding in small runs would not be overfeeding where the chicks were out on the ground and permitted to run at will. Chicks confined to basement or in buildings continually, should have moist earth to scratch in and even then, should not be long confined to such runs.

The cold will not hurt them if they can return to the warm hovel at will, and they will very soon learn where to find it.

LOSS OF INCUBATOR CHICKS

Poultry Specialist Saves Lives of Many Young Fowls by Using Feather Duster in Brooder.

A poultry specialist claims to be able to reduce loss among incubator chicks by providing the brooder with feather dusters. The chicks in coming in contact with the dusters imagine that they are being brooded by a hen and consequently do not become homesick and dependent upon the fact that they have no mother to love them.

GOOD DUST BATH FOR FOWLS

Necessary in Every Poultry House That Hens May Get Rid of Vermin—Fine Dust Is Best.

In every poultry house there should be a dust bath where the hens may get rid of lice.

Poultry live brood through pores in their skins and fine dust fills these pores and suffocates the vermin. Road dust, hard coal ashes or dry dust of any kind will accomplish the purpose.

Salt for Breeding Stock.

A little salt in the dry mash for the breeding stock and in the feed for newly hatched chicks will largely prevent the vice of toe-picking and cannibalism.

To for Hen's Beard.

Formerly a lady by a hen between November 28 and March 1st simply pays for her year's feed. It takes from 90 to 100 to do so in midsummer.

THE KITCHEN CABINET

If all the world were playing holi-cup to start would be as tedious as to work.—Shakespeare.

ECONOMY IN SMALL THINGS.

We have all heard that "little leaks sink a great ship," and we know that there are countless little leaks going on in our households for which we are directly responsible. The woman who does her own marketing in person saves many a dime in her purchases. When the goods are delivered she may present to check up the parcels and weigh those that are bought by weight. Today an ounce of meat short of what you have paid for means a loss, and a quarter of a pound short amounts to five or ten cents, depending on the price of the meat bought. This shortage may not mean anything but carelessness on the part of the butcher, but when he knows that his goods will come back if not just as ordered, it will make a difference in the care taken in filling the order. The woman who says "never mind, it is too small to mention" will find that five cents a day will amount to a dollar in less than a month and over \$12 in the course of a year. The meals in our homes must be taught to be less wasteful, to be more careful in preparing food in right amounts so there will be none or very little left over to make a problem of disposal.

The wood and coal bill, as well as the gas and electricity, may all be lessened by proper thought. The roasting fire when none is necessary; just shut the dampers of the stove when not in use. When making pudding, if there are pieces enough, which is easy to plan for, knowing the family appetite, there is no waste.

In using soap, if the lather is left in the water it is softened and wasted; more is used than needed. Many workers will make half a cake of soap so as far and do no good work as others who use a whole cake. Soap pieces may be saved, melted and used in the boiler or bits may be saved for the soap shaker in dish washing. Illumination bills may be greatly lessened by turning off the light if absent from the room but five minutes. Habits of thrift are best begun in childhood, but thought will do much to overcome wasteful practices.

Nellie Maxwell The KITCHEN CABINET

The health and morals of a people depend mainly upon the food they eat, and the homes they live in.—Ellen Richards.

VARIETY THE SPICE OF LIFE.

Bread and butter with potatoes will stand the everyday test, but the most delicious dish in the world will lose its charm by being served too often. Lack of variety in the diet is often due to sheer laziness. A mental laziness may be just as serious a failing as a moral and physical laziness.

Many a housewife who is the soul of industry, does not exercise her brains in planning for her table. A notebook and pencil used with thought once a week will plan the meals for the family in a half hour. If one is too busy, or too tired to add variety to the table of what advantage man of the house loses all interest in food, the children lose their appetites in the household where the rut traveled is growing deeper and deeper. Don't bore the family or members of the family with questions as to what they would like, for the thinking housewife will find out without seeming to inquire. To many it spoils a meal to know beforehand what they are going to have. Never, as you value your reputation as an intelligent housekeeper, never let your family say "this is rice-pudding day, or codfish gray day at our house." To be successful the cook must keep her troubles to herself, as perquisites in the home are best not shared.

Variety in our diet is as important as it is in other things, and the dish that comes as a surprise is always more enjoyed.

We need to remember Turner's famous reply to a man who inquired how he mixed his colors: "With brains, sir," and nowhere can brains be put to so good a use as in the preparation of food for the family.

Chocolate Pudding.—Take one pint of hot milk, one cupful of bread crumbs, and three tablespoonfuls of chocolate, bake for 25 minutes. Sauce.—Beat one egg and one cupful of sugar together, add three tablespoonfuls of boiling water and a tablespoonful of butter. Stir and serve immediately.

Excellent Frosting.—Four tablespoonfuls of milk, one cupful of sugar, heated together until it spins a thread. Beat until thick, flavor or add melted chocolate if desired.

Nellie Maxwell

THE KITCHEN CABINET

When eggs grow cheap, we'll surely make a cake. Some lumpy afternoon, for early tea. And what a joyful thrill 'twill give to know That we may use two eggs, or even three!

How odd 'twill seem to bring to light The dear old cake tin with its dusting deep. And butter it—Ah! what a stirring time. When eggs grow cheap! —Harriet Whitney Symonds.

TASTY EATS.

Here is a tomato salad that is different. Scald a half dozen of small, even-sized tomatoes, peel them and cut in quarters to within an inch of the stem and chill them well. Beat a cupful of heavy cream until stiff, add a half cupful of powdered sugar, a fourth of a cupful of vinegar, a half teaspoonful of salt, a dash of cayenne and a half cupful of grated horseradish. The mixture should be quite stiff. Place the tomatoes on nests of lettuce, fill with the dressing and garnish with parsley sprigs.

Potato Dumplings.—Stiff together 1½ cupfuls of flour with four teaspoonfuls of baking powder with a half teaspoonful of salt, add three teaspoonfuls of butter to the mixture, rubbing it into the flour, then three-fourths of a cupful of milk, half a cupful of rice or potato, and one egg beaten light. Turn upon a floured board and knead slightly; roll into a sheet and cut in rounds. Set close together in a buttered steamer and cook 15 minutes without opening the steamer.

Crumb Bread.—Crumbs that are dried, ground through the meat chopper and not kept long will make a bread that is both wholesome and digestible. Take four cupfuls of hot water, and when lukewarm add a yeast-cake that has been softened in one cupful of the water, three cupfuls of bread crumbs, two cupfuls of Graham flour, and enough white flour to make a very stiff dough, and two teaspoonfuls of salt, and two tablespoonfuls of shortening. Let rise, work down, then place at once in the tin; let rise again and bake. This makes four loaves. For a small family half the recipe will suffice. Buttered crumbs in a generous layer over chopped apples, spread and sweetened, then baked, makes a most wholesome pudding, named Brown Betty.

Nellie Maxwell The KITCHEN CABINET

A woman should always keep her tongue to herself or she will find she meets somebody who is looking for it.

Fun gives you a forcible hug and shakes laughter out of you, whether you will or not.

THE GOOD OLD POTATO.

We are now enjoying the fine potatoes that are once more plentiful and cheap. Potatoes are at their best when simply prepared, such as baked or boiled. A generous supply of potatoes will lessen the bread consumption and thus help in the saving of wheat. When baking potatoes, scrub them well and grease them lightly; the skin will be softened and there will be very little waste. Baked potatoes should be served just as soon as they are done, to be in prime condition. If it is necessary to wait for a late comer, break open the potato and let out the steam, then return to the oven. If the late comer is very late, put a slice from the top of the potato and scrape out the inside, season with butter, onion juice, celery salt and pepper, with a little hot milk or cream, beat well and return to the shell; place in the oven to brown.

Hashed Brown Potatoes.—Cut two cupfuls of cold boiled potatoes into small pieces, season with salt and pepper, cook three minutes in one-third of a cupful of bacon drippings, stirring constantly. Let stand a few seconds to brown underneath, then fold like an omelet.

Potato Soup.—Boil three medium-sized potatoes and when soft rub through a sieve. Scald a small sliced onion in a quart of skim milk with a stalk of celery cut up fine. Take out the vegetables and pour the milk slowly on the potatoes. Melt two tablespoonfuls of butter or other fat, mix with two tablespoonfuls of flour, and when well blended add to the soup. Season with salt and pepper, let boil up, strain, add two more tablespoonfuls of fat and sprinkle with parsley to serve.

The number of vegetables eaten, the amount of cereal to cook and the amount of meat to serve are all things for every thinking woman to put time upon these days. An onion saved, a potato left over, a spoonful of squash may be put into a warmed over dish, but many families rebel at leftovers.

STAFF OFFICER IMPORTANT COG IN WAR MACHINE

Helps Win Battles, But Never
Signs His Name.

PART OF GENERAL'S BRAINS

Good Artillery and Good Staff Officers
Are Two Most Important Elements
of Success in Modern Fighting—
General Public Knows Little About
The Staff and Its Pre-Eminent Place
in Army.

It is important that America should understand from the beginning the role of the staff officer in the present war. This role, though pre-eminent, has been, and is, obscure to the general public. Yet, given a sufficient infantry, the two most important elements of success in modern fighting are good artillery and good staff officers. France lost many brave leaders in the first months of the war, and it was consequently only after a great effort that the various units were able to develop in certain individuals that combination of coolness, intelligence and experience which must animate the personnel of every efficient staff. The excessive British losses during the second year of the war were due as much to the lack of experienced staff officers as to any other one reason, writes Paul Scott Moore in Chicago Daily News.

I have heard much talk in our own army about artillery, engineers, aviation and infantry, but nothing about staff officers. I hope this is merely a coincidence and not an oversight, for we are certainly going to be short of this class of men unless we are taking immediate measures to choose and to train them.

Behind the list that strikes the eye that sees, the staff directs and the nerves that co-ordinate. Behind every army there is a quiet building somewhere, in which all reports are classified, all decisions taken, all orders drawn up in detail, all efforts of whatever nature organized. The men who do this are the general and his staff.

Now every military operation may be said to consist of five factors: (1) the study and preparation of the elements which must be considered before making a decision; (2) the decision itself; (3) the transmission of this decision to the units charged with executing it; (4) the execution; (5) the coordination of the execution. The decision rests with the commanding general, the execution rests with the troops; all else is the work of the staff.

What the Staff Does.
Every staff has its chief, who directs and co-ordinates its labors. When the staff is important, there is also an assistant chief of staff. These men should be absolutely impregnable with their general's mentality. They should be able to replace him in an emergency without disconcerting results. To the chief of staff is permanently delegated the general's own signature, to be attested by him in discretion to all papers containing neither praise nor blame, decisions nor principles.

The work of the staff is divided between four departments:

One charged with keeping for the general an up-to-date account of all means in men, guns, etc., at his disposal, and with seeing to the various needs of the troops.

One charged with gathering information concerning the enemy.

A third charged with everything which concerns the training, movements and operations of troops.

A fourth to deal with all matters of supply, transport and communication. There is also a courier section, charged with recording, all papers which enter or leave the staff, and with their transmission by motorcycle, automobile, runners, etc.

The part played in large staffs by a department is relegated in small staffs to a single officer provided with a number of secretaries.

Everything in Writing.

It is the general, then, who takes the decision, but it is the staff which presents to him, after careful examination and study, the facts of the situation, and it is the staff which attends to the carrying out of the general's orders. There are certain axioms to be followed by staff officers in this work, which are the result of painful experience. Always put everything in writing. Verbal orders given in haste should be confirmed as quickly as possible by written orders. Make it clear to each officer exactly what he is to do. Avoid all double employment which may give rise to hesitation or to doubt. Leave as much initiative to subordinates as possible. Handwriting should be large and clear; the important words should be underlined. Transmission should be rapid. It is often well to send first a very brief written order, followed later by the full order, thus starting the line officer time to take his initiative measures even while waiting to learn the details.

Where General Gets Facts.
Although different generals have different methods of procedure, that most commonly adopted is as follows:

The general, before taking a decision, will demand from his staff, in writing, a statement of the exact situation of his own and the enemy's forces. This statement will be based not only on documents, but on an examination by staff officers of the ground itself. After hearing the opinion of his chief of staff and of the head of the department of operations, the general will take his decision, for which he alone is responsible. He will then assemble his staff, and explain to the entire body his general plan, thus avoiding repetition, misapprehensions and the loss of time. Each officer knows what is expected of him. He is ready to do his part without further delay.

And what, finally, are the personal qualities which are to be expected of a good staff officer? In the first place, he must be able to understand not only his general but the troops. His own personality must be subordinated. He must put all his strength, both physical and moral, at the service of others. At all times a desire to learn should animate him; the least carelessness or ignorance on his part would be a crime which might cost the lives of a great many of his comrades.

He should be modest and discreet, speedy, hard-working, clear-headed, calm and methodical, keeping the same anonymity in the little circle of the staff that the private keeps in the ranks.

Must Efface Himself.
In his relations with his immediate superiors he should be deferential, frank, sincere and loyal. After having contributed all he can to the study of any question, after having expressed his personal opinion with perfect freedom, but with modesty and measure—and never except when it is asked for—then he must loyally accept the decision made, and work with all his heart to give it success, even though it be contrary to his personal judgment. He must endeavor at all times to be cheerful and confident, contributing thus to that mental relaxation so indispensable at certain times, which is only possible in an atmosphere of safety and faith.

In his relations with subordinate commanders he must be deferential and sincere, seeking to win their confidence by showing them respect and devotion. He will at no time and under no circumstances seek to put himself ahead of his general or behave in a way which might injure the latter's authority. When he feels that an order is being badly interpreted he should point out the mistake to the officer who is responsible, but he should never seek to correct it himself. His reports should be unflinchingly honest, confining themselves to what is important, and so justly couched that they might be read even by the person they concerned, frank and open, stating facts, not impressions, always affirming, never insinuating.

Bravery and Coolness.
During battle the staff officer should at all times be brave, without hesitation, but without boldness. Always keeping a cool head, and using it, if necessary, to re-establish order, and to carry out his general's will, of which he is in some sort the incarnation. He must not shrink upon to sacrifice his life. No soldier's death could be more glorious.

And in the obscure but essential work of his office he should work ceaselessly to grasp the mind and will of his general, uniting his own will with that of his commander, and vigorously excluding all temptations to become envious, or to push himself forward. The officers of one staff are like the cells of a single brain, and the part which each one plays in the elaboration of the single idea may not be defined.

Above everything else, the staff officer must be immovably confident in the final victory. It is an old military saying that those who do not believe in the victory are not capable of organizing it. There is no more apparent truth.

French School for Officers.
I will close with a rapid summary of the methods by which officers are at present being trained in the French army. Before the war, those who desired to become staff officers were required to pass a preliminary examination which required at least two years to prepare. They then had two years of special schooling, and

two more years of experience in the various branches of the service, after which, on the test of another examination, it was decided whether or not they were fit for staff work. But obviously this training was too long for war time. A staff school has therefore been created to train suitable men as quickly as possible for the highest technical task of the staff officer. In this school the candidates are taught to know the various branches of the service thoroughly (infantry, cavalry, engineering, artillery, aviation) and to understand and foresee the needs of these branches. They are taught the organization and methods of staff work. Finally, they are taught how to do the work necessary to the preparation of an operation, how the troops are used, the mechanism of giving orders, and the part which the staff must play in the course of the battle. A special appeal is made to the candidates to develop their energy, their intellectual curiosity, and their morale. They are advised to live together in a constant interchange of ideas and experiences, the weaker absorbing moral strength from the stronger.

American Army Needs Them.
This schooling lasts a fixed period, at the end of which the candidates, divided into two classes according as they are to serve on the staff of a division or a brigade, are attached for a short time to branches of the service with which they happen to be unfamiliar, and for another brief term to some army or division staff. Only then are they ready to receive an appointment to a regular post.

Schools of this sort will have to be formed sooner or later by the American army. The best general in the world is helpless without a thoroughly competent staff.

**SURPLUS OF WHEAT
ALREADY SENT ABROAD**

Protests Against Wheatless and
Meatless Days Denounced by
Food Administration.

The following was issued by the United States Food administration: Statements appearing in the Chicago press emanating from interested parties, protesting against wheatless and meatless days as unnecessary sacrifices by the American public, are either malicious or emanate from personal interest.

The results from meatless days have, for the first time, given us sufficient reserves of meat to allow us to partially comply with the quantities requested by the allies for shipments. This should be a matter of satisfaction to the entire American people, that their devotion in this matter now enables us to at least partially fulfill our duties to the allies in this respect.

As to wheat, we have already exported the whole of the surplus of the 1917 harvest, over and above the normal demands of our own population. It is necessary, therefore, for the food administration to restrict the export of wheat so as to retain in the United States sufficient supplies to carry our own people until the next harvest.

Therefore all exports of wheat from now forward are limited entirely to volume of saving made by the American people in their consumption of wheat and wheat products. We are continuing wheat shipments as far as our situation allows but even with all the conservation made we are still unable to load over 400,000 tons of foodstuffs urgently required by the allies.

Statements of the character referred to given out for personal interest are in little accord with the spirit being shown by millions of homes in the United States in an endeavor to aid the food administration in its task.

MUST BE BURIED IN FRANCE

Bodies of U. S. Soldiers Who Die
Abroad Cannot Be Removed Now.

War department officials say it is practically impossible to remove bodies of American soldiers who die in France to this country until after the war. If relatives want to do so before hostilities end, they will have to assume that responsibility. Secretary of War Baker has ruled that the United States men who die on European battle fields shall be buried and the graves marked and the relatives notified of all disposition made of the bodies.

The first contingent of a registration service to look after the marking and burial of American soldiers has sailed. The burial will be in cemeteries designated by government officials. The bodies will be placed in serviceable caskets, so that they may be preserved for an indefinite time.

DOG TRAVELS 400 MILES

Was Sold, but Made the Journey Back
to Old Master.

Making his way over 400 miles of territory and crossing two large rivers on the way, a black shepherd dog belonging to John Smith of Asheville, O., returned home recently after traveling from Tarboro, Ga. The dog was sold to E. A. P. McCarthy of the Georgia town and was shipped to Tarboro by express.

He seemed to be doing well in the Georgia town, but escaped a few nights ago, and the next heard of him was when he returned and weary, he scratched at the foot of Smith's house on Spring street, and was brought all over the place when Jack opened the door. The sale had been called off.

MAKE SURE OF EGGS

Laws Governing Marketing of Food Products Demand It.

Behooves Up-to-Date Farmer to Test Quality of Products Before Shipping—Practical Candler Is Easily Made.

Every year the state laws governing the marketing of food products are made more stringent. It is becoming more and more unsafe for the farmer to market, unknowingly or otherwise, eggs of a doubtful quality. It behooves the up-to-date farmer to make sure of the quality of his eggs before marketing them. Writes E. W. Crumb in Wisconsin Agriculturist.

The following description is of a practical egg candler, or tester, which may be easily made at home and which will show up any defects in an egg. Aside from the light used, which may be either oil or electricity, the cost complete need not exceed 25 cents. Procure an ordinary cheese box and reinforce the bottom with three-quarter inch boards nailed on the outside.

Homemade Egg Tester.

These may be left square or sawed around to conform with the box. This is necessary to make the bottom solid enough to hold the 20d. spike which is driven up through the bottom one inch from the side of the box. On the point of the spike fasten the reflector, which is of the ordinary kind used on oil bracket lamps. Directly opposite the center of the reflector and at the same height, cut a smooth round hole one and one-half inches in diameter. Around this on the outside tack a piece of thick leather cut to fit the hole. This wears smooth very shortly and shuts in all the light when an egg is applied to the hole. If an oil lamp is used, a hole about three inches in diameter must be cut in the top of the box, and over this an inverted flower pot with a two-inch hole broken out of the bottom should be put to serve as a sort of chimney. If two holes are desired so that a large number of eggs may be handled with more facility, it is a simple matter to cut another hole.

WINTER GARDEN IN CELLARS

Many Vegetables Can Be Grown That Will Furnish Fresh Supplies for Family Table.

During the winter several garden vegetables can be successfully grown in the cellar that will furnish fresh supplies for the winter table when such things would otherwise be a luxury.

Rhubarb and asparagus roots can be forced into growth, if vigorous roots are taken up before freezing, then allow them to freeze and remain in that condition two weeks.

Put them in boxes of earth in a cool cellar, and they almost immediately begin to furnish a supply of beautiful blanching stalks. A temperature of about 50 degrees is desirable.

Rhubarb will do well at even a lower heat and darkness is desirable.

If your cellar windows face the east and south they will be good places to grow lettuce that has been previously started outside. Roots of parsley taken from the garden will thrive and flourish. Chives will thrive and so will sprouting plants. It is well worth trying this fall.

SUGGESTIONS ON BEST FEED

Mighty Expensive Form of Lazines to Threw Corn on Ground—Open Shed Is Favored.

It saves a lot of work to dump the corn for cattle on the ground and let them dig it out of the dirt for their convenience, but it is a mighty expensive form of laziness.

An open shed with a well-drained dirt floor provided with troughs should always be a part of every stock-feeder's equipment.

The hard work cases up on the horses, but down their feed accordingly.

KEEP OUT INJURIOUS WEEDS

Give Milk Undesirable Flavor and Should Not Be Permitted to Grow in the Pastures.

During rainy seasons the weeds often grow very rank in our pastures. The use of the mower once in a while will be a great help in keeping down the weeds, and giving the grass a chance to grow. Weeds give the milk undesirable flavor, and should not be allowed to grow in the pastures.

RAISING TURKEYS ON RANCH

Now Found Only in Unsettled Foothill Regions of California and Some Western States.

Turkey ranching is a new industry born of the decreasing production of turkeys on farms, according to an article in the recently published 1916 Yearbook of the United States Department of Agriculture.

Exclusive turkey ranching is now found practically only in the unsettled foothill regions of California and

Fine Type of Bronze Turkey.

In certain sections of Arizona and other Western states. In these regions a few persons are engaged in raising a thousand or more turkeys a season. The establishments are located where the range is unlimited and the natural food of the turkey, such as grasshoppers and other insects, green vegetation, and the seeds of various weeds and grasses, is abundant. Advantage also is taken on these ranches of the turkey's relish for acorns, and where these are plentiful but little grain need be used for fattening in the fall.

The large flocks of turkeys are managed much like herds of sheep, being taken out to the range early in the morning, and brought home to roost at night. They are herded during the day by men either on foot or on horseback, and by dogs especially trained for the work.

BOTHER WITH EARLY CHICKS

Leg Weakness and Bowel Troubles Are Most Common Complaints—Two Ordinary Causes.

Many have had trouble with their early chicks. Leg weakness and bowel troubles are the most common complaints. The general causes for these troubles are overfeeding and too close confinement and the two usually go together. That which would be regarded as overfeeding in small runs would not be overfeeding on the ground and permitted to run at will. Chicks confined to basement or in buildings continually, should have moist earth to scratch in and even then, should not be long confined to such runs.

The cold will not hurt them if they can return to the warm hovel at will, and they will very soon learn where to find it.

LOSS OF INCUBATOR CHICKS

Poultry Specialist Saves Lives of Many Young Fowls by Using Feather Duster in Brooder.

A poultry specialist claims to be able to reduce loss among incubator chicks by providing the brooder with feather dusters. The chicks in coming in contact with the dusters imagine that they are being brooded by a hen and consequently do not become homesick and despondent over the fact that they have no mother to love them.

GOOD DUST BATH FOR FOWLS

Necessary in Every Poultry House That Hens May Get Rid of Vermin—Fine Dust Is Best.

In every poultry house there should be a dust bath where the hens may get rid of lice.

Poultry lice breed through pores in their skin and fine dust fills these pores and suffocates the vermin. Road dust, hard coal ash or dry dust of any kind will accomplish the purpose.

Salt for Breeding Stock.

A little salt in the dry mash for the breeding stock and in the feed for newly hatched chicks will largely prevent the vice of toe-pickling and cannibalism.

For Sale by Han's Beard.

For Sale by Han's Beard.

If all the world were playing holiday, to sport would be as tedious as to work—Shakespeare.

ECONOMY IN SMALL THINGS.

We have all heard that "little leaks sink a great ship," and we know that there are countless little leaks going on in our households for which we are directly responsible. The woman who does her own marketing in person saves many a dime in her purchases. When the goods are delivered she may be present to check up the parcels and catch those that are bought by weight. Today an ounce of meat short of what you have paid for means a loss, and a quarter of a pound short amounts to five or ten cents, depending on the price of the meat bought. This shortage may not mean anything but carelessness on the part of the butcher, but when he knows that his goods will come back if not just as ordered, it will make a difference in the care taken in filling the order. The woman who says "never mind, it is too small to mention" will find that five cents a day will amount to a dollar in less than a month and over \$12 in the course of a year. The maid in our homes must be taught to be less wasteful, to be more careful in preparing food in right amounts so there will be none or very little left over to make a problem of disposal.

The wood and coal bill, as well as the gas and electricity, may all be lessened by proper thought. The rooming fire when none is necessary; just shut the dampers of the stove when not in use. When making pudding, if there are pieces enough, which is easy to plan for, knowing the family appetite, there is no waste.

In using soap, if the suds are left in the water it is softened and wasted; more is used than needed. Many workers will make half a cake of soap go as far and do as good work as others who use a whole cake. Soap pieces may be saved, melted and used in the boiler or bits may be saved for the soap shaker in dish washing. If illumination bills may be greatly lessened by turning off the light it is absorbed from the room but five minutes. Habits of thrift are best begun in childhood, but thought will do much to overcome wasteful practices.

The health and morals of a people depend mainly upon the food they eat, and the homes they live in.—Ellen Richards.

VARIETY THE SPICE OF LIFE. Bread and butter with potatoes will stand the everyday test, but the most delicious dish in the world will lose its charm by being served too often. Lack of variety in the diet is often due to sheer laziness. A mental laziness may be just as serious a failing as a moral and physical laziness. Many a housewife who is the soul of industry, does not exercise her brains in planning for her table. A notebook and pencil used with thought once a week will plan the meals for the family in a half hour. If one is too busy, or too tired to add variety to the table of what advantage is it to think of what might be? The man of the house loses all interest in food, the children lose their appetites. In the household where the rut traveled is growing deeper and deeper. Don't bore the family or members of the family with questions as to what they would like, for the thinking housewife will find out without seeming to inquire. To many it spoils a meal to know beforehand what they are going to have. Never, as you value your reputation as an intelligent housekeeper, never let your family say "this is rice-pudding day, or codfish gravy day at our house." To be successful the cook must keep her troubles to herself, as appliances in the home are best not shared.

Variety in our diet is as important as it is in other things, and the dish that comes as a surprise is always more enjoyed.

We need to remember Turner's famous reply to a man who inquired how to mix his colors: "With brains, sir," and nowhere can brains be put to so good a use as in the preparation of food for the family.

Chocolate Pudding.—Take one pint of hot milk; one cupful of bread crumbs, and three tablespoonfuls of chocolate, bake for 25 minutes. Sauce.

Beat one egg and one cupful of sugar together, add three tablespoonfuls of boiling water and a tablespoonful of butter. Stir and serve immediately.

Excellent Frosting.—Four tablespoonfuls of milk, one cupful of sugar, boiled together until it spins a thread, beat until thick, flavor or add melted chocolate if desired.

Crumb Bread.—Crumbs that are dried, ground through the meat chopper and not kept long will make a bread that is both wholesome and palatable. Take four cupfuls of hot water, and when lukewarm add a yeast-cake that has been softened in one cupful of the water, three cupfuls of bread crumbs, two cupfuls of Graham flour, and enough white flour to make a very stiff dough, add two teaspoonfuls of salt, and two tablespoonfuls of shortening. Let rise, work down, then place at once in the tin; let rise again and bake. This makes four loaves. For a small family half the recipe will suffice. Buttered crumbs in a generous layer over chopped apple spiced and sweetened then baked, makes a most wholesome pudding, named Brown Betty.

A woman should always keep her trouble to herself or at least let it meet somebody who is looking for it. Fun gives you a forcible hug and shakes laziness out of you, whether you will or not.

THE GOOD OLD POTATO. We are now enjoying the fine potatoes that are once more plentiful and cheap. Potatoes are at their best when simply prepared, such as baked or boiled. A generous supply of potatoes will lessen the bread consumption and thus help in the saving of wheat. When baking potatoes scrub them well and grease them lightly, the skin will be softened and there will be very little waste. Baked potatoes should be served just as soon as they are done, to be in prime condition. If it is necessary to wait for a late comer, it is necessary to wait for a late comer, break open the potato and let out the steam, then return to the oven. If the late comer is very late, put a slice from the top of the potato and scrape out the inside, season with butter, onion juice, celery salt and pepper, with a little hot milk or cream, beat well and return to the shell; place in the oven to brown.

Hashed Brown Potatoes.—Cut two cupfuls of cold boiled potatoes into small pieces, season with salt and pepper, cook three minutes in one-third of a cupful of bacon drippings, stirring constantly. Let stand a few seconds to brown underneath, then fold like an omelet.

Potato Soup.—Boil three medium-sized potatoes and when soft rub through a sieve. Skim a small sliced onion in a quart of skim milk with a stalk of celery cut up fine. Take out the vegetables and pour the milk slowly on the potatoes. Melt two tablespoonfuls of butter or other fat, mix with two tablespoonfuls of flour, and when well blended add to the soup. Season with salt and pepper, let boil up, strain, add two more tablespoonfuls of fat and sprinkle with parsley to serve.

The number of vegetables eaten, the amount of cereal to cook and the amount of meat to serve are all things for every thinking woman to put blue upon these days. An onion saved, a potato left over, a spoonful of squash may be put into a warmed over dish, but many families rebel at leftovers.

Another objection to knitting in church is that it would interfere with the thread of the discourse.

But as yet no one in the interest of economy has dared suggest abolishing the hold tips.

The Russian hour is beginning to walk like a man again.

Take Your County Paper.

Neenie Maxwell

When eggs grow cheap, we'll surely make a cake. Some happy afternoon, for early tea. And what a joyful thrill 'twill give to know That we may use two eggs, or even three!

How old 'twill seem to bring to light The dear old cake tin with its duting deep. And butter it—Ah! what a stirring time. When eggs grow cheap! —Harriet Whitney Symonds.

TASTY EATS.

Here is a tomato salad that is different. Scald a half dozen of small, round, green tomatoes, peel them and cut in quarters to within an inch of the stem and chill them well. Beat a cupful of heavy sour cream until stiff, add a half cupful of powdered

sugar, a fourth of a cupful of vinegar, a half teaspoonful of salt, a dash of cayenne and a half cupful of grated horseradish. The mixture should be quite stiff. Place the tomatoes on nests of lettuce, fill with the dressing and garnish with parsley sprigs.

Potato Dumplings.—Sift together 14 cupfuls of flour with four teaspoonfuls of baking powder with a half teaspoonful of salt, add three teaspoonfuls of butter to the mixture, rubbing it into the flour, then three-fourths of a cupful of milk, half a cupful of rice potatoes, and one egg beaten light. Turn upon a floured board and knead slightly; roll into a sheet and cut in rounds. Set close together in a buttered steamer and cook 15 minutes without opening the steamer.

Crumb Bread.—Crumbs that are dried, ground through the meat chopper and not kept long will make a bread that is both wholesome and palatable. Take four cupfuls of hot water, and when lukewarm add a yeast-cake that has been softened in one cupful of the water, three cupfuls of bread crumbs, two cupfuls of Graham flour, and enough white flour to make a very stiff dough, add two teaspoonfuls of salt, and two tablespoonfuls of shortening. Let rise, work down, then place at once in the tin; let rise again and bake. This makes four loaves. For a small family half the recipe will suffice. Dibowski's Cafe
—THAT—
Neat Little Place
For Farmer, Workman, Merchant, Clerk and Professional Man.
Commercial Luncheon from 11 a. m. to 1:30 p. m. Supper 5 to 7 p. m.
No. 6 Pike Street, Covington, Kentue ky.

THE IMPORTANT THING
When getting a pair of glasses is to have your eyes fitted right. We have had 26 years' experience and guarantee to fit you exactly right. We grind every lens we use on our own machinery and take plenty of time to test your eyes carefully. Our prices are reasonable for first-class work.
WITH NOTCH, Jeweler.
DR. N. F. PENN, 613 Madison Ave., Covington, Ky.

PHILIP TALIAFERRO
Undertaker & Embalmer
Magnificent Horse Drawn or Automobile Equipment at Your Command
Calls Answered Promptly in Auto at all Hours.
PHONES (DAY—ERLANGER 84) (NIGHT—) **ERLANGER, KY.**

C. SCOTT CHAMBERS
WALTON, KY.
Undertaker and Embalmer
[First Class Equipment.]
Calls Answered Promptly in Automobile Day or Night.
Holds License in Three States—Ohio, Indiana, Kentucky.
Auto Hearse and Outfit Furnished if Wanted.
Telephone No. 38, Walton, Ky.

Buy Boone County Bonds.
Your Magistrate will receive your order for County Road Bonds. There is no better investment, as these bonds pay 4 per cent semi-annual interest and can not be taxed for any purpose. These Bonds are in denominations of \$500 and can not sell for less than par and accrued interest. Give your Magistrate your order for one of these bonds; or mail an order to P. E. CASON, County Judge or N. E. RIDDELL, Co. Atty.

J. L. HAMILTON
UNDERTAKER
Verona, - - Kentucky.
All of the Up-to-Date methods and reasonable charges. Fine line of Monument Work.
Telephone—Calls answered promptly, day or night.

W. W. RUSSELL BRADFORD
ATTORNEY-AT-LAW,
502-501 Copple Bldg. Covington, Ky.
Will practice in all the courts.
With O. M. Rogers

DR. T. B. CASTLEMAN,
DENTIST
Will be at Burlington every Monday prepared to do all dental work with painless extraction, bridge and plate work a specialty.
All Work Guaranteed

JOHN WHITE & CO.
LOUISVILLE, KY.
Liberal assortment and full value paid for FURS
Hides and Goat Skins

STAFF OFFICER IMPORTANT COG IN WAR MACHINE

Helps Win Battles, But Never
Signs His Name.

PART OF GENERAL'S BRAINS

Good Artillery and Good Staff Officers
Are Two Most Important Elements
of Success in Modern Fighting—
General Public Knows Little About
the Staff and Its Pre-Eminent Place
in Army.

It is important that America should understand from the beginning the role of the staff officer in the present war. This role, though pre-eminent, has been, and is, obscure to the general public. Yet, given a sufficient insight, the two most important elements of success in modern fighting are good artillery and good staff officers. France lost many brave leaders in the first months of the war, and it was consequently only after a great effort that the various units were able to develop in certain individuals that combination of coolness, intelligence and experience which must animate the personnel of every efficient staff. The excessive British losses during the second year of the war were due as much to the lack of experienced staff officers as to any other one reason, writes Paul Scott Mourer in Chicago Daily News.

I have heard much talk in our own army about artillery, engineers, aviation and infantry, but nothing about staff officers. I hope this is merely a coincidence and not a fact. For we are certainly going to be short of this class of men unless we are taking immediate measures to choose and to train them.

Behind the fist that strikes are the eyes that see, the will that directs and the nerves that co-ordinate. Behind every army there is a quiet building somewhere, in which all reports are classified, all decisions taken, all orders drawn up in detail, all efforts of whatever nature organized. The men who do this are the general and his staff.

Now every military operation may be said to consist of five factors: (1) the study and preparation of the elements which must be considered before making a decision; (2) the decision itself; (3) the transmission of this decision to the units charged with its execution; (4) the execution; (5) the assessment of the result. The decision rests with the commanding general, the execution rests with the troops; all else is the work of the staff.

What the Staff Does.

Every staff has its chief, who directs and co-ordinates its labors. When the staff is important, there is also an assistant chief of staff. These men should be absolutely impregnable with their general's mentality. They should be able to replace him in an emergency without disconcerting results. To the chief of staff is permanently delegated the general's own signature, to be affixed by him to the decision on all papers containing neither praise nor blame, decisions nor principles.

The work of the staff is divided between four departments:

One charged with keeping for the general an up-to-date account of all means in men, guns, etc., at his disposition, and with seeing to the various needs of the troops.

One charged with gathering information concerning the enemy.

A third charged with everything which concerns the training, movements and operations of troops.

A fourth to deal with all matters of supply, transport and communication.

There is also a courier section, charged with recording, all papers which enter or leave the staff, and with their transmission by motorcycle, automobile, runners, etc.

The part played in large staffs by a department is relegated in small staffs to a single officer provided with a number of secretaries.

Everything in Writing.

It is the general, then, who takes the decision, but it is the staff which presents to him, after careful examination and study, the facts of the situation, and it is the staff which attends to the carrying out of the general's orders. There are certain national laws to be followed by staff officers in this work, which are the result of painful experience. Always put everything in writing. Verbal orders given in haste should be confirmed as quickly as possible by written orders. Make it clear to each officer exactly what he is to do. Avoid all double employment which may give rise to hesitation or to doubt. Leave as much initiative to subordinates as possible. Handwriting should be large and clear; the important words should be underlined. Transmission should be rapid. It is often well to send first a very brief written order, followed later by the full order, thus giving the line officer time to take his initiative measures even while waiting to learn the details.

Where General Gets Facts.

Although different generals have different methods of procedure, that most commonly adopted is as follows:

The general, before taking a decision, will demand from his staff, in writing, a statement of the exact situation of his own and the enemy's forces. This statement will be based not only on documents, but on an examination by staff officers of the ground itself. After hearing the opinion of his chief of staff and of the head of the department of operations, the general will take his decision, for which he alone is responsible. He will then assemble his staff, and explain to the entire body his general plan, thus avoiding repetition, misapprehensions and the loss of time. Each officer knows what is expected of him. He is ready to do his part without further delay.

And what, finally, are the personal qualities which are to be expected of a good staff officer? In the first place, he must be able to understand not only his general but the troops. His own personality must be abdicated. He must put all his strength, both physical and moral, at the service of others. At all times a desire to learn should animate him; the least carelessness or ignorance on his part would be a crime which might cost the lives of a great many of his comrades.

He should be modest and discreet, speedy, hard-working, clear-headed, calm and methodical, keeping the same anonymity in the little circle of the staff that the private keeps in the ranks.

Must Efface Himself.

In his relations with his immediate superiors he should be deferential, frank, sincere and loyal. After having contributed all he can to the study of any question, after having expressed his personal opinion with perfect freedom, but with modesty and measure, and never except when it is asked for—then he must loyally accept the decision made, and work with all his heart to give it success, even though it be contrary to his personal judgment. He must endeavor at all times to be cheerful and confident, contributing thus to that mental relaxation so indispensable at certain times, which is only possible in an atmosphere of gaiety and faith.

In his relations with subordinate commanders he must be deferential and sincere, seeking to win their confidence by showing them respect and devotion. He will at no time and under no circumstances seek to put himself ahead of his general or behave in a way which might injure the latter's authority. When he feels that an order is being badly interpreted he should point out the mistake to the officer who is responsible, but he should never seek to correct it himself. His reports should be unflinchingly honest, confining themselves to what is important, and so justly couched that they might be read even by the person they concerned, frank and open, stating facts, not impressions, always affirming, never insinuating.

Bravery and Coolness.

During battle the staff officer should at all times be brave, without hesitation, but without boldness. Always keeping a cool head, and using it, if necessary, to re-establish order, and to carry out his general's will, of which he is in some sort the incarnation. He may be called upon to sacrifice his life. No soldier's death could be more glorious.

And in the obscure but essential work of his office he should work ceaselessly to grasp the mind and will of his general, uniting his own will with that of his comrades, and vigorously excluding all temptations to be envious, or to push himself forward. The officers of one staff are like the cells of a single brain, and the part which each one plays in the elaboration of the single idea may not be defined.

Above everything else, the staff officer must be immutably confident in the final victory. It is an old military saying that those who do not believe in the victory are not capable of organizing it. There is no more apparent truth.

French School for Officers.

I will close with a rapid summary of the method by which officers are at present being trained in the French army. Before the war, those who desired to become staff officers were required to pass a preliminary examination which required at least two years to prepare. They then had two years of special schooling, and

mon, will demand from his staff, in writing, a statement of the exact situation of his own and the enemy's forces. This statement will be based not only on documents, but on an examination by staff officers of the ground itself. After hearing the opinion of his chief of staff and of the head of the department of operations, the general will take his decision, for which he alone is responsible. He will then assemble his staff, and explain to the entire body his general plan, thus avoiding repetition, misapprehensions and the loss of time. Each officer knows what is expected of him. He is ready to do his part without further delay.

And what, finally, are the personal qualities which are to be expected of a good staff officer? In the first place, he must be able to understand not only his general but the troops. His own personality must be abdicated. He must put all his strength, both physical and moral, at the service of others. At all times a desire to learn should animate him; the least carelessness or ignorance on his part would be a crime which might cost the lives of a great many of his comrades.

He is ready to do his part without further delay.

two more years of experience in the various branches of the service, after which, on the test of another examination, it was decided whether or not they were fit for staff work. But obviously this training was too long for war time. A staff school has therefore been created to train suitable men as quickly as possible for the highest technical task of the staff officer. In this school the candidates are taught to know the various branches of the service thoroughly (infantry cavalry, engineering, artillery, aviation) and to understand and foresee the needs of these branches. They are taught the organization and methods of staff work. Finally, they are taught how to do the work necessary to the preparation of an operation, how the troops are used, the mechanism of giving orders, and the part which the staff must play in the course of the battle. A special appeal is made to the candidates to develop their own initiative, their intellectual curiosity, and their morale. They are advised to live together in a constant interchange of ideas and to strengthen the weaker absorbing moral strength from the stronger.

American Army Needs Them.

This schooling lasts a fixed period, at the end of which the candidates, divided into two classes according as they are to serve on the staff of a division or a brigade, are attached for a short time to branches of the service with which they happen to be unfamiliar, and for another brief term to some army or division staff. Only then are they ready to receive an appointment to a regular post.

Schools of this sort will have to be formed sooner or later by the American army. The best general in the world is helpless without a thoroughly competent staff.

**SURPLUS OF WHEAT
ALREADY SENT ABROAD**

Protests Against Wheatless and
Meatless Days Denounced by
Food Administration.

The following was issued by the United States food administration: Statements appearing in the Chicago press emanating from interested parties, protesting against wheatless and meatless days as unnecessary sacrifices by the American public, are either malicious or emanate from personal interest.

The results from meatless days have, for the first time, given us sufficient reserves of meat to allow us to only partially comply with the quantities requested by the allies for shipments. This should be a matter of satisfaction to the entire American people, and their devotion in this matter now enables us to at least partially fulfill our duties to the allies in this respect.

As to wheat, we have already exported the whole of the surplus of the 1917 harvest, over and above the normal demands of our own population. It is necessary, therefore, for the food administration to restrict the export of wheat, so as to retain in the United States sufficient supplies to carry our own people until the next harvest. Therefore all exports of wheat from now forward are limited entirely to volume of saving made by the American people in their consumption of wheat and wheat products. We are continuing wheat shipments as far as our situation allows but even without the conservation made we are still unable to load over 400,000 tons of foodstuffs annually required by the allies.

Statements of the character referred to given out for personal interest are in little accord with the spirit being shown by millions of homes in the United States in an endeavor to aid the food administration in its task.

MUST BE BURIED IN FRANCE

Bodies of U. S. Soldiers Who Die
Abroad Cannot Be Removed Now.

War department officials say it practically is impossible to remove bodies of American soldiers who die in France to this country until after the war. If relatives want to do so before hostilities end, they will have to assume that responsibility. Secretary of War Baker has ruled that the United States men who die on European battle fields shall be buried and the graves marked and the relatives notified of all disposition made of the bodies.

The first contingent of a registration service to look after the marking and burial of American soldiers has sailed. The burial will be in cemeteries designated by government officials. The bodies will be placed in serviceable caskets so that they may be preserved for an indefinite time.

DOG TRAVELS 400 MILES

Was Sold, but Made the Journey Back
to Old Master.

Making his way over 400 miles of territory and crossing two large rivers on the way, a black shepherd dog belonging to John Smith of Asheville, O., returned home recently after traveling from Tarboro, Ga. The dog was sold to E. A. P. MacCarthy of the Georgia town and was shipped to Tarboro by express.

He seemed to be doing well in the Georgia town, but escaped a few nights ago, and the next heard of him was when, footsore and weary, he scratched at the door of Smith's house on Spring street and wagged himself all over the place when Jack opened the door. The sale has been called off.

For Sale.

Your Next Tire—

The rugged, enduring, ground-gripping, anti-skid 'Chain' Tread

Next time you need a tire, buy a United States 'Chain' Tread.

You will get more real service out of it—at lower mileage cost than you have ever had out of any other make of woven fabric pneumatic.

While you may hope we are right, we know we are right. We know, because we make the 'Chain' Tread.

We know, because thousands upon thousands of motorists having once used the 'Chain' Tread, continue season after season to remain 'Chain' Tread users.

We know, because the tremendous sales increases show a continuously growing increase in new users.

Put one of these rugged, enduring, ground-gripping 'Chain' Tread Tires on your car—and make comparisons.

United States Tires Are Good Tires

'Nobby' 'Chain' 'Royal Cord' 'Usco' 'Plain'

United States Tubes and Accessories Have All the Starring Worth and Wear That Make United States Tires Supreme

Also Tires for Motor Trucks, Motor Cycles, Bicycles, and Aeroplanes

A Complete Stock of United States Tires Carried by EDGINS & BAKER, Burlington, Ky.

BOONE HIGH SCHOOL

Gave Two Interesting Entertainments Last Friday—One in and One at Night.

The local High School observed the Christmas season by giving two entertainments on Friday, December 21st. The first, which was held at the school house in the afternoon, consisted of song, stories and playlets by the pupils of the primary and intermediate grades and was attended by a great many of the parents and other people interested in the school. All present were unanimous in voicing their approval of the program which was very enjoyable and which showed to marked extent the beneficial results derived by the children from having the privilege of attending a school so efficiently supervised by principal and teachers as the Burlington school obviously is.

At 7:30 Friday night a Christmas Cantata, "The Shepherd's Story," was rendered in the auditorium of the Court House by the more advanced pupils of the school. The program was replete with excellent reading parts which, in telling the story of the risen Christ, was ably supported by the singing of the chorus. Several solo, duet and quartet numbers were interspersed thru the program relieving the continuity of chorus singing which made the affair all the more enjoyable. The evening's effort showed much preparation and the pupils are to be commended for the excellent rendition of a program which was evidently difficult in the extreme.

During a short intermission Rev. David Blyth made a four-minute talk on the Red Cross drive which he believed to be of this county and elsewhere. Rev. Blyth is chairman of the organization in Boone county and is well qualified to place the facts relative to same before the people in a capable manner. He emphasized the fact that the present Red Cross movement was one in which no one could afford to be a slacker making mention of the important fact that anyone who is not able to assist in a financial way will not be urged to do so but his services are requested in some way or other to further the worthy movement. He complimented the school and school management upon the capable program he had the pleasure of listening to remarking upon the wonderful change which has taken place in regard to the school conditions of his young days in Burlington as compared to existing ones. In closing, he assured the audience of the magnificent results thus far obtained by the Red Cross workers and expressed the opinion that Boone county would "go over the top."

Mr. Edison's Silent Speech.

Thomas A. Edison's films which show how deaf the inventor really is, wondered at the success with which he provided the now naval consulting board met in Washington last fall. As a matter of fact, says the New York Sun, Mr. Edison fooled every member of that distinguished body of men, including President Wilson and Secretary of the Navy Daniels; he heard little that was said but he guessed successfully because his assistant, Mr. Miller R. Hutchinson, kept him informed of everything by means of a telegraphing the finger-tapping method. Mr. Edison's knee under the table.

A few years ago Mr. Hutchinson fell a victim to the whooping cough and lost his voice temporarily. Mr. Edison suggested to Mr. Hutchinson that he learn the Morse Code. He did so, and the two men communicated with each other by tapping the dots and dashes with their fingers.

And so, when the inventor went to Washington to preside over the destinies of the new board, he took Mr. Hutchinson with him, and posted him at his right hand. Mr. Hutchinson tapped to Mr. Edison everything that was said, sometimes verbatim and sometimes boiled down into fewer words. He was able to send Morse messages to Mr. Edison at the rate of thirty words a minute, and the messages were delivered in a more or less deliberate fashion, he was able to keep up with almost every sentence of every address made.

Mr. Edison and his assistant also work the Morse code with their eyelids. With them a quick wink means a dot, and a long wink means a dash, and they talk to each other in this way when they wish to convey a message of a private nature which they are surrounded by other persons and are too far apart for the finger-tapping method. Youth's Companion.

Realizing Conditions

Farmers are beginning to realize that they may have considerable trouble next spring getting a stand of corn because of the year's crop being so badly hurt. While the ears are large and make a fine appearance in the bulk they are found to be loose-grained and sappy. The seed corn trouble can be overcome largely by selecting seed at once and testing it out. Do not wait until planting time to discover that your seed is defective. Test early.

Burning Midnight Oil

Representative W. P. Cropper is hard at work on some new laws and amendments to others which he hopes to be able to put through the legislature this winter. It will be Mr. Cropper's second term and because of his previous legislative experience he should be in a position to have considerable influence in the next House of Representatives.

Red Cross Notes.

The Bullittsville unit met last Wednesday, with Mrs. B. C. Grady. Though only six were present they report 28 folded gauze strips and ten three yard rolls. Their next meeting January 2, is with Mrs. Cleve Hankins.

Whatever the result of Boone county's "Christmas Drive," a great deal of the credit undoubtedly must be given the Recorder for so faithfully publishing all the material sent in.

Thirty pounds of sweater yarn came last Monday night, and all of it was taken by noon of the following day.

Very little was done at headquarters the latter part of last week, due at least partially to a lack of gauze. A box was packed Monday and Tuesday, which held 1080 four inch compresses, 420 nine inch compresses, 80 gauze strips, 2 stacks gauze squares, 200 sponges, 10 three yard rolls, 250 abdominal bandages, 55 triangular bandages, 10 pair bed socks, 33 surtars, 33 pair socks, 17 scarfs, 16 pair wristlets.

Rabbit Hash cleared \$30 at their dinner and supper Friday night.

Finished articles received last week:

Constance—5 sweaters, 6 muslin shirts, 12 outing shirts, Bullittsville—40 gauze strips, 20 four inch compresses, Burlington—1 sweater, 40 four inch compresses.

Last week's Union for Red Cross was Junior Red Cross.

WAY TO WIN WAR

Is to Hit German People on the Head With a Club, Says W. H. Taft.

Boston, Mass. — The U. S. not only is fighting the Kaiser and the Prussian military system but the German people, said former President Taft in addressing a gathering of manufacturers at the annual banquet of the Associated Industries of Massachusetts here. "And the only way we can win," he said, "is by hitting the German people on the head with a club."

"It is not true," said Mr. Taft, "that we are not fighting the German people. We are fighting the Kaiser and Prussian military system alone. We are fighting the German people, a people obsessed with megalomania, and the only way we can win is by hitting the German people with a club."

When the attempt to form a constitutional monarchy in Germany failed, Mr. Taft continued, the freedom loving Germans came to this country, and now are counted among our first citizens. Those who remain in Germany thru the Bismarckian rule—the success of this rule of blood and iron until, Mr. Taft said, they became obsessed with the idea that success in conquest had made them a chosen people of God and that there was a German God, represented by the Kaiser, which state could do no wrong.

Mr. Taft thought that to accomplish the defeat of the Germans the United States must send from 5,000,000 to 7,000,000 American soldiers to France. Two million would not be enough, he thought.

Looks Like Bad Management.

The News is not disposed to be critical of those who manage big affairs like the Red Cross, for instance, but we are of the opinion that some very poor judgment is being displayed by the press agents of the Red Cross Society in their indiscriminate use of the telegraph. During the week the Secretary of the Red Cross Society has received dozens of telegrams from Lake Division at Cleveland. The aggregate number of words would run into the thousands. These telegrams were duplicated to a dozen or more people in this country, ministers, business men, and others. The total amount paid for telegraph tolls in this country would no doubt amount to several hundred dollars. If this has only been the average the toll paid out in the whole country would mount very high indeed. These messages so far as we can learn have accomplished very little in the way of securing new members or subscriptions. In many instances they have been entirely ignored. The money thus spent has been to the great extent thrown away, it seems to us. Newspapers everywhere have donated their space liberally to the Red Cross. So far as this paper is concerned we have never charged a dollar for all the publicity we have given. Doubtless most other newspapers could truthfully say the same. We have never asked for a dollar for advertising, but have spent many dollars in paying for labor of set the matter up to say the least of the space consumed. If the Red Cross Society has money to burn in sending useless telegrams it could be better used in advertising campaigns. It looks to us like there is bad management somewhere, but even at the best there is no better thing we can do and that is to give, and give liberally whenever called on to do so.—Grant County News.

Wheat Short In France.

Paris, Dec. 20.—The food needs and resources of France for the coming nine months were dealt with before the Senate today in a statement by Victor Boret, the Minister of Provisions, in which he pointed out that there was a deficit of 33,000,000 hundred weight in wheat.

"The United States and England will only give us tonnage to supply this deficit," he said. "The United States will give us 1,000,000 hundred weight, or three days' consumption. Oats are not in better condition. The ration of animals must be reduced. Saccharine will replace in part the sugar ration next month and there will be more sugar for the candy makers or the cake makers."

"France's new bread ration still remains larger than that of many enemy, neutral and allied countries. The situation in Italy is so critical that I had on one occasion to supply wheat to the Italian Government and was glad to do it. I am considering new regulations for potatoes, regarding which I shall say nothing as I feel that speculators might profit."

JERUSALEM MOST FOUGHT FOR CITY IN THE WORLD

Seat of Christian Religion
Wrested From Moslem After
1,200 Years' Rule.

CROSS DISPLACES CRESCENT

Down Through the Ages the Holy City
Has Been Prey of Half the Races
of the World and Has Been
Destroyed and Rebuilt
Many Times.

The capital of the Jewish race, Jerusalem has been the prey of half the races of the world. It has passed successively into the hands of the Assyrians, Babylonians, Greeks, Romans, Persians, Arabs, Turks, the Crusaders, finally to fall before the descendants of that Richard the Lion Hearted who strove in vain for its possession more than seven hundred years ago.

The historic city has been destroyed and rebuilt times without number, only to finally fall for the second time into the hands of Christian Britain.

Great Moral Victory.

The gigantic British encircling strategy took in, on the south, the little town of Bethlehem, where Christ was born, 2,017 years ago. There seemed to be no doubt that the capture of Jerusalem is one of the most stupendous moral victories of the war.

It is a unique fact that British leaders and British armies now, as in the centuries past, are still the tenacious, successful foes of Mohammed's people.

In the twelfth century Richard Coeur de Lion, in penitence for fancied sins, decided to atone himself of mundane taints by engaging in an altruistic campaign for the deliverance of Jerusalem to Christian control. In a series of campaigns he fought the mighty Saladin through many sanguinary battles to a truce. He found it impossible to maintain a maximum fighting strength through the extreme line of communications. Disease and misfortune reduced his armies to nomadic bands, which were, some of them, taken as slaves by the Muslims.

Others roamed the continent for years engaged in mercenary wars wherever they found chieftains willing to employ them.

Richard himself became a fugitive, was arrested by enemies while struggling his way through Austria, and only released when friends in Britain raised enormous ransoms.

Interesting Campaign.

It is an interesting campaign that has just been successful in restoring Jerusalem. A glance at the geographical nature of the land over which the British advanced from Gaza to Jaffa to Jerusalem is intensely interesting.

Palestine, an almost regular rectangle, may be divided into four equal parts lengthwise for this purpose. The strip along the Mediterranean sea is the country, a continuous plain. The next strip to the east is mountainous. It resembles in general character the Catskill country of New York state, except that the hills and mountains are not so heavily wooded.

The third strip from the coast is a great depression through which the River Jordan flows.

The fourth is the plateau land which rises beyond the Jordan.

By taking the coastal route the English were able to advance with little trouble from several objectives some distance above Antioch the invading army apparently forked one

branch continuing up the coast to Jaffa and the other turning northwestward toward Jerusalem, which lies in the hilly country.

Story of Jerusalem.

The Tell el-Amarna tablets reveal there was an important town on the site of Jerusalem in the fifteenth century B. C., called Uru-salim. The earliest mention of the place in Scripture is in Gen. 14:8, where Melchisedek is called "King of Salem." It next appears as the Jebus, the stronghold of the Jebusites, which long-held out against the Israelite invaders.

With King David a new chapter opens, for it was he who made the final conquest of the fortress. Joining the lower city was the citadel of Mount Zion. The first temple there was built by Solomon, and the story of its construction and the articles used is outlined in the Scripture story give some idea of its magnificence.

After the revolt of Jeroboam, the city was successively attacked by Shalshak, king of Egypt, 855 B. C.; the Philistines and Arabs, 850 B. C.; Jeho-

shaphat, 786 B. C., all of which caused more or less damage.

In 701 B. C. Sennacherib laid siege to Jerusalem, but was forced to withdraw. In 597 and more effectively in 586 Babylon took possession of the city, sacked it and deported the "elite" of its inhabitants to Babylon.

Jerusalem was then reduced to the position of an insignificant town.

A new chapter begins with the return of the exiles under Zerubbabel and Joshua 539 B. C. A new temple was begun in 535 and after a long delay caused by the machinations of the

branch continuing up the coast to Jaffa and the other turning northwestward toward Jerusalem, which lies in the hilly country.

In 134 A. D. the rebellion of Bar Cochba was the signal for another devastation, but in 136 Hadrian rebuilt the city, called it Aelia Capitolina, and generally paganized it. When the Roman empire eventually became Christian, the Jews acquired the right to visit Jerusalem annually to lament over the ruins of their loved city.

In 338 the Church of the Holy Sepulcher was founded. In 633 Julian attempted to rebuild the temple, but was prevented.

The next important epoch was about 460, when the Empress Eudocia visited Palestine and expended large sums on the improvement of the city. A church was built above the pool of Siloam, and after having completely disappeared for many centuries it was recovered by F. J. Bliss when making his exploration of Jerusalem.

The empress also erected a large church in honor of St. Stephen north of the Damascus gate. The site of this church was discovered in 1874 and it has since been rebuilt.

In 527 Justinian erected important buildings, of which remain incorporated with the mosque, but these and the other Christian buildings were ruined in about 614 by the destroying Caliph Chosroes II.

Justinian the Builder.

A short breathing space was allowed the Christians after this storm, and then the young strength of Islam swept over them. In 637 Omar conquered Jerusalem after four months' siege.

Under the comparatively easy rule of the Ommyad caliphs Christians did not suffer severely. Though excluded from the temple area, they were free to use portions of the Holy Sepulcher.

This, however, could not last under the fanatical Fatimite caliphs, who succeeded them, and the suffering of the Christians then led to that extraordinary series of invasions commonly called the Crusades. The Crusaders were a semireligious and a semi-military movement. They represented the passions and ideas of Europe in the twelfth and thirteenth centuries—in chivalry, its hatred of Mohammedanism and its desire to possess the spots hallowed by the sufferings of our Lord. Their long continuance shows the intensity of the sentiments which possessed them. During this period Palestine was harried for about a hundred years and the undying tradition of which no doubt retarded the final triumph of Christianity over the Arab. In 1247 Jerusalem became subject to Egypt for 270 years until the Ottoman sultan, Selim I, conquered Syria in 1517, and Turkish possession has continued to the present day and under rule practically without a history.

Singularly Situated.

In 1187 Jerusalem fell to Saladin, who rebuilt its walls. From 1229 to 1241 the German Christians held Jerusalem; but in 1244 a fearful massacre swallowed up the last relics of Christian occupation. In 1317 it was conquered by the Sultan Selim I, and since then it has been a Turkish city. Selim's successor, Suleiman the Magnificent, restored the fortifications, which since that time have been little altered.

The situation of Jerusalem is in several respects unique among the cities of Palestine. Its elevation is remarkable, occasioned not from its being on the summit of one of the numerous hills of Judea, like most of the towns and villages, but because it is the edge of one of the highest tablelands of the country.

Although to a certain extent one of four hills on which it is built—Zion, Moriah, Acra and Bezetha—may still be distinguished, their actual boundaries cannot be traced. The contour of these hills has been changed by the accumulation of debris of past centuries. Jerusalem is connected with its

Samarians, was completed in 515. Ezra, with another band of captives returned there in 458 and established the law, while Nehemiah rebuilt the wall, and again Jerusalem became the shrine of Israel.

Lapses in History.

We know practically nothing of its history for more than a century, until in 332 Alexander the Great conquered Syria. The gates of Jerusalem were opened to him, and he left the Jews in peaceful occupation.

The revolt of the Maccabees brought, however, a fresh succession of troubles upon it. It was besieged by the Greeks in 139, 134, 65 and 63 B. C., and the temple was pillaged in 53 B. C. The Roman domination under Herod brought an interval of peace. Herod built a palace, restored the citadel Antonia, and in 19 B. C. began the erection of the third temple.

Jerusalem was very closely identified with the earthly life of Jesus Christ. It was to the great Jewish festival here he was taken by his parents. Here they lost him and on returning found him conversing with the wise men.

It was to the city he looked when he uttered his plaintive cry, "O Jerusalem, thou that killest the prophets and stonest them sent unto thee," finishing by predicting its doom, which occurred just over seventy years later.

It was to Jerusalem he went for the last week of his life, "The Passion week," as we term it, and on entering the city on the last day of his life he was crowned with thorns and cast down branches of palm trees, hailing him as king.

Walk to Golgotha.

His mock trial in Pilate's hall and walk to Golgotha outside the city, where on the cross the world's Redeemer was crucified, add most profound interest to Jerusalem. It was within sight of the city, with the disciples around him, that Christ ascended to heaven, leaving for his followers the command to go out into all the world and preach the gospel to every creature, and to begin the story of the evangel in Jerusalem.

Here a few days later Peter preached at the threshold of the city, and at Jerusalem for the Passover. This marvelous sermon created such a powerful impression that 3,000 responded to his summons.

In the early days of the Christian era the Jews were in constant revolt against the Roman power. At length Titus, son of Vespasian, was sent to take and destroy the city. In spite of a heroic Jewish defense and after a siege of 143 days it fell to Titus in 70 A. D.

The greater part of the populace was put to the sword and the city razed to the ground. So that, according to Christ's prophecy, not one stone remained upon another. The numbers who perished in this siege, according to Josephus, amounted to above a million souls, and the captives to almost a hundred thousand.

Gen. E. M. H. Allenby, commander of the British forces that captured Jerusalem.

port, Jaffa, by a carriage road 41 miles, which was completed in 1892 and worked by a French company.

Prior to 1853, when the modern building period commenced, Jerusalem lay wholly within its sixteenth-century walls, and even as late as 1875 there were few private residences beyond their limits. At present Jerusalem without the walls covers a larger area than that within.

As 90,000 Moslems gave the population 18,000 Jews 40,000. During the pilgrimage season it is increased by about 15,000 travelers.

In 134 A. D. the rebellion of Bar Cochba was the signal for another devastation, but in 136 Hadrian rebuilt the city, called it Aelia Capitolina, and generally paganized it. When the Roman empire eventually became Christian, the Jews acquired the right to visit Jerusalem annually to lament over the ruins of their loved city.

In 338 the Church of the Holy Sepulcher was founded. In 633 Julian attempted to rebuild the temple, but was prevented.

The next important epoch was about 460, when the Empress Eudocia visited Palestine and expended large sums on the improvement of the city.

A church was built above the pool of Siloam, and after having completely disappeared for many centuries it was recovered by F. J. Bliss when making his exploration of Jerusalem.

The empress also erected a large church in honor of St. Stephen north of the Damascus gate. The site of this church was discovered in 1874 and it has since been rebuilt.

In 527 Justinian erected important buildings, of which remain incorporated with the mosque, but these and the other Christian buildings were ruined in about 614 by the destroying Caliph Chosroes II.

Justinian the Builder.

A short breathing space was allowed the Christians after this storm, and then the young strength of Islam swept over them. In 637 Omar conquered Jerusalem after four months' siege.

Under the comparatively easy rule of the Ommyad caliphs Christians did not suffer severely. Though excluded from the temple area, they were free to use portions of the Holy Sepulcher.

This, however, could not last under the fanatical Fatimite caliphs, who succeeded them, and the suffering of the Christians then led to that extraordinary series of invasions commonly called the Crusades. The Crusaders were a semireligious and a semi-military movement. They represented the passions and ideas of Europe in the twelfth and thirteenth centuries—in chivalry, its hatred of Mohammedanism and its desire to possess the spots hallowed by the sufferings of our Lord. Their long continuance shows the intensity of the sentiments which possessed them. During this period Palestine was harried for about a hundred years and the undying tradition of which no doubt retarded the final triumph of Christianity over the Arab. In 1247 Jerusalem became subject to Egypt for 270 years until the Ottoman sultan, Selim I, conquered Syria in 1517, and Turkish possession has continued to the present day and under rule practically without a history.

Some Don't Understand

Some people who refused to contribute to the Red Cross would have been surprised to learn that the Red Cross is not a religious organization, while there is occasionally one who thinks that every proposition to take a dollar out of his sign is in some way a fraud—that all men are rascals when it comes to handling money.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

FLORENCE.

A Merry Christmas and a happy New Year for the Recorder. Mrs. Charles Dell Brown and Nellie Carpenter spent Friday in the city.

Nannie Corbin and her brother, Charles, spent Wednesday in the city.

Mrs. Allie Lalle spent Friday with her brother, Edward Skirvin, in the city.

Mrs. Kate Rudick will spend Christmas with her daughter, Mrs. Elsie Flagg, of Cincinnati.

The Christmas exercises at the school were fine, and a credit to the principal, A. M. Yealey.

Don't forget the lunch and dance given by the young ladies of St. Paul church, Dec. 29th.

R. H. Tanner and family and J. S. Surface and wife spent Thursday with Mr. and Mrs. Edgar Ayler.

Remember the oyster supper given by the ladies of the Lutheran church, Dec. 27th. Everyone invited.

Sarah E. Glacken, who attends school here, left Friday afternoon for her home at Richwood, to spend the holidays.

An entertainment, "The Burlesque Degree," will be given at Odd-Fellows Hall, Florence, Tuesday night, January 1st, for the benefit of the Red Cross, beginning at 8 p. m. Admission, 15 and 25 cents.

GUNPOWDER.

Wm. Tallaferra, of Erlanger, made this writer a brief call last Friday.

Clyde Clements answered the call to the colors and left for Louisville, Thursday night.

Edward Busby, visited his sister, Mrs. Etta Tanner, in Covington last Thursday night.

Wishing the Recorder, its staff of correspondents and readers a merry Xmas and a happy New Year.

Enoch Rouse's illness has become so serious that a surgical operation will have to be performed.

The work of butchering hogs in this neighborhood is about completed, and everybody has a good supply of meat.

Mrs. Mottie Clements, of Grange Hall neighborhood, was the guest of her sister, Mrs. Grace Clow, last Thursday night.

Hopeful church Council will sell at public auction a lot of lumber, Monday, January 1, 1918 at 1 o'clock p. m., at the church.

Some Don't Understand

Some people who refused to contribute to the Red Cross would have been surprised to learn that the Red Cross is not a religious organization, while there is occasionally one who thinks that every proposition to take a dollar out of his sign is in some way a fraud—that all men are rascals when it comes to handling money.

HEBRON.

Miss Leona Rogers is spending the holidays with her parents in Ohio.

Miss Mary Gordon, of Lexington, and father, Prof. J. C. Gordon, of Burlington, were guests at Mr. Gordon's, Thursday night and Friday.

A lecture "Winning the War, with Stereoscopic views," will be given at Odd-Fellows Hall, here, New Year's night, by the Hebron High School.

A Christmas tree and entertainment given by the pupils of Misses Jessie Gordon and Sallie Castleman, last Friday afternoon, was enjoyed by all present, and the teachers deserve credit for the training given the pupils. Misses Mary Conner, Mary Eggleston and Chester Goodridge each spoke on the Red Cross work, which was also enjoyed.

UNION.

W. W. Conner is sick. Mrs. Ella Tanner will move to Middletown, Ohio, in a few days.

Miss Ruth Lloyd will spend the Christmas holidays with relatives here.

J. T. Bristow went to the city last Wednesday to do his Xmas shopping.

Martha Emily Bristow, who has been threatened with pneumonia is improving.

The ladies of Union Red Cross will meet as usual, Wednesday, Dec. 26th to work.

Abe Rice, wife and daughter came out to C. P. Baker's last Friday to spend Christmas week.

FLICKERTOWN.

Earl Sullivan is quite sick. J. W. White will finish the butchering act here this week.

E. A. Grant visited his son, Albie, at Camp Taylor, last week.

Miss Sophia Weiskie is visiting her uncle, Chas. Beeson and wife. Ed. Batts received turkeys here one day last week for Chas. Clow.

Alcie White, Mabel Gaines and Walter Gaines had measles last week.

Wish the RECORDER and its force a Merry Christmas and a Happy New Year.

Earl Walton and Harry Drake, were pleasant callers here one afternoon last week.

Not much tobacco has been delivered to the buyers yet from this neighborhood.

Willie White, Arba Finn, Bernard Sobree, Boone Ryle and Ed. Batts were shopping in the city, Saturday.

NOTICE—All those owing the old Water Telephone and Wood per line will be deprived of the use of the switchboard if not paid by Jan. 10th, 1918.

Hands Up

Everyone who is certain he has caught the first of May will hold up his hand. Not a hand went up.

PT. PLEASANT.

John Baker is sick of measles at Camp Taylor.

No services at Point Pleasant last Sunday night as the lighting plant was frozen.

May the New Year bring peace, happiness and prosperity to the Recorder, its many readers and correspondents, is my wish.

Howard Tanner bought a Ford touring car last Saturday. He says he would rather drive his traction engine than a Ford.

The coldest point we heard of during the recent blizzard was W. L. Rouse's on the Limburg creek, 38 degrees below zero.

J. S. Tanner and wife entertained the following at dinner last Sunday: Rev. Simmons, T. C. Bonnar and family and Howard Tanner and family.

Ever Family Should Have One

The Red Cross is displayed in about every home in Burlington, bachelor quarters being no exception. The Red Cross is the badge that signifies those in whose windows it appears think more of their dollar and that they are willing to contribute to the comfort of those who go to the front in a strange land, risking everything for their country and dear ones who they leave behind.

U. S. Mail Truck in Trouble

The mail truck had trouble at the Limburg ford last Saturday morning. There were fifteen passengers on board, and the men had to get out and push the vehicle until it got back on the pike. Kelly's truck had trouble at the same point that day.

Questionnaires Up to 306 Mailed

Questionnaires up to 306 were mailed Wednesday of this week by the local draft board. Those who receive them lose no time in having them filled out as required by the Government.

Sold Her Farm

Mrs. William Popp, who resides on the headwater of Middle creek, sold her farm to Lewis C. Beeson. The consideration, it is understood, is \$5,500, and the number of acres 109.

Made Bad Records

November and December, 1917, have made weather records for reference by the "oldest inhabitant" at some time along in the future.

Local Colored People Interested

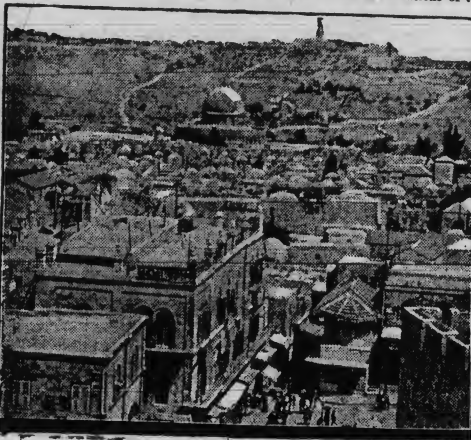

The local colored people are taking considerable interest in the Red Cross and have contributed several dollars to the fund.

Went Over the Top

October and December have furnished their quota of bad weather—in fact they went over the top.

With millions of bushels of potatoes and apples and millions of dozens of eggs in the cold storage warehouses of the country, and prices on these products as high as they are it will be a little difficult to convince the buying public that the man who invented this system was a public benefactor.

Miss Estelle Huey, who teaches in the Dry Ridge, Tenn. community school, is spending the holidays with her parents, Mr. and Mrs. R. H. Huey, of Commissary.

Heart of Modern

RUIN IN WAKE OF HUN IN FRANCE

Nothing But Desolation Where
Prosperous Villages Smiled.

FLATTEN OUT EVEN SCRAPS

One Can Motor for Hours in Region
Now Known as British Front and
See Nothing But Ruins of What
Used to Be Human Habitations—
People Hide in Cellars Least Boche
Sheets Find Them Out.

By FREDERIC WILLIAM WILE
of the Vigilantes.

"Somewhere in France"—I never
imagined in the wildest flights of
fancy about war that to gain an objective
under modern battle conditions an
army has not to lay waste a position
or a village but practically a country
side. You can motor nowadays for
hours in the region generally known
as the British front, sweep the land-
scape for miles in every direction and
see nothing but ruins of what used
to be human habitations. Your guides
point to a scattered dump of brick,
mortar, twisted timbers, indiscrimi-
nate rubbish of all sorts, lying either
in the roadway along which you are
spinning. Here and there at ir-
regular intervals the bare, charred re-
mains of what once were trees stick
up from amid the debris and the
chaos. There is not a suggestion of a
standing wall anywhere, nor even of a
door or window-frame, and, of course,
no semblance of a roof. There are
only cellars into which houses, shops,
churches, stores, schools—everything
—have been thrown into a crazy hold-
all of a town-wide grave.

"We are now going through"—
remarks our military chaplaine, in-
conically, and we recognize the
of a place prominent in the fighting
during some important "push" weeks
as months ago—now wiped from the
face of the earth as effectually as if
honest French peasants and villagers
had never striven through the gener-
tions to make a comfortable abode for
themselves and theirs. One hopes that
the ministering angels permitted them
to evacuate the town before their
homes were splintered and crushed by
15-inch death-dealers. One wonders
how many human remains may still lie
buried beneath the wreckage of beams
and sandstone. One speculates
whether men, women and children who
contrived to escape the shells will
ever again be able to start life with
their dwellings, places of business and
cultivated fields mangled and des-
troyed. One is persuaded that stupen-
dous as is the work of destruction
wrought by twentieth century warfare,
the task of reconstruction will be
enormously more gigantic still. Towns
that took years to make have been
shot to pieces in an hour.

Last Word in Perforation.

I have heard of towns in our own
wild and woolly West that have been
"shot-up." But — is surely the
last word in complete and scientific
perforation. In July, 1914, it was a
happy, thriving community of 35,000
or 40,000 inhabitants, a stately town,
with a wonderful Grand place and a
picturesque Petit place, a noble Gothic
cathedral and a splendid town hall.
Round the Grand place ran a quad-
rangle of commodious houses of sur-
passing architectural beauty. For the
rest, the town was typically French,
by which I mean a complex of neat
lancers and dwelling houses, churches
and factories, schools and estaminets
(cafes). Today there is not a solitary
building of any kind in the whole town
that is not entirely or partially wrecked.
There is not a single thing of
wood, brick or stone that is intact.
Not more than 1,500 or 2,000 people
live there now, and they must hide in
cellars most of the time, lest Boche
shells search them out. Death lurks
in every street, even though the British
have held it for more than two
years and have extended their lines
beyond it considerably during the past
few months. Though they have long
since turned the town into scraps of
its former self, the Germans seem filled
with an insatiable lust to flatten out
even the scraps. You walk through
the Grand place, hugging close to the
walls by order of your army guide,
in perpetual danger that a solvent from
above will land at your feet and send
fragments of you flying into the
eternal ether. But you are only
living the life that the British garrison
and indomitable little civilian rear-
guard of 1,500 or 2,000 people—mostly
old men and women too fragile to seek
a safer abode further behind the lines
—are living day in and day out.

Museum of German Savagery.

This thought occurred to me while
surveying the tumbled-down cathedral
and mangled town hall and the
hamlets lying all around them at every
turning: Why not keep it just as it is
today, a pile of glorious ruins, as a
world museum of German savagery?
Why not leave it, stricken, battered
and mangled in its every structural
limb, just as we saw it this day three
months ago, for the admiration, horror
and instruction of a universe which
has been at arms for the overthrow
of the Kaiser? There will be vast
amounts of documentary evidence of
the most convincing kind to educate
and make parents for the noncombatant
populations of Belgium, France and Po-
land.

struction as threatened to loose the
tear-ducts of five prosaic American
observers today?

I was born and raised in an Indian
town very much like dozens of French
towns which have been crushed be-
neath the merciless heel of the German
army. There are Illinois and Iowa and
Michigan and Wisconsin towns just
like them, too. I thought of those
towns this afternoon. I said to my-
self that if Essen's 17-inch murder-
guns could ever be planted within
range of our own smiling Western
communities, the Kaiser and his Ger-
mans would splinter them as gladly,
as ruthlessly, as completely, as they
have demolished this beautiful town.
Persian's men are here to help save
France. But with every blow they
strike to that noble end they are strik-
ing to save our own Arras, Ba-
pannes and Perennes from the fate
which has overtaken France's La-
portes, Rockfords, Kenosha, Daven-
ports and Battle Creeks.

STARTED TOTS CARED FOR BY RED CROSS

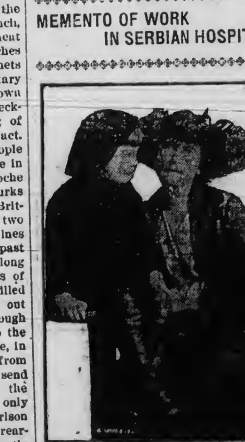

Story of Tragedy and Pathos in
Struggle of Child Life in the
War Arena.

A cablegram received at the head-
quarters of the American Red Cross in
Washington brought another human in-
cident of tragedy and pathos in the
child life of the French and Bel-
gian war areas.
"Six hundred and fifty underfed chil-
dren, travel-worn after three days in a
closed train coming from Belgian pro-
vinces," says the cablegram, "crossed
the frontier last night, and reached
Evian at dawn. The morning blast of
French trumpets met the children
who, some too young to know their age,
had traveled motherless and unac-
comppanied. They poured into the street
crying 'Vive la France' and 'Vive la
Belgique,' shaking hands with every
bystander."
"Trumpeters, like six Pied Piper of
Hamelin, led the dancing, shouting
throng to the casino—all except a few
sick children who were carried in
American Red Cross ambulances. At
the casino all received food; bags
were distributed and songs were sung.
Welcome words were spoken by the
mayor. Even the small children knew
the words of 'Brabanconne' and the
'Marseillaise,' but some of them were
so tired that they slept right through
the music."

"Next came baths, examination by
an American Red Cross doctor; and
then lunch and sleep. Tomorrow these
children start for Longdander, where
the American Red Cross will house
thousands of them—some orphans, others
prepubertal or needing better
nourishment than was possible under
the German rule from which they had
come."

"One little girl in the throng disem-
barking at Evian clutched four franc
pieces in a pudgy fist. 'What are you
going to do with them?' she was asked.
'Buy paper to write to mamma,' was
the reply."

MEMENTO OF WORK IN SERBIAN HOSPITAL

Miss Elizabeth Shelley of Washing-
ton has a memento of many months
work conducting with Mrs. Starke
Groulitch a children's hospital in a lit-
tle Serbian town in the early stage of
the war. His name is Bogaljub, which
is Slavic for God's love, and his chief
ambition is to be a Boy Scout and an
American citizen. Bogaljub is four
years old, one of the few Serbian or-
phans allowed to depart from Serbia
after the Austrian occupation.

Clothing is Needed.

The Red Cross society is informed
that great quantities of clothing will
be needed by the civilian population of
war-stricken countries of Europe.
Women who are not able because of
some defect or physical disability to
take up their own work, are urged to
make garments for the noncombatant
populations of Belgium, France and Po-
land.

CLEAN HEALTHY WHEAT SEED ESSENTIAL

SPLENDID CROP OF WHEAT IN COLORADO.

(From the United States Department of
Agriculture.)

Sound, clean, healthy seed is the
first requisite for the largely increased
wheat crop which the United States
Department of Agriculture hopes to see
harvested next year. Whatever the
source of supply, farmers will find it
to their advantage, says the depart-
ment, to see that only good seed is
planted. What has been said is
equally true of seed for the rice crop
which the department hopes to see
much larger than usual next year.

If a farmer has seed from his own
crop which is satisfactory so far as
variety and general condition are con-
cerned, he should lose no time in get-
ting it into shape for storage until
planting time. The fanning mill is the
farmer's best friend should have such
a mill, and if he has not and is unable
to obtain one, should borrow or rent
his neighbor's mill, or several farmers
can join in buying one. A fanning mill
removes weed seeds, smut and shriveled
grain and leaves only plump kernels,
practically every one of which
may be depended upon to produce a
thrifty plant. After it is cleaned, how-
ever, the seed should be treated in order
that the smut may be prevented.

Scab is more likely to be prevented by
seed treatment, but the use of the fan-
ning mill will assist materially in im-
proving the crop grown from seed
known to have contained scabby kernels.
Buy Seed From Neighbor.

If the farmer is dependent on out-
side sources for his seed, he should buy
from his neighbor if possible, so that

DISPOSITION OF DEAD HOGS

Mighty Poor Practice to Bury Cholera
Victims or Permit Them
Lie Around in Open.

Only too often, when an outbreak
of hog cholera is investigated it is
found that last fall or winter, a pre-
cious amount of dead hogs, buried
themselves about six inches deep and
hog dogs dug them up. Other cases are
found to be due to some dog which
has been feasting on dead, unburned
hog carcasses left out in the open by
some person a mile or more away.
The dog brings home a bone, a piece
of skin or a chunk of meat, and
leaves it in the hog lot. The pigs
promptly consume the morsel, hog
cholera germs and all. The only best
way of combating this method of
spreading disease is to burn every
dead hog completely. When reduced to
ashes, there is left no ghost to walk.

ADVANTAGES OF FALL COLTS

Youngster Can Be Weaned in Spring
When Grass Is Beginning to
Come—Pasture Helps.

A very large proportion of all colts
are foaled in the spring. However,
some who have raised a fall colt or
two each year have found the advan-
tages are not all in favor of the practice
of exclusive spring colt raising.
A colt foaled in September or early
October will get a nice start before
the pasture dries up and winter ap-
proaches. Then the mare and her
foal should receive a piece of land and
nourishing roughage during the winter.
Colts can be weaned in the spring when
the grass is beginning to come, and
the pasture will help wonderfully to
keep it in condition and to keep it
going.

KILL INSECTS IN GRAIN BIN

Carbon Bisulphide is Recommended
for Destruction of Insects in
Stored Grain.

Carbon bisulphide used at the rate
of five to eight pounds to 1,000 cubic
feet of space is recommended for the
destruction of insects in stored grain.
The grain bins should be airtight and
the temperature above 70 degrees
Fahrenheit. The carbon bisulphide may
also be used with liquid waste satur-
ated with liquid may be thrust into
the grain. The carbon bisulphide may
also be sprayed over the grain with a
pump through a small opening in the
side of the bin. The gas kills all the
weevils in 24 hours.

he may be more likely to get seed well
adapted to his conditions. It is advis-
able to buy as soon after harvest as
possible, as at this time prices are
likely to be lowest. If the farmer de-
sires, his neighbors may dispose of all
their surplus grain and he may be
forced to plant seed grown under con-
ditions radically different from his
own. If the farmer patronizes a seed-
man he should insist on getting seed
grown as near his section as possible.
If seed is affected by diseases, care-
ful inspection will usually disclose the
fact. The presence of stinking smut
in wheat is indicated by the odor and
the presence of scab by the appear-
ance of the kernels. Purchased seed
should, of course, be cleaned and treat-
ed for the destruction of the spores of
disease-producing fungi, if the exami-
nation shows this to be necessary.

Selecting Varieties.
In choosing varieties of wheat, the
farmer should be guided by the ex-
periences of his neighbors and the ad-
vice of his state experiment station.
This is true also of rice, but there are
available fewer varieties of rice than of
wheat. The stations can furnish com-
parative statistics on the yields and
behavior of a number of varieties of
the two cereals.

After the grain farmer has procured
a supply of satisfactory seed he should
store it carefully so that it will keep
in good condition and will be safe from
the depredations of rats, mice and in-
sects. Bins which are supposedly rat-
proof are available on practically all
farms and it will pay farmers to see
that they are kept in good condition
to keep out the rodents.

PLOWING TO CONTROL PESTS

Remedies for Effective Check Must Be
Applied During Fall and
Winter Seasons.

After the corn-root-rot, rootworm,
grubworm, and wireworm have at-
tacked the cornfield, it will be too late
for effective control measures. Rem-
edies for these pests must be applied
during fall and winter. These insects
feed below ground and are most effec-
tively controlled by fall or winter
plowing, clean culture and crop rota-
tion.

The root-rot winter as the eggs in
the nests of the small cornfield ant
By winter plowing these ant nests are
broken up and the ants, as well as the
house eggs, are destroyed. The eggs
of the Northern rootworm are de-
posited by the beetle during fall in
cornfields and since the grub on hatch-
ing on the roots will feed only on the
rotation is entirely effective. Some of
the grubworms and wireworms require
two or three years to mature. They
winter in the soil where winter plow-
ing will destroy many. They breed
largely in sod. Therefore, if a field of
sod is to be used for corn in the spring,
plow it in late fall, if possible. Should
dry weather permit before freezing
weather is over, winter plowing will
eliminate a great many of the insects
which ordinarily attack corn in the
spring.

FATTENING FOOD FOR DUCKS

Cornmeal, Wheat Bran and Beef Scraps
Mixed With Milk or Water is
Recommended as Good.

A good fattening food for ducks is
three parts cornmeal, one part wheat
bran and one part high-grade beef
scraps mixed crumbly with milk or wa-
ter and fed at morning and noon. The
evening food should consist of crack-
ed corn. No more should be fed at
one meal than they will eat up
promptly, and then the troughs should
be removed.

TEACH COLT TO LIKE GRAIN

This Should Be Done Before Young
Animal is Weaned—Allow Lib-
eral Ration of Alfalfa.

The colt should be taught to eat
grain before it is weaned, and after
being weaned should be allowed a lib-
eral ration of alfalfa or clover hay
with other available roughage, such as
corn fodder, hays, butts, cane hay and
straw.

The B. B. Hume Automobile Co., Agents
23-25-27 E. Fifth St., Covington, Ky.
Agents for the following Automobiles and Truck:
CHEVROLET, one man top, tire rack, demountable rim,
a swell car. No hill it will not climb, have sold 102 and
have contracted for 125 more. There is not a dissatisfied
customer.

**COULD HARDLY
STAND ALONE**
Terrible Suffering From Headache,
Sickdache, Backache, and Weak-
ness, Relieved by Cardui.
Says This Texas Lady.

Gonzales, Tex.—Mrs. Minnie Phil-
pot, of this place, writes: "Five years
ago I was taken with a pain in my
left side. It was right under my
left rib. It would commence with an
aching and extend up into my left
shoulder and on down into my back.
By that time the pain would be so
severe I would have to take to bed,
and suffered usually about three days.
... I suffered this way for three years,
and got to be a mere skeleton and was
so weak I could hardly stand alone.
I was not able to go anywhere and had
to let my house work go. ... I suffered
awful with a pain in my back and I
had the headache all the time. I just
was unable to do a thing. My life
was a misery, my stomach got in an
awful condition, caused from taking
so much medicine. I suffered so much
pain. I had just about given up all
hopes of our getting anything to help me.
One day a Birthday Almanac was
thrown in my yard. After reading
its testimonials I decided to try Car-
dium, and am so thankful that I did,
for I began to improve when on the
second bottle. ... I am now a well
woman and feeling fine and the cure
has been permanent for it has been
two years since my awful bad health.
I will always praise and recommend
Cardui. Try Cardui today."
